CONSOLIDATED
Digest of Decisions

Under the Interstate Commerce Act.
(1887 to 1924)

IN TWO VOLUMES

VOLUME I

By
HERBERT C. LUST
Of the
Chicago Bar

Author: Digest, Supplemental and Quarterly Digests of Decisions under the Interstate Commerce Act; the Workmen's Compensation Law of Illinois, Annotated; The Law of Loss and Damage Claims, Etc.

To the Interstate Commerce Commission this work is dedicated. The extraordinary quality of its work, the unquestioned integrity of its purpose, the self sacrifice of each commissioner in being a member of the hardest working tribunal on earth, must always be an inspiration to everyone in the traffic world.

PREFACE

In this publication there is classified every decision of the Interstate Commerce Commission from Volume One through 85 I. C. C. The period covered by this Digest is from 1887 to 1924.

It has always been the desire of the author to prepare a digest of the decisions of the Interstate Commerce Commission from its inception.

Mr. E. B. Peirce, commerce counsel of the Rock Island lines, prepared a digest at one time that covered the period from 1887 to 1908. That work was of undoubted excellence, but Mr. Peirce did not continue its publication. This was in a sense unfortunate, because after the passage of the Hepburn Act in 1906 a tremendous impetus was given to the work of the Commission, so that shortly thereafter it was deciding as many principles in one year as it had done in any previous five. The need of traffic men for a reference work to this immense volume of traffic law was so pronounced, that in 1913 the author published a digest of the recent decisions, which was really a reprint of material he had prepared for use in his own practice, and that publication has been kept down to date. Unfortunately the distribution of the Peirce Digest was much more restricted than that of the Lust Digests, and owing to Mr. Peirce's untimely demise a short time after he published his work, no copies were available other than the first printing. The subscribers to the Lust Digest, therefore, had to remain in ignorance of the body of traffic law that had been decided prior to 1908.

As shippers, and one might also say carriers, became more familiar with the additional powers granted the Commission by the Hepburn Act, and its numerous supplements, appeals to the Commission became very much more frequent. The work, therefore, of keeping the traffic interests advised of the current decisions of the Commission has become increasingly arduous. The Lust Digests to date comprise eight volumes of over ten thousand pages and containing something like seventy thousand principles governing traffic.

Traffic men as a usual proposition are extremely busy; they hold responsible positions with a tremendous amount of detail to be looked after, and proper attention paid to detail takes time. It has been the idea of the author, therefore, to save time. Perhaps some day, proper

recognition will be given the new profession of traffic manager, and thus encourage these men to study and do research concerning the matters connected with their profession, as do lawyers and doctors. Unfortunately at the present time this does not seem to be the general rule. Traffic men either through necessity or otherwise have largely gotten into the habit of deciding very important problems in a very brief period, and do little intensive research. Time is what they seem to need the most.

It has been the desire of the author to devise some means by which this need of the profession could be met. It has been recognized that the Lust Digests have now reached a size where they can no longer be used for instantaneous reference, as formerly. To add separately to them (covering as they do the period from 1908 to 1925), the large volume of traffic law decided from 1887 to 1908, seems impracticable. This body of law, however, is too important to be overlooked. For instance, at the present time there is a great deal of agitation over the Hoch-Smith Resolution. A reference to the prior decisions shows the same kind of a resolution was passed by the Senate in 1890. The author himself would not have known of this except for the preparation of the book presented here. Enquiry among commerce counsel representing the carriers, traffic experts, and even employes of the Interstate Commerce Commission, fail to find one person who had heard of the resolution of 1890. This is a striking illustration of the value of having a complete record of the decisions. So a mere consolidation of the Lust Digests, plus a digest of the decisions prior to 1908, did not appear to the author to meet the vital question, which was the giving of a quick reference work to the busy traffic manager.

Such a scheme also would have meant reprinting at a colossal expense the past Digests. It was also believed that whatever scheme was adopted should be complete.

In any analysis of the problems of traffic law it is the principles which are important. The logical scheme is to show the earliest application of the law, together with its later variations, in chronological order. After a great deal of consideration the author evolved the present method of preparing this Digest.

There is presented here an absolutely complete digest of every point of law decided by the courts or Commission in construing the Interstate Commerce Act, from volume one to twelve, inclusive, of the Commission's reports. This covers the period from 1887 to 1908. These points, as well as the entire Digest, are placed under the classi-

fication which is in practically universal use today, and which was created by the author in 1913. The early cases have in front of them a heading showing they were decided prior to 1908. There has also been classified, following them, a digest of all points which seemed to the author to be of special importance and to be most useful for quick reference. These are placed under a subheading, "Important Cases Since 1908."

In order to make this Digest absolutely complete there is then a third subheading, "All Other Citations," and under this is listed the reference to the name of the case, volume and page of the decision to which the principle referred to is discussed, in every other case ever decided by the Interstate Commerce Commission and courts construing the Interstate Commerce Act. Thus we have here absolutely complete, under each classification, a complete list of every case governing the particular subject ever decided by the Interstate Commerce Commission in its thirty-seven years of operation from 1887 to 1924.

For the busy traffic man who desires a quick reference on any particular subject, it is the opinion of the author that this publication will give him almost instantaneous reference. If he desires to pursue his subject further by analyzing it down to the last detail, or in writing a brief, he has the opportunity to do so by referring to the other cases. If he wishes to simply ascertain the holdings of the Commission, during the period prior to 1908, those cases are available to him in full.

The author has personally examined every case, and every point in every case ever decided by the Interstate Commerce Commission or courts, to which reference is made here. The selection of principles represents his best judgment as to practical value and necessity. It is not pretended that the points which are reprinted will give a complete analysis of the law governing the particular principle. To do that all the cases bearing on the subject must be examined, but they do represent the author's judgment, that they will give the reader a practically instantaneous idea of what his rights are, and what principles govern the more common traffic problems presented.

The opportunity is taken of expressing the thanks of the author to the Lawyers' Co-operative Publishing Company of Rochester, New York, publishers of the first twelve volumes of the Interstate Commerce Commission reports, for courtesies extended.

HERBERT C. LUST.

Chicago, Ill., 1925.

I. APPLICATION OF ABSORBED RATE.

§1. In General.

IMPORTANT CASES SINCE 1908

(a) The absorption of switching charges is not in contravention of law. Columbia Gold Min. Co. v. O. W. R. R. & Nav. Co., 35 I. C. C. 42, 43.

(b) In so far as the shipping public is concerned the effect of switching absorption is to establish a joint rate, but this does not imply that by tariff provision a switching line may arbitrarily demand for its portion of the service any amount satisfactory to it. Joint rates and divisions thereof result from agreements among carriers or from appropriate action by the Commission when carriers fail or are unable to agree. When joint rates and divisions are established voluntarily one carrier can exact no more than its connections will allow. Manifestly if the amount of a switching charge differs from that which the line-haul carrier offers to absorb, and there is no provision for collecting the difference from the shipper, the switching line must accept less or the line-haul carrier must absorb more than is authorized by the tariffs. Switching Absorptions, 47 I. C. C. 583, 586.

(c) Where carriers earn specific amounts out of through rates or fares, such amounts authorized to be increased in the same percentages as the through rates or fares, and where divisions of carriers participating in through rates or fares are in fixed amounts per unit and are absorbed by other carriers, such absorptions should be increased in the same percentage as the through rates or fares. Increased Rates, 1920, 58 I. C. C. 220, 254.

(d) Wherever a charge is to be absorbed by connecting carriers, they should so indicate by appropriate tariff provision. Intermediate Switching at Appleton, Wis., I. & S. Docket No. 1180, 58 I. C. C. 691, 694.

C. 621.

II. DISCRIMINATION.

See Discrimination.

§1½. In General.

IMPORTANT CASES SINCE 1908

(a) The burden of proof rests upon carriers to justify proposed increased through charges resulting from a reduction in the amount of switching charges they will absorb even though they need not have increased the amount of such absorption by more than a certain per cent under Increased Rates, 1920, 58 I. C. C. 220. Absorption of Switching Charges at Toledo, 62 I. C. C. 30, 31.

ALL OTHER CITATIONS

Absorption of Switching charges at

Toledo, 62 I. C. C. 30, 31; Tidewater Oil Co. v. Director General, as Agent, 62 I. C. C. 226; Miller Paper Co. v. P. R. R. Co., 62 I. C. C. 705, 708; Lafayette Gravel Co. v. C. & E. I. R. R. Co., 62 I. C. C. 729, 732; Tide Water Oil Co. v. Director General, as Agent, 73 I. C. C. 528. Hunt, Helm, Ferris & Co. v. C. & N. W. Ry. Co., 68 I. C. C. 283, 284; Detroit Board of Trade v. W. Ry. Co., 80 I. C. C. 717.

§2. Absorption Subsequent to Shipment.

IMPORTANT CASES SINCE 1908

(a) But the Commission has no authority in the absence of a showing of discrimination, to require a carrier to absorb the switching charge of another. DuPont de Nemours Powder Co. v. P. R. R., 50 I. C. C. 203, 204.

(b) Under present conditions and the elimination of carrier competition, when there is absorption of switching charges within a switching district, the provisions therefore should be uniform where similar circumstances and conditions prevail. Kaw River S. & M. Co. v. A. F. & S. F. Ry., 51 I. C. C. 350, 355.

(c) It is well settled that if the carriers absorb switching charges for one shipper, they must do the like for all others similarly situated and entitled to like treatment. Ridge Coal Mining Co. v. M. P., 62 I. C. C. 259, 262.

ALL OTHER CITATIONS

Great Western Portland Cement Co. v. A., T. & S. F. Ry. Co., Unrep. Op. 454; Fort Smith Wholesale Grocery Co. v. Ft. S. & W. R. R. Co., Unrep. Op. 509; Wellington v. St. L. & C. F. R. R. Co., 13 I. C. C. 534, 535; Acme Cement Plaster Co. v. St. L. & S. F. R. R. Co., 18 I. C. C. 376, 377; Deeves Lumber Co. v. C. & N. W. Ry. Co., 19 I. C. C. 482, 483; Swift & Co. v. M. P. Ry. Co., 22 I. C. C. 385; Laclede-Christy Clay Products Co. v. St. L. & S. F. R. R. Co., Unrep. Op. A105; Ennis, Brown Co. v. S. P. Co., Unrep. Op. 2078; Consumers Co. v. C. & N. W. Ry., 36 I. C. C. 259, 261; Garden City Sand Co. v. N. Y. C. & St. L. R. R. Co., 38 I. C. C. 723, 724; Bath & Co. v. Ft. Worth & R. G. Ry., 51 I. C. C. 129.

§3. Refusal to Absorb.

CASES 1887-1908

(a) A railroad company is not prevented from absorbing a terminal charge on livestock in one city, and exacting such a charge for terminal services in another city reached by a different line, by the Act to Regulate Commerce, § 2, prohibiting the rendering of a given service to one person for a less compensation than is exacted from some other person for the same service under substantially similar circumstances and conditions. Cattle Raisers' Asso. v. Fort Worth & D. C. R. Co., 7 I. C. C. 513.

(b) A carrier may, under stress of competition, absorb a terminal charge upon one kind of merchandise or in favor of one locality and not in favor of another, unless in so doing he is guilty of an undue preference. Cattle Raisers Asso. of Texas v. Ft. W. & D. C. R. Co., 7 I. C. C. 513, 545.

IMPORTANT CASES SINCE 1908

(c) Unjust discrimination cannot be predicated merely on the refusal of a line entering a terminal to meet the competition of other carriers by the absorption of the total switching charges. Consumers Co. v. M., St. P. & S. Ste. M Ry., 43 I. C. C. 561, 566.

(d) A reciprocal switching arrangement between certain carriers does not justify their refusal to absorb the switching charges of another carrier, notwithstanding the smaller volume of traffic of the latter, if in fact unjust discrimination or undue prejudice is shown to result. National Spring and Wire Co v. Director General, as Agent, 60 I. C. C. 564, 565.

(e) Upon further hearing, former report, 62 I. C. C., 705, finding failure of defendants to provide for absorption of charges for interchanging in-bound traffic at Downington, Pa., and provide charges for interchanging outbound traffic, not unreasonable, discriminatory, or unduly prejudicial, affirmed. Failure to provide for interchange of outbound traffic is not shown to prejudice Downingtown, in comparison with Coatesville, Pa., and other points where such arrangements are maintained, and to require such interchange would compel carriers to short haul themselves. Miller Paper Co. v. P. R. R. Co., 80 I. C. C. 314.

Co., 73 I. C. C. 376.

III. CONTROL AND REGULATIONS.

See Control and Regulation.

§4. In General.

IMPORTANT CASES SINCE 1908

(a) But the Commission's jurisdiction over switching charges attaches only by reason of the fact that they are applicable in connection with interstate shipments, and in determining whether or not a fourth section departure exists, the aggregate charges for the transportation from point of origin must be considered and not merely the switching charges. However, the Commission has the power to fix a separate switching charge. Sheldon Axle & Spring Co. v. L. V. R. R. Co., 53 I. C. C. 43.

(b) In a proceeding to determine the propriety of switching charges absorbed by carriers the Commission must consider them as though they were to be charged for by the railroad rendering the service and paid for by the shippers. Interchange Switching at Wichita, 61 I. C. C. 205, 206.

(c) The general rule is that in the absence of unjust discrimination or undue prejudice a carrier can not be compelled to absorb the switching charges of a connecting line. Barber Asphalt Co. v. L. & N. R. R., 88 I. C. C. 307, 309.

ALL OTHER CITATIONS

Utica Traffic Bureau v. N. Y. C. & W. Ry. Co., 18 I. C. C. 168, 170; Mfrs. Ry. Co. v. St. L. I. M. & S. Ry. Co., 28 I. C. C. 93, 101, 103, 109; Detroit Switching Charges, 28 I. C. C. 494, 496; Kansas City & M. Ry. Co. Rate Cancellation, 28 I. C. C. 640, 643; Richmond Chamber of Commerce v. S. A. L. Ry. 30 I. C. C. 552, 559; Seattle Chamber of Commerce v. G. N. Ry. Co., 30 I. IV. REASONABLENESS.

See Reasonable of Rates.

§5. In General.

IMPORTANT CASES SINCE 1908

(a) The effect of a switching absorption is to establish a joint rate, but this does not imply that by tariff provision a switching line may arbitrarily demand for its portion of the service any amount of satisfaction to it. Switching Absorptions, 47 I. C. C. 583, 586.

ALL OTHER CITATIONS

Casey-Hedges Mfg. Co. v. C. of Ga. Ry. Co., 26 I. C. C. 63; Waverly Oil Works v. P. R. R. Co., 28 I. C. C. 621, 627; Hammerschmidt & Franzen Co. v. C. & N. W. Ry. Co., 30 I. C. J., 40 I. C. C. 465, 469; Nashville Switching, 40 I. C. C. 474, 482; New Orleans Terminal Allowances, 42 I. C. C. 748; Portsmouth Assn. of Commerce v. S. A. L. Ry., 55 I. C. C. 377, 390, 391; National Tube Co. v. L. T. R. R., 55 I. C. C. 469, 481, 482, 484; Globe Elevator Co. v. Director General, 55 I. C. C. 587; Matthiessen and Hegeler Zinc Co. v. C., B. & Q. R. R. Co., 57 I. C. C. 173; St. Louis Chamber of Commerce v. B. & O., 57 I. C. C. 639, 647, 654; Cuyahoga Valley Ry. Co. v. Director General, 57 I. C. C. 660; Increased Rates, 1920, 58 I. C. C. 220, 254; Forest Products from North Carolina and Virginia to Norfolk and other Virginia cities, 59 I. C. C. 579; Consolidation Coal Co. v. C. & O., 60 I. C. C. 763, 767; Absorption of Switching Charges at Fort Worth, Tex., 61 I. C. C. 73; Swift & Co. v. Ft. W. & D. C. Ry. Co., 61 I. C. C. 77; Miller Paper Co. v. P. R. R. Co., 62 I. C. C. 705; Absorption of Switching Charges at Toledo, Ohio, 64 I. C. C. 8; Illinois Brick Co. v. Director General, as Agent, 64 I. C. C. 273; Terminal Charges on Grain at Texas Ports. 64 I. C. C. 629; Memphis Freight Bureau v. Director General, as Agent, 74 I. C. C. 588; Absorption of Charges between Croxton and Jersey City, N. J., 81 I. C. C. 181. Nonabsorption of Switching Charges on Fish, 81 I. C. C. 113.

§5½ Legal Rate.

See Legality of Rates; Legal Rates

IMPORTANT CASES SINCE 1908

(a) While it is proper for the line haul carrier to absorb the terminal or switching charges of a connecting line it may not absorb its local transportation charges for line haul. Atlantic Refining Co. v. Director General, 64 I. C. C. 61, 62.

(b) The absorption by one carrier of the line haul charges of another as a means of establishing through rates is unlawful. Commodity rates from Bronson to Danville, Ill., 63 I. C. C. 277, 278.

V. REPARATION.

See Reparation.

§6. In General.

ALL CITATIONS

Globe Elevator Co. v. Director General, 55 I. C. C. 587, 594; Swift & Co. v. Fort Worth & Denver City Ry. Co., 69 I. C. C. 449.

VI. EVIDENCE.

See Evidence.

§7. In General.

IMPORTANT CASES SINCE 1908

(a) Under the law the Commission can give no weight to the fact that absorption by the line-haul carrier of switching charges of connecting lines are the subject of contract or to the fact that a pier or dock is owned or operated by the state, except in so far as those facts may have evidential bearing upon the characteristics of the rates and practices of the carriers and may assist in defining their status under the act. National Dock & Storage Warehouse Co. v. B. & M. R. R., 38 I. C. C. 643, 647.

(b) That cancellation by the line-haul carrier of provision for absorption of connecting line charges will have a tendency to drive business to other ports, must be regarded in forming an opinion as to the propriety of the proposed cancellation. National Dock & Storage Warehouse Co. v. B. & M. R. R., 38 I. C. C. 643, 656.

(c) Therefore, where it is proposed to add to the line-haul rate a terminal

charge which has been absorbed, it should be affirmatively shown not only that the charge, considered alone, is reasonable, but also that the through charge is reasonable. Manure from Jersey City, N. J., 40 I. C. C. 465, 469.

(d) The reasonableness of charges maintained by one carrier can not be judged by the ability or inability of a connecting competitor to absorb them. Nashville Switching, 40 I. C. C. 474, 482.

(e) Where the absorption of a switching charge subsequent to January 1, 1910, was the voluntary act of the carrier, and its cancellation had the effect of increasing the transportation charges, the burden of proof is upon the carrier to justify such increased charges. Consolidation Coal Co. v. C. & O. Ry. Co., 60 I. C. C. 763, 767.

VII. TARIFFS AND PUBLICATION.
See Tariffs.

§8. In General.

CASES 1887-1908

(a) No switching or other terminal charges should be absorbed except under a plain and specific tariff provision therefor. J. H. Leonard v C., M. & St. P. Ry., 12 I. C. C. 492, 494.

ACCESSORIAL SERVICE

See Additional Services and Charges.

ACCIDENT REPORTS

IMPORTANT CASES SINCE 1908

(a) Filing of reports covering accidents that occur in operation of cars, other than purely city cars, carrying interstate passengers, freight, or express will answer the requirements of the accident-report law. Jurisdiction Over Urban Electric Lines, 33 I. C. C. 536, 540.

ACCOUNTING

I. POWER TO REGULATE.
- §1. Jurisdiction of Commission.
- §2. State Regulation.

II. APPLICATION TO RATES.
- §3. In general.
- §4. Necessity of uniform accounting.
- §5. Construction of Commission's rules.
- §6. Cost accounting.
- §7. Destruction of records.

I. POWER TO REGULATE.
See Control and Regulation.

§1. Jurisdiction of Commission.
See Interstate Commerce Commission I.

CASES 1887-1908

(a) The Interstate Commerce Commission cannot, for the purpose of discovering and preventing unjust discrimination by a party which is both a shipper and carrier of its own products over its own line, compel it to keep separate accounts showing what it charges itself for transportation, or what the cost of transportation to it is. Haddock v. Delaware, L. & W. R. Co., 3 I. C. C. 302.

(b) A railroad whose termini are both within a single state, and which transports freight, whether shipped upon its line for destinations out of the state, or from abroad to stations upon its own line, upon local bills of lading under special contract of carriage limited to its own line, and does not do such business upon through rates which it divides with other carriers, or assume any obligation to or for them with respect of such carriage, but delivers to and receives from them freight in the same manner substantially as to or from any consignee or consignor, is not bound to file an annual report under the Interstate Commerce Act; following Cincinnati, N. O. & T. P. R. R. Co. v. Interstate Commerce Commission, 162 U. S. 184; and Interstate Commerce Commission v. Bellaire, Z. & C. R. Co., 77 Fed. Rep. 942; U. S. ex rel. I. C. C. v. Chicago, K. & S. R. Co., 8 I. C. C. App. XXVI.

IMPORTANT CASES SINCE 1908

(c) The granting by Congress in section 20 of the Act to the Commission of power to prescribe for carriers a system of accounting and reports covering their interstate and intrastate business is not an unlawful delegation of legislative power, since having laid down the general rules under which the Commission should proceed, it may require of the Commission the application of such rules to particular situations and the investigation of facts, with a view to making orders in a particular matter within the rules laid down by Congress. I. C. C. v. Goodrich Co., 224 U. S. 194, 214; 32 Sup. Ct. 436, 56 L. Ed. 729.

(d) Regulations of the Commission promulgated under section 20 of the Act, as amended in 1906, to prescribe a uniform system of bookkeeping and accounting for interstate carriers, do not

constitute an abuse of power because rejecting the theory that the cost of property abandoned in making permanent improvements should remain in the property account, rather than be charged to operating expenses. K. C. S. Ry. Co. v. United States, 34 Sup. Ct. 125, 132; 231 U. S. 423; 58 L. Ed. —.

(e) Under the Interstate Commerce Act authorizing the Interstate Commerce Commission to inquire into the management of the business of carriers and keep itself informed as to the manner and method in which such business is conducted and to obtain full and complete information from the carriers, section 13, as amended (section 8581), authorizing it to institute an inquiry on its own motion in any case and as to any matter or thing concerning which a complaint is authorized to be made to or before it, or concerning which any question may arise under any of the provisions of that act or relating to the enforcement of any of its provisions, and section 20, as amended (section 8592) authorizing the Commission to require detailed accounts of all expenditures and revenues and a complete exhibit of the financial obligations of carriers, and to prescribe forms of accounts, records, and memoranda, the Commission is authorized to make an investigation as to whether amounts subscribed or expended by railroad companies in political activities and efforts to suppress competition have been charged to operating or legal expenses, and where this was the purpose of an inquiry, questions as to the amount so subscribed or expended were not objectionable. Smith v. I. C. C., 28 Sup. Ct. 30, 245 U. S. 33; 62 L. Ed. 135.

(f) Amendment of 1906 conferred upon Commission authority to examine accounts, records and memoranda of common carriers engaged in transportation of oil by pipe lines. Conditions Affecting Crude Petroleum, 36 I. C. C. 429.

ALL OTHER CITATIONS

I. C. C. v. Goodrich Co., 224 U. S. 194, 211, 213, 32 Sup. Ct. 436, 56 L. ed. 729; Goodrich Transit Co. v. Interstate Commerce Commission, 190 Fed. 943, 958, 966; Railroad Commission of Tex. v. T. &. P. Ry. Co. (Tex. 1911), 140 S. W. 829, 833, 834, 835; Kansas City S. Ry. Co. v. U. S., 204 Fed. 641, 644, 645; K. C. S. Ry. Co. v. United States, 34 Sup. Ct. 125, 130, 135, 231 U. S. 423, 58 L. Ed.; St. Paul & Puget Sound accounts 29 I. C. C. 508, 517; United States v. N., C. & St. L. Ry., 217 Fed. 254, 260, 263, 264; Financial Relations, Etc., L. & N. R. R. Co., 33 I. C. C. 168, 236; State v. Atchison, T. & S. F. Ry. Co. (Kans., 1923), 221 Pac. 259.

§2. State Regulation.

See State Regulation.

IMPORTANT CASES SINCE 1908

(a) The Interstate Commerce Act empowering the Interstate Commerce Commission to prescribe for interstate carriers a uniform system of accounts, and forbidding them from keeping any other accounts than those ordered, does not prevent a state railroad commission from prescribing a system of accounts with respect to intrastate business. Texas & P. Ry. Co. v. R. R. Commission of Texas (Tex. 1912), 150 S. W. 878, 880.

II. APPLICATION TO RATES.

§3. In general.

IMPORTANT CASES SINCE 1908

(a) Whether the record indicates profit on the particular division on which rates are sought to be advanced is not controlling as to the reasonableness of such rates, as the incidental benefit to the other portions of the system may much more than offset any loss upon the particular division. It is to be expected that an originating division would apparently not be self-supporting any more than would the average large terminal in a city. To make them self-supporting it is necessary to assign to the originating division and to the terminal a sufficient portion of the revenues to more than offset the expenses. This would have to be an arbitrary sum. It could hardly be accomplished by the ordinary method of prorating the revenue or dividing it under the block-mileage system. L. & N. R. R. Coal & Coke Rates, 26 I. C. C. 20, 29.

(b) Permanent improvement and betterment expenses should not be charged to operating expenses for a year. Louisville & Nashville Railroad Coal and Coke Rates, 26 I. C. C. 20, 26.

(c) Statements of increased cost of transportation by reason of higher price of equipment and greater wages paid employes can have little weight when presented in the abstract, with no attempt to allocate charges or consider corresponding reductions resulting from greater efficiency. Hormel & Co. v. C.,

M. & St. P. Ry. Co., 26 I. C. C. 112, 114.

(d) The equalization of freight costs as a principle of rate making must be condemned as being but one phase of more general equalization of costs of production, which the Commission has frequently condemned. Pittsburgh Steel Co. v. L. S. & M. S. Ry. Co., 27 I. C. C. 73, 178.

(e) A theory rate on coke based on the effort to equalize assembling costs in different competing districts is not proper. Coke Producers' Asso. of Connellsville v. B. & O. R. R. Co., 27 I. C. C. 125, 149.

(f) An attempted distinction between equalizing cost of product and equalizing freight costs for assembling the raw material is not valid as a matter of principle. Equalization of freight costs is simply a partial equalization of the costs of production. Pittsburgh Steel Co. v. L. S. & M. S. Ry. Co., 27 I. C. C. 173, 178.

(g) The Commission has consistently pursued the policy of giving consideration to cost in establishing rates. What weight to be given the factor depends on the particular case. In re Separation of Operating Expenses, 30 I. C. C. 676, 678.

(h) Proper accounting demands that the records of a company should reflect accurately the transactions relating to the matter recorded, and when accounts fail to reveal a true history of the transactions it can be due to but one of two causes—carelessness or design. Financial Investigation of N. Y., N. H. & H. R. R. Co., 31 I. C. C. 32, 57.

(i) The unreliability of the property investment accounts of carriers have frequently been commented on by the Commission. Notwithstanding this, they afford a usable basis for a fairly satisfactory study of the course and tendency of the returns; but, while used for purposes of comparison, they are not accepted by the Commission as evidence either of the actual cost or the present value of these properties. The Five Per Cent Case, 31 I. C. C. 351, 361.

(j) It is not proper to charge the last increment of traffic with the cost of the additional track and also with a part of the cost of the old track. Both tracks being used in common by two classes of traffic, the value thereof should be apportioned according to the use of the double track. Lum v. G. N. Ry., 33 I. C. C., 541, 554.

(k) Change in accounting may alter the operating ratio. 1915 Western Rate Advance Case, 35 I. C. C. 497, 506.

(l) Allocating revenues and expenses of a branch line on a mileage pro rate basis is open to objection, if made use of as the sole test, where it appears that the mileage of the branch constitutes a very small proportion of the total system mileage. Abandonment of Part of Branch Line by N. P. Ry., 71 I. C. C. 169.

(m) The proclamation of the President assuming possession and control of the carriers at noon on December 28, 1917, stated that for accounting purposes such possession and control would date from midnight on December 31, 1917. Terre Haute, Indianapolis & E. T. Co. v. Director General, as Agent, 77 I. C. C. 658, 659.

ALL OTHER CITATIONS

Louisville & Nashville Railroad Coal & Coke Rates, 26 I. C. C. 20, 25, 26, 27, 28, 29, 31; Pittsburgh Steel Co. v. L. S. & M. S. Ry. Co., 27 I. C. C. 173, 177; Financial Relations, Etc., L. & N. R. R. Co., 33 I. C. C. 168, 173, 232; Car Spotting Charges, 34 I. C. C. 609, 620; Smith v. I. C. R. R. Co., 68 I. C. C. 427, 433; Appendix A. Final settlement under Section 209, 70 I. C. C. 717.

§4. Necessity of Uniform Accounting.

IMPORTANT CASES SINCE 1908

(a) It is unnecessary to emphasize the necessity and importance of statistical reports from carriers that will be uniform and truly reflect their condition. Recent years have witnessed the exposure of glaring instances of the financial wrecking of transportation agencies by those in positions of authority. In many instances the application of correct accounting rules and principles, with proper knowledge on the part of stockholders and public of the conditions thus reflected, would have gone far to avoid such consequences. St. Paul and Puget Sound Accounts, 29 I. C. C. 508, 517.

(b) Varying methods of accounting result in a confusion and lack of uniformity, which impair the value of the freight traffic statistics reported to the Commission. Iron Ore Rate Cases, 41 I. C. C. 181, 204.

ALL OTHER CITATIONS

St. Paul & Puget Sound Accounts, 29 I. C. C. 508, 518; Illinois Coal Cases, 32 I. C. C. 659, 673.

§5. Construction of Commission's Rules.

IMPORTANT CASES SINCE 1908

(a) The principal classifications in the Commission's system of accounts for steam railroads were formerly announced on June 3, 1907, and became effective July 1, 1907. It did not involve new and untried principles, but was put into effect by the Commission only as a result of prolonged conferences with the accountants of the carriers. While it does not conform exactly to the accounting practices theretofore observed by any particular railroad, it represents the consensus of opinion among the accounting officers of the country as to what system would best suit the situation. St. Paul and Puget Sound Accounts, 29 I. C. C. 508, 516.

(b) The assignment of the portion of all supervision expenses to the refrigeration service is not an assignment of additional or differential expenses of the refrigeration movement under ventilation. R. R. Comm. of California v. A. G. S. R. R. Co., 32 I. C. C. 17, 25.

(c) Carriers will be required to keep an account of additions to their revenues from increases in rates. Five Per Cent Case, 32 I. C. C. 325, 330.

(d) Accounting rules of the Commission provide that interest and taxes during construction, expenses incident to organization, including fees paid to promoters, and other general expenditures may be included in the cost of the property. City of East Liverpool, Ohio, v. S. E. L. & B. V. T. Co., 51 I. C. C. 563, 567.

ALL OTHER CITATIONS

St. Paul and Puget Sound Accounts, 29 I. C. C. 508, 513, 514; Norman Lumber Co. v. L. & N. R. R. Co., 29 I. C. C. 656, 659; Rates on Bananas from Gulf Ports, 30 I. C. C. 510, 517, 518; The Five Per Cent Case, 31 I. C. C. 325, 351, 361, 362; I. & S. 1172, Local Fares Hudson & Manhattan Railroad Co., 58 I. C. C. 270, 274, 275.

§6. Cost Accounting.

See Evidence §18.

IMPORTANT CASES SINCE 1908

(a) It is not proper to set up as an item of expense mileage on the car both ways without crediting the mileage earned on cars returned under load. Rates on Bananas from Gulf Ports, 30 I. C. C. 510, 518.

(b) Assumption of a full 100 per cent return movement of empty cars, notwithstanding the fact that a certain proportion of these cars returned loaded with company material, unduly swells the cost of this traffic. Coal rates from Virginia Mines, 30 I. C. C., 635, 646.

(c) The Commission considered the matter of requiring carriers to separate their operating expenses between freight and passenger services, as outlined in statistical circular No. 3, containing a proposed order requiring railroads having annual operating revenues of $100,000 to report separately the greater portion of their freight and passenger expenses, certain common expenses being left unapportioned. Approximately one-half the mileage of large carriers in the United States make this division voluntarily; not for rate making, but for efficiency purposes, though it would seem that a division made under circular No. 3 would not conflict with efficiency accounting. Moreover, the Commission is not interested in these statistics merely for rate-making purposes. And it appeared (1) that railway cost accounting can be made sufficiently accurate for useful information in dealing with rates; (2) that the information thus obtained is more reliable than that gained from special studies; (3) and would be useful in ascertaining particular cost units among railroads for different years and for the same railroad from year to year; (4) that the expense of making cost analyses would not be prohibitive. HELD: That sufficient reason exists for requiring the extension of the separation of operating expenses between freight and passenger services beyond that heretofore required in the Commission's report. Circular No. 3 will be revised and if sufficient progress can be made carriers will be asked to file a special report of the year ending June 30, 1915; and as early as practicable all carriers of Class I will be required to assign and apportion all operating expenses between freight and passenger services on a basis to be prescribed. In re Separation of Operating Expenses, 30 I. C. C. 676.

(d) Cost accounting can be made sufficiently accurate for useful consideration in dealing with rates. Approximately two-thirds of the operating ex-

penses may be divided satisfactorily. In re Separation of Operating Expenses, 30 I. C. C. 676, 679.

(e) Although not possible twenty years ago, it would appear that at the present time approximately two-thirds of the operating expenses of a railroad can be separated in a reasonably satisfactory manner. In re Separation of Operating Expenses, 30 I. C. C. 676, 679.

(f) Length of haul and volume of traffic are among the determining factors in arriving at cost. In re Separation of Operating Expenses, 30 I. C. C. 676, 681.

(g) A division between freight and passenger service alone will not involve additional expense which can not be justified. In re Separation of Operating Expenses, 30 I. C. C. 676, 681.

(h) The Commission has considered cost in many freight cases and has never found it necessary to separate the state from the interstate cost. In re Separation of Operating Expenses, 30 I. C. C. 676, 681.

(i) If sufficient progress can be made in the perfection of the circular, carriers will be asked to file a special report for the year ending June 30, 1915, showing the separation between freight and passenger expenses. In re Separation of Operating Expenses, 30 I. C. C. 676, 682.

(j) Recommended that the methods of accounting be improved with a view to the accurate ascertainment of the costs of protective service. Perishable Freight Investigation, 56 I. C. C. 449, 549, 615.

ALL OTHER CITATIONS

In re Separation of Operating Expenses, 30 I. C. C. 676, 680; Hughes' Creek Coal Co. v. K. & M. Ry. Co., 31 I. C. C. 10, 13; Rates for Transportation of Anthracite Coal, 35 I. C. C. 220, 275, 276.

§7. Destruction of Records.

IMPORTANT CASES SINCE 1908

(a) A carrier is acting within its rights in destroying records which have been retained for the period prescribed by the Commission. Financial Relations, Etc., L. & N. R. R., 33 I. C. C., 168, 234.

ACROSS-LAKE RATES

IMPORTANT CASES SINCE 1908

(a) Across Lake rates apply on traffic moving across the Great Lakes destined to the important gateways beyond, and are generally lower than the local rates. The Commission has held that a proportional across-lake rate on traffic destined for beyond, which is higher than the across-lake rate for local delivery at Milwaukee, does not discriminate unduly against such city. City of Milwaukee v. C., M. & St. P. Ry., 39 I. C. C. 363, 366.

ACT TO REGULATE COMMERCE

I. CONSTITUTIONALITY.

See Constitutional Law; Discrimination §1, §2 (1); Loss and Damage § 1, §2; Pipe Lines §2; State Rates and Regulation.

CASES 1887-1908

(a) The Legislature, in the exercise of its power of regulating fares and freights, may classify the railroads according to the length of their lines. If the same rule is applied to all railroads of the same class, there is no violation of the constitutional provision securing to all the equal protection of the laws. Dow v. Beidelman, 2 I. C. R. 56.

(b) Congress has authority, in the exercise of its power to regulate commerce among the several states, to construct or authorize individuals or corporations to construct railroads across the States and Territories of the United States. California v. Central Pacific R. R. Co., 2 I. C. R. 153.

(c) Possessing sovereign and exclusive power over the subject of commerce among the states, it is difficult to understand why Congress may not legislate, in respect thereto, to the same extent, both as to rates, and all other matters of regulation, as the States may do in respect to purely local, or internal commerce; but the court is not called upon in the present case to say what would or would not come within this regulating power, for the existing law does not undertake to prescribe anything more upon the subject of rates, than they shall be reasonable and just; and it does not undertake to require a common carrier subject to its provisoins to establish through routes and through rates with all connecting lines merely because it may have done so with one of them. Kentucky & Indiana Bridge Co. v. Louisville & Nashville R. Co., 2 I. C. R. 351.

(d) Congress has express power to exercise exclusive legislation over the District of Columbia; but, in creating the District of Columbia a body corporate for municipal purposes, Congress could only authorize it to exercise municipal powers. Stoutenburgh v. Hennick, 2 I. C. R. 409.

(e) The grant to the federal government of the power to regulate interstate commerce is full and complete and cannot be narrowed or encroached upon by state authority, either directly or indirectly. The fact, therefore, that one or more states have adopted a particular regulation is not a reason for applying it to interstate commerce, if in itself it appears to be objectionable. State action will always be treated with the highest deference and respect, but cannot be allowed to control in matters within the federal jurisdiction. Leonard v. Chicago & Alton R. Co., 2 I. C. R. 599.

IMPORTANT CASES SINCE 1908

(f) Congress is not restricted by the clause in the Constitution against the impairment of contracts. Mountain States T. & T. Co. v. City and County of Denver (Colo. 1921), 201 Pac. 1024.

(g) The Act of June 18, 1910, amending the long-and-short-haul clause is not unconstitutional as being a delegation to the Commission of legislative power which Congress was incompetent to make. United States v. A. T. & S. F. Ry. Co., 34 Sup. Ct. 986, 991; 234 U. S. 476; 58 L. Ed. —.

(h) That the long-and-short-haul clause imposes upon the Commission in a proper case the duty of refusing an application for relief from the rule, does not render the statute void on the ground that in such a contingency the statute would amount to an imperative enforcement of the clause; for a general enforcement of the clause would not be repugnant to the Constitution. United States v. A., T. & S. F. Ry. Co., 34 Sup. Ct. 986, 992; 234 U. S. 476; 58 L. Ed. —.

(i) The provision in section 15 of the Interstate Commerce Act that in any actions in the United States courts "the findings and order of the Commission shall be prima facie evidence of the facts therein stated" is not unconstitutional because it infringes upon the right of trial by jury and operates as a denial of due process of law, because it only establishes a rebuttal presumption; cuts off no defense, interposes no obstacles to a full contestation of all the issues, and takes no question of fact from either court or jury, and at most, therefore, is merely a rule of evidence. Meeker v. Lehigh Valley R. Co., 35 Sup. Ct. Rep. 328, 335.

(j) While the commission may not with propriety decide that an act of Congress is unconstitutional, it must as clearly avoid any suggested construction of a statute which would render it ineffectual and adopt a construction, when called upon to construe it, which will sustain it, if such a construction is reasonable and consonant with the language employed. Public-Conveyance Application of D. & N. M. Ry., 71 I. C. C. 795, 799.

(k) The provision of Transportation Act 1920, § 422, requiring railroads to pay to the Interstate Commerce Commission's revolving fund one-half of all net earnings in excess of 6 per cent for the promotion of the public interest in railway transportation, is within the power of Congress as a legitimate tax imposed on all railroads to further interstate commerce. Dayton-Goose Creek Ry. Co. v. United States, 287 Fed. 728.

(l) An act of Congress will not be declared unconstitutional, unless the question is free from any reasonable doubt. Dayton-Goose Creek Ry. Co. v. United States, 287 Fed. 728.

ALL OTHER CITATIONS

L. & N. R. R. v. Mottley, 219 U. S. 467, 482, 484, 31 Sup. Ct. 265, 55 L. Ed.

297; Galveston, H. & S. A. Ry. Co. v. Wood (Tex. 1912), 146 S. W. 538, 541; The Five Per Cent Case, 31 I. C. C. 351, 357; Vulcan Coal & Mining Co. v. I. C. R. R. Co., 33 I. C. C. 52, 67; Lehigh Valley R. Co. v. United States, 234 Fed. 682, 683; Carter Planing Mill Co. v. New Orleans, M. & C. R. Co., 72 S. 884; Paducah Board of Tarde v. I. C. R. R. Co., 43 I. C. C. 537, 540; Standard Time Zone Investigation, 51 I. C. C. 273, 283; Public Service Commission v. New York Cent. R. Co., 183 N. Y. S. 799; Texas & Pacific R. R. Co. v. Abilene Cotton Oil Co., 204 U. S. 426, 27 Sup. Ct. 350, 51 L. Ed. 553, 9 Ann. Cas. 1075; Baltimore & Ohio R. R. Co. v. United States, 215 U. S. 481, 30 Sup. Ct. 164, 54 L. Ed. 292; Morrisdale Coal Co. v. Pennsylvania R. R. Co., 230 U. S. 304, 33 Sup. Ct. 938, 57 L. Ed. 1494; Minnesota Rate Cases, 230 U. S. 352, 33 Sup. Ct. 729, 57 L. Ed. 1511, 48 L. R. A. (N. S.) 1151, Ann. Cas., 1916, A, 18; Texas & Pacific Ry. Co. v. American Tie Co., 234 U. S. 138, 146, 34 Sup. Ct. 855, 58 L. Ed. 1255; Pennsylvania R. R. Co. v. Clark Coal Co., 238 U. S. 456, 469, 35 Sup. Ct. 896, 56 L. Sd. 1406; and Loomis v. Lehigh Valley R. R. Co. 240 U. S. 43, 49, 36 Sup. Ct. 228, 60 L. Ed. 517; Director General of Railroads et al. v. Viscose Co., 41 Sup. Ct. 151; Rates, Fares and Charges of N. Y. C. R. R., 59 I. C. C. 290, 294; Kansas City Board of Trade v. A. T. & S. F. Ry. Co., 69 I. C. C. 185, 191; Public Service Com- 455; Robinson & Reynolds v. Atlantic Coast Line R. Co., (Ga., 1922), 112 S. E. 389; State of New York v. United States Ry. Co. (Tex. 1922), 244 S. W. 980; Calivada Fertilizer Co. v. S. P. Co., 73 I. C. C. 496, 498.

II. INTERPRETATION IN GENERAL.

See Compress Companies I; Crimes §2; Discrimination §1; Elkins Act; Export Rates and Facilities §1½; Long and Short Hauls II, §2½; Loss and Damage §2; Panama Canal Act; Personal Injuries.

CASES 1887-1908

(a) The Interstate Commerce Act only applies to such carriers as use a railway or a railway and water craft under common control or management for a continuous carriage or shipment of property from one state to another. Ex parte Koehler (U. S. C. Ct. Or.), 1 I. C. R. 28.

(b) Interstate Commerce Act. This act does not include or apply to all carriers engaged in interstate commerce, but only such as use a railway, or a railway and water craft "under common control, management or arrangement for a continuous carriage or shipment" of property from one state to another; nor does it apply to the carriage of property by rail wholly within the state, although shipped from or destined to a place without the state, so that such place is not in a foreign country. Ex parte Kochler, Receiver of Ore. & Cal. R. Co., 1 I. C. R. 28.

(c) Incidental injuries under this act must be borne for the public good, until the Legislature provides a remedy. Jurisdiction of the Commission, 1 I. C. R. 73.

(d) Where a subject of interstate commerce is national in character, or admits of only one uniform system of regulation, the power of Congress is exclusive, and its failure to make express regulations indicates its will that the subject shall be free. Philadelphia & Southern Mail S. S. Co. v. Penn., 1 I. C. R. 308.

(e) The word "line" in the Act to Regulate Commerce means a physical line, not a business arrangement. Boston & A. R. Co. v. Boston & L. R. Co., 1 I. C. R. 571.

(f) By the word "line" in the act, a physical line is meant, not a business arrangement, and one piece of road may be part of several lines. Boston & A. R. R. Co. v. Boston & L. R. R. Co., 1 I. C. R. 571.

(g) Whether a special privilege granted by railroad companies to manufacture in a single line of trade, but not to manufacture in general, is consistent with the rule of equality and justice which the law undertakes to establish, is a question upon which an opinion ought to be expressed only after the most careful consideration, and the Commission ought clearly to see that duty requires an answer before it proceeds to give one an ex parte application. Re Iowa Barb Steel Wire Co., 1 I. C. C. 605.

(h) The Interstate Commerce Act does not afford a remedy for transactions occurring before it took effect. Ottinger v. Southern Pac. R. Co., 1 I. C. R., 607.

(i) The spirit and purpose of the Act to Regulate Commerce requires that

when the circumstances and conditions will fairly admit of it the charges to all points for a like service should be made relatively equal. Crews v. R. & D. R. R. Co., 1 I. C. R. 703.

(j) The act provides that the carrier shall be entitled to receive a reasonable compensation for the service performed upon open published rates, against which no competitor can take advantage by allowing shippers' secret rebates and drawbacks in order to get the business. Farrar & Co. v. E. Tennessee, Virginia & Georgia R. Co., 1 I. C. C. 764, 767.

(k) The words "substantially similar circumstances and conditions" as found in the second and fourth sections of the act, in certain important particulars define the rights and duties of carriers and the rights of shippers as well. If the carrier claims to act under the compulsion of circumstances and conditions of his own creation or connivance in the making of an exceptional rate, then these will not avail him; or if the carrier claims to act under a compulsion of circumstances and conditions in the making of an exceptional rate which he could obviate by reasonably fair and just exertion on his part, then they will not avail him. But if the carrier is in good faith, acting under a compulsion of circumstances and conditions beyond his control, not of his own convenience, and which he could not obviate by any reasonably fair and just effort on his part, and to avoid large loss adopts exceptional rates on a portion of his line, not unreasonable in themselves, and forced upon him by the action of an independent state railroad, which is not subject to the act, and which is operating a slightly shorter and competing line with his own, these are circumstances and conditions under the operation of the statute which justify him in adopting exceptional rates thus forced upon him on this portion of the line. Business Men's Asso. of Minnesota v. C., St. P., M. & O. Ry., 2 I. C. C. 41, 46.

(l) To render a preference of one over another unlawful, under the act, it is not necessary that it should be accomplished by any "device"; and it is equally true that the ingenuity of man cannot invent a device for the perpetration of an unlawful preference on the part of a carrier engaged in interstate commerce, without incurring the penalties prescribed by the statute. Scofield v. L. S. & M. S. R. R., 2 I. C. C. 67, 77.

(m) The fact that statutory regulations of internal commerce are such as to preclude the literal enforcement of pre-existing contracts does not affect their validity, or make them, in a constitutional sense, laws impairing the obligation of contracts. Such a consequence is often a necessary result of any considerable change in the general laws, and must be submitted to as such. Kentucky & Indiana Bridge Co. v. Louisville & Nashville R. Co., 2 I. C. R. 102.

(n) The requirement of the Act to Regulate Commerce, that every common carrier shall afford reasonable, proper and equal facilities to connecting lines, imposes upon a carrier no duty either to form new connections or to establish new stations, yards, or depots, or to pay any part of the expense of providing such new facilities, either for the convenience of the public or of other carriers; and a carrier cannot be compelled to receive or deliver traffic at a point where another company has made a new connection with its roads, but has not provided proper facilities. Kentucky & I. Bridge Co. v. Louisville & N. R. Co. (C. C. D. Ky.), 2 I. C. C. 351. Overruling decision of the Interstate Commerce Commission in the same case. 2 I. C. R. 102.

(o) The provisions in the Act to Regulate Commerce, that all rates shall be just and reasonable, was a provision inserted for the protection of the general public, and not for the protection of the carriers against the action of their own officers or against the action of rivals. The carriers were supposed to have means of self-protection against unreasonably low rates in the power they had to make the rates themselves. Re Chicago, St. Paul & Kansas City R. Co., 2 I. C. R. 137.

(p) As a matter of public history, nothing could be so notorious than that the act had for its leading and general purpose, to which other purposes were subordinate, to provide effectual securities that the general public, in making use of railroad transportation provided by law for its service, should have the benefits which the law had undertaken to give, but of which in very many cases it was found the parties entitled to them were deprived by the arbitrary conduct, the favoritism, or the unreasonable exactions of those who managed them. Re Chicago, St. Paul & Kansas City R. R. Co., 2 I. C. C. 137, 146.

(q) Act to Regulate Commerce; rule of construction in contests between common carriers. The law should be as liberally construed, in favor of commerce among the states, as its language will permit; but when complaint is made, or relief is sought, solely or mainly, in the interest of the common carriers engaged in the transportation of such commerce, the act complained of, or the right asserted, should not rest upon any doubtful construction, but should clearly appear to have been forbidden or conferred. And where the complaining carriers are not in a position to commend themselves to the favorable consideration of a court of equity, no strained construction of the law should be made, in order to afford them, or either of them, the relief they seek at the hands of the court. Kentucky & Indiana Bridge Co. v. Louisville & Nashville R. Co., 2 I. C. R. 351.

(r) The Act to Regulate Commerce was probably intended to effect similar results; but in its present form and in the absence of the necessary machinery it is not adequate to afford the relief prayed in the petition. Little Rock & Memphis R. Co. v. East Tennessee, V & G. R. Co., 2 I. C. R. 545.

(s) The provisions of the Act to Regulate Commerce apply to foreign as well as domestic common carriers engaged in the transportation of passengers or property, for a continuous carriage or shipment, from a place in the United States to a place in an adjacent foreign country. Matter of Grand Trunk Railway Co. v. 2 I. C. C. 496.

(t) The provisions of the Act to Regulate Commerce, construed in the light of the principles that apply to interstate commerce as enunciated by the courts of the United States, must be understood as intended to regulate all the commerce subject to the exclusive jurisdiction of Congress, including the agents and instrumentalities employed and the commodities carried, with only the limitations found in the Act itself. Mattingly v. Pennsylvania Co., 2 I. C. R. 806.

(u) The proviso in the first section that the provisions of the Act shall not apply to the transportation of passengers or property, as to the receiving, delivery, storage or handling of property, wholly within one state, and not shipped to or from a foreign country from or to any state or territory as aforesaid, that is, by continuous carriage or shipment, only excludes from regulation the purely internal commerce of a state, that which is confined within its limits, which originates and ends in the same state. Mattingly & Pennsylvania Co., 2 I. C. R. 806.

(v) The national regulations prescribed are not in all respects co-extensive with the power of Congress, and do not provide for ordering through routes and through rates. While it is the duty of a state carrier which engages in interstate commerce to forward traffic offered from a connecting line, there is no authority under the present act to compel the carrier to forward the traffic over a route not operated or selected by itself. Mattingly v. Pennsylvania Co., 2 I. C. R. 806.

(w) Section 7 of the Act may properly be considered in construing the general jurisdictional clause of the first section. Boston Fruit & Produce Exch. v. New York & N. E. R. Co., 3 I. C. R. 493.

(x) The requirement of the statute that all rates shall be reasonable and just involves a consideration of the commercial value of the traffic, and implies that rates should be so adjusted that producers of traffic as well as carriers may carry on their pursuits successfully, if practicable for both and without injustice to the carrier. The public good requires what is plainly the spirit of the law, that the transportation interests are not alone to be considered, but that in the just exercise of regulation care should be taken that the lawful and necessary occupations of citizens are not unjustly burdened. Delaware State Grange v. N. Y., P. & N. R. Co., 3 I. C. C. 554, 560.

(y) The Interstate Commerce Act was not designed to prevent competition between different roads, nor to interfere with the customary arrangement made by railway companies for reduced fares in consideration of increased mileage, where such reduction does not operate as an unjust discrimination against other persons traveling over the road. Interstate Commerce Commission v. Baltimore & O. R. Co., 4 I. C. R. 92.

(z) All charges made for any service in the transportation of any passengers or property, or for receiving, delivering, storing, or handling property, must under the Interstate Commerce Act be reason-

able and just; and no discrimination can be made in rates, charges, or facilities. Cutting v. Florida R. & Nav. Co., 4 I. C. R. 424.

(aa) There is no national common or general law in the sense of a rule of civil conduct prescribed by the nation as sovereign, as distinguished from the body of common law in force in the several states, which will be enforced by the Federal courts, except in those areas not taken into the boundaries of the states. Swift v. Philadelphia & R. R. Co. (C. C. N. D. Ill.), 5 I. C. R. 116.

(bb) The known and settled construction of laws by courts of the state from which they are taken is presumed to be adopted with the adoption of the laws. Brown v. Walker, 5 I. C. R. 369.

(cc) There is no national common law. Gatton v. Chicago, R. I. & P. R. Co. (Iowa), 5 I. C. R. 474.

(dd) Commerce, in its largest sense, must be deemed to be one of the most important subjects of legislation, and an intention to promote and facilitate it, and not to hamper or destroy it, is naturally to be attributed to Congress. Interstate Commerce Commission v. Alabama M. R. Co., 5 I. C. R. 685.

(ee) The purpose of the act is to promote and facilitate commerce, and the adoption of regulations to make charges for transportation just and reasonable, and to forbid undue and unreasonable preferences or discriminations. Interstate Commerce Commission v. Alabama M. R. Co., 5 I. C. R. 685.

(ff) The spirit and letter of the act require that orders made by the Commission should have in view the purpose of promoting, and facilitating commerce, and the welfare of all to be affected, the carriers as well as the traders and consumers of the country. Interstate Commerce Commission v. Alabama M. R. Co., 5 I. C. R. 685.

(gg) The terms "reasonable and just," "unreasonable and unjust," "undue or unreasonable preference or advantage," "undue or unreasonable prejudice or disadvantage in any respect whatsoever," as used in the statute, imply comparison of relative locations, of natural and acquired advantages, of the reasonableness of charges per se and in their relation to other rates on the various lines which serve competing localities, and consideration of all the facts and circumstances which affect rates to different communities. Daniels v. C., R. I. & P. R. Co., 6 I. C. C. 458, 477.

(hh) The law requires regulation of railroad charges according to the ascertained rights of persons and places; it is not an agency for the regulation of trade by enabling shippers and communities to do business or putting them on even terms with rivals more remote from competitive territory. Therefore, the fact that one town is able, under existing rates to and from that point, to compete with another town on practically even charges for the aggregate in and out transportation, cannot be regarded as an excuse for any injustice in the rates to the former town; the rates to the two competing towns should accord with their relative situation. Daniels v. C., R. I. & P. R. Co., 6 I. C. C. 458, 478.

(ii) The terms 'reasonable and just," "unreasonable or unjust," "undue or unreasonable preference or advantage," "undue or unreasonable prejudice or disadvantage in any respect whatsoever," and "unjust discrimination," as used in the statute, imply comparison, and rates to be lawful must bear just relation to each other as well as be reasonable per se. Page v. Delaware, L. & W. R. Co., 6 I. C. C. 548.

(jj) The act does not attempt to fix rates which railway companies shall charge, nor does it in any way provide a tribunal which can establish those rates. The carriers are left entirely to their own discretion in the making of their rates, subject only to certain prohibitions contained in the law. So long as those prohibitions are not infringed every carrier is free to determine for itself what traffic it will engage in and foster, and at what points and in what manner, and to adjust its tariffs and connections accordingly. It can not, in theory at least, impose an unreasonable rate, nor can it discriminate between different shippers in the amount of compensation which it exacts for a like service. It may give to one locality or one commodity a preference over some other locality or some other commodity, provided that preference be not undue or unreasonable. Cattle Raisers Asso. of Texas v. Ft. W. & D. C. R. Co., 7 I. C. C. 513, 541.

(kk) The Act to Regulate Commerce applies to the transportation of export

and import traffic, and the jurisdiction of the Commission over such traffic is not denied, but is distinctly affirmed and rather enlarged by the decision of the United States Supreme Court in Texas & P. R. Co. v. Interstate Commerce Commission, 162 U. S. 197, 40 L. Ed. 940, 5 Inters. Com. Rep. 405. Re Export and Domestic Rates on Grain, 8 I. C. C. 214.

(ll) The Act to Regulate Commerce is intended to and does apply, not only in cases of direct injury to particular individuals or industries, but also in cases involving indirect injury to the community as a whole. Re Export and Domestic Rates on Grain, 8 I. C. C. 214.

(mm) Whether rates upon domestic traffic contravene the provisions of the Act to Regulate Commerce is a question of fact. Re Export and Domestic Rates on Grain, 8 I. C. C. 214.

(nn) One of the underlying principles of the act is equality between great and small. Holdzkum v. M. C. Ry., 9 I. C. C. 42, 52.

(oo) The Act to Regulate Commerce assumes that persons, corporations and localities are interested not only in the rates charged to them, but in the rates which are charged to others, and, while the act does not require all rates to be proportional, it nevertheless makes the element of proportion an important one when the rates for any locality are to be determined; and it follows that no rates can be reasonable in and of themselves within the contemplation of the act, which are made regardless of proportion. Martin v. Louisville & N. R. Co., 9 I. C. C. 581.

(pp) The Act to Regulate Commerce assumes that persons, corporations and localities are interested in the rates charged to others, as well as those charged to them, and, while the act does not require all rates to be proportional, it makes the element of proportion an important one; and it follows that no rates can be reasonable in and of themselves which are made regardless of proportion. Martin v. Louisville & Nashville R. Co., 9 I. C. C. 581.

(qq) The act assumes that persons, corporations and localities are interested not only in the rates charged to them, but in the rates which are charged to others, and, while the act does not require all rates to be proportional, it nevertheless makes the element of proportion an important one when the rates for any locality are to be determined; and it follows that no rates can be reasonable in and of themselves within the contemplation of the act, which are made regardless of proportion. Marten v. L. & N. R. R., 9 I. C. C. 587, 599.

(rr) The intent of the first section was to insure that the carriage of freight and of passengers should be subject to the act from its inception to its conclusion and that the jurisdiction of the government over such transportation should not be divested by the fact that any agency used in the transportation was furnished by some party other than the common carrier itself. Enterprise Transportation Co. v. Pennsylvania R. R., 12 I. C. C. 327, 336.

IMPORTANT CASES SINCE 1908

(ss) In the case of doubtful or ambiguous provisions, reference may be had to the history of the legislation, the evils sought to be corrected, and the remedy intended to be provided. In Re Jurisdiction Over Water Carriers, 15 I. C. C. 205, 206.

(tt) The act was clearly intended to prescribe the only rule as to the regulation of interstate rates and it should and does supersede different rules in prior statutes. West End Improvement Club v. O. & C. B. R. & B. Co., 17 I. C. C. 239, 247.

(uu) Section 15 is the dominating and controlling expression of the real object and meaning of the act. It makes of the Commission a special expert body to deal with rates and not to supplant the courts. Joynes v. P. R. R. Co., 17 I. C. C. 361, 369.

(vv) A construction abhorrent to the theory of our institutions is not to be presumed as the one which Congress intended. Railroad Commission of Nevada v. S. P. Co., 21 I. C. C. 329, 335.

(ww) Because the words "undue" and "unreasonable" are used in the statute, it does not follow that Congress attempted to lodge arbitrary powers in the hands of the Commission. Railroad Commission of Nevada v. S. P. Co., 21 I. C. C. 329, 336.

(xx) The fundamental principle of the act is one of fair play. A railroad may not control the character of the industries along its line by giving preferential rates as between commodities, nor discriminate as between one shipper and

another, even though by following such procedure it can develop the greatest amount of traffic for itself. Mobile Chamber of Commerce v. M. & O. R. R. Co., 23 I. C. C. 417, 426.

(yy) Equality of opportunity in the use of transportation facilities is one of the purposes of the act. In re Wharfage Charges at Galveston, 23 I. C. C. 535, 544.

(zz) Congressional debates may be considered in construing the act. In re Pipe Lines, 24 I. C. C. 1, 4.

(3a) A narrow construction of the act is not in harmony with its spirit nor in keeping with the principle enunciated by the United States Supreme Court. Santa Rosa Traffic Asso. v. S. P. Co., 24 I. C. C. 46, 48.

(3b) The law contemplates protecting the carrier in its long haul on traffic which it originates. Commercial Club of Superior, Wis., v. G. N. Ry. Co., 24 I. C. C. 96, 113.

(3c) Section 1 provides that charges for the transportation of passengers or property shall be just and reasonable. National Wool Growers' Asso. v. O. S. L. R. R. Co., 25 I. C. C. 675, 676.

(3d) Section 8 makes a common carrier, subject to the act, liable to the person injured for whatever damages accrue by reason of the doing of any act prohibited or declared to be unreasonable by the statute. National Wool Growers' Asso. v. O. S. L. R. R. Co., 25 I. C. C. 675, 676.

(3e) Section 2 of the act leaves to section 3 the prohibition of undue preference to one commodity and undue preference to another, and it should not be made the basis for an order fixing the relationship of rates upon kindred commodities. Board of Trade of the City of Chicago v. C. & A. R. R. C. Co., 27 I. C. C. 530, 534.

(3f) The Commission has frequently held that carriers may not rely upon a technical construction of one portion of the act to justify a violation of another provision, and that in determining questions of this nature, consideration must be given not alone to section 5, but as well to section 1, wherein it is made the duty of carriers to establish through routes and just and reasonable rates and charges applicable thereto, and to section 4, which forbids undue prejudice with respect to the interchange of traffic between connecting carriers. Chicago, Lake Shore & South Bend Ry. Co. v. Director General, 58 I. C. C. 647, 652.

(3g) The Commission can only act under the jurisdiction conferred upon it by the Congress, and must exercise powers which it now has, subject to limitations which now attach to them, as its jurisdiction and powers are drawn from the statute as it is now. P. W. V. Ry. Co. v. P. & L. E. R. R. Co., 61 I. C. C. 272, 276.

(3h) Under the provisions of paragraph 6, section 15, of the Interstate Commerce Act as amended by the Transportation Act, 1920, the Commission can require adjustment of divisions only for the period subsequent to the filing of the petition, even though such petition was filed subsequent to the taking effect of the amended act. Diamond Alkali Co. v. F., P. & E. R. R. Co., 62 I. C. C. 161, 165.

(3i) Carriers may not rely upon a technical construction of one portion of the act to justify a violation of another provision. Gillespie Coal Co. v. I. T. S., 62 I. C. C. 335, 337, 338.

(3j) A reasonable construction of the statute makes clear the intent of Congress that paragraph (4) of section 1 and paragraph (6) of section 15 of the act, taken together, should supersede former provisions of the statute and constructions placed thereon with respect to divisions of joint rates, whether established voluntarily or pursuant to the Commission's finding or order. New England Divisions, 62 I. C. C. 513, 560.

(3k) The Commission must be guided by the intent of Congress as expressed in the provisions of the present statute, and it is fundamental that it can act only under the jurisdiction conferred by Congress, exercising only such powers as it now has subject to any limitations which now attach to them. New England Divisions, 62 I. C. C. 513, 560.

(3l) Words "without regard to the mileage haul" in paragraph (6) of section 15 of the act, do not forbid consideration of the element of distance in a proceeding involving divisions. They serve rather to emphasize the fact that other elements may outweigh the element of distance, in which event the Commission may properly disregard the mileage haul. The clause is inclusive rather than

exclusive, and the general words "among other things" constitute a clear exposition of the intent of Congress that the Commission should consider all the facts and circumstances. New England Divisions, 62 I. C. C. 513, 560, 561.

(3m) The stautory provision for recapture of excess earnings from individual carriers clearly negatives the idea that the Congress contemplated or intended that all carriers in a group should so share in the aggregate earnings of the roads in the group that all would be upon an equality. Such a plan would stifle all incentive to skill, efficiency, economy, and good management. New England Divisions, 62 I. C. C. 513, 560, 561, 562, 565.

(3n) The duty cast upon the Commission by section 15a is continuing and looks to the future. It does not constitute a guaranty to the carriers, nor is the obligation cumulative. The Commission is not restricted by past or present statistics of operation and earnings. These are serviceable only as they illuminate the future. What is contemplated by the law is that in this exercise of rate-making power the result shall reflect the Commission's best judgment as to the basis which may reasonably be expected for the future to yield the prescribed return. Rates on Grain, Grain Products, and Hay, 64 I. C. C. 85, 89

(3o) In determining what is "in the public interest" in a given case, as antecedent to the affirmative exercise of this broad grant of power, the commission must take into consideration not only the interests of the particular shippers located at or near the terminal involved, but also the interests of the carriers and of the general public. York Mfrs. Asso. v. P. R. R. Co., 73 I. C. C. 40, 49.

(3p) The phrase "under substantially similar circumstances and conditions," in section 2 of the act, "refers to matters of carriage, and does not include competition," which is "extraneous to the transportation." Rates on Bunker Coal, 73 I. C. C. 62, 74.

(3q) The purpose of the act is to facilitate, not to impede, commercial operation. When shippers and railways unite in asking that a particular thing be done; when that thing is manifestly for the interest and convenience of all parties; when no harm can result, but when, upon the contrary, the fundamental purposes of the act will be promoted, such a construction should be placed on the statute as will permit it. Rates on Bunker Coal, 73 I. C. C. 62, 76.

(3r) The act applies to common carriers engaged in the transportation of property from any place in the United States to a foreign country in so far as such transportation takes place within the United States. Southern Acid & Sulphur Co. v. A. & N. M. Ry., 74 I. C. C. 641, 642.

(3s) A carrier under section 15 of the act as amended June 29, 1906, is entitled to have a finding by the Commission that any particular charge is unreasonable and unjust before it is required to change such charge. I. C. C. v. Stickney, 215 U. S. 98, 105, 30 Sup. Ct. 66, 54 L. Ed. 112.

(3t) The Interstate Commerce Act as amended does not attempt to equalize fortune, opportunities or abilities. On the contrary, it in turn contemplates that if a carrier receives services from an owner of property transported, or uses instrumentalities furnished by the latter, he shall pay for them, the only restriction being that he shall pay no more than is reasonable, and the only permissive element being that the Commission determine the maximum in case there is complaint or upon its own motion. I. C. C. v. Diffenbaugh, 222 U. S. 42, 46, 32 Sup. Ct. 22, 56 L. Ed. 83.

(3u) When the United States has exercised its exclusive powers over interstate commerce, so far as to take possession of the field, the states no more can supplement its requirements than they can annul them. Pennsylvania R. Co. v. Public Service Commission, 40 Sup. Ct. 36.

(3v) In construing a statute it is not proper to confine attention to particular words, phrases, or sections. The fundamental rule is to ascertain and give effect to the intention of the legislature as gathered from the language of the whole statute. S. P. Co. Ownership of Atlantic S. S. Lines, 77 I. C. C. 128.

(3w) It is the Commission's duty to apply a statute as it finds it, and for the courts to determine its validity where that question arises. Interchangeable Mileage Ticket Investigation, 77 I. C. C. 200, 202.

(3x) If paragraph (12) of section 1 of the act is at all doubtful in construction, the construction adopted by the

commission as administrative agency in its enforcement, followed for many years, without any attempt of Congress to change it, even when a bill for that purpose was long pending before it, and without any challenge of its correctness by any other department of the Government, while not controlling, is not to be disregarded without most cogent and persuasive reasons. Robertson v. Downing, 127 U. S., 607. Assigned Cars for Bituminous Coal Mines, 80 I. C. C., 520, 529.

(3y) A contract between carriers can not be permitted to defeat plain requirements of the law. St. Louis & O'Fallon Ry. Co. v. E. St. L. & S. Ry. Co., 81 I. C. C., 538, 541.

W. 917.

III. TIME OF TAKING EFFECT.

IMPORTANT CASES SINCE 1908

(a) A statute passed to take effect at a future date must be understood as speaking from the time it goes into operation, and not from the time of its passage, and before the time of going into effect no rights may be acquired under it and no one is bound to regulate his conduct according to its terms. Nicola, Stone & Myers Co., v. L. & N. R. R. Co., 14 I. C. C. 199, 206.

(b) The legislative intent was to make August 28, 1906, the effective date of the Hepburn Act, which was approved June 29, 1906. Nicola, Stone & Myers Co. v. L. & N. R. R. Co., 14 I. C. C. 199, 206.

(c) The law stands for what it means from the date when it takes effect and not from the date when it is construed by the Commission. Ordinarily the date of the announcement by the Commission of its interpretation of a particular provision is therefore of little real importance. Liberty Mills v. L. & N. R. R. Co., 23 I. C. C. 182, 185.

IV. ENFORCEMENT.

CASES 1887-1908

(a) The Northern Pacific Railroad Company, notwithstanding certain provisions in its charter, is subject, like all other interstate carriers, to the authority conferred by Congress in the Act to Regulate Commerce. Citing and affirming Raworth v. Northern Pac. R. Co., 3 Inters. Com. Rep. 857, 5 I. C. C. Rep. 257; Merchants' Union v. Northern Pacific R. Co., 4 I. C. R. 183.

(b) An action against a carrier for violation of the Interstate Commerce Act in making unlawful discriminations may be maintained in the name of the United States by the district attorney under § 12 of such act as amended March 2, 1889, and February 10, 1891, to provide that upon the request of the Commission it shall be the duty of any district attorney to institute in the proper court, and to prosecute under the direction of the attorney general all necessary proceedings for its enforcement and for the punishment of all violations thereof. United States v. Missouri P. R. Co. (C. C. D. Kan.), 5 I. C. R. 106.

IMPORTANT CASES SINCE 1908

(c) A suit to enforce an order of reparation entered by the Interstate Commerce Commission brought under the Interstate Commerce Act as amended June 29, 1906, is an action sounding in tort for damages. Naylor & Co. v. Lehigh Valley R. Co., 188 Fed. 860, 861.

(d) Section 8 of the Act does not have any relation to the jurisdiction of the Commission. It creates a substantive right of action to recover damages for the violation by a carrier of some provision of the Act, but leaves the right enforceable only in the courts. Joynes v. Penn. R. R. Co., 17 I. C. C. 361, 369.

(e) The Act to Regulate Commerce remains in full force and effect in so far as it may be inconsistent with the provisions of the Federal Control Act or other acts applicable to federal control or with any order of the President.

Johnston v. A. T. & S. F. Ry., 51 I. C. C. 356, 361.

ALL OTHER CITATIONS

Gage v. Erie R. R. Co., 33 I. C. C. 593, 594; Postal Telegraph-Cable Co. v. W. U. Telegraph Co., 59 I. C. C. 512, 516; Lustig-Burgerhoff Co. v. Director General, 74 I. C. C. 395; Interchange Mileage Ticket Investigation, 77 I. C. C. 200, 202; McElvain v. Railroad, 151 Mo. App. 126, 151, 131 S. W. 736; Assigned Cars for Bituminous Coal Mines, 80 I. C. C. 520, 556; A. G. S. Ry. Co. v. McCleskey, 160 Ala. 630, 634, 49 So. 433.

V. AMENDMENTS.

§1. War Legislation.

See Government Control; War Legislation.

IMPORTANT CASES SINCE 1908

(a) The amendment to the act declares a public policy established by Congress, which it is the duty of the Commission to protect and perpetuate. Blakely Southern R. R. Co. v. A. C. L. R. R. Co., 26 I. C. C. 344, 349.

(b) Where there are two acts on the same subject the general rule is undoubtedly to give effect to both if possible, but if the two acts are repugnant in any of their provisions the latter act, even though it may contain no repealing clause, will operate to reveal the former act to the extent of the repugnancy. Colonial Nav. Co. v. N. Y., N. H. & H. R. R. 50 I. C. C. 625, 630.

(c) Both the legislative history and the provisions of the transportation act, 1920, make it clear that the purpose of Congress in this legislation was broader than the mere regulation of individual railroads. Congress was endeavoring to assure an effective transportation system for the nation, and the principle was recognized that the various carriers, while independently owned, are nevertheless to a large extent interdependent, and that they owe a duty to one another in the public interest. New England Divisions, 66 I. C. C. 196, 198.

(d) Contention that the language of the federal control act did not give power to the President or the Director General to assess a penalty, and that Congress could not have given either of them that power because the imposition of a penalty is a legislative function which can not be delegated. HELD: The Director General was authorized to inaugurate any reasonable and just regulation and practice which he might find necessary to eliminate the abuse of excessive and unreasonable detention of freight cars. American Wholesale Lumber Asso. v. Director General, as Agent, 66 I. C. C. 393, 396.

(e) The word "deficit" as used in paragraph (a) of section 204 of the Transportation Act, 1920, construed to mean a deficiency or decrease in a carrier's railway operating income for that portion (as a whole) of the period of federal control during which it operated its own railroad as compared with its average railway operating income of the corresponding portions of the test period. Construction of the Word "Deficit," 66 I. C. C. 765.

(f) In the definition of the word "carrier" in paragraph (a) of section 204 of the Transportation Act, 1920, Congress meant those carriers which sustained losses in income under private operation in the federal control period as compared with the test period Construction of the Word, "Deficit," 66 I. C. C. 765, 771.

(g) The valuation of the carriers, pursuant to Interstate Commerce Act, § 19a, as amended by Transportation Act, 1920, § 433, required to be made for the purposes of section 15a, enacted by Transportation Act of 1920, § 422, of all the real property of the carriers used in the service of transportation, includes the property used in intrastate commerce as well as that in interstate commerce. Railroad Commission of Wisconsin v. Chicago, B. & Q. R. Co., 42 Sup. Ct. 232.

(h) Transportation Act, 1920, § 402, which amended Interstate Commerce Act, § 1, by adding new paragraphs thereto, must be read in connection with it and with the other amendments of it, which show an intention to regulate interstate and foreign commerce, and to affect intrastate commerce only as incidental to such regulation, so that the broad language of the added paragraphs will not be considered to depart from such purpose, unless they so plainly declared. State of Texas v. Eastern Texas R. Co., 42 Sup. Ct. 281.

ACTIONS AT LAW

See Allowances §14½; Bills of Lading IV, §15; Cars and Car Supply §3, §33; Courts I; Demurrage §22; Discrimination §16; Freight Charges; Interstate Commerce Commission II, VII, VIII; Loss and Damage §10, §13½; Overcharges; Reparation §23; Undercharges; War Legislation.

CASES 1887-1908

(a) Money paid without knowledge that it was a wrongful exaction, but in the belief of the truth of the positive assertions of the one to whom it was paid that it was rightful, is not paid voluntarily, and it may be recovered back. Cook v. Chicago, R. I. & P. R. Co. (Iowa), 3 I. C. R. 383.

(b) Permitting the recovery of attorneys' fees on recovery against a railroad company for violation of a statute regulating rates does not violate the constitutional provision as to equality. Burlington, C. R. & N. R. Co. v. Dey (Iowa), 3 I. C. R. 584.

(c) No right of action can spring out of an illegal contract, and this rule applies, not only when the contract is expressly illegal, but whenever it is opposed to public policy. Cleveland, C. C. & I. R. Co. v. Closser (Ind), 3 I. C. R. 387.

(d) The Act of February 4, 1887, § 12, as amended in 1889 and 1891, is constitutional and valid, so far as it authorizes or requires the circuit courts of the United States to use their process in aid of inquiries before the Interstate Commerce Commission. Interstate Commerce Commission v. Brimson (U. S. Sup Ct.), 545, Rev'g. 4 I. C. R. 315.

(e) The voluntary joinder of parties has the same effect for purposes of jurisdiction as if they had been compelled to unite. Merchants' Cotton Press & S. Co. v. Insurance Co. of North America (U. S. Sup. Ct.), 4 I. C. R. 499.

(f) The right of removal must be determined by the pleadings at the time the petition is filed. Merchants' Cotton Press & S. Co. v. Insurance Co. of North America (U. S. Sup. Ct.), 4 I. C. R. 499.

(g) A contract to render personal service cannot be specifically enforced. Ames v. Union P. R. Co. (C. C. D. Neb.), 4 I. C. R. 619.

(h) The terms "carelessly, wrongfully, and negligently failed and neglected" to deliver a message, used in a complaint, import ordinary and simple negligence, and nothing more. Butner v. Western U. Telegraph Co. (Okla.), 4 I. C. R. 770.

(i) To impeach a witness the evidence must reflect the opinions of the people in the community in which he lives. United States v. Howell (D. C. W. D., Mo.), 4 I. C. R. 818.

(j) Law is a rule of civil conduct prescribed by the supreme power in the state. Swift v. Philadelphia & R. R. Co. (C. C. N. D., Ill.), 5 I. C. R. 116.

(k) A declaration seeking to recover back unreasonable rates imposed by a carrier upon shipments after the Interstate Commerce Act became effective is bad in failing to aver that no rates were published and in existence as required by the law. Swift v. Philadelphia & R. R. Co. (C. C. N. D., Ill.), 5 I. C. R. 116.

(l) A private person cannot maintain a bill in equity to enforce the provisions of the Act of Congress of July 2, 1890, against unlawful restraints and monopolies, as § 7, which is the only one giving a private remedy, confers only the right to sue at law for damages. Pidcock v. Harrington (C. C. S. D. N. Y.), 5 I. C. R. 161.

(m) A common carrier is subject to garnishment of property delivered to it

for transportation, which is not in actual transit at the time of garnishment. Landa v. Missouri, K. & T. R. Co. (Mo.), 5 I. C. R. 254.

(n) Mo. Rev. Stat. 1889, chap. 74, and chap. 10, § 543, permitting garnishment of railroad companies, does not violate the federal statute regulating commerce between the states. Landa v. Missouri, K. & T. R. Co. (Mo.), 5 I. C. R. 254.

(o) Rev. Stat. 1889, chap. 74, and chap. 10, § 543, permitting garnishment of railroad companies, does not violate the federal power to regulate commerce between the states. Landa v. Missouri, Kansas & Texas R. Co., 5 I. C. R. 254.

(p) A common carrier is subject to garnishment of property delivered to it for transportation which is not in actual transit at the time of garnishment. Landa v. Missouri, Kansas & Texas R. Co., 5 I. C. R. 254.

(q) A railroad company which has an arrangement with another company by which it is enabled to forward all matter intrusted to it for transportation to a designated place, which it adopts as a station on its line, is estopped to deny its possession of property intrusted to it at such place for shipment. Landa v. Missouri, Kansas & Texas R. Co., 5 I. C. R. 254.

(r) If the court instructs the jury to find more than is absolutely necessary for them to find in order for plaintiffs to recover, such action cannot be complained of by the defendant. Seawell v. Kansas City, Ft. S. & M. R. Co. (Mo.), 5 I. C. R. 262.

(s) Special findings of fact returned by the jury, which are inconsistent with the general verdict, control the latter, and the court should either render a judgment in accordance with such findings, or set aside the findings and verdict and grant a new trial. Rouse v. Youard (Kan. App.), 5 I. C. R. 315.

(t) When the special findings of fact returned by the jury are inconsistent with the general verdict, the special findings of fact are controlling, and the court should either render a judgment in accordance with the special findings, or set the findings and verdict aside and grant a new trial. Rouse v. Youard, 5 I. C. R. 315.

(u) Where there is evidence to prove each fact necessary to support the verdict of the jury, and the jury have rendered their verdict on such evidence, this court cannot disturb the verdict, although the court might have come to a different conclusion on the whole evidence. Rouse v. Youard, 5 I. C. R. 315.

(v) Where a person has been educated in a particular profession or trade, as a physician, surgeon, veterinarian, or engineer, or the like, he is presumed to understand thoroughly the questions pertaining to his profession or trade; he is termed an expert, and is qualified to give opinions on subjects coming within the scope of his profession or trade; but a witness who is not educated in any particular profession or trade is not competent to give an opinion in any matter that requires science or skill to determine, although he may have frequently seen the treatment of diseases by physicians, or operations made by surgeons, and have assisted veterinarians in the treatment of stock for diseases, and has read extensively from books and papers treating on diseases of stock. Rouse v. Youard, 5 I. C. R. 315.

(w) Testimony as to the distance between two places is not so conclusive as to render immaterial the admission of jurors who had formed an opinion upon the question which is given by a person not a surveyor, who states that he measured the distance with a surveyor's chain, but who cannot tell how long the chain was. Missouri Pacific R. Co. v. Smith, 5 I. C. R. 348.

(x) Jurors who have sat in a number of cases tried at the same term are not qualified to sit in another case involving the same issues, under the Arkansas statute providing that no person who has formed or expressed an opinion concerning the matter in controversy which might influence his judgment shall be sworn as a juror. Missouri P. R. Co. v. Smith (Ark.), 5 I. C. R. 348.

(y) Persons are incompetent as jurors in an action for the statutory penalty for overcharge for transportation, in which the main issue is as to the distance between two places, who have already sat as jurors in another case in which the same issue was involved. Missouri Pacific R. Co. v. Smith, 5. I. C. R. 348.

(z) The original waybill is admissible in evidence in a suit against a connecting carrier for refusal to deliver the goods on tender of the charges agreed on in

the bill, where, in connection with other evidence, it shows that the carrier had paid accrued charges in amount equal to the sum specified, as tending to show that it did not intend to ratify that contract. Dwyer v. Gulf, C. & S. F. R. Co., 5 I. C. R. 361.

(aa) A case before the Commission involving alleged discrimination in furnishing cars, and demanding reparation, is not barred, under section 9 of the Act by the previous institution in the State court of a suit for damages between the same parties, based on such discrimination. Gallogly v. Cincinnati, H. & D. R. Co. 11 I. C. C. 1.

IMPORTANT CASES SINCE 1908

(bb) Bill of lading provisions with respect to filing of claims or institution of suits on account of loss, damage, or delay, found to prohibit payment of meritorious claims seasonably filed with the carrier after the two year and one day period has elapsed, but in that they do not accord the shipper the right to a reasonable period after declination of a claim within which to institute suit, where carrier fails to promptly adjust claims, found unreasonable, discriminatory, and undudly prejudicial. Reasonable provision prescribed. Decker & Sons v. Director General, 55 I. C. C. 453.

(cc) Defendants may reasonably and properly provide that the period prescribed within which suit shall be instituted after the declination of a claim shall date from the definite declination in writing of the claim. Decker & Sons v. Director General, 55 I. C. C. 453, 460.

(dd) When a shipper has complied with carrier's requirements with respect to duly filing a claim, he is entitled to a reasonable period after the declination of the claim within which to institute suit if he so desires. Decker & Sons v. Director General, 55 I. C. C. 453, 460.

ADDITIONAL CHARGES AND SERVICES

See Agency; Allowances §8 (1), (2), (2½), (3), (4), (4½), (5), (6), (7), §12 (1); Assorting Packages; Back Haul; Baggage Transfer; Branch Lines; Bridge and Tolls; Car Ferry; Car Shortage; Compress Companies and Charges; Demurrage; Drayage Charges; Evidence §2½; Export Rates and Facilities; Facilities and Privileges §3, §4, §5, §6, §7, §8, §9, §10, §11, §12, §12½, §13, §14, §15, §15½, §16; Floatage; Heater Cars; Lighterage; Precooling; Reconsignment; Refrigeration; Special Rates and Service; Storage; Substitution of Tonnage; Switch Tracks and Switching §5; Terminal Facilities; Track Storage; Transfer; Warehousing; Weights and Weighing §6, §7.

IMPORTANT CASES SINCE 1908

(a) There must be a point beyond which an additional charge over the line-haul rate can be justified if additional service is in fact rendered. Second Industrial Railways Case, 34 I. C. C. 596, 602.

(b) The question whether or not a particular kind of delivery is in the nature of an additional service, or whether it is such a delivery as the carrier must perform without additional charge, is one of fact to be determined by examining the history of the rates, the nature of the service, the physical condition of the land and tracks, the custom of the carrier, and other pertinent evidence. R. R. Commissioners of Fla. v. F. E. C. Ry., 42 I. C. C. 616, 624, 626.

(c) The Commission has never intended to suggest that an additional charge would be proper for services which by long continued general custom and usage have been treated as covered by the line-haul rate. National Poultry, Butter & Eggs Assn. v. B. & O. S. W. R. R. Co., 43 I. C. C. 392, 396.

(d) A carrier is entitled to reasonable compensation for each service rendered. For services that it may render or procure to be rendered off its own line or outside the mere matter of transportation over its line, it may charge and receive compensation. Anaconda Copper Mining Co. v. Director General, 57 I. C. C. 723, 738.

(e) Carriers may generally charge for services performed for shippers, but such compensation must be provided for in lawfully published tariffs. Hart Bros. v. P. M. R. R. Co., Unrep. Op. 1875.

(f) A carrier is entitled to reasonable compensation for each service rendered. For services that it may render or procure to be rendered off its own line or

outside the mere matter of transportation over its line, it may charge and receive compensation. Anaconda Copper Mining Co. v. Director General, 51 I. C. C. 723, 738.

(g) The line-haul rate covers only one placement of the car for loading or unloading, and an additional charge may and should be made for each additional placement for that purpose. Wharton Steel Co. v. Director General, as Agent, 59 I. C. C. 11, 21.

(h) A carrier is entitled to additional revenue for additional service, other things being equal. But considerations other than distance alone are involved in a determination of the propriety of group rates. Commercial Coal Co. v. L. & N. R. R. Co., 83 I. C. C. 464, 467.

ADJACENT FOREIGN COUNTRY

See Alaska; Canada; Coastwise Traffic; Cuba; Foreign Commerce; Jurisdiction of Commission; Mexico; Porto Rico.

CASES 1887-1908

(a) The provisions of the act apply to foreign as well as domestic common carriers engaged in the transportation of passengers or property, for a continuous carriage or shipment, from a place in the United States to a place in an adjacent foreign country. Matter of Grand Trunk. Co., 2 I. C. C. 496, 503.

IMPORTANT CASES SINCE 1908

(b) The Commission's jurisdiction in connection with transportation to or from an adjacent foreign country is over that portion of the transportation within the confines of the United States. The Commission can not, therefore, prescribe joint through rates from points in Canada to points in the United States, but it can control the rates which the lines in the United States charge for services rendered within the United States. Joint rates from and to points in Canada are a convenience to the public and the shippers and should be encouraged. Carey Mfg. Co. v. G. T. W. Ry., 36 I. C. C. 203.

(c) Commission can not prescribe joint through rates from Canada into the United States, but can control rates from ports of entry to destinations in the United States. Carey Mfg. Co. v. G. T. W. Ry. Co., 36 I. C. C. 203, 206.

(d) Carriers have a right to contract for limitation of liability beyond their own lines after delivering the property to another carrier on shipments to nonadjacent foreign countries, but bill of lading should disclose the class of traffic in connection with which it is to apply, and should recite that it is not to be used on shipments to points in adjacent foreign countries. Express Classification, 1920, 59 I. C. C. 265, 269.

(e) The Commission's territorial jurisdiction carries up to the international boundary line, at which that of Congress itself halts, and as to foreign commerce is thus coextensive with that of the federal government. No act of Congress has force of law beyond that boundary line, but up to it, as everywhere else within the United States, the Interstate Commerce Act has full effect just as the Federal Control Act had effect when these shipments moved. International Nickel Co. v. Director General, as Agent, 66 I. C. C. 627, 629.

(f) The provisions of the act apply to common carriers engaged in the transportation of property by railroad from any place in the United States through a foreign country to any other place in the United States, and from or to any place in the United States to or from a foreign country, but only in so far as such transportation takes place within the United States. American Cyanamid Co. v. Director General, 69 I. C. C. 337, 343.

(g) The Commission's jurisdiction over commerce between the United States and a foreign country is limited to that part of the transportation within the United States. But all carriers parties to joint rates are jointly and severally liable for any damages resulting from their application. California Sugar & White Pine Co. v. Director General, as Agent, 73 I. C. C. 338, 339.

(h) Contention that rates from points in United States to points in Mexico, increased under General Order No. 28 of director general, were unlawful since laws of Mexico required publication of increased rates for 30 days before becoming effective, not sustained. Rates assailed were lawfully established under acts administered by this commission, which is without jurisdiction to determine whether or not they were lawfully established under laws of Mexico. Greene Cananea Copper Co. v. Director General, as Agent, 80 I. C. C. 121.

(i) In International Nickel Co., 66 I. C. C., 627, and other cases, it has been held that the commission has no jurisdiction to prescribe joint rail rates between points in United States and adjacent foreign countries; that its territorial jurisdiction is coextensive with that of the Federal Government; that commission's orders can be enforced against American lines only; that in fixing future rates it can deal only with service up to or from international border; but that as assessment of unreasonable rates is a tort it can award reparation against American lines parties to such rates to or from points in United States and points in adjacent foreign countries.

Boston Wool Trade Asso. v. A., T. & S. F. Ry. Co., 83 I. C. C. 445, 449.

(j) The commission has no jurisdiction to prescribe conditions of contract of carriage entered into at point in adjacent foreign country so far as movement to border is concerned; or of misrouting by carrier prior to receipt of shipment by American carrier at border point. This is equally applicable to shipment from nonadjacent foreign country up to time American rail carrier receives shipment. Boston Wool Trade Asso., v. A., T. & S. F. Ry. Co., 83 I. C. C., 445, 449.

I. CONTROL AND REGULATION.

See Control and Regulation.

§1. Jurisdiction of Commission.

See Interstate Commerce Commission I; Jurisdiction of Commission.

(1) Inquiry into Reasonableness.

CASES 1887-1908

(a) A carrier always has the power to put up rates, but the fact that it has the power scarcely affords sufficient reason for the institution of proceedings to determine whether other rates than those now existing would be sustainable. Harris v. Duval, Receiver, F. Ry. & Navigation Co., 2 I. C. C. 514.

(b) The act provides that all interstate rates shall be filed with the Commission, and requires annual reports of the operations and financial condition of all interstate carriers. When a schedule is filed announcing an advance of general application, for which no apparent reason exists, such action is a proper subject of investigation, and if it thereupon appears that the advance is unwarranted the Commission should exhaust whatever power it has to correct the injustice. In the Matter of Proposed Advances in Freight Rates, 9 I. C. C. 382.

IMPORTANT CASES SINCE 1908

(c) In this connection it is wise to bear in mind that in proceedings under section 15, relating to suspended schedules proposing increases of rates, the issue is not solely whether the rate is just and reasonable, as appears from the fact that the section authorizes the Commission to enter upon a hearing concerning the "propriety" of a rate. This term is comprehensive enough to cover all the considerations entering into a rate, such as its reasonableness per se, its relative reasonableness, or its preferential or prejudicial character. The provision as to burden of proof would seem to mean simply that when the new rate is an increased rate, as to one issue only, namely, whether it is just or reasonable, the burden of proof shall be on the carrier. while, when the rate is an increased rate this particular issue is necessarily a part of the case, it does not follow that it must be the sole issue. Even though the Commission is always to consider whether an increased rate is just and reasonable, it is not precluded from considering the rate from other viewpoints, such as that of its preferential or discriminatory character. Wickwire Steel Co. v. N. Y. C. & H. R. R. Co., 30 I. C. C. 415, 420.

(d) The commission may institute an investigation without first suspending the tariffs involved. The Fifteen Per Cent Case, 45 I. C. C. 303, 310.

(e) Contention that rates from points in United States to a point in Mexico, increased under General Order No. 28 of director general, were unlawful since laws of Mexico required publication of increased rates for thirty days before becoming effective not sustained. Rates assailed were lawfully established under acts administered by commission, which is without jurisdiction to determine whether or not they were lawfully established under laws of Mexico. Greene Cananea Copper Co. v. Director General, as Agent, 80 I. C. C. 121.

§1(2). **Power to Require Advance.**

CASES 1887-1908

(a) The Interstate Commerce Commission cannot compel a railroad company to increase its rates, which are supposed to be so low as to be ruinous to itself or its rivals. Re Chicago St. P. & K. C. R. Co. (Com.), 2 I. C. R. 137.

(b) The Commission has no power to

compel a railroad company to increase its rates, which are supposed to be so low as to be ruinous to itself or to its rivals. Re St. Paul, Chicago & Kansas City R. Co., 2 I. C. C. 137.

(c) The Commission has no power and authority in this proceeding to order other carriers not parties to this proceeding to raise their rates on pig iron transported from Youngstown and Cleveland, Ohio, to New England points in order to overcome the difference in the cost of production of pig iron now existing against petitioner; nor would the Commission enter upon the consideration of any such subject in a proceeding to which such carriers were not parties and in which such localities sought to be burdened with higher rates, for example. Youngstown and Cleveland, Ohio, had no opportunity to be heard; and the findings of fact in the present proceeding, which show that the rates already charged petitioner by the defendants are in themselves, as well as relatively, just and reasonable rates, demonstrate that the Commission could not order the defendants to lower these rates from Poughkeepsie to all points on the Boston & Albany Road one half, and to Holyoke nearly one half, in order to overcome the difference in the cost of production of pig iron now existing against petitioner. The Poughkeepsie Iron Co. v. N. Y. C. & H. R. Co., 3 I. C. R. 248.

C. 302, 303; Lumber from Arkansas City, Ark., 43 I. C. C. 423, 427; The Fifteen Per Cent Case, 45 I. C. C. 303, 317.

§1 (5) To Suspend Reduction.

IMPORTANT CASES SINCE 1908

(a) The Commission decides that it has the power to suspend reductions of rates in any case where such suspension will operate to prevent an apparent discrimination. However, a prima facie case clearly and affirmatively persuasive should be presented before the power to suspend is exercised. This, not having been done, the complaint is dismissed. In Re Suspension of Rates on Packing House Products, 21 I. C. C. 68, 70.

§1. (6) Elimination of Water Competition.

IMPORTANT CASES SINCE 1908

(a) Act to Regulate Commerce, §4, providing that when a carrier by rail shall, in competition with a water route, reduce rates, it shall not be permitted to increase such rates unless after hearing by the Interstate Commerce Commission it shall be found that the proposed increase rests on changed conditions other than the elimination of water competition. HELD: When construed in the light of the purpose of its enactment, of the earlier paragraphs of the section, and of other sections in the Act to Regu-

late Commerce desired to prevent unjust discrimination, not to apply where reduction in rates was, with the approval of the commission, given after hearing, by order entered on application of the carrier for relief from operation of the section, the specific purpose of which was to prevent discrimination by charging less for the longer haul, unless in the opinion of the commission the circumstances made it just. Skinner & Eddy Corp. v. V. S., 39 Sup. Ct. Rep 375.

(b) Changed conditions found by Interstate Commerce Commission HELD to be something other than the "elimination of water competition," which Congress intended should not justify raising rates reduced by a carrier by rail in competition with a water route. Skinner & Eddy Corp. v. V. S., 39 Sup. Ct. Rep. 375.

§2. Limitation of Power.

IMPORTANT CASES SINCE 1908

(a) Commission has no authority to approve rate increases with a view to stimulating business. Five Per Cent Case, 31 I. C. C. 351, 426.

(b) When investigation precedes the suspension of proposed increased rates, the Commission cannot, as a matter of law, require the cancellation of such rates at the time. The Fifteen Per Cent Case, 45 I. C. C. 303, 317.

ALL OTHER CITATIONS

In Re Advances in Rates, Eastern Case, 20 I. C. C. 243, 248; Wharton Steel Co. v. D., L. & W. R. R. Co., 25 I. C. C. 303, 313; Coal Rates from Oak Hills, Colo., 30 I. C. C. 505, 508; Harmon & Co. v. N. Y., N. H. & H. R. R., 50 I. C. C. 455, 456.

II. JUSTIFICATION OF INCREASE.

§2½. In General.

CASES 1887-1908

(ab) Carriers making an advance in rates should be able to present a satisfactory justification of such advance, particularly when the old rates have been of many years' standing and the advance is great and the traffic affected is of large and constant volume and of vital importance to a large section of country. Railroad Commission of Florida v. S. F. & W. R. Co., 3 I. C. C. 688, 700.

(cde) An increase which results solely from the withdrawal of a lower export rate, or from the maintenance of a published tariff, cannot ordinarily be condemned as unlawful. Railways are entitled to share in the general prosperity of the country; they have suffered severely in the past and should be allowed to recuperate while that prosperity continues; but it does not follow necessarily that they are entitled to advance former rates which were not reduced on account of financial depression. Re Proposed Advances in Freight Rates 9. I. C. C. 382.

(fg) Commission instituted an investigation as to advances in freight rates. Under the competitive conditions heretofore prevailing tariff rates on grain and grain products from Chicago to New York have not exceeded 17½c during the last four years, except for a brief period, while the actual rates have been materially and sometimes greatly below that figure. The legality of the recent advance of this rate to 20c depends upon two considerations: First, whether the increased rate is reasonable, having reference to the cost and value of the service, and as compared with rates on other commodities; and, second, whether it is unreasonable in the absolute, regarded as essentially a tax upon the people who ultimately pay the transportation charge. A rate of 17½c on grain and grain products from Chicago to New York is not shown to be unremunerative or disproportionate as compared with other rates. Whether tested by cost of movement, by what the carriers have voluntarily accepted in the past, or by comparison with rates on somewhat similar kinds of traffic, it is not unprofitable nor unreasonably low. It is from 2c to 5c higher than the rates actually received in recent years, and nothing appears in the financial condition of the carriers to justify a greater advance. HELD: Respondent carriers should readjust their rates on grain and grain products in accordance with the views herein expressed on or before May 15, 1903. In the Matter of Proposed Advances in Freight Rates, 9 I. C. C. 382.

(fga) Transportation by rail is a quasi-public service, not to be sold to the highest bidder, and the charges therefor are not controlled by the law of supply and demand. Freight rates do not in fact rise and fall with changes in prices of market commodities, though they are often affected by commercial conditions; and when reductions have

been made on account of commercial depressions, it is difficult to see why corresponding advances may not properly be made with the return of business prosperity. In the Matter of Proposed Advances in Freight Rates, 9 I. C. C. 382.

(h) When a railroad company advances a rate which has been for sometime in force, the fact of its continuance is in the nature of an admission against that company, which tends to show the unreasonableness of the advance. Central Yellow Pine Asso. v. Illinois C. R. Co., 10 I. C. C. 505.

(ij) The advances in freight rates by defendants were not justified by the increased cost of operating the roads, where, although the operating expenses have constantly increased, they have been enlarged by the inclusion therein of large expenditures for permanent improvements, and defendants' gross earnings have increased from year to year to such extent as to result in a constant increase of net earnings. Central Yellow Pine Asso. v. Illinois C. R. Co., 10 I. C. C. 505; Tift v. Southern R. Co., 10 I. C. C. 548.

(kl) Carriers have no right to advance a rate which is already reasonably high and which yields an adequate return for the service rendered, solely because additional revenue is needed. Tift v. Southern Ry., 10 I. C. C. 548.

(m) Where an advance in rates which have been long maintained and the evidence shows that the traffic affected is large, important and constantly increasing, the advance will be held unjust, unless it is satisfactorily explained. Tift v. Southern Ry., 10 I. C. C. 548, 581.

IMPORTANT CASES SINCE 1908

(n) Roads should not be permitted to make a general rate increase until they have eliminated unlawful concessions, rebates, and preferences. Industrial Railways Case, 29 I. C. C. 212, 218.

(o) Before they may fairly ask the general public to share further in casting their burdens, the railroads must themselves properly conserve their sources of revenue by making every service rendered by them contribute reasonably to their earnings. Industrial Railways Case, 29 I. C. C. 212, 218.

(p) When an important and long-standing rate relation is sought to be changed, the justification must be clear and convincing. Reshipping Rates on Grain from Omaha, 32 I. C. C. 590, 594.

(q) Rates cannot be justified by mere general statements made by a witness. Some concrete and persuasive evidence must ordinarily be adduced. Lumber from Michigan Points, 36 I. C. C. 184, 189.

(r) The consideration of a general increased rate case is necessarily a study of tendencies. The Fifteen Per Cent Case, 45 I. C. C. 303, 314.

(s) Increases in individual rates must of necessity occur under any plan of unification where wide disparities and inconsistencies exist, but these are justified only to the extent that they are necessary to secure a harmonious rate structure and to avoid any undue depletion of carriers' revenues. Memphis-Southwestern Investigation, 77 I. C. C., 500.

§3. Burden of Proof.

See Burden of Proof; Evidence I.

CASES 1887-1908

(a) Carriers making an advance in rates should be able to present a satisfactory justification of such advance, particularly when the old rates have been of many years' standing and the advance is great and the traffic affected is of large and constantly increasing volume and of vital importance to a large section of country. R. R. Comm. of Fla. v. Savannah, F. & W. R. Co., 3 I. C. R. 688.

(b) A satisfactory justification must be made where large advances are made on old rates of long standing, where the traffic affected is large and constantly increasing and of vital importance to a large section of country. Railroad Commission of Florida v. Savannah, F. & W. R. Co. (Com.), 3 I. C. C. 688.

(c) Under the competitive conditions which heretofore prevailed, tariff rates on grain and grain products from Chicago to New York have not exceeded 17½ cents during the last four years, except for a brief period, while the actual rates have been materially and sometimes greatly below that figure. The legality of the recent advance of this rate of 20 cents depends upon two considerations: First, whether the increased rate is reasonable, having reference to the cost and value of the service, and as compared with rates on other commodities; and, second, whether it is reasonable in the absolute, regarded as essentially a tax upon the people who ultimately pay the transportation charge. Re Proposed Advances in Freight Rates 9 I. C. C. 382.

(d) Rates in force on freight articles from St. Louis, Mo., to Texas common points prior to March 15, 1903, afforded reasonable compensation to the carriers, and as they had been in effect for a long period, and the material advances of such rates on that date were made through concerted action of the carriers, justification for the advances should be clearly shown; but this is a general investigation, in which no complainant is demanding relief from some particular rate, and no particular rates have been investigated, and it does appear, moreover, that the financial condition of the respondents, especially those operating in Texas, is not favorable. While impressed with the belief that these advances in rates are improper, the Commission does not feel warranted in making an order condemning such advances in this proceeding. Rates from St. Louis to Texas Common Points 11 I. C. C. 238.

IMPORTANT CASES SINCE 1908

(e) For each rate, a carrier offers and obligates itself to perform a certain amount of service. If the service so offered and for a long time performed in consideration of that rate includes taking the property transported from a given point and delivering it at a given point, the delivery at that point is in no sense a "free service." The carrier may increase the rate or it may curtail the service performed for that rate, but

if such action is challenged it must bear the burden of showing that the new rate of service is reasonable and free from unjust discrimination. Rates in Chicago Switching District, 34 I. C. C. 234, 242.

(f) The burden resting upon carriers under section 15 of the Act to Justify Increases in the rates proposed by them and under suspension has always been regarded by the Commission as a substantial requirement in the law which can not be met by a merely perfunctory showing by the carriers. The propriety of such rates must be sustained by evidence of a probative nature showing satisfactory reasons for the increase and that the higher rates are reasonable. Echols & Co. v. A. & W. Ry., 34 I. C. C. 644, 646.

(g) "Propriety" is a broader and more inclusive term than "reasonable." 1915 Western Rate Advance Case, 35 I. C. C. 497, 589.

(h) While section 15, in defining the power of suspension, gives the Commission jurisdiction over any new "rate, fare, charges classification regulation or practice," the provision in the same section specifies only the "increased rate" in defining the carrier's duty as to burden of proof in such cases. The intention of Congress, however, as gleaned from the law and from the mischief to be remedied was to shift the burden of proof to the carrier to justify any change disadvantageous to the shipper existing at the time suspended schedule is filed. "Rate," "fare," and "charge," broadly speaking, denote the compensation of the carrier; "classification," "regulation," and "practice" are merely incidents of a rate, fare, or charge which serve to determine the amount, availability, or elasticity thereof, or of the value of the whole service rendered. By placing the burden of proof upon the carrier to justify a proposed increased rate, Congress placed the burden of proof upon the carrier to justify the propriety of stop-over changes. Stopping of Cars in Transit to Complete Unloading, 36 I. C. C., 130, 132.

(i) The burden of proof to show that a rate increased after January 1, 1910, is just and reasonable is not removed by a general permission of the Commission which did not approve any specific rate as reasonable in itself or as properly adjusted with respect to other rates; for it is the total rate which must be justified and not the amount of the increase. Globe Soap Co. v. A. & S. Ry. Co., 40 I. C. C. 121, 123.

(j) It is as much an increase of rate to give less service for the same amount as to charge a greater amount for the same service. Consolidation Coal Co. v. C. & O. Ry. Co., 60 I. C. C. 763, 767.

(k) The law places upon carriers the burden of showing that proposed increased rates are reasonable and otherwise lawful. The fact that they are made in accordance with a basis of long standing, while entitled to due consideration, is not of itself sufficient justification. Class and Commodity Rates from Illinois and Other States, 75 I. C. C. 59, 60; Silica from Southern Illinois, 73 I. C. C. 406, 408, 409; Butter Eggs and Dressed Poultry from Texas, 73 I. C. C. 466, 468.

(l) Explanation of increases is not justification. Linseed Oil from Edgewater, N. J., to C. F. A. Points, 74 I. C. C. 153, 154.

(m) Proposed increased rates on cement from Oglesby, La Salle, and Dixon, Ill., and Hannibal and Ilasco Junction, Mo., to certain Kentucky junction points found not justified. Carriers made no attempt to justify the proposed rates, which would result in violations of both the aggregate of intermediate and long and short haul provisions of section 4 of the Act, but merely explained the circumstances which led to their publication. Cement from Illinois and Mississippi Points, 77 I. C. C. 164.

(n) The commission is not impressed by a desire to establish increased rates upon wholly technical grounds, and the fact that carriers failed to take full measure of increase which it authorizes can not, in the absence of any showing that existing rates are unduly low or unlawful, sustain the burden of proof which rests upon them. Fruits, Melons, and Vegetables from the Southwest, 77 I. C. C., 180, 182.

(o) Where rates have been increased January 1, 1910, burden of proof to show their reasonableness is upon defendant carriers. Elem Coal Co. v. L. V. R. R. Co., 80 I. C. C. 647.

C. 71; Class Rates to and from Delaware Division Stations, 81 I. C. C. 758, 761; Minimum Class Rates from Atlantic Seaboard, 83 I. C. C. 711.

§4. Effect.

IMPORTANT CASES SINCE 1908

(a) Where the differences in distance between competitive localities are relatively great a 15 per cent increase would seriously affect competitors in a common market. The Fifteen Per Cent Case, 45 I. C. C., 303, 316.

(b) The Commission's sanction of a general adjustment of rates does not carry with it the approval of any particular rate under that adjustment. Globe Soap Co. 40 I. C. C., 121. Steel & Tube Co. v. Director General, as Agent, 61 I. C. C., 526, 529.

(c) Any general increase necessarily disturbs pre-existing rates, either by varying amounts, if it be a percentage increase, or by varying percentages, if it be a flat increase. Wofford Oil Co. v. Director General, 66 I. C. C., 509, 510.

§5. Right to Advance.

(½). In general.

CASES 1887-1908

(a) An increase which results solely from the withdrawal of a lower export rate, or from the maintainance of a published tariff cannot ordinarily be condemned as unlawful. While railroads have suffered severely in the past, and should be allowed to recuperate while prosperity continues it does not follow necessarily that they are entitled to advance former rates which were not reduced on account of finanicial depressions. In the Matter of Proposed Advances in Freight Rates, 9 I. C. C., 382.

(b) The legality of the recent advance to 20 cents of the tariff rates on grain and grain products from Chicago to New York, which have not exceeded 17½ cents during the last four years, except for a brief period, while the actual rates have been materially and sometimes greatly below that figure, depends upon two considerations: First, whether the increased rate is reasonable, having reference to the cost and value of the service, and as compared with rates on other commodities; and, second, whether it is reasonable in the absolute, regarded as essentially a tax upon the people who ultimately pay the transportation charge. In the Matter of Proposed Advances in Freight Rates, 9 I. C. C., 382.

IMPORTANT CASES SINCE 1908

(c) The ordinary considerations of justice require that money invested in railroads by invitations of the government should be allowed a fair return. This does not mean that the Commission should permit rates which will guarantee all railroad investment, nor which will guarantee any railroad investment at all times but it should allow rates which will yield to this capital as large a return as it could have obtained from other investments of the same grade. If rates formerly in effect have become insufficient then higher rates should be permitted. Rates should be such as to render possible a high class, not an extravagant, transportation service. In Re Advances in Rates—Eastern Case, 20 I. C. C., 243, 262.

(d) Within certain limits it may be the right of the Commission to consider the question of advanced rates in Official Classification territory as one of public policy and not one of strict legal right. If the true interest of the whole commuity requires it the railroads might perhaps be allowed fair earnings with which to aid their properties in addition to the payment of return to their stockholders even though there is not strict requirement of law which commands it. In Re Advance in Rates—Eastern Case, 20 I. C. C., 243, 266.

(e) Carriers are not justified in increasing rate claimed to be unduly low which is established under compulsion of competitive conditions. Grain Rates in C. F. A. Territory, 28 I. C. C., 549, 557.

(f) Rates might properly be increased where existing rates do not afford adequate compensation for added risk and liability. The Cummins Amendment, 33 I. C. C., 682, 697.

(g) Reasonableness of proposed increases can not be established by pointing to fourth section violations that are thereby obviated. Rates between Shreveport and Texarkana, 32 I. C. C., 180, 182.

(h) That proposed increased rates may eliminate fourth section departures does not establish that the rates published are reasonable. Ice Rates to Long Branch, 35 I. C. C., 73, 75.

(i) The fact that a general adjustment of the rates on a certain railroad has been approved by the state railroad commissions of certain only of the states traversed, is not sufficient to justify the increase of a rate attacked. Rosenblum v. B. & M. R. R., 43 I. C. C., 435, 437.

(j) The Commission can not say that merely because a higher intrastate rate exists that an increase of an interstate rate to meet the state-made rate is justified, even though the transportation conditions as to distance and territory are similar. Old Vincennes Distillery Co. v. B. & O. S. W. R. R. Co., 45 I. C. C., 447, 451.

(k) Rates in effect via routes over which traffic seldom or never moves are known as paper rates and increases in such rates are paper increases. Alabama Packing Co. v. L. & N. R. R., 47 I. C. C., 524, 526, 528.

(l) Fact that the combined passenger and newspaper traffic has increased to a point where the transportation facili-

ties are inadequate does not furnish any justification for proposed rates on newspapers transported in passenger cars between stations on the Kansas City, Kaw Valley & Western Ry., Kansas City, Mo., to Lawrence, Kan., inclusive. Newspapers on Passenger Cars, 57 I. C. C., 743.

(m) Mere acquiescence of shippers in increased rates proposed by carriers does not afford sufficient justification for their approval. Lion Coal Co. v. U. Ry. Co., 60 I. C. C., 674, 681.

(n) The Commission has required the cancellation of suspended schedules because of threatened violations of the long-and-short-haul provision of the fourth section of the act. Salt from Louisiana Mines to Chicago, 66 I. C. C., 81, 91.

(o) The requirements of section 15a of the Act may not be defeated or jeopardized by the action of particular rail carriers seeking to augment their own net earnings, irrespective of the effect of rate changes adverse to the carriers of the country generally, or of a large territorial group. Transcontinental Cases of 1922, 74 I. C. C., 71.

C., 71; Iron and Steel Articles, 89 I. C. C. 17.

§5. (1) To Avoid Reducing Other Rates.

IMPORTANT CASES SINCE 1908

(a) The fact that unless the rates to several communities are increased another and competing community will be entitled to lower rates than it now enjoys is no justification for the increase. Texas Common Point Case, 26 I. C. C., 528, 532.

(b) Where existing rates resulted in violations of sections 3 and 4, and making of other reductions would bring about further departures, held advances were justified. In Re Advances on Knitting-Factory Products, 25 I. C. C., 634, 639, 640.

§5. (1½) Decline in Tonnage.

ALL CITATIONS

Lumber Rates, 31 I. C. C., 464, 465; Class Rates from Kansas Points, 78 I. C. C. 741.

§5. (2)To Equalize Rates.

See Equalization of Rates; Relative Rates.

IMPORTANT CASES SINCE 1908

(a) The fact that rates are in-

creased so as to effect a differential, or so as to more equitably equalize rates between competing coal fields, and that such increase is made without regard to the reasonableness of the resulting rates, may not be considered as conclusive or in anywise determinative as to the justness or reasonableness of the rates in themselves. The Commission is not concerned with the increase in the rates, but with the increased rate. In Re Advances on Coal to Lake Ports, 22 I. C. C. 604, 612.

(b) That a readjustment between adjoining towns is necessary is not in itself a justification for advancing rates to one of them. Lumbermens' Exchange of St. Louis v. A. & S. R. R. R. Co., 24 I. C. C. 220, 222.

(c) The Commission repeatedly has sanctioned increases of rates for the purpose of bringing such rates into harmony with the established rate structure. Westbound Lake and Rail Knit Goods Commodity Rates, 32 I. C. C., 54, 57.

(d) When investigating the propriety of increased rates under suspension the Commission, in addition to the question of their reasonableness, may consider to what extent they may involve unlawful discriminations and preferences in their relation to other rates; but to withhold approval of proposed rates that are found to be reasonable and in harmony with the general interstate rate adjustment in the territory in question solely because the state rates are on a lower level would put both the carriers and the Commission under the control of state authorities in many cases involving interstate rates. Danville, Va., Class and Commodity Rates, 38 I. C. C., 742, 745.

(e) Proposal to increase the rate on scrap iron and steel south-bound from Cairo and Metropolis, Ill., to St. Louis, Mo., to the basis of the southbound rate from Brookport and Thebes, Ill., and to increase the rate northbound from St. Louis to all four points to the same basis, found justified. Proposed increases will remove an inconsistent adjustment; the resulting rates will compare favorably with rates on the same commodities in the same general territory; and the same rates will apply in both directions. Scrap Iron and Steel between River Crossings, 77 I. C. C. 32.

C., 732; Building and Roofing Paper from Indiana and Ohio, 77 I. C. C., 85; Grain, Grain Products and Feeds, 78 I. C. C. 209. Imported Wool from New York and Boston 80 I. C. C. 309: Class Rates from Points in Kansas, 80 I. C. C. 709; Brick and Clay Products from Texas to Arizona, 81 I. C. C. 20; Grain and Grain Products, 81 I. C. C. 267, 440; Benzol and Blended Gasoline, 81 I. C. C. 735; Grain from Memphis, 80 I. C. C., 138; Grain and Grain Products between Stations in Iowa and Minnesota and Milwaukee, Wis., and Chicago and Peoria, Ill. group points, 81 I. C. C., 267; Grain from Minnesota and South Dakota to Mississippi Valley, 81 I. C. C., 440.

§5. (2½) Fourth Section Violations.

See Long and Short Hauls.

IMPORTANT CASES SINCE 1908

(a) A rate established from an intermediate point in contravention of the fourth section does not constitute a valid justification for increasing the rate from the point to which it is intermediate. Brick from Michigan City, Ind., 42 I. C. C., 509, 510.

(b) The Commission has required the cancellation of suspended schedules because of threatened violations of the long-and-short-haul provision of the fourth section of the act. Salt from Louisiana Mines to Chicago, 66 I. C. C., 81, 91.

(c) Proposed increased rates on iron and steel articles rated "special iron" in southern classification, from Ohio River points, St. Louis, Mo., and points taking the same rates, to points in Carolina territory, Augusta, Ga., and south Atlantic ports and points taking the same rates, designed as a temporary adjustment, the primary purpose of which is to remove fourth section violations at the Virginia cities, found justified in so far as such increased rates do not exceed the existing Virginia cities rates. Iron and Steel Articles from Ohio & Mississippi River Crossings, 73 I. C. C., 753.

ALL OTHER CITATIONS

Rice Products to Jackson, Miss., 44 I. C. C., 364; Iron Ore Rate Cases, 44 I. C. C., 368, 378; Lumber from Arkansas Points, 50 I. C. C., 118; Fort Smith Com. Co. v. K. C. Ry., 50 I. C. C., 136; Kentucky Lumber Co. v. St. L. S. F. Ry. Co., 50 I. C. C., 22; Lumber from Arkansas Points, 50 I. C. C. 118; Garrett Lumber Co. v. C. & O. 55 I. C. C., 530; Iron and Steel Articles from Boston and Other Points to Maine Central Railroad Destinations, 66 I. C. C., 100; Salt from Louisiana Mines to Chicago, 66 I. C. C. 81, 91; West Kentucky Coal Bureau v. I. C. R. R. Co., 66 I. C. C. 228; Cotton and Cotton Linters from Mississippi Valley 69 I. C. C. 318, 334; Lumber from California to Minnesota and Wisconsin, 69 I. C. C. 721; Increased Rates on Hosiery, 73 I. C. C. 477; Farm Wagons to Louisiana Points, 73 I. C. C. 547; Lime Between C. F. A. Points and from C. F. A. to Canadian Points, 74 I. C. C. 105; Farm Wagons from Lynchburg to Kentucky, 74 I. C. C. 255; Potatoes from Stations in Colorado, 80 I. C. C. 191: Benzol and Blended Gasoline, 81 I. C. C. 735; Grain and Grain

Products from Illinois, 83 I. C. C. 543; Grate Bars to Memphis, 88 I. C. C. 701; Burlap Bags and Iron and Steel Articles, 89 I. C. C. 131; Increased Rates on Petroleum and Its Products, 83 I. C. C. 98.

§5. (3) To Preserve Commodity Relationship.

See Classification §17, §22; Comparative Rates; Evidence §12; Relative Rates.

CASES 1887-1908

(a) Complainant attacked as unreasonable rates charged on coal, carloads, from mines in Indian Territory and southern Arkansas to Dallas, Tex. These rates were increased from $1.25 to $1.50 per ton on slack coal and from $1.85 to $2.10 per ton on mine run coal. Prior to this advance the rates formerly in effect were published to meet the competition of fuel oil, which latter is not now used for that purpose. HELD: Rates attacked unreasonable to extent they exceeded $1.90 on lump coal and $1.40 on slack coal. Dallas Freight Bureau v. G., C. & S. F. Ry., 12 I. C. C. 223.

IMPORTANT CASES SINCE 1908

(b) Cancelling a commodity rate and reestablishing a higher class rate in order to remove a discrimination and bring rates into a proper relationship held to be justified. In Re Advance on Apples, 24 I. C. C. 38, 42.

(c) An advance in rates correcting an improper relation between two articles is justified. In Re Advances on Trunk-covering Material, 25 I. C. C. 685.

(d) There are cases where increased rates may be proper to secure uniformity in rate relationship, but it is to be remembered that uniformity may be secured in many cases by reduced rates as well as by increased rates. The mere fact that a relation of rates requires readjustment in the interest of uniformity is not proof that rates increased to the level of relatively higher rates are reasonable. Rates on Lumber, 32 I. C. C. 494, 496.

(e) Proposed increased rates are intended to equitably distribute charges among different types of vehicles and to secure additional revenue. Theory not condemned, but increase held unnecessary. New York-Jersey City Ferry Rates, 37 I. C. C. 103, 112, 113.

(f) Proposed increased rates on oyster shells, crushed or ground, from Biloxi, Miss., and other points in Mississippi and Louisiana, to New Orleans, La., Mobile and other Alabama points, and Orange Grove, Miss., so as to create a rate distinction between whole and powdered shells on the one hand, and crushed or ground shells on the other, found justified. Crushed or ground shells are much more valuable than either whole or powdered shells, and the rates proposed compare favorably with rates maintained between other points in same general territory. Oyster Shells from Biloxi, 74 I. C. C. 585.

(g) Proposed establishment of l. c. l. commodity rate on grain and products from Memphis, Tenn., to Birmingham, Ala., and group points, higher than applicable class D rate, so as to restore parity between c. l. and l. c. l. rates on this commodity, found not justified. It is unusual, particularly in the South, for a commodity rate on grain to exceed class D, and establishment of such higher commodity rate would mean application of class D. rate prescribed by commission to but minor portion of articles rated in that class. Grain from Memphis, 80 I. C. C. 138.

C. 569; Linseed Oil from Edgewater (Undercliff), N. J., to C. F. A. Points, 74 I. C. C. 153; Rates on Clams, Mussel, and Oyster Shells, 74 I. C. C. 245; Waste Resinous Wood, 77 I. C. C. 448.

§5. (4) Unreasonably Low Prior Rate.

See Evidence §43.

CASES 1887-1908

(a) Transportation by rail is a quasi-public service, not to be sold to the highest bidder, and the charges therefor are not controlled by the law of supply and demand. Freight rates do not in fact rise and fall with changes in prices of market commodities, though they are often affected by commercial conditions; and when reductions have been made on account of commercial depressions, it is difficult to see why corresponding advances may not properly be made with the return of business prosperity. In the Matter of Proposed Advances in Freight Rates, 9 I. C. C. 382.

(b) Carriers have no right to advance a rate which is already reasonably high and yields an adequate return for the services rendered, solely because additional revenue is needed. Central Yellow Pine Asso. v. Illinois C. R. Co., 10 I. C. C. 505; Tift v. Southern R. Co., 10 I. C. C. 548.

IMPORTANT CASES SINCE 1908

(c) If unduly low or unremunerative rates have in the past been established to meet conditions that obtained at the time of their inception, and if conditions have changed so that there is no justification for maintaining such rates, they ought to be increased to a basis where they will be remunerative. Proposed Increases in New England, 49 I. C. C. 421, 426.

§5 (5) Congestion of Traffic.

IMPORTANT CASES SINCE 1908

(a) It is clear that the congestion of traffic and the detention of cars in connection with export traffic at New Orleans, La., arising partly from rail-carrier inefficiency, partly from indifference of the water-carriers to the losses which fall upon others than themselves, and partly from short-sighted detention of cars by shippers, cannot be remedied by any increase in the rates for line transportation. If the charge for the detention of cars is to be found in the rate for the line transportation of property, then every shipper paying such rate will have a justification for such delays as he may cause, and he will be without any incentive to promptly release equipment. The proper method of securing the release of cars is by the enforcement of fairly constructed car service rules and by an increase in the efficiency of the carriers. Lumber Rates from Memphis to New Orleans, 27 I. C. C. 471, 479.

§5 (5½) Government Initiated Rates.

See Director General.

§5 (6) Erroneous Prior Rate.

See Erroneous Rates.

IMPORTANT CASES SINCE 1908

(a) Where a carrier attempts to justify increased rates on the ground that the lower old rates were put in by mistake, the claim is not persuasive where the old rates have remained in effect for as long a period as two years. The Commission in such cases will regard the rate as one voluntarily and knowingly made. It recognizes that errors will creep in the tariffs, but feels that they should be discovered and eliminated within a reasonable time. Wausau Advancement Assn. v. C. & N. W. Ry. Co., 28 I. C. C. 459, 460.

(b) It does not follow from the fact that southwestern lines are not prosperous that they should get all or any additional revenue by means of an increase in rates on lumber, for lumber may be contributing its fair share. Rates on Lumber from Southern Points, 34 I. C. C. 652, 658.

(c) Error in the publication of rates and rules does not in itself justify cancellation of rates or rules so established and maintained. Intermediate Application of Class Rates, 77 I. C. C. 427.

(h) Tariff naming rates assailed included cornstarch in "list of articles taking by-products rates," but in applying increase under The Fifteen Per Cent case 45 I. C. C., 303, erroneously provided rates for that commodity on higher grain-products basis. Resulting rates found unreasonable to extent they exceeded contemporaneous rates on articles contained in grain by-products list. Reparation awarded. Staley Mfg. Co. v. C. P. Ry. Co., 80 I. C. C. 512.

Director General, as Agent, 83 I. C. C. 566.

§5 (7) Expense of Competition.

See Competition.

IMPORTANT CASES SINCE 1908

(a) If a carrier elects to discontinue a competitive rate, whether because the competition no longer exists or because it does not care longer to compete, the Commission concerns itself only with whether or not the increased rates are just, reasonable and proper. Tobacco from the Ohio River Crossings, 73 I. C. C. 384, 387.

ALL OTHER CITATIONS

§5 (7¼) Low or High State Rate.

See State Rates and Regulation.

IMPORTANT CASES SINCE 1908

(a) An advance in interstate rates to prevent a state commission from reducing intrastate rates is not justified. Coal Rates to Dewey, Okla., 30 I. C. C. 115, 116.

(b) The incongruity between proposed interstate rates and an intrastate scale is a circumstance which relates vitally to the propriety of the rates under suspension. To dispose of this issue it is necessary to have before the Commission the facts and circumstances surrounding the establishment of these intrastate rates. Live-Stock Rates from Colorado Points to Omaha, 35 I. C. C. 682, 689.

(c) It is not in itself a justification of increased rates that they are a consequence of a readjustment of intrastate rates. La Crosse Shippers' Asso. v. C. & N. W. Ry. Co., 38 I. C. C. 453, 455, 456.

ALL OTHER CITATIONS

§5. 7½) Paper Rates.

See Evidence §12¼.

IMPORTANT CASES SINCE 1908

(a) Increased rates on lumber from Newcastle, Cal., to points between Reno, Nev., and Ogden, Utah, not justified. Reasonableness of increase can not be justified by showing that there is little or no movement and that rates are factors in a combination which is being used to defeat specific through rates. Lumber Rates from Newcastle, Cal., 37 I. C. C. 596, 597.

§5. (8) To Prefer Particular Locality.
See Evidence §2, §40½; Origin of Traffic.

IMPORTANT CASES SINCE 1908

(a) That a city is an important market should be a reason against, rather than for, discrimination in its favor. In Re Rates on Salt, 24 I. C. C. 192, 194.

(b) That a city is a trade center is no reason for giving it unfair rates. Bowling Green Business Men v. L. & N. R. R. Co., 24 I. C. C. 228, 239.

(c) Carriers seek to justify a proposed rate structure on the ground that otherwise manufacturing will tend to be further concentrated on the congested Atlantic seaboard. They represent that their proposed rate structure will beneficially distribute manufacturing throughout the Middle and Central West. But this they may not do, unless it can be done without creating undue rate preferences. Transcontinental Cases of 1922, 74 I. C. C. 48, 82.

ALL OTHER CITATIONS

In Re Advances on Barley from California Point to Minneapolis, 24 I. C. C. 664; Lumber Rates from Texas, Louisiana and Arkansas, 28 I. C. C. 471; Boxboard Rates from Wilmington, Ill., 29 I. C. C. 694; Wheat Rates from Oklahoma, 30 I. C. C. 93; Rates on Packing House Products, Etc., from Mason City, Etc., 30 I. C. C. 341; Grain Rates to Pittsburgh, Pa., 30 I. C. C. 382; Coal Rates from Oak Hills, Colo., 30 I. C. C. 505; Class and Commodity Rates to and from Quincy, Ill., 32 I. C. C. 471; Cottonseed Products to Port Arthur, Tex., 38 I. C. C. 378; Lithopone and Zinc Oxide Between Western Points, 61 I. C. C. 208.

Class Rates from New Orleans to Colorado, 59 I. C. C. 734, 736; Consolidated Coal Co. v. Director General, as Agent, 64 I. C. C. 536; Grain and Grain Products from Memphis, Tenn., originating beyond, destined to Carolina territory, 66 I. C. C. 19.

§6 Right to Earn.
See Evidence §6.

(½) In general.

IMPORTANT CASES SINCE 1908

(a) A railroad is justified, no doubt, in maintaining a surplus which will insure dividends to its stockholders during lean years; and it may accumulate through the years funds to meet obsolescence in plant, unless this charge is taken care of in maintenance. The one other legitimate end for which a surplus may in reason be accumulated is to supply facilities in the nature of luxuries, which cannot be made to yield adequate return upon the capital invested. This would appear to be as broad a definition of a legitimate surplus as could be desired and when it is considered that the maintenance accounts of these carriers practically rebuild the roads every ten years, it seems to be as broad a definition as necessity would require. In Re Advances in Rates, Western Case, 20 I. C. C. 307, 336.

(b) It remains for the Supreme Court yet to decide that a public agency such as a railroad created by public authority, vested with governmental authority, may continuously increase its rate in proportion to the increase in its value, either (1) because of betterments which it has made out of income, or (2) because of the growth of the property in value due to increase in value of the land which the company owns. Advances in Rates, Western Case, 20 I. C. C. 307, 339, 340.

(c) Public policy forbids the theory that a carrier is entitled to increase rates so as to earn a return upon betterments created out of income. Its return should come from increased traffic and operating economy. Advances in Rates, Western Case, 20 I. C. C. 307, 340.

(d) It is manifest that when additional revenues are desired and rates are to be increased for that purpose a horizontal advance in all rates on a fixed percentage instead of yielding additional revenues would not improbably result in a reduced revenue. Competitive and commercial conditions have so important a relation to the movement of particular kinds of traffic as to make such a readjustment of a rate schedule inadvisable if not altogether impossible. To increase a rate on a given commodity when it is already as high as competitive and commercial conditions will allow means that it will cease to move, and such a rate will necessarily result in a loss even of the revenue that has theretofore been en-

joyed on that commodity. Railroad Commission of Texas v. A. T. & S. F. Ry. Co., 20 I. C. C. 463, 482.

(e) Evidence that an existing rate is so high that no shipments move thereunder does not show that a proposed increased rate is just and reasonable. Cement Rates from Points in Illinois, 32 I. C. C. 369, 374.

(f) Certain increases in rates, fares, and charges of carriers in official, southern, and western classification territories, to a basis that will enable them to earn an aggregate annual net railway operating income equal to 6 per cent upon the aggregate value of the railway property held for and used in the service of transportation, authorized. Increased Rates, 1920, 58 I. C. C. 220.

ALL OTHER CITATIONS

The Five Per Cent Case (Diss. Op.), 32 I. C. C. 325, 336, 337..

§6. (1) On Bona Fide Investment.

See Evidence §6.

IMPORTANT CASES SINCE 1908

(a) The trend of the highest judicial opinion would indicate that the Commission should accept neither the cost of reproduction nor the capitalization, nor the prices of stock and bonds in the market, nor yet the original investment alone, as the test of present value for purposes of rate regulation. Perhaps the nearest approximation to the fair standard is that of bona fide investment the sacrifice made by the owners of the property—considering as part of the investment any shortage of returns that there may be in the early years of the enterprise. Upon thus taking the life history of the road through a number of years, its promoters are entitled to a reasonable return. This, however, manifestly is limited, for a return should not be given upon wastefulness, mismanagement or poor judgment, and always there is present the restriction that no more than a reasonable rate shall be charged. In Re Advances in Rates, Western Case, 20 I. C. C. 307, 347.

ALL OTHER CITATIONS

Increased Rates, 1920, 58 I. C. C. 220.

§6. (2) On Unearned Increment.

IMPORTANT CASES SINCE 1908

(a) It is a conservative statement of the law to hold that a railroad may not increase the rate upon a number of commodities solely because its real estate has risen in value. In Re Advances in Rates, Western Case, 20 I. C. C. 307, 344.

§6. (3) On Reproduction Value.

IMPORTANT CASES SINCE 1908

(a) Carriers in official classification territory advanced all their class rates and about half of their commodity rates. No testimony was introduced tending to show the cost of reproducing the properties of the defendants. HELD: The Commission was compelled to dispose of the case upon the evidence available; that it is plain that a physical valuation would introduce into the calculation a new element which might lead to a different conclusion. The Commission has several times urged Congress to authorize a reproductive valuation of those railroads subject to federal jurisdiction. It is reported that certain railroad companies are making such valuations themselves, and the results may at any time be urged upon the Commission and the courts as a justification for higher freight rates. The interest of the public ought not to depend upon a valuation made entirely by the owners of these properties, no matter how honestly the work may be prosecuted. In Re Advances in Rates, Eastern Case, 20 I. C. C. 243, 305.

(b) Carriers running west of Chicago advanced some 200 commodity rates. It was contended that the Mann-Elkins Act made all rates in effect January 1, 1910, reasonable; that the credit of the railroads was becoming impaired; that the roads were not earning an adequate return upon the reproduction value of their properties, and had a legal right to earn a reasonable return upon the actual fair value of the railroad as it exists today and as a going concern, and that the cost per unit of service was increasing. HELD: That the burden of proof under the Mann-Elkins Act compelled the railroad to justify as reasonable the increased rate as a whole; that the net earnings of railroads under governmental regulation when there was stability of rates and the extinction of rebates to have been greater than ever before, and that the credit of the railroad was as high as it had ever been, and the dividend paid greater. That to allow a carrier to earn a reasonable return upon the present value of its property rather than upon its bona fide investment therein would mean to permit

rates to increase as the value of the property increased and would be against public policy; and that the Commission could not sanction the idea that any railroad had a legal right to do this. That the gross net earnings of the carriers were greater than ever before in their history, and that upon the record the advanced commodity rates already paid their due share of the value of the service rendered by the carrier, many of them being twice as high for the haul immediately west of Chicago as corresponding rates for a similar rate immediately east of Chicago. Carriers asked to cancel tariffs carrying the advanced rates and adhere to rates already in effect. In Re Advance in Rates, Western Case, 20 I. C. C. 307.

§6. (4) On Surplus.

See Reasonableness of Rates §33.

IMPORTANT CASES SINCE 1908

(a) Carriers in Official Classification territory increased all class rates and about half their commodity rates. They contended they should be allowed to invest in improvements and additions to the property an amount equal to that paid by way of dividends to stockholders. In the year 1910 railroad dividends aggregated $450,131,650. HELD: That inasmuch as every dollar thus added to the value of the property justifies, according to the claim of the defendants, an added net return, the Commission cannot properly permit an advance in rates with the intent to produce an accumulation of surplus for this purpose until the status of the surplus is determined by legislative action or judicial interpretation. In Re Advances in Rates, Eastern Case, 20 I. C. C. 243, 270.

ALL OTHER CITATIONS

In Re Advances in Rates, Western Case, 20 I. C. C. 307, 336, 341.

§6. (5) For Permanent Improvements.

See Reasonableness of Rates §26.

IMPORTANT CASES SINCE 1908

(a) Both the Supreme Court and the Commission are committed to the proposition that in fixing a fair return upon railroad property for the purpose of determining whether a given advance is reasonable the railway ought not to treat as a part of its operating expenses the cost of permanent improvements or extensions, and this must of necessity mean that the rates should not be sufficient to allow both the payment of dividends to stockholders and interest to bondholders, and an additional sum for the purpose of improving and increasing the value of the property. Each generation may well be required to bear its own burden, and the stockholder should not obtain both an adequate dividend upon his stock and an addition to the value of his property. In Re Advances in Rates, Eastern Case, 20 I. C. C. 243, 266.

(b) The purchase of an additional terminal at Norfolk, Va., for the exclusive use of shippers of fruits and vegetables has not enhanced the value of the service accorded to the shipper, but has added materially to the shippers' inconvenience; and does not justify increased rates proposed. Fruits and Vegetables from Norfolk, Va., 38 I. C. C. 252, 256.

ALL OTHER CITATIONS

Advance in Rates, Western Case, 20 I. C. C. 307, 339, 340; Fruits and Vegetables from Norfolk, Va., 38 I. C. C. 252, 256.

§6. (6) All Traffic Will Bear.

IMPORTANT CASES SINCE 1908

(a) The Commission has never accepted the doctrine that the best test of the reasonableness of the rate is whether the traffic will move freely under it, although it has always deemed the state of an industry a pertinent fact in considering the reasonableness of the rate. In Re Transportation of Wool, Hides, and Pelts, 23 I. C. C. 151, 156.

ALL OTHER CITATIONS

Oregon & Washington Lumber Mfrs. Assn. v. U. P. R. R. Co., 14 I. C. C. 1, 15; Commercial Club of Omaha v. Anderson & Saline River Ry. Co., 18 I. C. C. 532, 536; Commercial Club of Omaha v. A. & S. R. Ry. Co., 19 I. C. C. 419, 421; Railroad Commission of Texas v. A., T. & S. F. Ry. Co., 20 I. C. C. 463, 482; In Re Advances on Staves, 23 I. C. C. 382; Cement Rates From Points in Illinois, 32 I. C. C. 369, 374; The Five Per Cent Case (Dis. Op.), 32 I. C. C. 325, 336, 337; Rates on Lumber from Southern Points, 34 I. C. C. 652, 658.

§6. (7) Cost of Insurance.

IMPORTANT CASES SINCE 1908

(a) Defendant rail and water carriers in their bills of lading exempted themselves from all liability for losses except those due to their own negli-

gence, and protected themselves by taking out insurance on the shipments moving over rail and water routes. Shippers also provided themselves with insurance, not being able to rely on those effected by the carriers, since on such insurance the names of the shippers were not specified, the value of the invoice was not known, nor had the shipper any information as to the company in which the insurance was placed, the nature of the policy taken out, or the conditions attaching to the policy. Defendants raised the class rates on rail and water transportation of merchandise from Atlantic ports to Minneapolis and Chicago, the purpose of the increase being to cover the cost of insurance incurred by the carriers. HELD: Since the shippers were not adequately protected by the insurance effected by the carriers, the increases were unreasonable and should be reduced to the former rates. Wyman, Partridge & Co. v. B. & M. R. R. Co., 13 I. C. C. 258, 264.

III. EVIDENCE.

See Evidence.

§6½. In General.

IMPORTANT CASES SINCE 1908

(a) In making increases under General Order No. 28, the President, through the Director General, was meeting a public need for additional revenue, as he certified in that order. In readjusting the resulting rates on petroleum and its products at the instance of interested shippers he exercised an authority and discretion recognized by the federal control act. Atlantic Refining Co. v. Director General, as Agent, 58 I. C. C. 46, 47.

(b) One of the principal difficulties of which complaint has been made by the livestock producers is the lack of prompt and efficient service. To encourage the long haul movement as against the short haul movement under present conditions of car supply would tend to increase rather than reduce transportation difficulties. Ex Parte 74, Application for Increase in Rates, 58 I. C. C. 220, 251.

(c) Wage increases, increased price of material, and other conditions which justified the Director General in increasing the rates under General Order No. 28, prevailed in the first six months of 1918 in the same manner and to the same degree as when that order was entered on June 25, 1918. Lake Park Refining Co. v. Director General, as Agent, 60 I. C. C. 381, 383.

(d) The Commission could not deny an otherwise justified increase because it might be used as a lever for increasing other charges. Switching at Mason City, 73 I. C. C. 308, 310.

ALL OTHER CITATIONS

Graves Bros. v. A. N. R. R., 45 I. C. C. 470, 472 Ex Parte 74, Application for Increase in Rates, 58 I. C. C. 220, 231; Mine Timbers from Missouri to Illinois Points, 58 I. C. C. 545, 548; Acme Cement Plaster Co. v. Director General, as Agent, 62 I. C. C. 119, 121; Lake Park Refining Co. v. Director General, as Agent, 60 I. C. C. 381, 383. Reparation as Relating to Increase of Rates, 68 I. C. C. 5, 7; Continental Paper Co. v. Director General, as Agent, 68 I. C. C. 162, 163; National Paving Brick Mfrs. Asso. v. A. & V. Ry. Co., 68 I. C. C. 213, 246; United Light & Rys Co. v. Director General, as Agent, 69 I. C. C. 417; Petroleum Asso. v. Director General, as Agent, 78 I. C. C. 711, 716; Sand and Gravel from Covington, 81 I. C. C. 295; Acme Fruit Co. v. C. P. Ry. 87 I. C. C. 401.

§7. Change in Conditions.

(1) In General.

See Evidence §9; Reasonableness of Rates §7; Season Rates.

CASES 1887-1908

(a) As rates on iron articles were formerly reduced on account of commercial conditions the advances in those rates may have been proper owing to subsequent changes in such conditions. In the Matter of Proposed Advances in Freight Rates, 9 I. C. C. 382.

IMPORTANT CASES SINCE 1908

(b) The reasonableness of a rate must of necessity depend upon the conditions surrounding the traffic at the time it moves. The length of the haul, the competition to be met, the cost of the service, the value of the service, the density or volume of the tonnage, as well as the general transportation conditions then existing are factors that have a more or less definite relation to the rate that a carrier may reasonably demand for a transportation service. And these factors, except possibly the length of the haul, the grades, and other transportation conditions are in their nature neither permanent nor fixed; but

necessarily change with the general economic panorama. No presumption of law, therefore, can arise against an advanced rate simply because a lower rate previously existed. Memphis Cotton Oil Co. v. I. C. R. R. Co., 17 I. C. C. 313, 318.

(c) That proposed increased rates must rest upon "changed conditions" other than elimination of water competition held not to apply to rates reduced prior to June 18, 1910. Westbound Lake-and-Rail Knit Goods Commodity Rates, 32 I. C. C. 54, 57.

(d) A charge, reasonable in its inception many years ago, may become unreasonably low in consequence of the construction of more adequate facilities, a change in the character of the service rendered, the increased level of operating costs generally, or one or more of these factors. But the existence of such general conditions alone affords no proper basis upon which to test the reasonableness of a specific material increase in charges. Space Rental Charges on Cotton, 66 I. C. C. 121, 125.

ALL OTHER CITATIONS

Pabst Brewing Co. v. C. M. & St. P. Ry. Co., 17 I. C. C. 359, 360; Advance in Rates, Western Case, 20 I. C. C. 307, 319; In Re Advance in Rates, Eastern Case, 20 I. C. C. 243, 285, 306; In Re Advance in Rates, 21 I. C. C. 546, 555, 557; In Re Advances on Grain, 21 I. C. C. 22, 35; In Re Advances on Milk, 23 I. C. C. 500, 502; Chamber of Commerce of Houston v. G., H. & S. A. Ry. Co., 23 I. C. C. 214, 216; In Re Advances in Rates on Freight in Single Packages and Small Lots, 22 I. C. C. 328; In Re Transportation of Wool, Hides and Pelts, 23 I. C. C. 151, 156; In Re Rates for Transportation of Flaxseed, 25 I. C. C. 337; Davis Sewing Machine Co. v. P., C., C. & St. L. Ry., 26 I. C. C. 282; Rates on Linseed Oil, 26 I. C. C. 265; Oklahoma Grain Rates, 28 I. C. C. 462, 466; Emigrant Movables to South Dakota, 29 I. C. C. 40; Industrial Railways Case, 29 I. C. C. 212, 218; Five Per Cent Case, 32 I. C. C. 325, 328; Cement Rates from Salt Lake City, 33 I. C. C. 5, 7; The Cummins Amendment, 33 I. C. C. 682, 692, 693; Scranton-Williamsport Rail & Lake, 43 I. C. C. 182; The Fifteen Per Cent Case, 45 I. C. C. 303, 311, 312, 317; Proposed Increases in New England, 49 I. C. C. 421, 462; Illinois Coal Traffic Bureau v. Director General, 58 I. C. C. 351; Express Rates, 1920, 58 I. C. C. 707; Reduced Rates, 1922, 68 I. C. C. 676, 734.

§7. (2) Increased Operating Expenses. See Reasonableness of Rates §9.

CASES 1887-1908

(a) While the hauling of flat cars empty to the mills, or the practice of shippers to load cars below their capacity, are conditions which, to the extent they exist, are properly taken into account by carrier in fixing rates, it must be assumed that they were considered by defendant in making and maintaining the rates so long in force prior to the advance complained of. Tift v. Southern R. Co., 10 I. C. C. 548.

IMPORTANT CASES SINCE 1908

(b) Everything else remaining the same, an increase in cost of operation would justify an advance in rates. Other things remaining the same, increase in traffic requires a decrease in rates. It may, therefore, happen that the increase of traffic will more than offset the increase in operating expense. Cattle Raisers' Assn. of Texas v. M., K. & T. Ry. Co., 13 I. C. C. 418, 430.

(c) An increase in the cost of labor and in the price of railroad materials and supplies does not necessarily imply that there has been a decrease in the net earnings of the carrier during the same period. A material growth in its traffic and economies resulting from an alert and skillful management may readily overcome the increase in the cost of labor and its materials and thus leave its net revenues unimpaired. Shippers' & Receivers' Bureau of Newark v. N. Y. O. & W. Ry. Co., 15 I. C. C. 264, 265.

(d) If the carrier does not see proper to make improvements that will reduce cost of operation, it cannot claim that it may raise rates because cost approaches or overtakes revenue. Louisville & Nashville Railroad Coal & Coke Rates, 26 I. C. C. 20, 29.

(e) Operating costs having increased is not alone a justification for increase in rates. Memphis Freight Bureau v. L. & N. R. R. Co., 26 I. C. C. 402, 405.

(f) A general statement that cost of conducting terminals has increased and more revenue is needed. This kind of testimony furnishes no justification. It is susceptible of exact proof, and should be so presented. Detroit Switching Charges, 28 I. C. C. 494, 497.

(g) Increased prices of materials and

supplies, the increased cost of fuel, and increased wages are all significant and extremely important factors in a situation of advanced rates. The Fifteen Per Cent Case, 45 I. C. C. 303, 318.

ALL OTHER CITATIONS

Mountain Ice Co. v. D., L. & W. R. R. Co., 15 I. C. C. 305, 320; Winters Metallic Paint Co. v. C., M. & St. P. Ry. Co., 18 I. C. C. 596, 598; Commercial Club, Salt Lake City, v. A., T. & S. F. Ry. Co., 19 I. C. C. 218, 222; In Re Advances in Rates, Western Case, 20 I. C. C. 307, 378; In Re Rates on Hardwood Lumber, 21 I. C. C. 397; In Re Advances on Freight in Single Packages and Small Lots, 22 I. C. C. 328, 331; In Re Advances by the D. & H. Co. on Fluid Milk, 23 I. C. C. 500, 501, 502; Hormel & Co. v. C., M. & St. P. Ry. Co., 26 I. C. C. 112, 114; Joint Coal Rates to Clinton, Ia., 26 I. C. C. 179; Furniture Rates in the Northwest, 26 I. C. C. 655; Rates on Sand to Houston, Tex., 26 I. C. C., 677, 679; In Re Advances on Hay, 25 I. C. C. 680, 682; Kansas-Iowa Brick Rates, 28 I. C. C. 285, 287; New York Butter and Cheese Rates, 28 I. C. C. 330; The Five Per Cent Rate Case, 31 I. C. C., 351, 386; Rates on Lumber from Southern Points, 34 I. C. C. 652, 660; Eastern Livestock Case, 36 I. C. C. 675, 693; Detroit Coal Exchange v. M. C. R. R. Co., 38 I. C. C. 79, 84; Coal to Brooksville, Ky., 43 I. C. C. 115; Traffic Bureau of Nashville v. L. & N. R. R., 43 I. C. C. 366; New England Lumber Rates, 43 I. C. C. 641; The Fifteen Per Cent Case, 45 I. C. C. 303, 312; Ex Parte 74, for Application for Increase in Rates, 58 I. C. C., 220, 230; Reparation as Relating to Increase of Rates, 68 I. C. C. 5, 7.

§7 (3) Impairment of Credit.

IMPORTANT CASES SINCE 1908

(a) The credit of American railroads should be first class. They should be able to borrow money at rates as low as the most stable of the great industries and the most solvent of municipalities. The railroad is interested in getting its money as cheaply as possible while the stock and bond buyer is interested in securing as high a rate as possible for the money which he invests alone. So far as the bond buyer is concerned it is evident that no matter to what elevation rates might be raised, it would not increase by the fraction of a cent the interest which he would receive. It is not to be imagined that an increase in railroad revenues would increase the rate of interest upon railroad bonds. Advances in Rates, Western Case, 20 I. C. C. 307, 331.

ALL OTHER CITATIONS

In Re Advances in Rates, Eastern Case, 20 I. C. C. 243, 251, 252.

§7. (4) Cessation of Competition.

See Competition.

IMPORTANT CASES SINCE 1908

(a) In particular cases the Commission has recognized the natural right of the carrier to adjust its rates on a lower basis than it would otherwise establish, in order to meet competition over other routes and from other quarters, and thus secure a traffic that would be lost to it under higher rates. The Commission has sanctioned such adjustments rather in the interests of the carrier than the shipper. Indianapolis Freight Bureau v. C., C., C. & St. L. Ry. Co., 26 I. C. C. 53, 58.

(b) It is for the carrier to determine whether it will meet water competition. If it elects to discontinue such practice at any point and increase its rates, the Commission is concerned only with the question of whether or not the increased rates are just, reasonable and proper. Rates on Scrap Iron from Gulf Ports, 33 I. C. C. 668, 672.

(c) Reasons other than the elimination of water competition must be shown where it is sought to increase rail rates depressed without authority. Reopening Fourth Section Applications, 40 I. C. C. 35, 40.

(d) If a carrier elects to discontinue a competitive rate, whether because competition no longer exists or because it does not care longer to compete, the commission would concern itself only with whether or not the resulting increased rates are just, reasonable, and proper. Tobacco from Ohio River Crossings, 73 I. C. C. 384, 387.

ALL OTHER CITATIONS

Florida Fruit & Vegetable Assn. v. A. C. L. R. R. Co., 17 I. C. C. 552, 558; Schoenhofen Brewing Co. v. A., T. & S. F. Ry. Co., 17 I. C. C. 329; New Orleans Board of Trade v. L. & N. R. R. Co., 17 I. C. C. 231, 237, sustained L. & N. R. R. Co. v. I. C. C., 184 Fed. 118, enjoined 195 Fed. 541; Audley Hill & Co. v. S. Ry. Co., 20 I. C. C. 225; R. R. Com. of Oregon v. S. P. Co., 24 I. C. C. 273;

Lumbermen's Exchange of St. Louis v. A. & S. R. Co., 24 I. C. C. 220; In Re Advances on Furniture from Nappanee, Ind., to Chicago, Ill., 25 I. C. C. 331; Pig Iron Rates from Virginia to Pennsylvania 27 I. C. C. 343, 346; Emlenton Petroleum Rates, 29 I. C. C. 519; Brownsville, Tex., Class and Commodity Rates, 30 I. C. C. 479; Westbound Lake-and-Rail Knit Goods Commodity Rates, 32 I. C. C. 54, 57.

§7. (5) Competition In General.

See Competition.

IMPORTANT CASES SINCE 1908

(a) But it can not be maintained that because a carrier has once chosen to make a low rate to meet water competition, it is estopped from thereafter increasing that rate. Lumber Between Points in Western Trunk Line Territory, 38 I. C. C. 370, 376.

(b) It is one thing to give consideration to the condition of all competing carriers in fixing rates between competitive points on a reasonable basis, but quite a different matter to lift the entire rate structure of an important territory solely for the purpose of enabling carriers operating through a different and higher rated territory to compete at border points with the carriers operating within that territory on a rate equality without reducing the rates at intermediate points in such higher rated territory. Rates To, From and Between Points South of the Ohio River, Including the Mississippi Valley, 64 I. C. C. 306, 329.

ALL OTHER CITATIONS

In Re Advances in Class and Commodity Rates, 25 I. C. C. 401, 402; Indianapolis Freight Bureau v. C., C., C. & St. L. Ry. Co., 26 I. C. C. 53, 58; Rates on Potash and Other Commodities, 29 I. C. C. 626; Rates on Scrap Iron from Gulf Ports, 33 I. C. C. 668, 672.

§7. (6) Disputes Concerning Divisions.

See Division §4.

IMPORTANT CASES SINCE 1908

(a) Disagreement between carriers over divisions will not be recognized as justification for withdrawal of joint rates or through routes. Especially is this true if such withdrawal occasions higher charges to shippers or receivers, and deprives them of the opportunity to ship via reasonable through routes. Lumber Rates from Mississippi to Eastern Points, 27 I. C. C. 6, 9.

(b) An increase in rates can not be justified on the ground that a particular carrier, which transports shipments over only a portion of the entire through route, receives an unsatisfactory division of the joint rate. Grain from Manitowoc, Wis., 37 I. C. C. 549 551.

(c) Disputes among carriers over divisions is no justification for increased rates. Concentration of Cotton at New Orleans, 83 I. C. C. 18, 20.

Transit of Copper Articles at Laurel Hill, N. Y., 64 I. C. C. 257, 258; Limestone from Illinois Points, 74 I. C. C. 345, 348; Cancellation of Joint Rates from and to Green Hill, S. C., 74 I. C. C. 571; Sisal from Gulf Ports, 88 I. C. C. 704, 706; Limestone Illinois Points, 89 I. C. C. 11; Paper Stock from St. Louis, 89 I. C. C. 267, 269.

§7. (7) Lack of Revenue.

See Evidence §51.

CASES 1887-1908

(a) Carriers are entitled under the act to regulate commerce to determine for themselves what are proper rates in the first instance, but when they make numerous rate advances by concerted action and under circumstances not showing justification for increased revenue, they cannot successfully plead the excuse of financial necessity where the legality of such action as applied to any given commodity is challenged; and the controlling question must be as to the reasonableness and justice of the advance in classification and rate upon the facts shown in each case. National Hay Association v. L. S. & M. S. Ry., 9 I. C. C. 264.

(b) Carriers have no right to advance a rate which is already reasonably high and yields an adequate return for the service rendered, solely because additional revenue is needed. Central Yellow Pine Asso. v. Illinois C. R. Co., 10 I. C. C. 505, 506.

(cde) Carriers have no right to advance a rate which is already reasonably high, and which yields an adequate return for the service rendered, solely because additional revenue is needed. The mere fact of the need of additional revenue to meet increased expenses does not justify the advance in rates on lumber shipments from Georgia to and beyond the Ohio River, which are, for the most part, of low grade and comparatively small value. Tift v. Southern R. Co., 10 I. C. C. 548.

IMPORTANT CASES SINCE 1908

(f) Certain increases in rates, fares, and charges of carriers in official, southern and western classification territories, to a basis that will enable them to earn an aggregate annual net railway operating income equal to 6 per cent upon the aggregate value of the railway property held for and used in the service of transportation, authorized. Increased Rates, 1920, 58 I. C. C. 220.

(g) But the financial condition of a carrier, although an important matter for consideration, does not in itself warrant an increase in rates. Coal from Cumberland R. R. to Southeastern Points, 61 I. C. C. 80, 82.

(h) The mere showing of the poor financial condition of one participating carrier is not sufficient to justify increased joint rates. Bituminous coal from mines on the C. & M. R. R., 74 I. C. C. 723, 725.

Director General, as Agent, 61 I. C. C. 92, 105; Rates on Grain, Grain Products and Hay, 64 I. C. C. 85, 99; Increased Rates on Ice, Carloads, from Various Wisconsin Points to Chicago, 74 I. C. C. 662; Bituminous Coal from Mines on C. & M. R. R., 74 I. C. C. 723.

§7. (8) Percentage Increases.

See Percentage Rates.

IMPORTANT CASES SINCE 1908

(a) A general percentage increase is undesirable because of its serious effect upon commercial conditions and established relationships. The Fifteen Per Cent Case, 45 I. C. C. 303, 325.

(b) Where revenue requirements necesitate a speedy revision of rates to produce increased earnings, adherence to a strict percentage increase would operate to the advantage of shipments traversing the shorter distances, and conversely to the disadvantage of long hauls. The area of competitive markets would be diminished; to the disadvantage of consumers, and the control of nearby producers over such markets would be strengthened. These considerations act less powerfully on goods of high value in comparison with their weight and

bulk where the cost of carriage is comparatively slight in comparison with the prices at which they are sold. Conversely these considerations operate powerfully on goods of relatively low value, in proportion to weight and bulk. On the other hand, a flat increase of certain money amount to preexisting rates tends to increase relatively the per ton and per car charge to nearby producers as compared with those who ship a longer distance. This method, however, imposes the same money handicap per unit of freight on all shippers, and does not tend to tighten the control of nearby producers upon the market. To a certain degree, therefore, it tends to be more in the interest of the consumers than a new system of higher rates adjusted more closely to distance which shipments traverse. Upon a tonnage of such magnitude as that of iron ore, the Commission is not prepared on this record to find that the flat per ton increase is not warranted under the circumstances in which it was instituted, and particularly in a situation such as that here disclosed, where the rates attacked, by whatever method increased, do not appear to be unjust and unreasonable or out of line with similar rates contemporaneously imposed upon the same traffic for comparable distances. Virginia Iron, Coal & Coke Co. v. Director General, 53 I. C. C. 583, 589.

(c) The percentage of increase is not controlling if the resulting rates are reasonable. Ault & Wiborg Co. v. Director General, 62 I. C. C. 133, 134.

(d) The percentage of increase is not controlling if the resulting rates are not unreasonable, Endicott-Johnson Corporation v. Erie R. R. Co., 73 I. C. C. 562, 565.

(e) Percentage of increase of rates is not controlling if resulting rates are reasonable. Nor does the commission regard subsequent reduction of rates as establishing unreasonableness. Sprague Tire & Rubber Co. v. Director General, as Agent, 80 I. C. C. 285, 288.

(f) Fact that rates paid represent a high percentage of increase over rates formerly charged is not proof that rates paid are unreasonable. Ault & Wiborg Co., 62 I. C. C., 133. French Battery & Carbon Co. v. C. & N. W. Ry. Co., 80 I. C. C. 344, 346.

(g) Evidence of the percentage or the amount by which rates are increased does not establish the unreasonableness of the resulting rates. Acme Fruit Co. v. C. P. Ry., 87 I. C. C. 401, 402.

ALL OTHER CITATIONS

Director General, 62 I. C. C. 119; Substitution for Increases in Rates, 61 I. C. C. 518, 522, 523; Barnett Oil Co. v. Director General, as Agent, 61 I. C. C. 568, 570; Barnett Oil & Gas Co. v. Director General, as Agent, 62 I. C. C. 133, 134; Boldt Paper Mills v. Director General, as Agent, 62 I. C. C. 471, 472; Lumber Rates Between El Paso and Western Points, 64 I. C. C. 12; Bedford Pulp & Paper Co. v. Director General, as Agent, 64 I. C. C. 219, 220; Maltby v. Director General, as Agent, 64 I. C. C. 297; Silica Sand Producers Traffic Asso. v. C., B. & Q. R. R. Co., 64 I. C. C. 302, 304; Ault & Wiborg v. Director General, as Agent, 64 I. C. C. 443; Sand and Gravel from Michigan City, 64 I. C. C. 512; Madison Lumber & Mill Co. v. Director General, as Agent, 64 I. C. C. 699, 701; Southern Hardwood Traffic Asso. v. I. C. R. R. Co., 66 I. C. C. 68, 74; Wofford Oil Co. v. Director General, as Agent, 66 I. C. C. 509, 510; Gilpin Langdon & Co., Inc. v. Director General, 68 I. C. C. 292, 293; Atlantic Coast Line Ry. Co. v. Railroad Commission of Georgia, 281 Fed 321, Alabama Company v. Director General, 78 I. C. C. 561, 568; Niles Fire Brick Co. v. Director General, as Agent, 80 I. C. C. 380; Central Iron & Steel Co. v. Director General, as Agent, 80 I. C. C. 698; Southern Appalachian Coal Operators v. L. & N. R. R. Co., 83 I. C. C. 130, 138; Lawton Refining Co. v. Director General, as Agent, 83 I. C. C. 443.

§7. (9) Government Advances.

IMPORTANT CASES SINCE 1908

(a) The records are clear that it was the intention of the Railroad Administration to apply to flat increases, where such were specifically provided, to line

haul rates generally throughout the country, including hauls complete within themselves from shipper to consignee between any two points within the switching limits of a city or district. But the interpretation of G. O. 28 was not always uniform as to complete hauls within a district and in some cases and on some commodities the general 25 per cent increase was applied to the existing rate. Illinois Brick Co. v. Director General, 64 I. C. C. 273, 277.

(b) The fact that a flat increase was authorized as reasonable for general application under General Order No. 28 of the director general does not preclude attacks upon particular rates which include that increase upon the ground that the resulting rate was unreasonably high. Lawton Refining Co. v. Director General, as Agent, 73 I. C. C. 121, 122.

(c) The reasonableness of the increases applied to combination rates can not be determined entirely by a construction of General Order No. 28 of the director general, but the controlling question is whether the resulting rates were unreasonable or otherwise unlawful. Wilbur Lumber Co. v. Director General, as Agent, 73 I. C. C. 152, 155.

(d) Fact that rates were not increased in strict conformity with the provisions of General Order No. 28 of the Director General does not, of itself, establish unreasonableness. Tampa Gas Co. v. Diretcor General, as Agent, 73 I. C. C. 488, 490.

(e) Contention that rates were unlawful and unreasonable because not made in accord with intention of General Order No. 28 of director general, not sustained. "Controlling fact to be determined is not whether rate was increased in strict compliance with terms of the general order, but whether resulting rate was unreasonable or otherwise unlawful." Greene Cananea Copper Co. v. Director General, as Agent, 80 I. C. C. 121, 122.

Director General, as Agent, 61 I. C. C. 753; Wilhoit Co. v. Director General, as Agent, 62 I. C. C. 313; Certain-Teed Products Corp. v. Director General, 63 I. C. C. 93, 97; Consolidated Gas & Electric Co. v. Director General, 63 I. C. C. 135, 138; Wilbur Lumber Co. v. Director General, 73 I. C. C. 152, 158; Alabama Co. v. Director General, as Agent, 78 I. C. C. 561; Van Dusen Harrington Co. v. Director General, as Agent, 78 I. C. C. 729, 730; Mason City Brick & Tile Co. v. Director General, 88 I. C. C. 37, 43.

§8. Presumptions.

See Evidence VI.

(1) Continuance of Prior Rate.

See Continuance of Prior Rate; Evidence §29; Presumptions; Voluntary Rates.

IMPORTANT CASES SINCE 1908

(a) Railways are authorized to establish in the first instance their transportation charges and the presumption of right doing attaches to their acts in the establishment of those rates. No presumption of law against a particular rate springs from the fact that the rate in question was an advance over some previous rate. The burden of proof is always upon the party who attacks an existing rate. The circumstance that the railway has for a series of years maintained a lower rate or a different relation of rates is an evidentiary fact which may be introduced and considered like any other fact. I. C. C. v. Chicago G. W. Ry. Co., 209 U. S. 108, 119, 28 Sup. Ct. 493, 52 L. Ed. 705.

(b) Where a rate has been established and maintained for a considerable period and for the purpose of developing a particular industry and with full knowledge that the industry could not be developed without it, and where, under the influence of such rate, large amounts of money have been invested in property the value of which must be seriously impaired by an advance of the rate, that fact is an important consideration in passing upon the reasonableness

of such advance. Western Oregon Lumber Mfrs. Assn. v. S. P. Co., 14 I. C. C. 61.

(c) It is said that an advance in a long established rate at once suggests the propriety of an inquiry of the carrier for a statement of its reasons for making the advance. But in making its explanation the carrier is not under the necessity of overcoming the technical weight and force of a presumption of law that the previously existing lower rate was a reasonable rate. The long continuance of a lower rate may be said to raise a presumption of fact that the advanced rate is unreasonable. But this in a sense is no presumption at all, for it cannot carry beyond the actual tendency of the fact itself to produce that belief in the mind of the investigator. The fact that the lower rate has long remained undisturbed has strong probative value. Considered merely as evidence, such a rate history, in the absence of some explanation that satisfies the judgment of the propriety and need of an increase in rates would ordinarily have great force. But in every case the Commission must consider and weigh all the other facts of record before arriving at the conclusion that the increase in rates was unreasonable. Memphis Cotton Oil v. I. C. R. R. Co., 17 I. C. C. 313, 318.

(d) The circumstance that carriers have established and voluntarily maintained certain rates for twenty-five years is not conclusive evidence that they were reasonable, but it is in the nature of an admission upon their part to that effect, which requires, when these rates are advanced, some satisfactory explanation. When it further appears that a rate voluntarily maintained for a quarter of a century has within seven years been increased by one-fourth, the reason by which it is sought to justify a still further advance must be even more cogent. This does not conclusively show that the carriers ought not to be permitted to advance such rate at the present time nor in the future, but it is evidence which bears strongly upon the propriety of a present increase. U. S. Leather Co. v. So. Ry. Co., 21 I. C. C. 323, 327.

(e) There exists a presumption in favor of inter-relations in a rate fabric that has long continued undisturbed. And there are common-sense limits within which any attempts at a rate adjustment are necessarily confined. Every act of rate making necessarily carries vestiges of discrimination. The Commission is not called upon to do the impossible and to show such meticulous attention to the adjustment of fractions as to preclude the possibility of any readjustment of rates whatever. With a demonstration of inadequate revenues, and with a presumption in favor of the propriety of the interrelation between rates long in effect, an advance moderate in amount, calculated to produce but a reasonable increment in earnings, and affecting all traffic in the same proportionate degree, is the plain dictate of law and of common sense. The Five Per Cent Rate Case, 31 I. C. C. 351, 450. (Dissenting Opinion.)

Louisville & N. R. R. Co. v. I. C. C., 195 Fed. 541, 557; Fairmont Creamery Co. v. C., B. & Q. R. R. Co., 22 I. C. C. 252, 254; Commercial Club of Omaha v. S. P. Co., 20 I. C. C. 631, 636; Sunderland Bros. Co. v. P. M. R. R. Co., 16 I. C. C. 450, 451; Shippers' & Receivers' Bureau of Newark v. N. Y., O. & W. Ry. Co., 15 I. C. C. 264, 265; Indianapolis Freight Bureau v. C., C., C. & St. L. Ry. Co., 15 I. C. C. 504, 529; Pacific Coast Lumber Mfrs. Assn. v. N. P. Ry. Co., 14 I. C. C. 23, 38, 39; Rehearing Denied, 16 I. C. C. 465; Decision Sustained, I. C. C. v. U. P. R. R., 222 U. S. 541, 32 Sup. Ct. 108 Sup. Ct. 108, 56 L. Ed. 308; Western Oregon Lumber Mfrs. Assn. v. S. P. Co., 14 I. C. C. 61, 72; Banner Milling Co. v. N. Y. C. & H. R. R. Co., 14 I. C. C. 398, 408; Hartville Celery Growers' Assn. v. Pac. Ex. Co., 14 I. C. C. 590, 593; Detroit Chemical Works v. N. C. Ry. Co., 13 I. C. C. 357, 362; Burgess v. Transcontinental Freight Bureau, 13 I. C. C. 668, 677; Memphis Freight Bureau v. L. & N. R. R. Co., 26 I. C. C. 402, 404; Missouri River Building Stone Rates, 28 I. C. C. 269; Chamber of Commerce, Houston, Tex., v. I. & G. N. Ry. Co., 32 I. C. C. 247, 257; Freight Rates from Minnesota Points, 32 I. C. C. 361, 364; Reshipping Rates on Grain from Omaha, 32 I. C. C. 590, 594; People v. Public Service Commission for Second District (N. Y. 1915), 109 N. E. 252, 255; 1915 Western Rate Advance Case, 37 I. C. C. 114, 150; New Orleans, Texas Rates, 38 I. C. C. 1, 10.

§8 (2) Temporary Reductions.

(a) Ordinarily the advance of a rate

for a short period followed by the restoration and maintenance of a lower rate formerly in force tends to raise a presumption of fact that the advanced rate was unreasonable. This rule may be modified where a special rate, not compensatory, is put in in order to "scalp" business on competitive traffic. Fairmont Creamery Co v. C. B. & Q. R. R. Co., 22 I. C. C. 252.

IMPORTANT CASES SINCE 1908

(b) Where a carrier lowered a rate to meet the short-line rate and subsequently increased it, the increased rate is not necessarily unreasonable. Wharton Steel Co. v. C. R. R. of N. J., 26 I. C. C. 166.

ALL OTHER CITATIONS

Fairmont Creamery Co. v. C., B. & Q. R. R. Co., 22 I. C. C. 252; In Re Advances on Vehicles, 22 I. C. C. 124, 127.

§8½. Comparisons.

See Comparative Rates; Evidence §12, §13.

IMPORTANT CASES SINCE 1908

(a) Where a comparison of the different parts of a suspended schedule is conclusive that the rates are not based on distance, the mere fact that there are other rates on lumber as high as some of the suspended rates, considering distances alone, is not persuasive that such suspended rates are reasonable. While railroads cannot be expected to grade their rates so closely with regard to distance that there will be no inconsistencies in their schedules, yet when they seek to justify proposed increases by comparisons based on distance, the fact that the proposed schedule was manifestly made without regard to distance is entitled to consideration in determining the weight to be given to the comparisons made. Lumber to Nashville, Tenn., 31 I. C. C. 186, 188.

(b) In considering a proposed rate increase, a comparison of single years with other single years, or of one 5-year period with another, may lead to confusing and inaccurate conclusions. To be on firm ground, the general course of the returns of carriers upon their investment through a long series of years must be examined. The Five Per Cent Case, 31 I. C. C. 351, 364.

(c) The mere fact that an average loading is taken for a larger territory than that covered by the suspended schedule is not sufficient to impair the value of the comparisons made. 1915 Western Rate Advance Case, 37 I. C. C. 114, 127.

(d) Comparisons of proposed increased rates on a particular commodity with higher rates on the same commodity between other points in the same territory are not convincing evidence justifying such increased rates where it is not shown that any substantial tonnage moves on the higher bases, whereas there is a substantial movement between the points to which the increases are proposed. Manure from New Orleans, 73 I. C. C. 400, 402.

ALL OTHER CITATIONS

Coal to Glencoe, Mo., 39 I. C. C. 190, 192; Grain and Grain Products, Chicago to Kansas City, 60 I. C. C. 128; Rock Products Traffic League v. B. & O. R. R. Co., 68 I. C. C. 146, 148.

§8½a. Combination Rule.

IMPORTANT CASES SINCE 1908

(a) Shipments moved under combination rates, each factor of which was increased by general increases of the railroad administration. Tariff of one participating carrier contained rule that increase be added but once to the through combination rate but tariff of remaining carriers contained no such rule. HELD: Principle applied in Sligo Iron Store Co., 66 I. C. C., 643, and 73 I. C. C., 551, is controlling, and carrier publishing combination rule must protect resulting aggregating rate. Reparation awarded against carrier publishing the rule, and remaining carriers authorized to retain full charges authorized by their tariff. Standard Oil Co. v. M. V. R. R. Co., 81 I. C. C. 193.

(b) Combination rates composed of commodity rate and class rate held not to be affected by combination rule in tariff of one of participating carriers providing for application of but a single increase under General Order No. 28 of director general to sum of factors. Acme Cement Plaster Co., v. Director General, as Agent, 81 I. C. C. 298, 302.

(c) Where one of the tariffs used in making combination rates on through shipments contains a rule that such rates will be subject to the increase but once, there is a holding out to the shipper of the rate so constructed which the carrier should protect. Mason City Brick & Tile Co. v. Director General, 88 I. C. C. 37, 41.

§9. Concerted Action.

See Evidence §10; Infra §16.

CASES 1887-1908

(a) While carriers are entitled to determine for themselves what are proper rates in the first instance, they cannot justify the making of rate advances by concerted action, under circumstances not showing justification for increased revenue, by the plea of financial necessity; the controlling question must be as to reasonableness and justification of the advance in classification and rates, on facts shown in each case. National Hay Asso. v. Lake Shore & Michigan S. R. Co., 9 I. C. C. 264.

(b) Carriers are entitled under the Act to Regulate Commerce to determine for themselves what are proper rates in the first instance, but when they, as in this case, make numerous rate advances by concerted action and under circumstances not showing justification for increased revenue, they cannot successfully plead the excuse of financial necessity where the legality of such action as applied to any given commodity is challenged; and the controlling question must be as to the reasonableness and justice of the advance in classification and rate upon the facts shown in each case. The National Hay Asso. v. L. S. & M. S. R. Co. et al., 9 I. C. C. 264.

(c) The advance of rates by defendants was the result of concerted action by them and other carriers, and, while the question whether such concert of action is in violation of the Anti-Trust Act is for the determination of the courts it is the province and duty of this Commission, when the reasonableness of rates is in issue before it, to consider whether the advanced rates resulted from untrammeled competition, or were fixed by concert of action or combination of carriers. Central Yellow Pine Asso. v. Illinois C. R. Co., 10 I. C. C. 505; Tift v. Southern R. Co., 10 I. C. C. 548.

(d) The advance of rates by defendants was the result of concerted action by them and other carriers; and, while the question whether such concert of action is in violation of the anti-trust act is for the determination of the courts, it is the province and duty of this Commission, when the reasonableness of rates is in issue before it, to consider whether the advanced rates resulted from untrammeled competition, or were fixed by concert of action or combination of carriers. Central Yellow Pine Asso. v. Illinois C. R. Co., 10 I. C. C. 505; Tift v. Southern, 10 I. C. C. 548.

(e) The advance of rates by defendants was the result of concerted action by them and other carriers, and, while the question whether such concert of action is in violation of the anti-trust act is for the determination of the courts, it is the province and duty of this Commission, when the reasonableness of rates is in issue before it, to consider whether the advanced rates resulted from untrammeled competition, or were fixed by concert of action or combination of carriers. Central Yellow Pine Asso. v. Illinois C. R. Co., 10 I. C. C. 505; Tift v. Southern R. Co., 10 I. C. C. 548.

(fg) Defendants made effective on June 22, 1903, an advance of 2 cents per 100 pounds over rates previously in effect from Georgia points to Ohio River destinations on lumber in carloads whether shipped locally to said Ohio River points or shipped beyond. The rates prior to that date were in effect from September 8, 1899, on which date an advance was made of 1 cent from Group 2 points on the Southern Railway, and of 2 cents from most other grouped shipping points in Georgia, over rates in force May 17, 1894. From the various groups the present advanced rates to Cincinnati, Louisville and Evansville are, as to some, 4 cents higher than in 1892, and as to others, 3 cents higher than in 1891. The rates prior to the advance complained of were remunerative to the carriers. HELD: 1. That complainants, constituting only a small portion of the membership of the Geeorgia Saw Mill Association, which is alleged by defendants to be an unlawful association, were entitled to bring and maintain this proceeding in their own behalf and in the interest of all shippers of the traffic involved and others constituting the public at large. 2. That the advance of rates complained of in this case was the result of concerted action by defendants and other carriers; and while the question whether such concert of action is in violation of the "Anti-TrustAct" is for de-

termination only by the courts, it is the province and duty of this Commission, when the reasonableness of rates is in issue before it to consider whether the advanced rates resulted from untrammeled competition, or were fixed by concert of action or combination of the carriers. 3. That where an advance is made in rates which have been long maintained, and the evidence shows that the traffic affected is large, important, and constantly increasing, the advance will be held unjust, unless it is satisfactorily explained. 4. That the test of the reasonableness of a rate is not the amount of profit in the business of the shipper or manufacturer, but whether the rate yields a reasonable compensation for the services performed. Carriers necessarily and justly participate in the prosperity of their patrons in the resultant enlargement of their own business, and no rule is more firmly grounded in reason, or more universally recognized by carriers, than that the greater the tonnage of the article transported, the lower should be the rate. 5 That if permanent improvements are not included in the operating expenses of defendants, and if only such expenditures for equipment as are properly chargeable to a single year are included, the percentages of operating expenses to gross earnings will be materially reduced. 6. That carriers have no right to advance a rate which is already reasonably high and which yields an adequate return for the service rendered, solely because additional revenue is needed. The mere fact of the need of additional revenue to meet increased expenses does not justify the advance in rates on these lumber shipments from Georgia to and beyond the Ohio River, which are, for the most part, of low grade and comparatively small value. 7. That the hauling of flat cars empty to the mills, or the practice of shippers to load cars below their capacity, are conditions which, to the extent they exist, are properly taken into account by carriers in fixing rates; and it must be assumed that they were considered by defendants in making and maintaining the rates so long in force prior to the advance herein charged. 8. That the rates on lumber, prior to the advance complained of, were reasonably high when compared with the rates on other commodities which are at all analogous to lumber in respect to value, volume, risk, cost of handling, and other circumstances and conditions affecting the transportation of the traffic. 9. That lumber rates should be relatively low, in view of the limited life of the lumber business in Georgia, at the end of which large investments of manufacturers in plants, including buildings, machinery and tram roads, will become practically valueless, the increase in the net revenue of the roads caused by the lumber traffic, the fact that lumber is inexpensive freight and few other commodities furnish greater tonnage, the constancy of the traffic throughout the year, the fact that no special equipment is required for its movement, that it is loaded by shippers and unloaded by consignees, that when flat or open cars are furnished the shipper is at considerable expense to equip them so as to protect the lumber and the train, that it is not a perishable freight and does not require rapidity of movement, that there is small risk and in case of accident the damage is insignificant, and that lumber is an article of general utility. 10. That the advance of 2 cents per 100 pounds in defendants' rates on lumber from Georgia shipping points to Ohio River points, which was made effective June 22, 1903, was not warranted by the facts, circumstances and conditions disclosed in this case, and that the increased rates then put in force are unreasonable and unjust. Tift et al. v. Southern R. Co. et al,, 10 I. C. C. 548.

(h) Rates in force on freight articles from St. Louis, Mo., to Texas common points prior to March 15, 1903, afforded reasonable compensation to the carriers, and, as they had been in effect for a long period, and the material advance of such rates on that date were made through concerted action of the carriers, justification for the advances should be clearly shown; but this is a general investigation, in which no complainant is demanding relief from some particular rate, and no particular rates have been investigated, and it does appear, moreover, that the financial condition of the respondents, especially those operating in Texas, is not favorable. While impressed with the belief that these advances in rates are improper, the Commission does not feel warranted in making an order condemning such advances in this proceeding. Re Class & Commodity Rates from St. Louis to Texas Common Points, 11 I. C. C. 238.

(i) Defendant's rates on cut flowers

from certain points in New Jersey and Pennsylvania to New York City, prior to May 1, 1906, were graduated from 50 to 75 cents per 100 pounds and on empty boxes returned from New York City to said points were graduated according to weight from 5 to 25 cents each; on said date the rates on cut flowers were increased to $1 per 100 pounds, and the rates on empty boxes folded flat were graduated from 50 to 75 cents per 100 pounds and on empty boxes folded flat the rates were made $1 per 100 pounds. HELD: Upon complaint that the advanced rates are excessive, that such rates are unreasonable, but that 60 cents per 100 pounds would be a reasonable rate upon cut flowers from the Chatham district, New Jersey, to New York City, and a similar increase of 10 cents above the rates existing on April 30, 1906, from the other points involved would be reasonable, and that the merchandise rate should apply on empty boxes not folded flat on the return trip. Society American Florists, Etc., v. U. S. Express Co., 12 I. C. C. 121.

(j) The evidence of complainants strongly tended to show that an illegal agreement to advance rates on cotton-piece goods was entered into by transcontinental lines and that the advanced rates were put in in consequence of that agreement; but it is not necessary to pass upon that question, because if it were answered in favor of complainant the Commission should still be of the opinion that this would afford no ground for either reducing the rate from southern mills or awarding reparation. The mere fact that the advance was the product of an unlawful combination will not justify the Commission in setting aside such rate if the Commission is of the opinion that such rate is not unreasonably high. Tift v. Southern Ry. Co. et al., 10 I. C. C. Rep. 548, and other decisions of the commission cited and followed. China & Japan Trading Co. v. Ga. R. R. Co. et al., 12 I. C. C. 236.

(k) The mere fact that an advance in rates is the product of an unlawful combination by interstate carriers will not justify the Commission in setting aside such rate if not unreasonably high. Tift v. Southern Ry. Co., 10 I. C. C. Rep. 548, and other decisions of the Commissioners cited and followed. China & Japan Trading Co. v. Georgia R. Co., 12 I. C. C. 236, 241.

(lm) A rate which is advanced as the result of an agreement among carriers, even if such agreement be with color of violation of the Anti-Trust Act, will not on that ground alone be declared unreasonable; evidence of such violation is pertinent and must be considered, but the existence of such an unlawful agreement, even when proved, is not conclusive of the unreasonableness of the rate so advanced. Enterprise Mfg. Co. v. Georgia R. R., 12 I. C. C. 451, 456.

IMPORTANT CASES SINCE 1908

(n) No presumption of unreasonableness arises from the theory that advanced rates were established as a result of agreement between carriers. Railroad Commission of Texas v. S. F. Ry. Co., 20 I. C. C. 463, 465.

(o) While evidence of collusion or concert of action among carriers to increase rates may be pertinent upon the issue of reasonableness, and will be taken into consideration by the Commission, yet evidence of such concert of action is not for that reason alone conclusive of unreasonableness of the rates so increased. Violations of the anti-trust acts are cognizable only in the courts. The Commission in the exercise of its administrative functions must weigh other factors and give consideration to the evidence as a whole. Excelsior from St. Paul, Minn., 36 I. C. C. 349, 362.

Kiser Co. v. C. of Ga. Ry. Co., 17 I. C. C. 430, 440; Chicago Lumber & Coal Co. v. T. S. Ry. Co., 16 I. C. C. 323, 332; Rates on Excelsior and Flax Tow from St. Paul, 26 I. C. C. 689, 692; Live Stock Rates from Colorado Points to Omaha, 35 I. C. C. 682, 689; Excelsior from St. Paul, Minn., 36 I. C. C. 349, 362.

§9½. Double Advances.

IMPORTANT CASES SINCE 1908

(a) When rates are based on combinations and tariffs governing one factor contained provision for the application of a flat increase to the through rate, carriers parties to the tariff governing the other factor which contained no similar provision and who concurred in the tariff containing such provision are bound by the rule which prescribed a specific method for constructing com-

bination on through shipments. Indian Refining Co. v. Director General, as Agent, 60 I. C . C. 438, 439.

(b) Where one of the tariffs used in making combination rates on through shipments contains a rule that such rates will be subject to the increase authorized under General Order No. 28 but once, and tariffs of the other carriers participating in the movement do not publish the clause or refer to any other tariff which publishes such a rule, there is a holding out to the shipper of the rate so constructed and carriers should protect. Sligo Iron Store Co. v. W. M. Ry. Co., 62 I. C. C. 643, 644.

(c) The application of a general increase to each of the several components of a combination rate does not in and of itself warrant a condemnation of the resulting aggregate rate. Walrath & Sherwood Lumber Co. v. Direstor General, 73 I. C. C. 271, 272.

(d) The application of general increases to each factor of combination rates does not in and of itself establish the unreasonableness of the increased aggregate rates. Hydraulic Press Brick Co. v. Director General, 74 I. C. C. 185, 186.

(e) Following Sligo Iron Store Co., 62 I. C. C. 643, and Madison Lumber & Mill Co., 64 I. C. C. 699, where one of the tariffs used in making combination rates on through shipments contains a rule that such rates will be subject to the increase authorized under General Order No. 28 of the director general but once, and tariffs of other carriers participating in the movement do not publish the clause or refer to any other tariff which publishes such a rule, there is a holding out to the shipper of the rate so constructed which carriers should protect. Standard Oil Company (California) v. Director General, as Agent, 74 I. C. C. 188.

(f) Where one tariff used in making combination rates on through shipments contained a rule that such rate would be subject to a single increase, there was a holding out to the shipper of the rate so constructed which the publishing carrier should protect. Standard Asphalt & Refining Co. v. Director General, 74 I. C. C. 274, 275.

(g) Shipments moved under combination rates, to each factor of which was applied the increase under General Order No. 28 of the director general. Tariff of one of the participating carriers provided that such increase be added but once to the combination rate. HELD: Where one of the tariffs used in making combination rates on through shipments contains a rule that such rates will be subject to a single increase there is a holding out to the shipper of the rate so constructed which the publishing carrier must protect. Reparation awarded. Marcus & Co. v. Director General, as Agent, 77 I. C. C. 244, 245, 246.

(h) Neither application of general increases to each factor of combination rates, nor failure of carriers to apply full increases authorized by commission in various cases or under General Order No. 28 of director general, is conclusive of reasonableness of applicable rates. American Fruit & Vegetable Asso. v. B. & A. R. R. Co., 78 I. C. C. 381, 384.

(i) Provisions of General Order No. 28 of director general are not inconsistent with application of double increases to combination rates, and it does not follow that rates increased beyond authority of that order are necessarily unreasonable. United Light & Railways Co., 69 I. C. C., 414, 417. Anaconda Copper Mining Co. v. Director General, as Agent, 80 I. C. C. 481.

(j) Rate on coke from Sunnyside, Utah, to Black Eagle, Mont., to each factor of which was applied increase under General Order No. 28 of director general, found not unreasonable. Between Sunnyside and Black Eagle volume of tonnage is practically all northbound, and return movement of equipment is practically all empty. Anaconda Copper Mining Co. v. Director General, as Agent, 80 I. C. C. 481.

(k) The Commission has uniformly found that, in absence of evidence showing that aggregate charge is unreasonable, double increase made under General Order No. 28, or lack of compliance therewith, does not of itself afford basis for finding of unreasonableness. Buhler Mill & Elevator Co., 66 I. C. C., 613, and cases there cited. Saginaw Milling Co. v. Director General, as Agent, 83 I. C. C. 343.

(l) It is settled that where the combination of separately established locals or proportionals is the usual and recognized basis for rates, the application of flat increases to the separate components of such combination rates is not, when unaccompanied by additional evidence,

sufficient to support a finding of unreasonableness. Mason City Brick & Tile Co, v. Director General, 88 I. C. C. 37, 44.

§10. Economy of Management.

See Reasonableness of Rates §12.

IMPORTANT CASES SINCE 1908

(a) No general advance in rates should be permitted until carriers have exhausted every reasonable effort toward economy in their business. The inducement to adopt methods of this kind which necessity creates in private occupations does not exist to the same extent in railroad operations. The Commission cannot escape the impression that railroad operators have not given to this important subject the attention which it deserves. An examination of the statistics before the Commission in in this case shows the widest divergence in the cost of doing the same thing upon different railroads. It appears, for example, that the cost of maintaining locomotives per train mile for the year 1910 was 9.22 cents upon the B. & O. R. R., as compared with 6.15 cents upon the B. & M. R. R. It is impossible to resist the conviction that railroads have not in the past given sufficient attention to these details, and in the future they must be prepared to explain these apparent differences in their operating costs, and to show reasonable diligence. In Re Advances in Rates, Eastern Case, 20 I. C. C. 243, 279.

(b) A premium must be put upon efficiency in the operation of American railroads. Rates cannot be increased with each new demand of labor or because of wasteful, corrupt or indifferent management. Nor should rates be reduced with each succeeding improvement in method. Society should not take from the wisely managed railroad the benefits which flow from the foresight, skill and planned cooperation of its working force. We may ruin our railroads by permitting them to impose each new burden of obligation upon the shipper. And we can make no less sure of their economic destruction by taking from them what is theirs by right of efficiency of operation—the elimination of false motion, of unneeded effort and the conservation of labor and material. The standard of rates must be so high that the needed carrier which serves its public with honest and reasonable effort may live. And yet rates should be still so much below the possible maximum as to give high and exceptional reward to the especially capable management, the well coordinated force and plant. Advances in Rates, Western Case, 20 I. C. C. 307, 334.

§10½. Fractions.

See Physical Valuation.

IMPORTANT CASES SINCE 1908

(a) Contention that as supplement to General Order No. 28, issued June 12, 1918, published specific increases on coal authorized by the General Order, but not the rule concerning the disposition of fractions, such rates were excepted from the application of that rule. HELD: Not sustained by the provisions of the supplement, and if it were the fact would not be controlling. Tallulah Cotton Oil Co. v. Director General, as Agent, 62 I. C. C. 41.

(b) Rule for disposition of fractions under General Order No. 28 of the director general, applied only to rates quoted in dollars or dollars and cents per ton. Such rule did not, and could not, by any reasonable interpretation, qualify another rule, which was complete in itself and specifically provided for the application of rates stated in cents per ton or other unit. Shipments found overcharged and reparation awarded. Hercules Mining Co. v. Director General, as Agent, 66 I. C. C. 140.

Director General, as Agent, 66 I. C. C. 157; MacGowan Coffee Co. v. I. C. R. R. Co., 66 I. C. C. 389; Walsh Fire Clay Products Co. v. Director General, 73 I. C. C. 413.

§10½a. Physical Valuation.

See Physical Valuation.

IMPORTANT CASES SINCE 1908

(a) While the valuation of the railroads under section 19-A of the Interstate Commerce Act is still incomplete, the work has progressed so far that the results are of value and informative in reaching the determination the Commission is now required to make. So far as the work has produced results, either as to particular roads, or as showing general tendencies and principles, the Commission has given consideration thereto. As will appear from examination of the Commission's various valuation reports and from section 19-A itself, the investigation of the Commission under that section is designed to give information as to the original cost of the property, the cost of reproduction now, the accrued depreciation, the amount of the investment, the corporate histories of the properties, the values of the lands, and other values and elements of value, if any. Ex Parte 74, Application for Increase in Rates, 58 I. C. C. 220, 228.

(b) In property appraising all elements of value, the Commission is mindful of the fact that the carriers are operating units and going concerns. This fact has been given due consideration in the light of the financial history of the transportation system of the United States, as developed by the record and as known to the Commission. The needs for working capital, and materials and supplies on hand, have been considered and allowance therefore has been made. Ex Parte 74, Application for Increase in Rates, 58 I. C. C. 220, 229.

ALL OTHER CITATIONS

Ex Parte 74, Application for Increase in Rates, 58 I. C. C. 220, 229, 228.

§11. Scientific Management.

IMPORTANT CASES SINCE 1908

(a) In combating a general advance in rates in Official Classification territory the shippers contended that by the use of "scientific management" $300,000,000 annually could be saved by the proper application of these methods to the business of railroading in the United States. The witness who testified to this stated that they were not in actual operation in over one-tenth of 1 per cent of all the manufacturing establishments in this country. HELD: The system is everywhere in an experimental stage and the Commission cannot find that the defendants could make good any part of their actual advances in wages by the introduction of scientific management. In Re Advances in Rates, Eastern Case, 20 I. C. C. 243, 279.

§11½. Differentials or Rate Relationship.

See Differentials; Relative Rates.

CASES 1887-1908

(a) On January 1, 1900, defendants and other carriers using the Official Classification advanced hay and straw in carloads from sixth to fifth class rates, and have since enforced such advanced charges. It is conceded that hay and straw should take the same rates. Hay in respect of character, use, value and volume corresponds more nearly with articles taking sixth class or lower commodity rates than with those in the fifth class. Apparently all commodities which come to defendants in aggregate volume or tonnage equal to or exceeding that of hay are given commodity rates. Hay as compared with grain and some other articles when carried between the same points gives the carriers less revenue per car, but it does not follow therefrom, taking the whole traffic, local as well as through, that hay may not give the carriers an average revenue per car per mile nearly as great or even greater than that derived from grain or such other articles. Though hay may be less desirable than grain as an article of traffic, it is much more profitable to the carriers, considering its greater volume and the certainty of large quantities seeking transportation each year, than many, if not all, other commodities actually taking fifth or even sixth class rates. Hay is a raw agricultural product which is grown, shipped and consumed in all parts of Official Classification Territory, and, coming to the carriers in steady and large volume, is profitable to them at sixth class rates. The cost to the shipper of transporting hay from the

Middle West to eastern markets constitutes a large part of its value in such markets, and when added to the cost of baling and sale the total approximates or exceeds the price realized by the producer. The increased rates have added to the cost of hay and straw to consumers or diminished the price to producers, or both, and prejudiced in some degree the business of middlemen. The advance in hay rates changed a long-existing rate adjustment as between American and Canadian hay shipped to New England and parts of New York in favor of a producing section in a foreign country from which hay shipments into the United States are required by law to pay a duty as high as $4.00 per ton. HELD: Upon all the facts and circumstances, that the action of defendants on January 1, 1900, whereby hay and straw were advanced from sixth to fifth class and thereafter charged fifth class rates for transportation was unreasonable and unjust and resulted in unlawful discrimination and prejudice against hay and straw, localities in Official Classification Territory wherein those commodities are produced, and against producers, shippers, dealers and consumers of such articles in that section of the country. The National Hay Asso. v. L., S. & M. S. R. Co. et al., 9 I. C. C. 264.

IMPORTANT CASES SINCE 1908

(b) While established or differential relationships of rates are not general, there are many adjustments, some fixed by the carriers and others by the Commission, and it is contended by some shippers that in such cases it is desirable in readjustments such differentials should be maintained. Many relationships in cents per unit were disturbed by the increases made by the Director General, except upon a few commodities of heavy movement which were subjected to specific increases in cents and dollars and cents per unit. A relatively small proportion of these relationships have subsequently been restored. It is evident that there are many competitive situations where no recognized differentials have ever existed but where, nevertheless, the rates have been made to reflect competitive conditions. Such situations greatly outnumber those where fixed relationships have been established. Ex Parte 74, Application for Increase in Rates, 58 I. C. C. 220, 244.

(c) The mere showing of the fact that in making effective the increase provided in General Order No. 28 of the Director General, a slight disturbance was created in the percentage relationship which a specific rate bore to other rates between the same points, and the subsequent voluntary restoration of that relationship, does not warrant a condemnation of the rate in effect during the interim. Ault & Wiborg Co. v. Director General, as Agent, 64 I. C. C. 443.

(d) Not only must the reasonableness of proposed increased rates be shown, but also their propriety in relation to other rates. Coal from Kentucky, Tennessee and Virginia, 73 I. C. C. 447, 450.

ALL OTHER CITATIONS

C. 483; Endicott-Johnson Corp. v. E. R. R. Co., 73 I. C. C. 562; Rails and Crossties from Eastern Points to Canada, 74 I. C. C. 3; Fruits, Melons, and Vegetables from Southwest to C. F. A., and trunk line points, 77 I. C. C. 180; Grain and Grain Products Between Stations on Northern Pacific Ry. in Idaho and North Pacific Coast Terminals, 77 I. C. C. 225; Coke from Chicago, Ill., and St. Louis, Mo., to Kansas and Missouri Points, 78 I. C. C. 248; Class Rates from Points in Kansas to Eastern Colorado, 80 I. C. C. 709; Brick and Clay Products from Texas to Arizona, 81 I. C. C. 20.

§12. Branch Lines.

See Branch Lines.

(1) Operation.

See Operation.

IMPORTANT CASES SINCE 1908

(a) If the branch lines of a railroad are judiciously planned and constructed they should certainly be taken into account in determining the value of the

railroad, for, although they may not earn a large return upon the cost, considered as an independent proposition, they do add to the traffic and the earning power of the entire system; but it must be assumed that the new branches which have been constructed are good investments, otherwise they would not have been built, and that they will add to the earnings of the property in proportion as they have added to its cost. No increase in rate should be called for on this account. City of Spokane v. N. Y. Ry. Co., 19 I. C. C. 162, 171.

(b) So the theory of a carrier that because an expense is incurred in hauling traffic over a particular division or branch, it is entitled at least to the branch rate, plus the additional expense, if not to some profit for the extra service, is an erroneous one. It is calculated to justify an increased rate from almost any point, particularly on coal or coke traffic where the rates from the mines are generally grouped. If, in making rates, a through route is to be divided into divisions, and these divisions subdivided into sections, why should not the separation continue until the road is dissected into as many parts as there are stations, or miles, or even feet of track? L. & N. R. R. Coal and Coke Rates, 26 I. C. C. 20, 30.

ALL OTHER CITATIONS

§12. (2) Purchase.

See Evidence §37; Reasonableness of Rates §15.

IMPORTANT CASES SINCE 1908

(a) If the New York Central Co. has exercised poor judgment in the taking on of subsidiary properties at the rentals which are paid, this ought not to permanently impose upon the shipping public an extravagant rate if the leases are unprofitable. The Commission should indulge every reasonable presumption in favor of the good faith and the good judgment of those who put together these properties, but certainly in the final analysis it cannot impose upon the community served by this system an unreasonable rate forever, simply because the managers of this property at some time in the past agreed to pay more for the use of a railroad than it was or is actually worth. In Re Advances in Rates, Eastern Case, 20 I. C. C. 243, 300.

ALL OTHER CITATIONS

Davis Bros. Lumber Co. v. C., R. I. & P. Ry., 26 I. C. C. 257.

§13. Detriment to Shipper.

See Evidence §45.

CASES 1887-1908

(a) Complainant attacked as unreasonable advance of 2c per 100 pounds over rates previously in effect from Georgia points to Ohio River destinations on lumber, carloads, whether shipped locally to said Ohio River points or shipped beyond. Rates on lumber, prior to the advance complained of, were reasonably high when compared with the rates on other commodities which are at all analogous to lumber in respect to value, volume, risk, cost of handling, and other circumstances and conditions affecting the transportation of the traffic. Lumber rates should be relatively low, in view of the limited life of the lumber business in Georgia, at the end of which large investments of manufacturers in plants, including buildings, machinery and tram roads, will become practically valueless, the increase in the net revenue of the roads caused by the lumber traffic, the fact that lumber is inexpensive freight and few other commodities furnish greater tonnage, the constancy of the traffic throughout the year, the fact that no special equipment is required for its movement, that it is loaded by shippers and unloaded by consignees, that when flat or open cars are furnished the shipper is at considerable expense to equip them so as to protect the lumber and the train, that it is not a perishable freight and does not require rapidity of movement, that there is small risk and in case of accident the damage is insignificant, and that lumber is an article of general utility. HELD: The advance of 2c not warranted and the increased rates are unreasonable and unjust. Tift v. Southern Ry., 10 I. C. C. 548.

IMPORTANT CASES SINCE 1908

(b) Where a plant has been established and money invested on the faith of certain transportation rates and conditions, upon which the life of the plant depends, a carrier may not increase those rates and charges to the serious disadvantage of such investment without good cause or reason. Douglas & Co. v. C., R. I. & P. Ry. Co., 16 I. C. C. 232, 237.

(c) An advance in rates resulting

from an increase in a minimum cannot be condemned merely because it affects a contract of sale based on the lower minimum in the absence of any evidence that the rate or minimum advanced is unreasonable. Barnum Iron Works v. C., C., C. & St. L. Ry. Co., 18 I. C. C. 94, 95.

(d) The Commission has never understood that it could dictate the policy of a carrier in the making of its rates in so far as there was just room for the exercise of a policy. It has several times explicitly so declared. It has, however, believed that it might consider what the policy of a carrier has been in determining whether the rates resulting from a change in that policy were just and reasonable. It often happens that the very existence of an industry depends upon the rate accorded to it. If, now, a carrier has established a particular rate for the express purpose of enabling an industry to exist, and if upon the strength of that rate money has been invested which must be destroyed if the rate is withdrawn, this fact might properly be considered in passing upon the reasonableness of the proposed change in the rate. Such fact is not controlling but is one of the circumstances which may properly be kept in view. The Commission might in a proper case order the continued maintenance of a rate upon which the investment of money had been induced, even though it would not in the first instance as an original proposition have directed the establishment of that rate. Oregon & Washington Lumber Mfrs. Assn. v. S. P. Ry. Co., 21 I. C. C. 389, 394.

(e) Testimony as to the effect of an increase in rates will have on the business of the shippers involved is always relevant, but should be established by direct evidence as distinguished from opinion testimony. The mere statement of an opinion that a certain increase in rates will put shippers out of business is not conclusive, since this fact can be established by direct proof of actual conditions encountered or of instances where the increase would have had such an effect, or it might be proved by a showing of what it costs to produce the commodity shipped or the margin of profit on which the operation is conducted, and in many other ways. The Commission may not require witnesses to testify against their will concerning the cost of production of the articles moving in interstate commerce. Stonega Coke & Coal Co. v. L. & N. R. R. Co., 39 I. C. C. 523, 549.

(f) While the depressed condition of the lumber industry would not of itself warrant a finding that respondents have not justified the proposed increased rates respondents are required to show by clear and convincing proof that the proposed increased rates are just and reasonable. Water competitive rates on lumber, 60 I. C. C. 643, 651.

(g) Investments made in expectation of the continuance of existing rates will not be considered in determining the reasonableness of increased rates. Meyersdale Smokeless Coal Co. v. B. & O., 62 I. C. C. 429, 431.

(h) Complainant attacked the unreasonableness and propriety of the level of interstate rates on grain, grain products and hay, carloads, between points in western group, as described in 58 I. C. C. 220. The Commission is asked to find that rates on wheat and hay within the western group are unreasonable to extent they include any part of the general increases authorized by the Commission that rates on coarse grains within the western group are unreasonable to extent they exceed 90% of the rates found reasonable on wheat from and to the same points; and that rates on grain products are unreasonable to extent they exceed rates made by continuing the relationships that now exist. Deflation has taken place in the agricultural industry. The high prices for farm products which prevailed during the war period were reflected in abnormally inflated land values. Many farmers, in reliance upon the stability of the then current prices for farm products, purchased or rented lands or otherwise assumed heavy obligations at the prevailing high prices. As long as prices for their products remained high enough they were able to carry the financial burden which they had assumed, but with price recession many have found it increasingly difficult to continue; others have given up the struggle. In spite of the fact that the past year has been better than the average from the standpoint of tonnage handled, the revenues of the defendants are not shown to have been excessive or in violation of law. Carriers in the western group have been and are now earning considerably less than the fair return to which they are entitled under their constitutional rights entirely independent of section 15a. From the record, it is improbable that a reduction

in the present rates on the commodities in issue would so increase the movement of these commodities as to enable the carriers to make up to any appreciable extent the loss in revenue should a general reduction in these rates be ordered. Of prime importance to the agricultural industry and to the country in general is an adequate and efficient transportation service. The extent to which a marked rate reduction would disable the carriers generally or particularly in the performance of this service is of great consequence. So far as the usual tests of the reasonableness of rates shown by the record, other than perhaps the values of the commodities when viewed fom the standpoint of existing prices may be applied to the question before the Commission, they do not indicate that the general basis of rates on the commodities here in issue is unreasonably high. HELD, the general basis of rates of grain, grain products and hay within the western group has not been shown to be unjust unreasonable, unduly prejudicial, or otherwise in violation of the act. Complaint dismissed Public Utilities Commission of Kansas v. A. T. & S. F. R. Co., 83 I. C. C. 105.

§14. Benefit to Industry.

See Evidence §45.

IMPORTANT CASES SINCE 1908

(a) Carriers in Official Classification territory advanced all the class rates and about one-half the commodity rates. It was urged that to permit these advances would induce larger expenditures in the maintenance of the roads, lead to extensions and improvements, which would in turn employ additional labor, put into circulation additional money and thereby improve general business conditions. It was also urged that the facilities of railway supply houses could only be utilized to the most profitable extent in case additional railroads were constructed and additional equipment required. HELD, the Commission must stand for the entire public, including the railways. It cannot accede to the mere wish of any class. It must recognize the just demand of all classes, and it must have in mind those who do not appear as well as those who are represented before it. The Commission ought not to impose upon the public rates otherwise unreasonable, for the mere purpose of temporarily providing business for the factories of railway supply houses, even though the effect might be to stimulate for the time being other kinds of industries. Just and reasonable rates should be allowed, but the Commission is not justified in permanently imposing rates unduly high in order that business conditions might be temporarily improved. In Re Advances in Rates—Eastern Case, 20 I. C. C. 243, 250, 251.

(b) The desire of dock operators to

increase the movement of traffic over their docks is not in itself a sufficient reason to justify an increase in all-rail rates. Coal from Kentucky, Tennessee and Virginia, 73 I. C. C. 447, 451.

ALL OTHER CITATIONS

Straw Rates from Stations in Missouri to Alton, Ill., 29 I. C. C. 562, 564.

§14½. Motive of Carrier.

See Evidence §34½.

IMPORTANT CASES SINCE 1908

(a) The motives which underly the action of carriers in increasing rates are not matters about which the Commission may indulge in speculation. The question whether proposed rates are reasonable must be determined upon the facts disclosed by the record. Freight Rates from Minnesota Points, 32 I. C. C., 361, 363.

§14¾. Previous Decision of Commission.

See Previous Decision of Commission.

(a) A previous decision of the Commission concerning the same or an allied rate relationship will be considered in determining the propriety of an advanced rate. Lumber from Sioux City, Ia., 47 I. C. C. 540; Rice from Texas and Louisiana (No. 2), 49 I. C. C. 172, 175; Anderson-Theobald Co. v. V. R. R., 50 I. C. C. 596; Chamber of Commerce of Johnson City, Tenn., v. S. Ry., 50 I. C. C. 248; Paper and Paper articles from Canada and New England 78 I. C. C. 258.

§15. Standard for Judging Advance.

See Evidence §55, §56; Relative Rates.

CASES 1887-1908

(a) Carriers making an advance in rates should be able to present a satisfactory justification of such advance, particularly when the old rates have been of many years standing and the advance is great and the traffic affected is of large and constantly increasing volume and of vital importance to a large section of country. National Hay Asso. v. L. S. & M. S. R. Co., 9 I. C. C. 264, 305.

(b) The advance in the rate on packing-house products, which was made by withdrawing a lower export rate is not properly an advance. In the Matter of Proposed Advances in Freight Rates, 9 I. C. C. 382.

(c) The legality of the recent advances to 20 cents of the tariff rates on grain and grain products from Chicago to New York, which have not exceeded 17½ cents during the last four years, except for a brief period, while the actual rates have been materially, and sometimes greatly, below that figure, depends upon two considerations: First, whether the increased rate is reasonable, having reference to the cost and value of the service, and as compared with rates on other commodities; and, second, whether it is reasonable in the absolute regarded as essentially a tax upon the people who ultimately pay the transportation charge. In the Matter of Proposed Advances in Freight Rates, 9 I. C. C., 382.

(d) Transportation by rail is a quasi-public service, not to be sold to the highest bidder, and the charges therefor are not controlled by the law of supply and demand. Freight rates do not in fact rise and fall with changes in the market prices of commodities, though they are often affected by commercial conditions; and when reductions have been made on account of commercial depression it is difficult to see why corresponding advances may not properly be made with the return of business prosperity. In the matter of proposed advances in freight rates, 9 I. C. C. 382, 405.

(e) Complaint was made of an advance by defendants of 2 cents per 100 pounds on April 15, 1903 (except as to the L. & N. R. Co., as to which the advance became effective June 22, 1903), in the rates on lumber in carloads from points in lumber producing territories east of the Mississippi River in Louisiana, Mississippi, and part of Alabama served by defendant roads, to Ohio River points, applying both on shipments locally to such Ohio River points and to shipments destined beyond. On September 9, 1899, the rate previously in effect from May 1, 1894, was advanced one cent, making a total advance of 3 cents since May 1, 1894. The rates prior to advance on April 15, 1903, were remunerative to the defendant carriers. HELD, 1. That when a railroad company advances a rate which has been for some time in force, the fact of its continuance is in the nature of an admission against that company which tends to show the unreasonableness of the advance; and in this case the rates in effect for long periods prior to the advance are shown to have been profitable to the defendant carriers. 2. That the test of the reasonableness of a rate is not the amount of profit in the business of the shipper or manufacturer, but whether the rate yields a reasonable compensation for the services performed. Carriers necessarily and justly participate in the prosperity of their patrons in the resultant enlargement of their own business. 3. That the advance in rates by defendants was not justified by increased cost of operating the roads, for while the operating expenses have constantly increased they have been enlarged by the inclusion therein of large expenditures for permanent improvements, and defendants' gross earnings have increased from year to year to such extent as to result in a constant increase of net earnings. 4. That the value of the entire property of a road employed for the public convenience can shed but little, if any, light upon the question whether the rate on one among thousands of articles of traffic yields its proper proportion of a fair return upon that value, and moreover, the voluminous and conflicting testimony in this case on that subject does not enable the Commission to determine the value of defendants' respective properties. 5. That the elements to be considered in determining the reasonableness of an entire system of rates are widely different from those involved in the question of the reasonableness of the rate upon a single commodity. 6. That the advance of rates complained of in this case was the result of concerted action by defendants and other carriers; and while the question whether such concert of action is in violation of the "Anti-Trust Act" is for determination only by the courts, it is the province and duty of this Commission, when the reasonableness of rates is in issue before it, to consider whether the advanced rates resulted from untrammeled competition, or were fixed by concert of action or combination of carriers. 7. That the rates in effect prior to the advance were reasonably high when compared with the rates on other commodities which are at all analogous to lumber in respect to value, volume, and the various conditions affecting the service of transportation. 8. That carriers have no right to advance a rate which is already reasonably high and which yields an adequate return for the services rendered solely because additional revenue is needed. 9. That logging roads, or "tap lines," to which the defendant M. & O. R. Co. grants allowances from its published rates, are not common carriers, but such tap lines are the private properties of mill owners, and the allowances are therefore unlawful. Cent. Yellow Pine Assn. v. V. S. & P. R. R. Co. (10 I. C. C. Rep. 193), cited and applied. 10. That section 3, of the Act to regulate commerce, which prohibits undue preferences as between individuals or localities, is not violated by the failure or refusal of defendants to make "tap line" allowances to mill owners in their territory while such allowances are granted to mill owners by other carriers in the territory west of the Mississippi; but if the rate west of the Mississippi River, minus the allowance, is reasonable, it tends to sup-

port the proposition that a similar reduction east of the River would leave the rate reasonably high; and the M. & O. R. Co., by voluntarily making such allowances east of the River, practically concedes this proposition as to itself. 11. That no rule is more firmly grounded in reason or more universally recognized by carriers, than that the greater the tonnage of an article of traffic, the lower should be the rate, but defendants have made yellow pine lumber an exception to this rule. 12. That lumber rates should be relatively low, in view of the fact that lumber is inexpensive freight and few other commodities furnish to carriers so large a tonnage; that the lumber business is constant, yielding carriers revenue all the year; that no special equipment is constructed or furnished for its carriage; that it is loaded by shippers and unloaded by consignees, and where open cars are furnished the shipper is required, at considerable expense, to equip them so as to protect the lumber and the train; and that there is small risk and in case of accident the damage is insignificant. 13. That the advance on April 15, 1903, of 2 cents per 100 pounds in the rate from the shipping points in question to the Ohio River was not warranted, and that the resultant increased rates are unreasonable and unjust. Central Yellow Pine Asso. v. Illinois C. R. Co., et al, 10 I. C. C. 505.

(f) When a railroad company advances a rate which has been for some time in force, the fact of its continuance is in the nature of an admission against that company which tends to show the unreasonableness of the advance. Central Yellow Pine Asso. v. I. C. R. R. Co., 10 I. C. C. 505, 535.

IMPORTANT CASES SINCE 1908

(g) In determining the reasonableness of an advance in rates by all the railroads in Official Classification territory the Commission ought not to make the most opulent nor the poorest railroad the standard by which to measure the reasonableness of the rates. In this territory the Pennsylvania system, the New York Central lines and the Baltimore & Ohio may be taken as typical, and whatever rate might reasonably be imposed upon these three systems must be held to be a reasonable charge for that service by all lines. Under rates reasonable for these three systems there may be lines whose earnings will be extravagant, but that is their good fortune. There may be lines which cannot make sufficient earnings, but that is their misfortune. The Commission ought not to impose upon this territory, for the purpose of allowing defendants additional revenues, higher rates than are adequate to these three systems considered as a whole. In Re Advances in Rates—Eastern Case, 20 I. C. C. 243, 274.

(h) In determining whether railroads running west of Chicago should be permitted to increase some 200 commodity rates, the Commission bases its decision upon the profits of those roads which are typical and therefore considers the figures of the Santa Fe, Burlington, C. & N. W., C. M. & St. P., Rock Island and C. & A. R. Rs. In Re Advances in Rates —Western Case, 20 I. C. C. 307, 324.

(i) In the absence of evidence bearing on the specific transaction, a comparison of the rates under consideration with other rates prescribed by the Commission in the same general section of the country is helpful in judging of the propriety of an advance. In re Advances on Fruits and Vegetables, 24 I. C. C. 164, 166.

(j) It is as much an increase of rate to give less service for the same amount as to charge a greater amount for the same service. Consolidation Coal Co. v. C. & O., 60 I. C. C. 763, 767.

(k) Where rates are based on combinations and tariff governing one factor contained provision for the application of a flat increase to the through rate, carriers parties to the tariff governing the other factor which contained no similar provision and who concurred in the tariff containing such provision are bound by the rule which prescribed a specific method for constructing combination rates on through shipments. Indian Refining Co. v. Director General, as Agent, 60 I. C. C. 438, 439.

(l) The essential question to be determined is whether the rate attacked was unreasonable or unduly prejudicial, and not whether it was contrary to the intent of the Director General in applying the increases ordered in G. O. 28. The Pure Oil Co. v. Director General, 64 I. C. C. 688, 689.

(m) It is not alone the line that can handle the traffic with the least cost that determines the question whether proposed rates are justified. Bituminous Coal to C. F. A. Territory, 46 I. C. C. 66, 115.

(n) The controlling fact to be determined is not whether the rate was increased in strict compliance with the terms or the intention of G. O. 28, but whether the resulting rate was unreasonable or otherwise unlawful. Greene Cananea Copper Co. v. Director General, 80 I. C. C. 121, 122.

ALL OTHER CITATIONS

C. 59; Rates from northern points to Bristol, Tenn.-Va., 73 I. C. C. 389; Van Dusen Harrington v. Director General, 78 I. C. C. 729, 731.

§15½. Two Line Haul.

See Evidence §59.

IMPORTANT CASES SINCE 1908

(a) While the Commission has approved in some cases rate increases because of two or more carriers participating in the haul, this fact has not, however, been laid down as a principle generally applicable to two-line hauls. Coal to South Dakota, 47 I. C. C. 750, 755.

ALL OTHER CITATIONS

United States Gypsum Co. v. C. R. I. & P. Ry. Co. Unrep. Op. A-760; Lumber Rates from Points in Arkansas, 34 I. C. C. 102; Coal to South Dakota, 47 I. C. C. 750, 756; Boldt Co. v. Directors General, 57 I. C. C. 259.

§ 16. Uniformity of Advance.

See Supra §9.

IMPORTANT CASES SINCE 1908

(a) Tariffs publishing a general advance in rates may not be criticized in the absence of testimony showing that specific mistakes or blunders were made because all the rates were not advanced on a fixed percentage, or because carriers in going over schedules selected particular commodities that seemed best able to stand a rate advance and others that seemed likely to move more freely under reduced rates and thus produce larger revenues. R. R. Commission of Texas v. A. T. & S. F. Ry. Co., 20 I. C. C. 463, 482, 483.

ALL OTHER CITATIONS

In Re Advances on Grain, 21 I. C. C. 22, 36, 38, 39; In Re Advances on Locomotives and Tenders, 21 I. C. C. 103, 252; Lumber from Oklahoma, 42 I. C. C. 567.

§16½. Widespread Rate Adjustment.

See Evidence §66.

IMPORTANT CASES SINCE 1908

(a) The fact that a flat increase was authorized as reasonable for general application does not preclude attacks upon particular rates which include that increase upon the ground that the resulting rate was unreasonably high. Lawton Refining Co. v. Director General, 73 I. C. C. 121, 122.

(b) The commission could not deny an otherwise justified increase because it might be used as a lever for increasing other charges. Switching at Mason City, Iowa. 73 I. C. C. 308, 310.

(c) Fact that proposed increased rates are made in accordance with a basis of long standing does not of itself constitute sufficient justification. Especially is this true when it is shown that such higher rates, without a corresponding change in the rate from competing points, would result in undue prejudice. Silica from Southern Illinois, 73 I. C. C. 406, 408, 409.

(d) Increases in individual rates must of necessity occur under any plan of unification where wide disparities and inconsistencies exist, but these are justified only to the extent that they are necessary to secure a harmonious rate structure and to avoid any undue depletion of carriers' revenues. Memphis-Southwestern Investigation, 77 I. C. C. 473, 500.

(e) Rates on coal from Ohio and Crescent districts to Stroh, Ind., found not unreasonable but rate parity with Jackson, Mich., group, disrupted following Bituminous Coal to C. F. A. Territory, 46 I. C. C., 66, and subsequent general increases should be restored. Reparation denied. Ohio-Michigan Coal Cases, 80 I. C. C. 663, 676.

(f) Proposed increased rates on plate and sheet iron and steel from St. Louis, Mo., Peoria and Chicago, Ill., St. Paul, Minn., and points taking same rates, to points in Kansas, Nebraska, and Colorado, found not justified. Protestant urged that proposed rates would disrupt adjustment between points in eastern and western Kansas, that there is no justification for publishing to points in Kansas same rates that apply to Colorado Common points and submitted various comparisons in support of contention that proposed rates are justified. Increased Rates on Iron and Stel Articles, 80 I. C. C. 732.

ALL OTHER CITATIONS

Box Shooks from Southeast to Eastern Points, 64 I. C. C. 389; Trunk Line & Ex Lake Ore Rates, 69 I. C. C. 611; Cement from Ohio and Mississippi River Crossings, 74 I. C. C. 561; Grain and Grain Products from Idaho, 77 I. C. C. 225.

IV. REASONABLENESS OF ADVANCED RATES.

See Through Routes and Joint Rates VI.

§17. In General.

See Evidence §17.

CASES 1887-1908

(a) An advance of 10 cents per box in rates on oranges from Florida to New York made by defendants was without justification, and so far as it exceeded 5 cents per box was unreasonable and contrary to law. Railroad Commission of Florida v. S. F. & W. R. Co., 3 I. C. C. 688.

(b) Upon consideration of all the facts and circumstances in this case,—HELD, that the advance of 10 cents per box in rates on oranges from Florida points to New York and other northeastern markets, made by defendants on November 23, 1890, was without justification, and so far as it exceeded 5 cents per box was unreasonable and contrary to law; that defendants be notified and required to make reparation for injuries occasioned by such unreasonable and unlawful rates to the several persons entitled thereto, and, as such persons are not parties to this proceeding and the amounts wrongfully received from them, respectively, cannot be ascertained from the evidence already taken, that this proceeding be continued for such further action or inquiry in that behalf as may become necessary. R. R. Commission of Florida v. Savannah, F. & W. R. Co., 3 I. C. R. 688.

(cd) The increase of rates for the transportation of oranges from Florida points to northeastern cities over the line of the Savannah, Florida & Western Railway and its connections, which was made Nov. 23, 1890, and amounted to 33 1-3 per cent upon rates previously in effect, is unjust, unreasonable, excessive, and in violation of the Interstate Commerce Act; and it is not justified by the increased facilities which have been afforded by the carriers for handling and preserving the fruit. Florida Fruit Exch. v. Savannah, F. & W. R. Co. (C. C. N. D. Fla.), 4 I. C. R. 400 Aff'd on 589.

(ef) Defendants' rate on uncompressed cotton from stations in Florida on the L. & N. R. R. to Savannah was $2.75 per bale at the time of hearing, when complaint was filed, and for some years prior thereto, but subsequent to the hearing this rate was increased 55 cents to $3.30 per bale. The rates to Mobile and New Orleans were, and still are, respectively, $2.00 and $2.50 per bale. HELD, that the rate of $2.75 per bale to Savannah was not unlawful, but that the whole advance of 55 cents was unlawful, and any higher rate on such cotton to Savannah than the former difference of 25 cents per bale above the rate in force from the same stations to New Orleans violates sections 1 and 3 of the statute. Savannah Bureau of F. & T. v. Louisville & N. R. Co., 8 I. C. C. 377.

(g) Shippers of hay and straw were discriminated against by the act of several carriers in advancing those commodities from sixth to fifth class, and thereafter charging fifth class rates for transportation. National Hay Asso. v. Lake Short & Michigan S. R. Co., 9 I. C. C. 264.

(h) The advances in the domestic rates on grain and grain products from 17½ to 20 cents per 100 pounds from Chicago is not justified. In the Matter of Proposed Advances in Freight Rates, 9 I. C. C. 382.

(i) The rate advances involved in this

investigation are those on iron articles, packing-house products, dressed meats, and grain and grain products. Upon all the facts and conditions now appearing, HELD, that as rates on iron articles were formerly reduced on account of commercial conditions, the advances in those rates may have been proper owing to subsequent change in such conditions; that the advance in the rate on packing-house products, which was made by withdrawing a lower export rate, is not properly an advance; that the advances in rates on dressed meats ought not to be condemned under the peculiar circumstances surrounding that traffic; that the advance in the domestic rate on grain and grain products from 17½ to 20 cents per 100 pounds from Chicago and the other advances made in consequence of the increased rate from Chicago to New York, the same being an advance over the highest published rate in effect for most of the four years previous and a great advance over actual rates received for the last fifteen years, are not justified. Re Proposed Advances in Freight Rates, 9 I. C. C. 382.

(j) The rates in effect for long periods prior to the advance made by defendants of 2 cents per 100 lbs. on April 15, 1903, as well as the rates on lumber in carloads from points in lumber producing territories east of the Mississippi River in Louisiana, Mississippi, and part of Alabama, served by defendant roads, to Ohio River Points, were remunerative to the defendant carriers, and the advance was unreasonable. Central Yellow Pine Asso. v. Illinois C. R. Co., 10 I. C. C., 505.

(kl) The advances in freight rates by defendants were not justified by the increased cost of operating the roads, where, although the operating expenses have constantly increased, they have been enlarged by the inclusion therein of large expenditures for permanent improvements, and defendants' gross earnings have increased from year to year to such extent as to result in a constant increase of net earnings. Central Yellow Pine Asso. v. Illinois C. R. Co., 10 I. C. C. 505; Tift v. Southern R. Co., 10 I. C. C. 548.

(m) The rates on lumber, in force prior to the defendants' advance of 2 cents per 100 lbs. on shipments from Georgia to Ohio River destinations, which advance was made on June 22, 1903, were reasonably high in comparison with the rates on other commodities which are at all analogous to lumber in respect to value, volume, risk, cost of handling, and other circumstances and conditions affecting the transportation of the traffic; and such advance was not warranted, and the increased rates thus in force are unreasonable and unjust. Tift v. Southern R. Co., 10 I. C. C. 548.

(no) Where an advance is made in rates which have been long maintained, and the evidence shows that the traffic affected is large, important, and constantly increasing, the advance will be held unjust unless it is satisfactorily explained. Tift v. Southern R. Co., 10 I. C. C. 548.

(p) In March 1903 carriers leading from St. Louis to Texas common points put into effect a general advance in rates on classes and commodities. Rates in force on freight articles from St. Louis, Mo., to Texas common points prior to March 15, 1903 afforded reasonable compensation to the carriers, and as they had been in effect for a long period, and the material advances of such rates on that date were made through concerted action of the carriers, justification for the advances should be clearly shown; but this is a general investigation, in which no complainant is demanding relief from some particular rate, and no particular rates have been investigated, and it does appear, moreover, that the financial condition of the respondents, especially those operating in Texas, is not favorable. While impressed with the belief that these advances in rates are improper, the Commission does not feel warranted in making an order condemning such advances in this proceeding. In the matter of class and commodity rates from St. Louis to Texas common points. 11 I. C. C. 238.

(q) Complainant attacked as unreasonable advance in commodity rates from points north of the Texas quarantine line to northern ranges in Colorado, Western Nebraska, Wyoming, Montana and North and South Dakota, and to Chicago, St. Louis and Kansas City. After considering cost to the carriers at originating and delivering points, cost and maintenance of equipment, expense of unloading and reloading in transit incident to feeding, watering and resting the stock, character of the movement, number of cars in trains, average loading, volume and desirability of the traffic return of empty cars, liability of damage, cost of carriage, increased cost of producing

live stock, decreased selling price, method of making the advanced rates, disappearance of competition, cost of railroad labor, and supplies, improved methods of operation and increased general traffic mileage revenue per ton per car and per train, HELD, defendants' advances not justified. Present terminal charge of $2 per car for delivery to Union Stock Yards Chicago unreasonable to extent it exceeded $1 per car. Cattle Raisers' Asso. of Texas v. M. K. & T. Ry, 11 I. C. C. 296.

(r) The advances in freight rates upon lumber from Dalton, Ga., to points in Virginia on the Norfolk and Western lines, between Bristol, Tenn., and Roanoke, Va., and between Bluefield, W. Va., and Kenova, W. Va., which were made in 1901 and 1903, are unreasonable and unjust, and the rates should not exceed those in force before the advances were made effective. Farrar v. Southern R. Co., 11 I. C. C. 640.

(st) It appears that the rates to Dallas, Tex., from certain mines on defendants' lines in Indian Territory and southern Arkansas have lately been increased from $1.25 to $1.50 per ton on slack coal and from $1.85 to $2.10 per ton on mine-run coal. Upon complaint that the present rates on such coal are unreasonable, and request that the lower rates be restored: HELD, that, under all the circumstances disclosed by the record and following former decisions of this Commission on the reasonableness of coal rates of these defendants in adjacent territory, the rates from the mines that now take the $2.10 and $1.50 rates to Dallas should not for the future exceed $1.90 on mine-run and lump and $1.40 on slack coal. As to the mines that now take rates of $1.85 and $1.25 to Dallas, there should be some corresponding reduction, but as to these mines no order is now made. Dallas Freight Bur. v. Gulf, Cal & S. F. Ry. Co. et al., 12 I. C. C. 223.

(u) Complainant attacked advanced rates on grain and grain products to Atlanta, Ga., and points beyond, from a group of towns on the I. C., beginning on the north with Henderson and Uniontown, Ky., and including Morganfield, Henshaw, Corydon, Grove Center and other river and inland points in the vicinity and south of Henderson and intermediate to Atlanta as unreasonable. For several years defendants maintained uniform rates on grain and kindred products from and to the points in question but on Dec. 15, 1904, defendants increased the rates by adding 4 cents. This gave to Henderson and Uniontown lower rates than those applicable from the intermediate points. On April 5, 1905, defendant canceled the increased rates from the intermediate points, restoring the former rates, and thus again putting all points in this group upon an equal rate basis. Reparation was agreed to on basis of 3 cents per 100 pounds. HELD, rates attacked unreasonable, reparation awarded on basis of 3 cents. Harth Brothers Grain Co. v. I. C. R. R., 12 I. C. C. 448.

IMPORTANT CASES SINCE 1908

(v) In considering increased rates, the only issue to be determined is whether such rates are just and reasonable. The carriers, the protesting shippers and the public generally are alike entitled to just and reasonable freight rates. Rates on Crushed Stone, 30 I. C. C. 22, 28.

(w) When the Commission enters upon an investigation of proposed increased rates, the propriety as well as the reasonableness of those rates is in issue. Transcontinental Commodity Rates, 32 I. C. C. 449, 451.

(x) Propriety of proposed increased rates includes the justification of the relative as well as the intrinsic reasonableness of the rates. Oil Barrels to Oklahoma, 41 I. C. C., 557, 559.

(y) A general increase in class rates, which preserves existing relationships, distributes itself more generally and more equitably than would general increases on commodity rates. The Fifteen Per Cent Case, 45 I. C. C. 303, 324.

(z) The subsequent increase in one of the components of a combination rate does not of itself justify a joint rate formerly in excess of the aggregate of the intermediate rates. Fort Smith Commission Co. v. K. C. S. Ry., 50 I. C. C. 135, 136.

(2a) The Commission's decision and permissive orders in the Five Per Cent Case, and the Fifteen Per Cent Case, under which defendants were allowed to increase their rates did not approve any specific rates as reasonable in themselves or as properly adjusted with other rates, and did not justify in advance any rates which might be published as a result thereof. The burden is still upon the carriers. Garrett Lumber Co. v. C. & O. Ry., 55 I. C. C. 637, 640.

(2b) In considering the line haul rates, the test should be their relative level; care should be exercised in giving weight to conditions affecting all freight rates alike. If it should be deemed, for example, that by reason of such conditions the general level of rates is too low, the remedy is a general advance in rates. There is obvious danger of injustice in using such a situation as a reason for increasing charges on a special class of traffic. Perishable Freight Investigation, 56 I. C. C. 449, 467.

(2c) Experience has shown the limitations which surround in actual practice the operation of section 15a of the act. When it became apparent that the general increase of 1920, intended to give carriers a specified return, failed by a considerable margin to reach the desired mark, carriers and shippers alike agreed that it was not the Commission's duty to raise rates to still higher levels. To have done this would clearly have been a vain thing, harmful alike to the country and to the carriers. The rate adjustment can not with advantage be made dependent upon fluctuations in traffic. Rates on Grain, Grain Products, and Hay, 64 I. C. C. 85, 99.

(2d) The mere showing of the fact that in making effective the increases provided in general order No. 28 of the Director General, a slight disturbance was created in the percentage relationship which a specific rate bore to other rates between the same points, and the subsequent voluntary restoration of that relationship, does not warrant a condemnation of the rate in effect during the interim. Ault & Wiborg Co. v. Director General, as Agent, 64 I. C. C. 443.

(2e) It does not follow that rates increased beyond the authority of G. O. 28 are unreasonable; the question is one which must be determined by the ordinary tests of reasonableness, the manner in which the rates were arrived at being only one of the elements to be considered. United Light & Railways Co. v. Director General, 69 I. C. C. 414, 417.

(2f) Increased charges on interstate traffic which will result from a proposed cancellation by the Erie R. R. of transit on grain products stopped at Dayton, Ohio for mixing, blending, drying, grinding, or shelling, found justified. Dayton is unfavorably located from the standpoint of transit over the Erie's lines, the greater part of the traffic handled involves an out of line and back haul, and it is pointed out that such back haul could be avoided if the traffic were handled by other Dayton lines under transit accorded by them. Transit Privileges on Grain and Grain Products, 77 I. C. C. 1.

(2g) Proposal to increase the rate on iron and steel scrap southbound from Cairo and Metropolis, Ill., to St. Louis, Mo., to the basis of the southbound rate from Brookport, and Thebes, Ill., and to increase the rate northbound from St. Louis to all four points to the same basis, found justified. Proposed increases will remove an inconsistent adjustment; the resulting rates will compare favorably with rates on the same commodities in the same general territory and the same rates will apply in both directions. Scrap Iron and Steel between River Crossings, 77 I. C. C. 32.

(2h) Rates on cotton from Arkansas points to and from Memphis, Tenn., to each of which was added increase under General Order No. 28 of director general, found not unreasonable as compared with provision of preexisting tariffs authorizing refund of one such increase. Shipments were not through shipments moving at combination rates but were separate shipments to and from Memphis, and increase added to each of separate rates was in accord with practice as to other cottor rates. Memphis Freight Bureau v. M. P. R. R. Co., 80 I. C. C. 98.

(2i) Contention that rates were unlawful and unreasonable because not made in accord with intention of General Order No. 28 of Director General, not sustained. "Controlling fact to be determined is not whether rate was increased in strict compliance with terms of the general order, but whether resulting rate was unreasonable or otherwise unlawful." Greene Cananea Copper Co. v. Director General, as Agent, 80 I. C. C. 121, 122.

(2j) Terminal charge for movement between line-haul carriers' rails and Union Stock Yards at Chicago, Ill., on live stock from points in western, mountain-Pacific and southern territory found not unreasonable or otherwise unlawful because increased in excess of increase authorized for Chicago territory in supplemental report in Increased Rates, 1920, 58 I. C. C., 302. If regarded as line-haul rate, terminal charge would properly be in excess of the amount collected through application of line-haul increases, and if regarded as switching or transfer charge, it was not affected by the supplemental report, which related to line-haul rates. American Farm

Bureau v. A. & R. R. R. Co., 80 I. C. C., 232.

C. 193; East Bay Water Co. v. Director General, as Agent, 83 I. C. C. 238; Furniture to Colorado Common Points, 83 I. C. C. 295; Sunderland Bros. Co. v. Director General, as Agent, 83 I. C. C. 337; Acid between Points in Chicago Switching District, 83 I. C. C. 432; Sand and Gravel to the Southeast, 83 I. C. C. 436; Connecticut Mfrs. Asso. v. Director General, as Agent, 83 I. C. C. 563; Cantaloupes and Melons from California, 88 I. C. C. 340; Pig Iron between Florence and Sheffield, Ala., 89 I. C. C. 324; Matches from Bellefonte, Pa., 89 I. C. C. 337.

§18. Circumstances and Conditions.
See Evidence II.

(½) In General.

(a) Neither the equities of the shippers nor the intent or motives actuating a carrier or carriers in prescribing an advance in freight rates has any bearing upon the reasonableness of the increased rates. L. & N. R. R. Coal and Coke Rates, 26 I. C. C. 20, 23.

(b) Categorical answers expressed as opinions are not sufficient to sustain the burden of showing that a proposed increase of rates is reasonable. Louisville & Nashville Railroad Coal and Coke Rates, 26 I. C. C. 20, 24.

(c) The reasonableness of increased joint rates cannot be proved by showing that the revenue accruing to the initial line under its divisions of the old rates was insufficient to cover the cost of handling the traffic. L. & N. R. R. Coal and Coke Rates, 26 I. C. C. 20, 31.

(d) Relative rates are not important in determining propriety of advance where transportation conditions are different. Lumber Rates from Memphis and Other Points to New Orleans, 27 I. C. C. 471, 486.

(e) The duty to justify advanced rates includes their relative reasonableness as well as reasonableness per se of the rates. Transcontinental Commodity Rates, 32 I. C. C. 449, 452.

(f) A rate increase uniform in amount necessarily tends to preserve rather than disrupt preexisting relationships. This is not true of a percentage increase. Barnett Oil & Gas Co. v. Director General, as Agent, 61 I. C. C. 568, 570.

(g) Fact that rates paid represent a high percentage of increase over rates formerly charged is not proof that rates are unreasonable. Ault & Wiborg Co., 62 I. C. C. 133. French Battery & Carbon Co. v. C. & N. W. Ry. Co., 80 I. C. C. 346.

ALL OTHER CITATIONS

In Re Advances on Fruits and Vegetables, 24 I. C. C. 164; New England Investigation, 27 I. C. C. 560, 607; Lumber Rates from Memphis and Other Points to New Orleans, 27 I. C. C. 471, 486; Lumber Rates from Memphis and Other Points to New Orleans, 27 I. C. C. 471, 486; People's Fuel & Supply Co. v. G. T. W. Ry. Co., 27 I. C. C. 24, 29; Kansas-Iowa Brick Rates, 28 I. C. C. 285, 287; Atlantic Refining Co. v. Director General, as Agent, 58 I. C. C. 46, 48; Increased Rates, 1920, 58 I. C. C. 220, 246; Boldt Paper Mills v. Director General, as Agent, 62 I. C. C. 471, 472; Ault & Wilborg Co., 62 I. C. C. 133; Southern Appalachian Coal Operators v. L. & N. R. R. Co., 83 I. C. C. 136, 142.

§18. (1) Low Receipts Per Ton Mile.

IMPORTANT CASES SINCE 1908

(a) The fact that a long established rate yields but small receipts per ton mile cannot justify its increase to such an extent or in such a manner as to be unjust to any shipper. Circumstances and conditions may be such that an increase in a particular rate may be unreasonable, although after the increase the rate will yield low receipts per ton mile. Detroit Chemical Works v. N. C. Ry. Co., 13 I. C. C. 357, 362.

(b) A carrier in submitting statistics as to the per-ton-mile earnings for the purpose of justifying an increase of rate, should take into consideration the short line distance, although the short line route involves a line operated separately, but controlled by it through stock ownership. Kansas-Iowa-Brick Rates, 28 I. C. C. 285, 287.

ALL OTHER CITATIONS

In Re Advances on Cement Originating in Central Freight Association Territory, 22 I. C. C. 90, 92; In Re Advances on Bituminous Coal, 22 I. C. C. 341, 345.

§18. (2) Water Competition.

See Water Competition.

IMPORTANT CASES SINCE 1908

(a) Section four provides that when water competition causes a carrier to reduce rates to or from competitive points, such rates shall not be increased unless such proposed increase rests upon changed conditions other than the elimination of water competition. American Insulated Wire & Cable Co. v. C. & N. W Ry. Co., 26 I. C. C. 415, 416.

(b) Proposed cancellation of joint "water competitive" rates on lumber from points in the south to eastern trunk line and New England territories, leaving in effect higher so-called "normal" basis of commodity rates, found not justified. Water Competitive Rates on Lumber, 60 I. C. C. 643.

ALL OTHER CITATIONS

Milwaukee-Waukesha Brewing Co. v. C. & N. W. Ry. Co., 21 I. C. C. 472.

§18. (3) Heavy and Uniform Tonnage.

IMPORTANT CASES SINCE 1908

(a) Minimum increase of 5c per ton on commodities moving at less than $1 per ton would cast upon heavy short-haul traffic a disproportionate burden. Five Per Cent Case, 31 I. C. C. 351, 403.

ALL OTHER CITATIONS

Kiser Co. v. C. of G. Ry. Co., 17 I. C. C. 430, 441.

§18. (4) Low Grade Commodity.

See Evidence §61.

CASES 1887-1908

(a) Complainant attacked as unreasonable advance of 2c per 100 pounds on April 15, 1903, in the rates on lumber in carloads from points in lumber producing territories east of the Mississippi River in Louisiana, Mississippi and parts of Alabama served by defendants, to Ohio River points applying both as to shipments locally to such Ohio River points, and to shipments destined beyond. On September 9, 1899, the rate previously in effect from May 1, 1894, was advanced 1c, making a total adavnce of 3c since May 1, 1894. The rates prior to the advance on April 15, 1903, were remunerative to the carriers. Lumber rates should be relatively low, in view of the fact that lumber is inexpensive freight and few other commodities furnish to carriers so large a tonnage; that the lumber business is constant, yielding carriers revenue all the year; that no special equipment is constructed or furnished for its carriage; that it is loaded by shippers and unloaded by consignees, and where open cars are furnished the shipper is required, at considerable expense, to equip them so as to protect the lumber and the train, and that there is small risk and in case of accident the damage is insignificant. HELD: The advance on April 15, 1903, of 2c per 100 pounds not warranted, and the resultant increase unreasonable and unjust. Central Yellow Pine Asso. v. I. C. R. R., 10 I. C. C. 505.

IMPORTANT CASES SINCE 1908

(b) An increase in rates of 25 per cent upon a low-grade commodity is not justified because of a slight increase in the ratio of expense to earnings. Winters Metallic Paint Co. v. C., M. & St. P. Ry. Co., 18 I. C. C. 596, 598.

(c) Proposed increased rates on coal from points on the Norton & Northern Ry. to Carolina and southeastern territories, found not justified as it is not shown that the situation of these mines from a transportation standpoint is so clearly distinguishable from that of other mines in the same group as to justify the higher charges and deprive them of the benefit of the group rates. Coal from Norton & Northern Ry. Mines, 58 I. C. C. 739.

(d) Proposal of the L. & N. to increase rates on stable manure from New Orleans, La., to points on its line in Mississippi and Alabama, found not justified. Manure is the only fertilizer that meets the peculiar needs of the soil in this territory, increase would tend to curtail or prohibit its transportation to these lands and hinder production resulting in a reduction in volume of the outbound business of the L. & N., and present rates compare favorably with rates to points on other lines in Louisiana and Mississippi. Manure from New Orleans, 73 I. C. C. 400.

(e) Where earnings under proposed rates appear excessive for low-grade traffic, such as ice, the proposed rates will be condemned. Increased Rates on Ice from Wisconsin, 74 I. C. C. 662.

ALL OTHER CITATIONS

In Re Investigation of Advances in Rates on Cement, 20 I. C. C. 588; In Re Advances on Staves and Other Articles, 23 I. C. C. 382; Virginia-Carolina Chemical Co. v. A. C. L. R. R. Co., 27 I. C. C. 234; In Re Advances on Cement, 24 I. C. C. 209; In Re Advances on Sand and Gravel, 24 I. C. C. 249; Rates on Crushed Stone, 30 I. C. C. 22; Scrap Iron Rates Between Chicago and Milwaukee, 28 I. C. C. 525; Second-hand Beer Packages from Arizona, 42 I. C. C. 85; Increased Rates, 1920, 58 I. C. C. 220, 252; Pulpwood to Kingsport, Tenn., from South Carolina, 62 I. C. C. 277; Manure from New Orleans, 73 I. C. C. 400.

§18. (5) Ratio of Rate to Value.

See Classification §11.

IMPORTANT CASES SINCE 1908

(a) Brooms, as a manufactured article, should in accordance with accepted principles pay a rate higher than broom corn, which is a raw material. Broom Rates to Colorado Points, 28 I. C. C. 310, 311.

(b) It would be desirable, if it were possible, to determine definitely the commodities, the sections of the country, and even the individual rates which can best bear the burden of increases, and the relationships of the rates and differentials which will be disturbed by a percentage increase. This is precluded by the necessity of prompt action upon the main issues presented. Ex Parte 74, Application for Increase in Rates, 58 I. C. C. 220, 243.

ALL OTHER CITATIONS

Memphis Cotton Oil Co. v. I. C. R. R. Co., 17 I. C. C. 313, 318, 321; Kaufman & Sons v. N. Y. C. R. R., 51 I. C. C. 551.

§18. (9) Use of Commodity.

See Classification §10.

IMPORTANT CASES SINCE 1908

(a) Complainants attacked an advance of 33 1-3 per cent in rates on stock cattle and sheep throughout western states to and beyond the Missouri River. For 25 years previously to the advance there had been a rate on stockers and feeders of 75 per cent of the rate on market cattle. HELD: That from the standpoint of value of stockers and feed-

ers as compared with market cattle, the character and cost of the service of the two, the heavy claims to which railroads are subject for shrinkage and fall in price from delays in reaching markets, the fact that carriers are insured a second haul to market on the fat cattle from the point where they are fed, and the value of the service to the shipper, the 75 per cent rate is reasonable compared with the service and rate on market cattle. It is not contrary to the Commission's rulings for defendants to make rates on the use to which cattle are put where there is a substantial dissimilarity in the transportation service and of the value of the service to the shipper. In Re Advances on Stock Cattle and Sheep, 23 I. C. C. 7, 12.

§18. (10) Increased Divisions.

Se Divisions.

IMPORTANT CASES SINCE 1908

(a) The fact that one of the interested carriers is to receive the benefit of a proposed increase is of course not conclusive of the reasonableness of the advanced rate. Lake-and-Rail Rates from C. F. A. Territory, 26 I. C. C. 671, 673.

ALL OTHER CITATIONS

In Re Advances in Class Rates, 22 I. C. C. 338; Lumber from Louisiana to North Atlantic Points, 26 I. C. C. 186, 191; D. & S. L. R. R. v. C., B. & Q. R. R., 51 I. C. C. 679, 682.

§18. (11) Bulk.

See Bulk; Minimums.

ALL CITATIONS

Rates on Tin Cans and Other Commodities, 28 I. C. C. 247, 248; Minimum Weight on Potatoes, 38 I. C. C. 101.

§18. (12) Change in Classification.

ALL CITATIONS

Cancellation of third class rating on fruits and vegetables between Minnesota, the Dakotas, Iowa and Nebraska, 68 I. C. C. 401; Asphalt and Other Petroleum Products to Iowa Points from Missouri, Kansas, Oklahoma and Arkansas, 68 I. C. C. 471; Riprap Between Points in Texas and Louisiana, 68 I. C. C. 475.

V. DISCRIMINATION THROUGH ADVANCE.

§19. In General.

See Discrimination.

CASES 1887-1908

(a) The prohibition of rebates and of unjust discriminations and preferences has resulted in some instances in increased charges to individual shippers, or on some particular traffic; but if such advances are only caused by the discontinuance of abuses, and bear proper relation to the charges on other traffic and to the conditions of transportation, no injustice is done. Myers v. Pennsylvania, 2 I. C. C. 403, 406.

(b) The law requires no increase in rates, but only equality under like conditions so that one shipper shall not have advantages at the expense of another. Obviously the elimination of rebates and preferences to favored individuals or localities, and the payment by all shippers of like charges for like service, would seem to warrant cheaper service for the public at large without loss of revenue to the carriers. Myers v. Pennsylvania Co., 2 I. C. C. 403, 406.

(c) The exaction of $2.76 a ton on freight tendered by a connecting road, for which $2.40 was formerly charged, and is still charged, another connecting road for precisely similar services, will be held an unreasonable and unlawful discrimination. Augusta Southern Ry. Co. v. Wrightsville & Tennille Ry. Co., 7 I. C. C. App. xxxviii.

(d) A rate on uncompressed cotton from stations in Florida on the Louisville & Nashville Railroad to Savannah, of $2.75 per bale, is not unlawful, although the rates to Mobile and New Orleans are respectively $2.00 and $2.50 per bale; but an advance of 55 cents is unlawful and in violation of sections 1 and 2 of the statute. Savannah Bureau of Freight and Transp. v. Louisville & N. R. R. Co., 8 I. C. C. 377.

(e) Hay and straw were discriminated against by the act of several carriers in advancing those commodities from sixth to fifth class, and thereafter charging fifth class rates for transportation. National Hay Asso. v. Lake Shore & Michigan S. Ry. Co., 9 I. C. C. 264.

IMPORTANT CASES SINCE 1908

(f) Where an industry has been required to pay for a long period of time rates of freight on raw material which bear certain relation to rates charged to competitors at other points, a marked change in such relation of rates in favor of competing industries cannot be made

without an attendant presumption of undue discrimination. Detroit Chemical Works v. N. C. Ry. Co., 13 I. C. C. 357, 362.

(g) A carrier does not justify an advance where tariff which contains many reductions will result in unreasonable and discriminatory rates. In Re Advances on Drain Tile and Sewer Pipe, 25 I. C. C. 688, 693.

(h) So the burden is on the carriers to justify not only the intrinsic reasonableness of the increased rate, but to show that it is free from the alleged unjust discrimination. Burson Knitting Co. v. C., M. & G. Ry., 42 I. C. C. 739, 741.

(i) For each rate, a carrier offers and obligates itself to perform a certain amount of service. If the service so offered and for a long time performed in consideration of that rate includes taking the property transported from a given point and delivering it at a given point, the delivery at that point is in no sense a free service. The carrier may increase the rate or it may curtail the service performed for that rate, but if such action is challenged it must bear the burden of showing that the new rate or service is reasonable and free from unjust discrimination. Also citing Rates on Hay to Chicago, 34 I. C. C. 150 and cases cited therein. National Tube Co. v. Lake Terminal Ry., 55 I. C. C. 469, 480.

(j) Where increased rates are proposed not only must the carriers establish the reasonableness of the proposed rates, but it must also appear that no undue prejudice or preference will result. Imported Wool from New York and Boston, 80 I. C. C. 309, 313.

ALL OTHER CITATIONS

Detroit Chemical Works v. N. C. Ry. Co., 13 I. C. C. 357, 362; Kiser Co. v. Central of Georgia Ry. Co., 17 I. C. C. 430, 441; Davenport Commercial Club v. Y. & M. V. R. R. Co., 20 I. C. C. 19; In Re Rates on Cream and Condensed Milk, 21 I. C. C. 522, 527, 528; Wisconsin State Millers' Assn. v. C., M. & St. P. Ry. Co., 23 I. C. C. 494; In Re Transportation of Fresh Meats, 23 I. C. C. 727; Grain and Flaxseed from Twin Cities, 78 I. C. C. 575; Class rates from Kansas Points, 78 I. C. C. 741. Class Rates from Points in Kansas, 80 I. C. C. 709 .

§19¼. Legal Rate.

See Demurrage §20; Legal Rate; Through Routes and Joint Rates.

IMPORTANT CASES SINCE 1908

(a) Legal rates on shipments which moved to milling point prior to advance and reshippped within 12 months, one year being transit period allowed, were the rates in effect at time of initial movement of grain. Minneapolis Traffic Asso. v. A. A. R. A. Co., 42 I. C. C. 76, 78.

(b) The fact that there was no notation or symbol of an increase in a tariff supplement, an item of which was amended, and that in a subsequent supplement a further modification of that item with reference to reconsignments bore symbols denoting both increase and reduction, did not affect the validity of the item, as it was allowed to become effective in each instance. New Era Milling Co. v. St. L. S. F. R. R., 50 I. C. C. 207, 210.

(c) The lawfulness of the rates, however, can not be determined entirely by a construction of G. O. 28. National Supply Co. v. C., M. & St. P., 57 I. C. C. 739, 741.

(d) Where one of the tariffs used in making combination rates on through shipments contains a rule that such rates will be subject to the increase but once, there is a holding out to the shipper of the rate so constructed which the carrier should protect. Sligo Iron Store Co. v. W. M., 62 I. C. C. 643, 644.

(e) Where factor of a combination rate applying over a carrier under federal control was increased under the terms of General Order No. 28, and that road was subsequently relinquished from federal control, the filed tariff naming such increased rate remains the lawful tariff after such relinquishment. Maltby v. S. V. Ry. Co., 63 I. C. C. 103, 104.

(f) Rates attacked as unlawful by reason of alleged failure to observe terms of General Order No. 28 were filed with the Commission by the President, through his duly appointed agent, and a failure to adhere strictly to the terms of a preliminary order of the Director General, which is not required by the federal control act, and in the absence of which complainant's contention would be without foundation, can not be construed as defeating the validity of the rates concerned. Maltby v. S. V. R. Co., 63 I. C. C. 103, 105.

(g) Tariff provided that increases were to apply to the entire rates, whether published as specific totals or by use of differentials or arbitraries, but since no through rate was published between points here involved, and the combination rate charged was not made by the use of differentials or arbitraries, the applicable rate was the sum of the prior rates individually increased 25 per cent under General Order No. 28 of the Director General. Doe Lumber Co. v. Director General, as Agent, 63 I. C. C. 354, 355.

(h) Contention that joint rates were inapplicable because in contravention of the fourth section, and that the increase authorized by General Order No. 28 of the director general should have been applied but once to the combination alleged to be applicable. HELD: Argument contrary to the commission's construction of the fourth section and the view repeatedly expressed that the lawfulness of rates can not be determined solely by a construction of the general order. Silica Sand Producers' Asso. v. C., B. & Q. R. R. Co., 73 I. C. C. 588, 589.

(i) Failure to adhere strictly to the terms of General Order 28 can not be construed as defeating the validity of rates filed by the President through his

duly appointed agent. Theo. Marcus & Co. v. Director General, 77 I. C. C. 244, 246.

ALL OTHER CITATIONS

Rath Packing Co. v. I. C. R. R. 56 I. C. C. 303, 306; Anaconda Copper Mining Co., 57 I. C. C. 723, 726; Acme Cement Plaster Co., 59 I. C. C. 411; Consolidated Gas Co. v. Director General, as Agent, 63 I. C. C. 135, 138; Wisconsin Dairy Products Co. v. C. M. & St. P. Ry. Co., 68 I. C. C. 307; Northern Potato Traffic Asso. v. Director General, as Agent, 69 I. C. Director General, as Agent, 83 I. C. C. 10, 11, 12; Greene Cananea Copper Co. v. C. R. & P. Ry. 88 I. C. C. 225.

VI. REMEDIES AND PROCEDURE

See Procedure.

§19½. In General.

CASES 1887-1908

(a) It does not appear that defendants wilfully omitted or failed to notify the Commission and the public of the advance in rates complained of, or that anyone has sustained damage or injury by reason of such failure or omission, and therefore there is no case made out for an application by the Commission to a District Attorney of the United States for the institution of a prosecution, and no ground for a recommendation of reparation for such injury. R. R. Comm. of Fla. v. Savannah, F. & W. R. Co., 3 I. C. R. 688.

(b) Where a general investigation of proposed advances in freight charges was in a manner ex parte, although the respondent carriers were fully heard through their traffic representatives, and in some instances through their attorneys, and facts not brought out in the inquiry, with further discussion of the subject, might lead to a different conclusion, no order was made; but it was determined that, unless the rates be readjusted in accordance with the views expressed by the Commission, proceedings would be begun against the several lines, which would put directly in issue the rates involved. In the Matter of Proposed Advances in Freight Rates, 7 I. C. C. 382.

IMPORTANT CASES SINCE 1908

(c) When an increased rate which has gone into effect is subsequently attacked by complainant, the complaint, as well as the act, must be considered to fix the issues. Wickwire Steel Co. v. N. Y. C. & H. R. R. R. Co., 30 I. C. C. 415, 421.

(d) Where a suspended tariff proposes an increase in the rate itself and carries provisions as to the carload minimum weight the same as in the tariff already in effect, the Commission will not consider in the I. & S. proceedings any question as to this carload minimum. Rates on Blackstrap Molasses, 32 I. C. C., 176, 177.

(e) The filing and serving of a formal complaint against proposed increased rates does not relieve carriers of the burden of proof imposed upon them by law. Transcontinental Commodity Rates, 32 I. C. C., 449, 452.

(f) If rates authorized to be increased are held by unexpired orders of the Commission, parties to such orders must, before filing such increased rates, apply for and secure specific modification of such orders. The Fifteen Per Cent Case, 45 I. C. C. 303, 325.

ALL OTHER CITATIONS

Proportional Rates on Grain Products from Omaha, 33 I. C. C. 621, 624; Rates on Iron and Steel Articles to Spokane, 38 I. C. C. 669; Swift & Co. v. U. P. R. R. Co., 39 I. C. C. 665, 669.

§20. Injunctions.

IMPORTANT CASES SINCE 1908

(a) Under the act, as amended in 1906, a United States Circuit Court may enjoin a carrier from putting a proposed advance into effect, and restrain such advance, until the Commission shall have an opportunity to pass on the reasonableness of the rates involved. Kiser Co. v. Central of Ga. Ry. Elec., 158 Fed. 193, 198.

(b) Under the Interstate Commerce Act, as amended June 29, 1906, the courts have no jurisdiction to enjoin the filing and posting of a rate or to enjoin the enforcement of a rate after it has been filed and posted, but before it has ever been enforced. Houston Coal & Coke Co. v. N. & W. Ry. Co., 171 Fed. 723, 724, 725.

(c) In determining whether it should temporarily enjoin a proposed increase of interstate rates the court must take into account the balance of equity between the shippers and the car-

riers. If the balance of detriment or inconvenience in the event the temporary injunction is refused is against the shippers, then the injunction will be granted. But if, on the other hand, the balance of detriment or inconvenience is against the carriers, in the event the temporary injunction should be issued, then it should be refused. Arlington Heights Fruit Co. v. S. P. Co., 175 Fed. 141, 142.

(d) The United States courts have no original jurisdiction to enjoin the putting into effect of a proposed schedule of rates alleged to be unreasonable, in advance of a determination of that question by the Interstate Commerce Commission, since under the Interstate Commerce Act as amended June 29, 1906, the question of the unreasonableness or discrimination of a rate is, in the first instance, vested solely in that Commission. Columbus Iron Steel Co. v. Kanawha & M. Ry. Co., 178 Fed. 261, 263.

(e) Where the case in which a temporary writ of injunction is asked presents questions of grave importance and difficulty, and it appears from the pleadings and affidavits presented upon the hearing for the temporary writ that great damage will result to the complainant if the writ is not granted and he shall be finally successful in the litigation, and, on the other hand, that the granting of the writ will not cause serious damage to the defendant as compared with the damage which would result to the complainant if the same were not granted, a court of equity will unhesitatingly, in order to maintain the present status, issue a temporary writ of injunction. Nashville Grain Exch. v. U. S., 191 Fed. 37, 40.

(f) Aside from the question of power, under the Interstate Commerce Act, since its amendment by act June 18, 1910, authorizing the Interstate Commerce Commission to suspend a proposed new rate pending a hearing as to its reasonableness, a court will not interfere by injunction to restrain the enforcement of such a new rate, where the Commission, on application and after being fully advised, has refused to suspend it. M. C. Kiser Co. v. Cent. of Georgia Ry. Co., 236 Fed. 573.

(g) In an action to enjoin certain advanced rates it was urged before the court that the shippers had made large investments, and made contracts for the purchase and sale of goods on the basis of existing rates, and that they would suffer serious loss if the new rates are put into effect. HELD: On that question the court is of the opinion that these shippers made such contracts with their eyes open; they knew that there was a chance of the rates being raised, and therefore they took the chances in the matter; and the fact that a hardship might be imposed upon them when they took the chances in this way, should not be considered by the court, especially in view of the fact that, if the Interstate Commerce Commission should subsequently determine that the new rates were excessive, the shippers would have the right to obtain reparation. Besides, the courts have no right to suspend a rate which is reasonable and lawful so far as the carrier is concerned on the sole ground that it would be burdensome to the shipper. M. C. Kiser Co. v. Central of Georgia Ry. Co., 236 Fed. 573, 578.

(h) A state equity court has no jurisdiction to enjoin the filing of a schedule of increased interstate rates with the Interstate Commerce Commission, as by the Act the Commission has exclusive original jurisdiction to determine the reasonableness of such rates. Thacker Coal & Coke Co. v. N. & W. Ry. Co., 67 W. Va. 448, 454, 68 S. E. 107.

ALL OTHER CITATIONS

Wickwire Steel Co. v. N. Y. C. & H. R. R. R. Co. 181 Fed. 316, 318; Columbus Iron & Steel Co. v. Kanawha & M. Ry. Co., 178 Fed. 261, 263; Arlington Heights Fruit Co. v. S. P. Co., 175 Fed. 141, 143, 144; Columbus Iron & Steel Co. v. Kanawha & M. Ry. Co., 171 Fed. 713, 719; A. C. L. R. R. Co. v. Macon Grocery Co., 166 Fed. 206, 218; N. P. Ry. Co. v. Pacific Coast Lumber Mfrs. Assn., 165 Fed. 1, 8; G. N. Ry. Co. v. Kalispell Lumber Co., 165 Fed. 25, 28.

§21. Investigations.

IMPORTANT CASES SINCE 1908

(a) Where the advance of an individual rate has been attacked in a general inquiry before the Commission, it is not necessary or proper to inquire into it, pending the general investigation. Hydraulic Press Brick Co. v. Vandalia R. R. Co., 15 I. C. C. 175, 176.

(b) Where the Commission is charged with the duty of determining generally whether the railroads in a certain classification territory are in need of additional revenues,, and, if so, how this shall be secured, and whether in-

creased freight rates proposed are just and reasonable, the questions involve the exercise of quasi-judicial functions, and the law requires the Commission to afford all parties an ample opportunity to introduce evidence and to be heard in support of their objections to the additional burdens upon their traffic proposed by the carriers. The law also requires the Commission to supplement the evidence so introduced by such further investigations as the importance and complexity of the questions may suggest. The Five Per Cent Rate Case, 31 I. C. C. 351, 425.

(c) The Commission is under the express statutory obligation of affording a full hearing where increased rates are proposed, to all who desire to be heard and have reasonable grounds for a hearing. The Five Per Cent Case, 31 I. C. C. 351, 426.

ALL OTHER CITATIONS

Rates on Blackstrap Molasses, 32 I. C. C. 176, 177.

§21½. Orders.

See Interstate Commerce Commission §5; Procedure IV.

IMPORTANT CASES SINCE 1908

(a) In a proceeding involving the suspension of advanced rates, the Commission cannot undertake to adjust relative rates from different groups. Coal Rates to Davenport, Ia., 26 I. C. C. 140, 142.

(b) After tariffs publishing rates to Missouri River cities were filed, respondents applied to Commission for permission to make corresponding increases to Des Moines; but as order had not expired application was denied. Western Trunk Line Rate Increases, 43 I. C. C. 481, 490.

VII. REPARATION.

See Reparation.

§22. In General.

See Claims.

CASES 1887-1908

(a) Decree affirming a decree enjoining the violation of an order of the Interstate Commerce Commission passed November 29, 1891, which prohibited the exaction of a rate for the transportation of oranges from Florida to northeastern markets which should exceed the rates in force prior to November 3, 1890, by more than five cents per box, allowing complainant a counsel fee of $5,000, and directing defendant to pay costs of the suit, including the master's charges of $870.50. Savannah, F. & W. R. Co. v. Florida Fruit Exchange, 4 I. C. R. 589.

(b) The effect of an advance in through rates after the Supreme Court had dismissed a proceeding to have certain terminal charges declared unjust and unlawful, which dismissal was upon the ground that there had been a reduction in the through rate greater than the terminal charge, cannot be determined, in a proceeding in the same suit for reparation, as regards territory to which the reduction in the through rate did not apply, but is also a matter for independent inquiry in a new proceeding. Cattle Raisers' Asso. v. Chicago, B. & Q. R. Co., 10 I. C. C. 83.

IMPORTANT CASES SINCE 1908

(cd) Carriers who concur in establishing an unlawful advance in rates are not thereby rendered jointly and severally liable for damages resulting therefrom, where they did not participate in the particular rate or receive any part of the overcharge in question. Nicola, Stone & Myers Co. v. L. & N. R. R. Co., 14 I. C. C., 199, 209.

(e) When a rate is advanced and the increased rate is condemned by the amount of the advance a much more satisfactory basis for an award of reparation is afforded than in the present case, where so far as changes have occurred they have been at least for the most part reductions in a territory where changes in conditions have taken place which contribute in greater or less degree to a present showing of unreasonableness in existing rates. Anadarko Cotton Oil Co. v. A., T. & S. F. R. R. Co., 20 I. C. C. 43, 50.

(f) Rate on lumber, cypress, increased 1 per cent following Fifteen Per Cent Case, 45 I. C. C. 303, but order in that case did not authorize any increase and joint rate subsequently reduced 1 per cent. Reparation awarded on basis of rate subsequently established. Pine Plume Lumber Co. v. Director General, as Agent, 57 I. C. C. 501.

(g) In the absence of any further proof in support of the allegations the Commission thinks that the Director General should not be at peril of liability for reparation merely because a reduction in rates followed in the course of readjustments resulting from the original in-

creases made under authority of G. O. 28. Woodbury Lumber Co. v. Director General, 62 I. C. C. 293, 294.

(h) The fact that the director general subsequently revised the increases under General Order 28 in the rates attacked on the basis of a specific advance, in place of the original 25% advance, would not, in the absence of further proof of the allegations, warrant an award of reparation. West Coast Lumbermen's Asso. v. Director General, 77 I. C. C. 669, 673.

(i) Fact that the director general, in lieu of the original advance of 25 per cent under General Order No. 28, subsequently revised the increases on basis of a specific advance, will not, in and of itself, warrant an award of reparation. West Coast Lumbermen's Asso. v. Director General, as Agent, 77 I. C. C. 669, 673.

ALL OTHER CITATIONS

Thompson Lumber Co. v. I. C. R. R. Co., 13 I. C. C. 657, 667; Burgess v. Transcontinental Freight Bureau, 13 I. C. C. 668, 680; Wyman, Partridge & Co. v. B. & M. R. R., 19 I. C. C. 551; Arlington Heights Fruit Exch. v. S. P. Co., 19 I. C. C. 148, 155; Canadian Valley Grain Co. v. C., R. I. & P. Ry. Co., 19 I. C. C. 108; Kaul Lumber Co. v. C. of Ga. Ry. Co., 20 I. C. C. 450; Gosline & Co. v. Director General, 55 I. C. C. 220; Boehmer Coal Co. v. P., C., C. & St. L. Ry., 58 I. C. C. 133; Hord Alkali Products Co. v. Director General, as Agent, 59 I. C. C. 574, 575; Crucible Steel Co. of America v. Director General, as Agent, 61 I. C. C. 753; Nagase & Co. v. Director General, as Agent, 62 I. C. C. 422, 425, 426; Lawton Refining Co. v. Director General, as Agent, 62 I. C. C. 480; American Sugar Refining Co. v. Director General, as Agent, 83 I. C. C. 560, 561.

VIII. TARIFFS AND PUBLICATION.

§23. In General.

See Application of Rates.

CASES 1887-1908

(a) If carriers are to any extent relieved from giving the notice now required, of advances and reductions in rates upon foreign commerce, they should in all cases file with the Commission the rates actually made, and give such further notice to the public as may be possible. Re Publication & Filing of Tariffs, 10 I. C. C. 55.

IMPORTANT CASES SINCE 1908

(b) Rule for disposition of fractions under General Order No. 28 of the director general applied only to rates quoted in dollars and cents per ton. Such rules did not and could not, by any reasonable interpretation, qualify another rule, which was complete in itself and specifically provided for the application of rates stated per ton or their unit. Shipments found overcharged and reparation awarded. Hercules Mining Co. v. Director General, as Agent, 66 I. C. C. 140.

(c) Rates named in a tariff published after the issuance of General Order No. 28 of the Director General, but not to become effective until after the effective date of that order, found to be subject to the increase of 25 per cent provided thereunder. Growers' Rice Milling Co. v. Director General, as Agent, 66 I. C. C. 165.

(d) Prior to General Order No. 28 of the director general, rates on brick and sewer pipe, chimney pipe, hollow building tile, fire clay, and terra cotta, were the same. Under that order, a flat increase of 2 cents was applied on brick and 25 per cent on the other commodities. Subsequently the brick tariffs carrying the 2 cent increase were amended to include "articles listed as taking brick rates" and a succeeding tariff restored the parity formerly existing. HELD: When tariffs were amended, inference was that 2 cent increase would apply on commodities listed in same item with brick. Charges assessed on commodities other than brick found illegal and reparation awarded. Clark & Sons v. Director General, as Agent, 74 I. C. C. 396.

ALL OTHER CITATIONS

Charleston Milling Co. v. Director General, as Agent, 68 I. C. C. 525; Northern Potato Traffic Asso. v. Director General, as Agent, 69 I. C. C. 26; Lehigh Valley Coal Co. v. Director General, as Agent, 69 I. C. C. 535, 539.

§24. Construction.

ALL CITATIONS

ADVERTISING.

I. OF EXCURSION TICKETS.
II. AS REBATES.
III. PREMIUMS IN SHIPMENTS.

1. OF EXCURSION TICKETS.

IMPORTANT CASES SINCE 1908

(a) Good faith to the public requires carriers to state in their advertisements of their excursions the total amount which will be exacted for the transportation privilege, of which validation is a part and for which a fee of 50 cents is charged, but it is difficult to see how it can be held to be a violation of the act to exact a part of the tariff rate at the ticket office when the ticket is sold, and the balance of that rate at the validating agency when the ticket is validated. Riter v. O. S. L. R. R. Co., 19 I. C. C. 443, 444.

II. AS REBATES.

IMPORTANT CASES SINCE 1908

(a) Under the act a passenger has no right to buy tickets with services, advertising, releases or property, nor can the railroad company buy services, advertising, releases or property with transportation. The statute manifestly means that the purchase of a transportation ticket by a passenger and its sale by the company shall be consummated only by the former paying cash and by the latter receiving cash of the amount specified in the published tariffs. L. & N. R. R. v. Mottley, 219 U. S. 467, 477; 31 Sup. Ct. 265, 55 L. Ed. 297.

(b) A contract by which a carrier agrees to furnish transportation to a publisher and his employes in exchange for advertising space at the regular advertising rates of the publisher, violates the provisions of the act forbidding the furnishing and transportation of rates "less and different" from those exacted from the general public. Chi., Ind. & L. Ry. Co. v. U. S., 219 U. S. 486, 494, 31 Sup. Ct. 272; U. S. v. C. I. & L. Ry. Co., 163 Fed 114, 115, 55 L. Ed. 305.

ALL OTHER CITATIONS

U. S. v. C., I. & L. Ry. Co., 163 Fed. 114, 115.

III. PREMIUMS IN SHIPMENTS.

IMPORTANT CASES SINCE 1908

(a) To be able to ship premiums in packages is a privilege of value to the shipper. Minneapolis Cereal Co. v. C. & N. W. Ry. Co., 28 I. C. C. 415, 417.

AGENCY

See Crimes §15; Passenger Fares and Facilities §15; Tariffs §3 (2); Terminal Facilities §3½.

CASES 1887-1908

(a) Unauthorized declarations of a depot agent, implying that a tank car, which has just returned from one long journey, is in a safe condition to be loaded and started on another long run, are not binding upon the railway company. Michigan Congress Water Co. v. C. & G. T. R., 2 I. C. C. 428, 431.

(b) The Western Classification Committee in the making of classification and rates represents about seventy-five railroad companies, but the classification and rates made by this Committee are merely recommendatory to the carriers in the Association and it is not obligatory upon the carriers to accept and operate them; some of the carriers upon such articles, for example, salted hides and pelts in less than carloads, make commodity rates of their own upon the classification and rates different from those prepared and recommended by the Classification Committee, while other carriers do not; upon a complaint by a shipper against the Classification Committee alone, upon this statement of facts, it is evident that no investigation or order that the Commission could make would have any binding effect whatever upon the carriers. McMillan & Co. v. W. Classification Committee, 3 I. C. R. 282.

(c) Where corporate agents are intrusted with the transaction of business requiring continuous negotiations the authority of the agent to bind the principal by his statement does not terminate until the negotiations are at an end. But narrations of an agent of past transactions are not evidence. Cleveland, C., C. & I. R. Co. v. Closser, 3 I. C. R. 387.

(d) Reconsignment for shipper may not be made by carriers' agent. Morgan v. M., K. & T. Ry. Co., 12 I. C. C. 525.

IMPORTANT CASES SINCE 1908

(e) There is no reason why carriers at a common terminal may not intrust to a joint agent work allotted elsewhere to the carriers' immediate employees. New York Mercantile Exchange v. B. & O. R. R. Co., 36 I. C. C. 156, 162.

(f) There can be no valid objection to carriers doing by an agent what they may do themselves, where such agent is not a shipper or otherwise interested in transportation of the articles with respect to which the service is rendered. In Re Private Cars, 50 I. C. C. 652, 705.

(g) Where shipper employs a steamship company to take delivery of a ship-

ment on board a rail carrier's lighter or barge he thereby makes the steamship company his agent, and becomes responsible for any delay on its part to same extent that he would be if he took delivery personally. Acts and omissions of agent are in such cases acts and omissions of the principal. New York Board of Trade v. Director General, 59 I. C. C. 205, 208.

(h) Tidewater coal exchanges are not shippers, but they are intermediate agencies created by carriers and shippers for the purpose of facilitating the handling of coal destined for transshipment at the ports, and, while they pay transportation rates and charges, they do so only as the agents of their shipper members. Regulations for Payment of Rates and Charges, 59 I. C. C. 456, 457.

(i) Contention that as carriers during federal control were being operated as a unified system by the Director General, that the agent of a carrier was the agent of the Director General, and as such it was his duty to telegraph request for diversion to the last gateway through which he knew the traffic would pass. HELD: Not sustained as it was not the purpose of the federal act or of the orders of the Director General in operating under that act to alter or nullify the rates and other provisions of the lawful tariffs. Du Pont de Nemours Co. v. Director General, as Agent, 64 I. C. C. 67, 670.

(j) Carrier's agent billed shipments to wrong destination, and teamster, employed by complainant to load cars only, accepted and signed the bills of lading. HELD: As authority not delegated to teamster to direct the movement of the cars, the acceptance and signing of the bills of lading by him did not bind complainant. Shipments found misrouted and reparation awarded. Phoenix Refining Co. v. A., T. & S. F. Ry. Co., 66 I. C. C. 303.

(k) Proposed rule under which shipper is required to execute agreement for stoppage of goods in transit, and where shipper is unknown or irresponsible, the agent must require one or more sureties to sign with him, found not justified. Such rule indefinite as to number of sureties required, reposes too much arbitrary power in agents to decide who is or is not "responsible," compliance therewith might require considerable time and result in loss of right to stop because of delivery at destination, and terms of agreement are inconsistent with recognition by respondent of any duty to obey the order to stop. Stoppage of Goods in Transit, 66 I. C. C. 423.

(l) Congress authorized the Commission to inquire into and report to the Senate the affairs of the Trans-Continental Freight Bureau. The Bureau comprises all the trunk lines reaching the Pacific Coast engaged in transcontinental traffic in the United States and Canada, and also most of those engaged in that traffic and having all or a substantial portion of their mileage west of the Missouri River. Shippers have never been members of the bureau or represented on any of its committees. The bureau conducts so-called weighing and inspection departments in the Pacific Coast territory. The general administration of the bureau's affairs is exclusively in the hands of the committee of executive traffic officers of Pacific Coast terminal lines. The conditions most strongly affecting transcontinental traffic to and from Pacific territory, such as water competition, are particularly within the knowledge of the Pacific lines, because their location naturally keeps them in close touch with those conditions. All proposed changes in transcontinental rates to and from Pacific territory directly affect one or more of the Pacific lines. No joint rates to and from Pacific territory can be made without participation by them. The obvious advantages which would accrue to carriers from the compilation of transcontinental rates in a common tariff or set of tariffs constituted a compelling reason for the establishment of the bureau. Multiplication of tariffs was thus avoided. The resulting economy becomes apparent when the expense of tariff compilation and printing is considered. Another purpose for which the bureau was established was to maintain and supervise departments in Pacific territory, to weigh and inspect shipments of transcontinental traffic in order to insure application of correct weights and the lawful tariff rates thereon. The freight traffic managers of the Pacific lines, upon whom devolves the duty of passing upon the recommendations of the standing rate committee, have no direct connection with the bureau nor any control over it. They act solely for their individual lines and the lines respectively connecting with them and thus forming through routes for transcontinental

traffic. It is the duty of Agent Countiss to compile and publish transcontinental tariffs, in accordance with the act, to file such tariffs with the Commission, and to distribute them to carriers and shippers. The printing of bureau publications is done, under contract, by five printing companies at Chicago, and is paid for by the bureau. WEIGHING AND INSPECTION SERVICE. The inspection service is intended to protect carriers from losses in revenues due to intentional or unintentional misdescription of shipments by shippers. These departments also police transit services accorded in their respective territories by bureau member lines and by the lines holding so-called memberships in the weighing service. The bureau's strongest influence in the publication of freight rates, rules and charges as between carriers is probably that flowing from the functioning of the standing rate committee. The members of the standing rate committee are men of wide experience in matters relating to transcontinental freight traffic, and their judgment is given weight. The assessments for maintenance of the bureau, made monthly, are based upon the ratio of the main line rail haul on transcontinental traffic of the respective members to the total of all members, except that the Canadian National Railways and the Grand Trunk Pacific each pays $250 monthly toward the general expenses. The salaries of the chairman, members of the standing rate committee, superintendent of the weighing and inspection departments, and all other bureau employes, are paid by the bureau. Shippers are a unit in indorsing the bureau's method of combining in one set of tariffs the principal transcontinental rates of practically all rail carriers. It affords shippers a ready method of ascertaining the rates available to their competitors; makes rate changes effective for all on the same date, and maintains established relationships between competing points, which is generally of greater importance to them than the measure of the rates. It would be impracticable for every shipper engaged in transcontinental business to have a complete file if each line published a separate set of tariffs. It is of advantage to shippers to be able, through the bureau, to have applications for tariff changes considered by all member lines at the same time, instead of being compelled to file them with the individual lines and then carry on the necessary correspondence with each. Changes are generally published in shorter time than if handled through individual lines. To the member lines the bureau offers distinct advantages. It is a clearing house for the interchange of views on matters of common concern, and affords a point of contact with all shippers engaged in transcontinental traffic and not merely with those on the individual members line. By reason of uniformity in effective dates all rail carriers can participate in the traffic on equal terms with respect to rates. It is manifest that the bureau as at present organized and operated serves many useful purposes, promotes economy and efficiency, and is of advantage to shippers as well as carriers. The need for some organization of this character in the transcontinental traffic field is demonstrated upon the record. It is abundantly shown that operation of the bureau tends to obviate or remove the discriminations as between persons and localities which the law condemns. HELD, the maintenance and operation of the Transcontinental Freight Bureau are not in violation of any provision of the act. In Re Trans-Continental Freight Bureau, 77 I. C. C. 252.

(m) The question of a consigneee's liability for freight and demurrage on army wagons, refused by him, because shipped in an automobile car, increasing the charges, instead of knocked down, was a question of agency, and if the depot quartermaster shipping them had authority from him to engage an automobile car for their shipment, the consignee was liable, and if he had no authority, actual or ostensible, the consignee was not liable. Virginian Ry. Co. v. Stoke, (Va. 1922), 113 S. E. 704.

AGGREGATED SHIPMENTS

See Express Companies §13½.

IMPORTANT CASES SINCE 1908

(a) A rule permitting the concentrating at the point of shipment of numerous small shipments belonging to different shippers into one large shipment for the transportation to one consignee by a steamship line may or may not be proper. There appeared no justification for applying a special rate on small shipments aggregated at destination after transportation service had been completed. S. P. Co. Ownership of Atlantic S. S. Lines, 43 I. C. C. 168, 178.

(b) A shipper making shipments in carload lots has the right to bill a single consignee though the contents of the car may be intended for different individuals. I. C. C. v. D. L. & W. R. R., 220 U. S. 236, 31 Sup. Ct., 392, 55 L. Ed. 448; Swift & Co. v. United States, 255 Fed. 291, 294.

I. CONTROL AND REGULATION.

See Control and Regulation.

§1. Commission's Right to Investigate.

IMPORTANT CASES SINCE 1908

(a) By section 15 of the Commission is authorized to determine what is a reasonable maximum allowance to be paid by a carrier to the owner of property who furnishes any instrumentality used therein. New Orleans Terminal Allowances, 42 I. C. C. 748, 754.

(b) It is not the commission's function under the act to enforce specific compliance of contracts for allowances between shippers and carriers where the tariffs on file do not include allowances claimed. But where carriers under their tariffs offer for a given rate to render a certain specified service, and after a certain date withhold a part of that service, there has been an increase in the rate, no less than if a higher charge had been made for the identical service previously performed for the original charge. United Chem. & Org. Products Co. v. Director General, as Agent, 73 I. C. C. 100, 103.

(c) By paragraph (14), section 1 of the Act the commission is given jurisdiction to establish reasonable rules, regulations, and practices with respect to car service, including compensation to be paid for use of any car not owned by carrier using it. Assigned Cars for Bituminous Coal Mines, 80 I. C. C., 520, 557.

(d) Under section 15, paragraph (13), of the Act the commission is not authorized to increase an allowance merely because it is inadequate to cover cost to shipper whom carrier has employed to perform the service. Cambria Steel Co., 64 I. C. C., 737, 740. Swift & Co. v. Director General as Agent, 81 I. C. C. 677.

(e) Section 15 paragraph 13 of the Act, empowers the Commission only to determine what is a reasonable charge as the maximum to be paid by the carrier or carriers for services rendered. Under this provision the Commission is not authorized to increase an allowance merely because it is inadequate to cover the cost to the shipper whom the carrier has employed to perform the service. Swift & Company v. Director General, 81 I. C. C. 677, 678.

(f) Section 15 of the Act authorizes the commission, if owner of property transported in interstate commerce directly or indirectly renders any service connected with the transportation, to determine what is a reasonable charge as maximum to be paid by carrier for service so rendered. This section, however, does not authorize the commission to require payment, but only to prevent excessive payments, by prescribing maximum which carrier may pay. Cambria Steel Co., 64 I. C. C., 737. National League of Commission Merchants v. P. R. R. Co., 83 I. C. C. 723, 730.

(g) Under Interstate Commerce Act, §15 (8), as amended (Comp. St. §8583), authorizing the Commission to determine a reasonable charge to be paid by a carrier for services rendered by the shipper, the determination of what is a reasonable allowance to a shipper, who was required to haul his goods to the express company's office after the express company failed to call for them and pick them up, as it was required to do under its tariffs on file, is a question which must be first submitted to the Commission, since to permit the shipper and the carrier to agree on the amount paid for such services would open the door to rebating, and the court will not require the carrier to do what it cannot voluntarily do. Fulton Bag & Cotton Mills v. American Ry. Express Co., 288 Fed. 854.

ALL OTHER CITATIONS

In Re Allowances for Transfer of Sugar, 14 I. C. C. 619, 625, 627; Mitchell Coal & Coke Co. v. P. R. R. Co., 38 I. C. C. 40, 43; Prusia Hardware Co. v. C. H. & D. Ry. Co., 40 I. C. C. 747, 748; Sanford, Day Iron Works v. L. & N. R. R. Co., 41 I. C. C. 10, 12; New Orleans Terminal Allowances, 42 I. C. C. 748, 754; Buckeye Steel Castings Co. v. H. V. Ry. Co., 58 I. C. C. 500; Wharton Steel Co. v. Director General, 59 I. C. C. 11, 22; Whitaker-Glessner Co. v. B. & O. R. R. Co., 63 I. C. C. 47, 56; Cambria Steel Co. v. Director General, 64 I. C. C. 734, 737, 741.

§2. Power to Prescribe.

See Jurisdiction of Commission.

IMPORTANT CASES SINCE 1908

(a) Section 15 of the Act provides the Commission may determine what is a reasonable charge as the maximum to be paid by the carrier or carriers for the services so rendered or for the use of the instrumentality so furnished and fix the same by appropriate order. The Commission's power thereunder is to fix the maximum to be paid as an allowance. In exercise of this power the Commission may not require a carrier to make an allowance or fix the precise amount, and it is doubtful whether it can award damages for failure to pay except in cases where the allowance is published in the carrier's tariffs and is not more than reasonable for the service. The Commission thinks the amount here claimed is reasonable, but any redress to which they may be entitled would seem to rest with the courts. Rutherford Brede v. Director General, 61 I. C. C. 515, 517.

(b) The Commission can require the carriers to perform the interchange switching if it finds it to be a reasonable transportation service incident to the line haul, but it can not compel them to act as a unit, or to do the work at the convenience and to the satisfaction of complainant. The Commission can not order carriers to make an allowance. Whether a shipper shall receive an allowance in lieu of such switching service is optional with the carriers. Whitaker-Glessner v. B. & O., 63 I. C. C. 47, 56.

C. C. 339, 343.

§3. Effect of Order.

See Interstate Commerce Commission.

IMPORTANT CASES SINCE 1908

(a) Where the principle of a decision prohibiting elevator allowances applies everywhere, the Commission expects that all interests, though not parties to the proceeding, will conform to the ruling of the Commission. Traffic Bureau, Merchants' Exchange v. C. B. & Q. R. R. Co., 14 I. C. C. 510.

ALL OTHER CITATIONS

Buckeye Steel Castings Co. v. H. V. Ry. Co., 58 I. C. C. 500.

II. PUBLICATION AND TARIFFS.

See Tariffs II.

§4. Obligation to File.

IMPORTANT CASES SINCE 1908

(a) Whatever charges are made, whatever services are performed, and whatever privileges are allowed by carriers, must be stated separately in the schedules filed with the Commission. Anderson, Clayton & Co. v. C. R. I. & P. Ry. Co., 18 I. C. C. 340, 350.

(b) While section 6 does not in express terms require the publication of allowances made to shippers under section 15, yet the courts have held that, in view of the broad prohibitions of the Elkins act and the broad requirements of section 6, allowances made to a ship-

per, even though reasonable in amount, are unlawful rebates unless published. Rates on Railroad Fuel and Other Coal, 36 I. C. C. 1, 3.

(c) Deviation from the legally applicable rate is not permitted by the act under any pretext; an allowance can not be made except under the provisions of a lawfully filed tariff. Lay Fish Co. v. Director General, 80 I. C. C. 4, 5.

(d) A railroad company engaged in interstate commerce can recover for its services in towing a shipper's car floats, which service was not a part of the interstate carriage, though it has not filed with the Interstate Commerce Commission a tariff showing the charges for such services as required for charges for interstate carriage by Interstate Commerce Act. §6, as amended by Act June 29, 1906, §2 (Comp. St. §8569). Pennsylvania R. Co. v. M. McGirr's Sons Co., 287 Fed. 334.

(e) Due to strike, complainants obliged to cart express shipments from freight station to place of business. Contention that shipments overcharged to extent of cartage charges, not sustained. Carrier's tariffs did not authorize allowance or deduction from legally applicable rate for services performed; and since question whether or not complainants may recover for such services can not be determined from tariff, amounts paid for cartage are not overcharges. Tariff rate itself and rules and regulations connected therewith are standards to determine an overcharge. Lay Fish Co. v. Director General, as Agent, 80 I. C. C. 4.

ALL OTHER CITATIONS

In Re Allowances for the Transfer of Sugar, 14 I. C. C. 619, 630; Anderson, Clayton & Co. v. C. R. I. & P. Ry. Co., 18 I. C. C. 340, 350; Best Co. v. G. N. Ry. Co., 33 I. C. C. 1, 3; Transportation of Potatoes, 34 I. C. C. 256; Second Industrial Railways Case, 34 I. C. C. 596, 603; Rates on Railroad Fuel and Other Coal, 36 I. C. C. 1 13; Powell Grain Co. v. St. L. I. M. & S. Ry. Co. Unrep. Op. 1876; Omaha Elevator Co. v. Union Pac. R. R., 249 Fed 827; Railway Co. v. Kirby, 225 U. S. 155, 32 Sup. Ct. 648, 56 L. Ed. 1033, Ann. Cas. 1914A. 501; Railroad Co. v. Mottley, 219 U. S. 467, 31 Sup. Ct. 265, 55 L. Ed. 297, 34 L. R. A. (N. S.) 671; Elwood Grain Co. v. Railway Co., 202 Fed 845, 121 C. C. A. 153; Omaha Elevator Co. v. Union Pac. R. R., 249 Fed. 827, 832; Waste Merchants Asso. v. Director General, 57 I. C. C. 686, 689.

§5. Effect of Publication.

IMPORTANT CASES SINCE 1908

(a) Where an industry has continuously for years performed the terminal or spotting services and apparently has preferred to do so, it can not now be heard in a demand for compensation from the carriers for such past services. Empire Steel & Iron Co. v. Director General, 56 I. C. C. 158, 180.

(b) A carrier cannot pay a shipper for the shipper's services in the wharfage and handling of goods, unless the charges therefor are specified in a duly published schedule or tariff. Southern Cotton Oil Co. v. Central of Ga. Ry. Co., 228 Fed. 335.

ALL OTHER CITATIONS

General Electric Co. v. N. Y. C. & H. R. R. R. Co., 14 I. C. C. 237, 242; Ames, Brooks Co. v. Rutland R. R. Co., 16 I. C. C. 479, 480, 481; Crosby & Meyers v. Goodrich Transit Co., 17 I. C. C. 175, 176; Lay Fish Co. v. Director General, as Agent, 80 I. C. C. 4.

§6. Construction.

IMPORTANT CASES SINCE 1908

(a) Where the service, when rendered by a line-haul carrier, is merely a substitute for team track delivery and involves no additional service beyond what such a delivery would involve, the line-haul rate is presumed to cover it. Huron Milling Co. v. P. M. R. R., 49 I. C. C. 558, 560.

(b) Line-haul rates of carriers in this country have been made to include compensation for delivery and placement of freight upon the tracks of private industries and if this long-established usage were to be changed and separate charges imposed for the accessorial services which are merely incidental to the line haul, even-handed justice would seem to require that these line-haul rates should be proportionately reduced and such a change would involve sweeping revisions of many thousands of tariffs. Huron Milling Co. v. P. M. R. R., 49 I. C. C. 558, 560, 561.

ALL OTHER CITATIONS

Victor Fuel Co. v. A. T. & S. F. Ry. Co., 14 I. C. C. 119, 120; Huron Milling Co. v. P. M. R. R., 49 I. C. C. 558, 560, 561.

III. DISCRIMINATION.

See Discrimination.

§7. Obligation to Treat All Alike.

CASES 1887-1908

(a) A carrier cannot pay the larger expense of the transportation of a remote shipper's merchandise to the station, and not pay the less expense of such transportation of the nearer shipper's merchandise. Hezel Milling Co. v. St. Louis, A. & T. H. R. Co. (Com.), 3 I. C. R. 701.

(b) Upon investigation had in a proceeding instituted by the Commission on its own motion, it appeared that the respondent had in force over its line to Nashville, Tenn., a special rate on coal when used for manufacturing purposes by persons named upon the manufacturers lists prepared by the railroad company. These lists were furnished to dealers who, on selling coal to such manufacturers, issued certificates which entitled them to obtain a refund from the railroad company amounting to the difference between the regular and special rates. Pending investigation the respondent discontinued the manufacturers rate and put in force a new coal tariff to Nashville whereby coal, run of mine, nut and slack, is given a rate of $1.00 per ton the year round, and screened coal a rate of $1.15 per ton, April to September, and for the remainder of the year a rate of $1.40 per ton. The rate from the same mines to Memphis, a point affected by water competition for coal traffic, is $1.40 per ton on all coal the year round, and respondent buys coal at the mines and sells it in the Memphis market. HELD, that the practice abandoned by the respondent of arbitrarily determining what persons should receive the so-called manufacturers rate was a clear violation of the act. The rate charged under the new tariff is not unreasonably low but the rate to Nashville should change at the time any change is made in the rate to Memphis. Re Louisville & Nashville R. R. Co., 4 I. C. C. 157.

IMPORTANT CASES SINCE 1908

(c) Whatever allowances are made must be just, reasonable and non-discriminatory. Suffern Grain Co. v. I. C. R. R. Co., 22 I. C. C. 178, 183; Federal Sugar Refining Co. v. B. & O. R. R. Co., 20 I. C. C. 200, 212; Anderson, Clayton & Co. v. C. R. I. & P. Ry. Co., 18 I. C. C. 340, 350; Brook-Rauch Mill & Elevator Co. v. M. P. Ry. Co., 17 I. C. C. 158, 161, 163.

(d) A carrier is not warranted under section 15 of the Act in making an allowance to a shipper who provides a facility and performs a service in the transportation of his own property while refusing a similar allowance to another shipper competing in the same markets in the same line of business who provides a similar facility and performs the same service in the transportation of his property. Federal Sugar Refining Co. v. B. & O. R. R. Co., 20 I. C. C. 200, 212.

(e) To pay an elevation allowance to one shipper or at one place while declining to pay it elsewhere is undue discrimination unless justified by circumstances. Suffern Grain Co. v. I. C. R. R. Co., 22 I. C. C. 178, 183.

(f) Though there may be no affirmative obligation upon defendants to perform the spotting services under the line haul rates, they may not practice unjust discrimination or undue prejudice by making allowances to other shippers who are competitors of complainant provided substantially similar circumstances and conditions at competitors' plants are shown to exist. Pittsburgh Forge & Iron Co. v. Director General, 59 I. C. C. 29, 33.

(g) The fact that complainant competes with some industries, and that defendants make allowances to these industries for spotting service does not of itself establish unjust discrimination or undue prejudice. Pittsburgh Force & Iron Co. v. Director General, 59 I. C. C. 29, 34.

(h) Aside from any question of the extent of a carrier's legal obligation as to the delivery of carload traffic without charge in addition to the line haul rates, if unjust discrimination or undue prejudice is found to result from the failure or refusal of the carrier to perform the spotting service for one shipper or to make that shipper a proper allowance therefor while it renders a like spotting service for other and competing shippers, the Commission may require by order the removal of the unjust discrimination or undue prejudice. Philip Carey Mfg. Co. v. Director General, 59 I. C. C. 640, 642.

(i) If the service is a transportation duty the carriers may elect either to do it themselves or to hire the shipper to do it for them; but their practices in this respect must be free from undue prejudice. United Chemical & Organic Prod-

ucts Co. v. Director General, 60 I. C. C. 523, 524.

(j) It is well established that, in the absence of undue prejudice, a carrier can not be required to compensate a shipper for services that it is not the duty of the carrier to perform under its contract of transportation, or for services which, because of conditions at the shippers plant, it can not reasonably be required to perform. Gulf States Steel Co. v. Director General, 66 I. C. C. 225, 258.

(k) Fact that a complainant at whose plant a carrier fails to perform a spotting service or make an allowance therefor is in competition with other industries at which such service is performed or allowances are made does not of itself establish unjust discrimination or undue prejudice. In addition, a showing of similarity of circumstances and conditions is necessary. Jackson Iron & Steel Co. v. Director General, as Agent, 77 I. C. C. 114.

Director General, as Agent, 69 I. C. C. 465, 468.

§8. Particular Allowances.

§8 (½). Car Ferry and Cars.

See Car Ferries.

IMPORTANT CASES SINCE 1908

(a) The Commission investigated the cancellation via the D. & M. Ry. and the M. C. R. R. of certain car ferry allowances to the protestant, who, for nine years, had been manufacturing lumber and forest products at Cheyboygan, and for six years receiving such allowances. His plant is on the east side of the Cheboygan River and the respondent lines run to the west bank. The carrier provided allowances of $5 a car on lumber and $3.75 a car on forest products, including bark, cooperage stock (staves, headings and hoops), hoop poles, hop poles, lath, paving blocks, pivots, piles, posts, shingles, trap-net stakes and railroad ties, loaded in or on cars and delivered by car ferry to the respondents either for carriage to Bay City, in the same state, or to points beyond. These allowances were meant to be payable to the protestant only, as he alone was so situated as to be able to receive them. In the beginning the protestant used a lighter for moving his mill products across the river; later he equipped himself, in compliance with the changes in the tariffs above described, with a car ferry having capacity for two cars. This boat is pulled back and forth across the

river, a distance of 350 feet, by means of a cable lying on the bed of the river and a steam engine on the boat. The protestant owns the equipment, and in its erection and maintenance he has expended approximately $5,000. At his expense he built the approaches and connections with the rails of the respondents. The maintenance and operation of the car ferry have cost him more than the amount of the allowances received by him. The tracks on his own side of the river are owned by the protestant and are on his land; the cars are handled on that side by horses; the tracks on the west side of the river are owned jointly by the carriers, although they are on land owned by the protestant and by him leased to the carriers; on that side the cars are handled by a steam hoist. Besides the use made of the latters tracks for the protestant's traffic, they are put to other uses by the respondents. The protestant publishes no tariff and makes no report to any public officer respecting the operation of this car ferry. He has a competitor operating a sawmill on the west side of the river with a plant reached directly by the railroads; the allowances do not put the protestant on a shipping equality with this mill. Ninety-five per cent of his traffic moves by water, and he uses the railroads chiefly for shipments to inland points, to which the shipments must necessarily move by rail or not at all. Since 1909 some 2,763 carloads of lumber and forest products of the kind designated in the tariffs, 651 carloads of forest products not specifically named in tariffs, and 46 carloads of steel rails and hay have been transported across the river by the protestant. HELD, considered most favorably to protestant's contentions, upon the assumption that such payment may lawfully be made, these allowances would still at best be nothing more than a venture by respondents in traffic policy or expediency to meet water competition and increase their business. They were voluntarily paid by respondents to effect a business gain for them; they resulted, so far as protestant is concerned, relieving him of an expense which otherwise he would have been compelled to meet as a part of the cost of carrying his products to the point where rail facilities were available. Accordingly, the payment of these allowances was subject to be discontinued within the desire and discretion of the carriers in contemplation of their own interests and profits. Car Ferry Allowance at Cheboygan, Mich., 32 I. C. C. 578, 581.

(b) Shipper entitled to an allowance for use of his own refrigerator car where carrier fails to furnish one. Rules Governing Transportation of Potatoes, 34 I. C. C. 255, 256.

ALL OTHER CITATIONS

Car Ferry Allowance at Cheboygan, Mich., 32 I. C. C. 578, 581; Tap Line Case, 31 I. C. C. 490, 493, 494; Rules Governing Transportation of Potatoes, 34 I. C. C. 255, 256.

§8. (1) Compressing Cotton.

See Facilities and Privileges.

IMPORTANT CASES SINCE 1908

(a) Carriers have the right to compress cotton in transit. They also have the right to grant or allow to shippers or owners of cotton the privilege to concentrate uncompressed cotton at designated compresses on their lines for such treatment as the shippers or owners may desire to give it with the right of the shippers or owners for transportation to interstate or foreign destination at the through rates from point of origin. Whatever charges are made must, however, be just, reasonable and non-discriminatory. They may not pay to compress companies any unjust or reasonable charge. Anderson, Clayton & Co. v. C., R. I. & P. Ry. Co., 18 I. C. C. 340, 350.

ALL OTHER CITATIONS

Anderson, Clayton & Co. v. C., R. I. & P. Ry. Co., 18 I. C. C. 340, 350; Merchants' Storage Co. v. I. C. R. R. Co., 17 I. C. C. 98, 103; Merchants' Cotton Press & Storage Co. v. I. C. R. R. Co., 17 I. C. C. 98, 104, 106; Brook-Rauch Mill & Elevator Co. v. M. P. Ry. Co., 17 I. C. C. 158, 161, 163; Keystone Elevator & Warehouse Co. v. Director General, as Agent, 73 I. C. C. 273.

§8. (2) Cooperage and Grain Doors.

IMPORTANT CASES SINCE 1908

(a) Where special reasons have induced railroads to furnish, upon certain terms, certain car fittings for winter transportation, the presumption is that the rates are maintained with respect thereto. New York Shippers' Protective Asso. v. N. Y. C. & H. R. R. Co., 30 I. C. C. 437, 438.

(b) The Commission may not with propriety fix by order a maximum

amount that should be paid the shipper by a carrier for labor performed and for materials furnished by him in installing grain doors or doing other incidental repair work on cars furnished for shipments of grain in bulk. If, however, a carrier makes any allowance to shippers at country stations for work done, or materials furnished, the conditions and purposes as well as the maximum allowance must be stated in its tariff and must be applied without discrimination. Farmers' Cooperative Asso. v. C., B. & Q. R. R., 34 I. C. C. 60, 65.

(c) Ever since grain has been shipped in bulk shippers have been required to place the grain doors. Such a requirement is not unreasonable. It is an incident of loading and should properly be performed by the shipper. Farmers' Cooperative Asso. v. C., B. & Q. R. R., 34 I. C. C. 60, 65.

ALL OTHER CITATIONS

Balfour, Guthrie & Co. v. O. W. R. R. & N. Co., 21 I. C. C. 539, 540; Northern Malt Co. v. C., M. & St. P. Ry. Co., Unrep. Op. A-123; New York Shippers' Protective Asso v. N. Y., C. & H. R. R. Co., 30 I. C. C. 437, 438; Farmers' Cooperative Asso. v. C., B. & Q. R. R., 34 I. C. C. 60, 65; Rock Milling & Elevator Co. v. Atchison, T. & S. F. Ry. Co. (Kans. 1916), 154 Pac. 254, 255; Keystone Wood Co. v. P. R. R. Co., 37 I. C. C. 622, 624; Continental Can Co. v. B. & O. R. R. Co., 38 I. C. C. 618; Stockton Elevator & Shipping Asso. v. Missouri Pac. Ry. Co. (Kans. 1916), 154 Pac. 1126; Rock Milling & Elevator Co. v. Atchison, T. & S. F. Ry. Co., 158 Pac. (Kans. 1916), 859; Sterling Salt Co. v. P. R. R. Co., 43 I. C. C. 276, 278, 279, 280; Fruit Dispatch Co. v. P. & R. Ry., 48 I. C. C. 634; Morgan County S. P. Assn. v. B. & O. R. R., 51 I. C. C. 475.

§8. (2½) Dunnage.

See Dunnage.

IMPORTANT CASES SINCE 1908

(a) For loading and unloading and for all other special services performed by it apart from conveyance, the carrier may properly make a reasonable charge, since they are not accessorial parts of the transportation which section 1 requires the carrier to furnish. If the placing of blocks, braces, supports, and like materials in lieu of packing, crating, or boxing of individual units of carload shipment is essential for the safe transportation of the loads, the materials should be furnished and placed by the shipper. And since the substitution of dunnage for the more expensive boxes and crates is of advantage to the shipper and reduces the gross weight upon which freight charges must be paid, the carrier should receive freight for the total weight hauled. Dunnage Allowances, 30 I. C. C. 538.

(b) If shippers elect to dispense with the use of boxes, crates, and other packing which might be available for further use, and upon the full weight of which the carriers would receive freight charges, the carrier offering equipment which would otherwise adequately take care of the shipment is entitled to revenue for the gross weight transported. Dunnage Allowances, 30 I. C. C. 538, 545.

(c) In Dunnage Allowances, 30 I. C. C. 538, the Commission said at pages 542 and 543: "Standard box, stock, ventilated, and refrigerator cars in good repair will accommodate all af the ordinary and usual needs of shippers, and if more than this demanded because of the form, nature, or peculiar characteristics of goods tendered for conveyance some obligation must attach to the shipper in connection with the additional demand. There can be no doubt on this record that the primary and most important purpose of the dunnage (specifically stated to include double-decking) used in varying forms by the shipping interests here represented is to make the load safe for transportation and to obviate injury to the goods, the prevention of damage to the carrier's equipment or property being a minor consideration. Under these circumstances, and in view of the fact that the substitution of dunnage for the more expensive boxes and crates and other packing material in respect of most of the commodities discussed is of advantage to the shipper and reduces the gross weight upon which freight charges must be paid, we think it not inconsistent that the carriers should receive revenue for the total weight hauled." California Wholesale Potato Dealers Asso. v. Arizona Eastern R. R. Co. et al., 52 I. C. C. 334, 335.

C. 157; Aetna Explosive Co. v. Penna. R. R., et al., 52 I. C. C. 173; California Wholesale Potato Dealers' Asso. v. Arizona Eastern R. R., 52 I. C. C. 334, 335.

§8. (3) Elevation of Grain.

See Infra §15; Transit.

CASES 1887-1908

(a) The construction of grain elevators by a shipper, and the allowance by the carrier of 1¼ cents per 100 pounds for elevator or transfer services to the corporations controlled by the shipper and which conduct the elevators, does not amount to a rebate. Re Allowance to Elevators, 10 I. C. C. 309.

(b) A carrier cannot complain because of a reasonable allowance made by a rival carrier for elevator or transfer service. Matter of Allowances to Elevators, 10 I. C. C. 309.

(c) One and one-fourth cents per 100 pounds of grain, paid by a carrier for elevator or transfer service, is not unreasonable. Matter of Allowances to Elevator, 10 I. C. C. 309.

(d) The allowance by a carrier to an elevator company which it has procured to construct elevators, of 1¼ cents per 100 pounds, as an elevation or transfer charge, does not amount to a discrimination in favor of grain shippers who own and control the elevator company. Matter of Allowances to Elevators, 10 I. C. C. 309.

(e) Commission instituted an investigation as to elevator allowances paid by the Union Pacific Railroad Company at the Missouri River. The U. P. entered into contracts with Peavey & Co. under which the latter erected grain elevators at Council Bluffs, Ia., and Kansas City, Mo., for the transfer of grain at those terminals, and for the service of transferring grain by elevator at said points the U. P. agreed to pay Peavey & Co. 1¼c per 100 pounds. Corporations controlled by Peavey & Co. were formed to conduct the elevators at each point. Peavey & Co. are large buyers and shippers of grain in the northern and western grain producing states and control a large number of country elevators. In making this arrangement the U. P. acted in good faith, and the facts indicate that the charge paid is not an excessive charge for the service as conducted by the elevator companies. The real complainants are carriers competing with the U. P., who claim that if this arrangement is not declared illegal they will be compelled to make similar allowances at transfer points on their lines, and no shipper nor any dealer in competition with Peavey & Co. has appeared to complain or protest in any manner against this arrangement. HELD: That the compensation paid for the elevator or transfer service is not unreasonable. That the U. P. is entitled to perform the work itself or hire it done by others and is not legally at fault or guilty of wrong doing because incidentally those employed by the carrier to transfer the grain are aided more or less in another line of business in which they are engaged. That any injury or detriment resulting to rival carriers under the arrangement is something which the law does not seek to prevent. In the Matter of Allowances to Elevators by the U. P. R. R., 10 I. C. C. 309.

(f) The construction of grain elevators by a shipper, and the allowance by the carrier of 1¼ cents per 100 pounds for elevator or transfer service to the corporations controlled by the shipper and which conduct the elevator, does not amount to a rebate. Matter of Allowances to Elevators, 10 I. C. C. 309.

(g) Elevator allowance rebate after it exceeds cost. Re Allowances to Elevators by U. P. R. R. Co., 12 I. C. C. 85.

(h) An allowance made to a shipper of grain, who furnishes elevation service under an arrangement with a carrier, is a rebate and an unlawful discrimination when it involves a profit over and above the actual cost to such shipper of the service rendered. It is not a rebate when the allowance does not so exceed the actual cost. The arrangement between the Union Pacific Railroad Company and the Peavey elevators at Council Bluffs and

Kansas City is not in itself unlawful. But the allowance of 1¼ cents per 100 pounds paid by the railroad company to these elevators, controlled by the Peavy interests, who are large shippers of grain and own practically all the grain going into the elevators, is in excess of the actual cost of the service, and is a rebate and therefore unlawful. Ordered: That such allowances be reduced and shall not exceed three-fourths of a cent per 100 pounds. Allowance to Elevators By U. P. R. R. Co., 12 I. C. C. 86.

(ij) The elevation of grain and arrangement between the U. P. R. R. and the Peavy elevators at Council Bluffs and Kansas City is not in itself unlawful. But the allowance of 1½ cents per 100 pounds paid by the railroad to these elevators, controlled by the Peavy interests, who are large shippers of grain and own practically all the grain going into the elevators, is in excess of the actual cost of the service, and is a rebate and therefore unlawful. HELD: Such allowance be reduced and shall not exceed ¾c per 100 pounds. In the Matter of Allowances to Elevator by the U. P. R. R., 12 I. C. C. 86.

(k) Since a carrier subject to the act is entitled to provide elevation for grain shipments, such carrier may either construct and operate the elevator itself or furnish elevation by arrangement with the owner of an elevator; and the amount of compensation paid by the carrier to the owner of an elevator rendering the service is of no concern to shippers or to other carriers, unless it operates to affect the rates charged by the carrier upon the grain traffic or by some device a portion of the allowance is returned to shippers and thus becomes a rebate. In the Matter of Allowances to Elevators by the U. P. R. R., 12 I. C. C. 86, 88.

(lm) The amount of the compensation or allowance that may be made to the owner of an elevator for rendering elevation is not a matter of concern either to shippers or to other carriers, unless in some way it enters into the rates charged on grain traffic and thus makes the rates excessive, or unless by some device a portion of the allowance is returned to shippers and thus becomes a rebate. Allowances to Elevators by U. P. R. R. Co., 12 I. C. C. 87, 88.

(n) While the Commission has no power under the statute to forbid a railroad company from contracting with an elevator owner for elevation, yet if the owner is also a shipper the Commission has the authority to so regulate and control the relations between them as to protect the rights of others and to enforce the observance of the law. Allowances to Elevators by U. P. R. R. Co., 12 I. C. C. 87, 90.

(o) Atchison entitled to same allowance on grain as sister cities. City Council of Atchison v. Mo. Pacific Ry. Co., 12 I. C. C. 111.

(p) Defendants grant certain allowances or free services in the elevation, transfer, mixing, cleaning and other handling of grain at Kansas City, Mo., Argentine, Leavenworth and Kansas City, Kan., which are withheld by them at Atchison, Kan., to which point they have established the same rates as those in force at said other cities. HELD: That such practice is unlawful and that defendants should not furnish at Kansas City, Mo., Kansas City, Leavenworth or Argentine, Kan., elevator allowances or other free services in connection with the elevation, transfer, mixing, cleaning, clipping, drying, weighing, storage loading out of shipments of grain which are not at the same time granted or furnished in like or equivalent service or allowance to the same degree and extent at Atchison. City Council of Atchison, Kan., v. M. P. Ry. Co. et al., 12 I. C. C. 112.

(q) Complainant attacked allowances given to elevators at Kansas City, Mo., Argentine, Leavenworth, Kan., and Coffeyville, Kan., as unjustly discriminatory in that no allowance was made to complainant of the same character. Complainant is located at Atchison, Kan. Defendants have placed Atchison on a parity and equality with Kansas City and other points named as to inbound and outbound rates, and have made it, for rate making purposes, a common point with Kansas City. None of the defendants own elevators at Atchison, although they do at the other points mentioned. HELD: The practice of making an elevator allowance at Kansas City, Argentine, Leavenworth and Coffeyville without making similar allowances to elevators at Atchison is unlawful. City Council of Atchison, Kan., v. M. P. Ry., 12 I. C. C. 112.

IMPORTANT CASES SINCE 1908

(r) In the decisions by the Supreme Court of the United States in the Dif-

fenbaugh Case, 222 U. S. 42, and the Updike Case, 222 U. S. 215, relating to the legality of the allowances paid for the elevation of grain by the Union Pacific at Council Bluffs, Ia., it was the intention of the court to hold that, whatever might be the case if a railroad saw fit to confine its payment to elevation actually required in the conduct of its business, it must, when it makes an allowance to one elevator under such circumstances as to give that elevator payment for commercial elevation, extend the same privilege to all other elevators similarly situated at that point. Defendant carriers ordered not to exceed ¾c in the payment of elevation or transfer allowances on grain at the Missouri River and to confine that payment to grain actually passing through the elevators in ten days. Traffic Bureau, Merchants' Exchange v. C., B. & Q. R. R. Co., 22 I. C. C. 496, 505, 506.

(s) There are two kinds of elevation, one of which may be termed transportation elevation, consisting of the passing of the grain through an elevator for the purpose of transferring it from car to car and obtaining its weight, and commercial elevation, which involves various processes in the treatment of the grain itself, like cleaning, mixing, clipping, drying, etc. The first sort of elevation is an incident to the transportation of the grain; the second, to the merchandising of the grain. In Re Elevation Allowances, 24 I. C. C. 197, 199.

(t) It is extremely difficult to separate transportation elevation from commercial elevation. Both things are part of the same general process. It is impossible to separate the different items of expense and to say with confidence what belongs to transportation and what to commercial elevation. In Re Elevation Allowances, 24 I. C. C. 197, 202.

(u) The Commission believes that the payment of all elevation allowances and the giving of all free elevation should be prohibited, for in no other way can discrimination be prevented. Every service of benefit to a shipper should be charged for at a reasonable sum, and no charge should be allowed one shipper over another. The Supreme Court of the United States has, however, decided that under the Interstate Commerce Act some sort of an elevation allowance may be made. This decision the Commission fully accepts. In Re Elevation Allowances, 24 I. C. C. 197, 204.

(v) The duty of the carrier to provide elevation is a necessary incident to the transportation of any shipment, can not be withdrawn from the public, for it is a part of the carrier's obligation under the law. That there are no tariffs on file which provide for elevation by carriers upon shipments of grain or seeds to a certain territory does not, of course, preclude the requirement that such tariffs be filed if it should be established that elevation is a necessary incident to transportation upon a particular movement. Grain Elevator Allowances at Kansas City, 34 I. C. C. 442, 447.

(w) Complainant, a corporation operating a grain elevator, and performing a transportation service, not as an independent entity, but as agent of a railroad, under contract, which service such railroad holds itself out to perform by the publication of charges in its tariffs, alleges that allowances made to it were unreasonably low. HELD: Since complainant has no interest in traffic handled through the elevator, it can not be considered a shipper or "owner of property transported." It stands in much the same position as an employee of the railroad and can not be considered a common carrier whose compensation is to be derived from divisions of joint rates. Keystone Elevator & Warehouse Co. v. Director General, as Agent, 73 I. C. C. 273.

Op. 2045; Lexington Flouring Mills v. M. P. Ry., 49 I. C. C. 379; Omaha Elevator Co. v. Union Pac. R. R., 249 Fed. 827; Keystone Elevator and Warehouse Co. v. Director General, 73 I. C. C. 273; Spencer Kellogg & Sons, Inc., v. Delaware, L. & W. R. Co., 197 N. Y. S. 380.

§8. (3⅛) Furnace Allowances.

IMPORTANT CASES SINCE 1908

(a) And the failure of a carrier to pay a furnace allowance to certain operators when such allowances were paid to their competitors results in unlawful prejudice and disadvantage against those who do not receive such allowances. Pittsburgh Steel Co. v. P. & L. E. R. R. Co., 39 I. C. C. 312, 315.

(b) Complainant attacked refrigeration charges collected by defendants on certain interstate carload shipments of fresh meat and packing house products from San Francisco, as unjust, unreasonable and unduly prejudicial. The shipments moved in refrigerator cars over the lines of the S. P. and connections. During the period covered by the complainant defendant's tariffs named stated refrigeration charges which were in addition to the freight charges and which covered the total cost of refrigeration of the commodities shipped by complainant to destination, including initial icing. The case was submitted upon an agreed statement of facts, which shows that prior to federal control it was agreed between the S. P. and complainant that complainant should provide the initial icing for its shipments and be reimbursed by the S. P., for all reasonable and necessary expense incurred in so doing. Pursuant to this agreement, complainant both before and during federal control, furnished at its own expense the initial icing for its interstate shipments, for which it was offered compensation in an amount equal to the cost of the ice and salt used. As there was no tariff provision authorizing such payment, this offer was declined on advice of counsel. Under the circumstances an allowance under section 5 of the Interstate Commerce Act might properly have been made to complainant for rendering a service connected with the transportation and furnishing an instrumentality or facility used therein in the initial icing which defendants were under obligation to supply. HELD: A charge of allowance therefore based on $4 per ton for ice and $7 per ton for salt furnished is no more than is just and reasonable, and, as it appears that the failure of defendants to make reimbursement on that basis has been occasioned solely by their neglect to provide therefor in the tariff, the Commission sees no objection to the carrying into effect of the adjustment agreed upon between the parties. No order authorizing reimbursement is necessary. If such allowance is to be made in the future, it should be duly provided for by tariff in accordance with section 6 of the Interstate Commerce Act. Complaint dismissed. Western Meat Co. v. Director General, 58 I. C. C. 743.

ALL OTHER CITATIONS

Pittsburgh Steel Co. v. P. & L. E. R. R. Co., 39 I. C. C. 312, 313, 314, 315; Iron Ore Rate Cases, 44 I. C. C. 368.

§8. (3⅛a) Icing.

See Refrigeration.

IMPORTANT CASES SINCE 1908

(a) Rule 210, clause A, governing allowances for icing by shippers at loading stations, should be revised to provide that carriers at its option and for its own convenience may permit shipper or owner to perform icing at its loading station, and make allowance therefor. Perishable Freight Investigation, 56 I. C. C. 449, 557.

§8. (3¼) Lateral Allowances.

See Lateral Allowances.

IMPORTANT CASES SINCE 1908

(a) In the Anthracite Coal Case (35 I. C. C. 220, 241), the Commission discovered a new variety of allowance, given by the Central Railroad of New Jersey to a favored coal shipper. This consisted of a reduction below the tariff rate, ranging from 11 to 23 cents per ton, depending on the destination, to which the shipments were transported and the sizes of the coal shipped and were termed "lateral allowances." Perhaps in sardonic

humor in originating an oblique method of evading the act.

ALL OTHER CITATIONS

Rates for Transportation of Anthracite Coal, 35 I. C. C. 220, 241, 243.

§8. (3½) Leakage.

IMPORTANT CASES SINCE 1908

(a) Under a tariff provision providing for reimbursement made to shippers for repairs of grain cars against "leakage in transit," the "leakage" which the tariff aimed to prevent was leakage of grain or other commodities from the car, and of moisture into the car. It was not intended to cover leakage from a package in the car to the floor of the car. S. W. Missouri Millers' Club v. St. L. & S. F. R. R. Co., 26 I. C. C. 245, 246.

(b) To pay leakage claims to some shippers and not to others similarly situated is an unjust discrimination. S. W. Missouri Millers' Club v. St. L. & S. F. R. R. Co., 26 I. C. C. 245, 249.

ALL OTHER CITATIONS

S. W. Missouri Millers' Club v. St. L. & S. F. R. R. Co., 26 I. C. C. 245, 246, 249; Lysle Commission Co. v. C., B. & Q. R. R. Co., Unrep. Op. A-265; Goldfield Consolidated Mines Co. v. S. P. Co., Unrep. Op. A-266; Rock Milling & Elevator Co. v. Atchison, T. & S. F. Ry. Co. (Kan. 1916), 154 Pac. 254; Western Meat Co. v. Director General, 58 I. C. C. 743.

§8. (4) Lighterage.

See Lighterage §4.

IMPORTANT CASES SINCE 1908

(a) The practice of petitioning carriers of granting allowances to Arbuckle Bros. at their Jay St. Terminal, New York City, for lightering their own sugar, condemned in Federal Sugar Refining Co. v. B. & O. R. R. Co., 20 I. C. C. 200, as unlawful and discriminatory against a competitor at Yonkers, N. Y., is not illegal as constituting the giving of a rebate in violation of the act, nor is it unjustly discriminatory under section 3, nor did the fact that said competitor shipped the sugar by boat from its refineries at Yonkers, consigned to its office at New York, within the lighterage limits, and had it transported to the pier of the boat company within such limits, and then rebilled and carried to the terminals of petitioners, entitle it to the lighterage allowance. Order in Federal Sugar Refining Co. v. B. & O. R. R. Co., 20 I. C. C. 200, enjoined (Mack, J., dissenting). B. & O. R. R. Co. v. U. S., 200 Fed. 779, 791.

(b) Complainants attacked the carrier's rule restricting the time within which allowance for lighterage to outside lighters might be made on shipments of hay and straw moving to points within the New York lighterage limits as unreasonable and prejudicial. The rule required that traffic must be called for by outside lighters the day of arrival at pier 29, E. R., or the next working day thereafter. The purpose of the rule was to compel the prompt removal of hay and straw from the pier; and it appeared that the storage charge of $1.50 per car per day was not sufficient to bring about this result. Although complainants had storage facilities their shipments often remained on the pier from 2 to 15 days. HELD That the rule attacked was not shown to have been unreasonable or prejudicial. Complaint dismissed. Schaefer & Son v. C. V. Ry., 42 I. C. C. 146.

(c) Carriers embargoed traffic to New York Harbor points. Complainant's shipments were permitted to go forward under permits which contained an agreement that they would perform their own lighterage service. Refusal of carriers to make an allowance, as provided in tariffs, for lighterage service to Shooters Island, in New York Harbor, found not unreasonable or otherwise unlawful following American Mfg. Co., 77 I. C. C., 52, and Compagnie Auxiliare, 77 I. C. C., 60. Permits were only for movement to Jersey City and Elizabethport and the contracts of transportation were terminated at those points by the express agreement of the parties. Standard Shipbuilding Corp. v. Director General, as Agent, 77 I. C. C. 64.

ALL OTHER CITATIONS

Federal Sugar Refining Co. v. B. & O. R. R. Co., 20 I. C. C. 214, 217; Federal Sugar Refining Co. v. B. & O. R. R., 17 I. C. C. 40, 45, 47; B. & O. R. R. Co. v. U. S., 200 Fed. 779, 791; Swift & Co. v. B. & O. R. R., 50 I. C. C. 103; Lehigh Coal & Navigation Co. v. P. R. R., 50 I. C. C. 543.

§8. (4¼) Outage On Tank Cars.

CASES 1887-1908

(a) The practice of allowing a tank shipper of oil an arbitrary deduction of 42 gallons per tank car is wholly indefensible when no corresponding allowance is made for leakage and evaporation

from shipments in barrels. Rice v. Cincinnati, W. & B. R. Co. (Com.), 3 I. C. R. 841; Rice v. Western N. Y. & P. R. Co. (Com.), 3 I. C. R. 162.

(b) The allowance by a carrier to a shipper of oil in tanks, of 42 gallons, or any number of gallons from the actual quantity put in a tank, for alleged leakage or waste in transportation, is, in the absence of a corresponding allowance to shippers in barrels, unjust discrimination and unlawful. Rice, Robinson & Witherop v. W. N. Y. & P. R. R. Co., 3 I. C. C. 162, 172.

(c) The practice of allowing the tank shipper an arbitrary deduction of 42 gallons per tank car is wholly indefensible. Losses from leakage and evaporation are not less proporotionately when the shipment is made in barrels, and no circumstance is discovered or reason advanced which justifies a concession of that nature to the shipper who furnishes his own conveyance, when no corresponding allowance is made to a rival shipper using the means of transportation provided by the carrier. Rice v. C., W. & B. R. Co., 3 I. C. C. 842, 855.

ALL OTHER CITATIONS

Consolidated Classification Case, 54 I. C. C. 65, 66.

§8. (4½) Lining and Padding.

See Supra §3½, §8.

IMPORTANT CASES SINCE 1908

(a) The Commission has jurisdiction over rules and regulations of carriers concerning the lining and bedding of cars for flour shipments. S. W. Missouri Millers' Club v. St. L. & S. F. R. R. Co., 26 I. C. C. 245, 250.

(b) Complainant asked reparation for expenses incurred in lining cars for the shipment of potatoes in winter from points in Wisconsin, Minnesota, and the Dakotas to points in Illinois, Iowa, Ohio, Indiana, and various other states, and in equipping such cars with stoves and fuel to protect such shipments from cold. Western classification rules required that shippers must line cars at their own expense and that rates for freight in carloads should not obligate carriers to furnish heated cars; and rates were constructed upon the theory that the shippers would provide such service. HELD: That, since it appeared that the rate was not intended to include the heating or lining of cars and that the established practice had been for the shippers, at their own expense, to line and heat the cars, the complaint must be dismissed. Reparation denied. Best Co. v. G. N. Ry. Co., 33 I. C. C. 1.

(c) Shippers may not shift the expense of affording protection against excessive absorption of moisture to the carriers. Straw Rates from St. Louis to Anderson, Ind., 36 I. C. C. 30, 32.

(d) Failure of carriers to equip refrigerator cars with temporary false floors for transportation of potatoes, under carriers' protective service against freezing, and refusal to pay shipper an allowance to reimburse them for cost of supplying the same, found not in violation of the Act to Regulate Commerce or the Federal Control Act. Any redress to which shipper may be entitled found to rest with the courts. Rutherford-Brede Co. v. Director General, as Agent, 61 I. C. C. 515.

(e) Reparation awarded for failure to make allowance for stoves and car linings used in the protection of shipments of potatoes in accordance with tariff provision. Miller & Co. v. C. & N. W. Ry. Co., Unrep. Op. A-137.

ALL OTHER CITATIONS

S. W. Millers' Club v. St. L. & S. F. R. R. Co., 26 I. C. C. 245, 250; Miller & Co. v. C., St. P., M. & O. Ry. Co., Unrep. Op. A-133; Miller & Co. v. C. & N. W. Ry. Co., Unrep. Op. A-137; Lysle Commission Co. v. C., B. & Q. R. R. Co., Unrep. Op. A-265; New York Shippers' Protective Asso. v. N. Y. C. & H. R. R. R., 30 I. C. C. 437, 440; Best Co. v. G. N. Ry. Co., 33 I. C. C. 1, 4; Boldt Co. v. C., R. I. & P. Co., 33 I. C. C. 8, 10; Straw Rates from St. Louis to Anderson, Ind., 36 I. C. C. 30, 32; Morgan County Sand Producers' Asso. v. B. & O. R. R., 51 I. C. C. 475, 476; Perishable Freight Investigation, 56 I. C. C. 449, 555, 557.

§8. (4¾) Scaleage and Shrinkage.

See Scaleage and Shrinkage.

CASES 1887-1908

(a) Complainant charged that the respondents were common carriers subject to the act, were accustomed to make deductions of from five to ten pounds of wheat per load from the true weight when delivered by the farmer to the buyer at the elevators of the respondents, and gave receipt to the farmer for the

amount as thus diminished, upon which the latter was paid by the buyer, thereby suffering a loss to the extent of such reduction, but failed to charge that the wheat was delivered for interstate transportation, or, indeed, for transportation anywhere. HELD: That the complaint was insufficient in substance to show violation of the act and that the respondents were entitled to have it dismissed on their motions to that effect, but that the dismissal should be without prejudice. White v. M. C. R. Co., 2 I. C. C. 641.

IMPORTANT CASES SINCE 1908

(b) Upon reconsideration, tariff rule providing for deductions of certain percentages of loading weights, generally ⅛ of 1 per cent on wheat, flax seed, rye, oats and barley, and ¼ of 1 per cent on corn, as representing natural shrinkage of grain in transit, not found unreasonable. Crouch Grain Co. v. A., T. & S. F. Ry. Co., 41 I. C. C. 717.

ALL OTHER CITATIONS

N. Y. Produce Exchange v. N. Y. C. & H. R. R. R. Co., 32 I. C. C. 212, 215; Miller & Co. v. C. & N. W. Ry. Co., Unrep. Op. A-746.

§8. (4⅞) Loading and Unloading.

See Loading and Unloading; Transportation §10.

IMPORTANT CASES SINCE 1908

(a) Following Omaha Packing Co., 66 I. C. C. 44, refusal of carriers to unload ordinary live stock from their cars into stock pens adjacent to packing plant of complainant, situated at Cactus, Ariz., or to make an allowance for unloading such shipments, while, pursuant to section 15, paragraph (5) of the act, performing the service of loading at point of origin or unloading at destination, such live stock shipped from or to public stockyards, without charge in addition to line-haul charges, not shown to violate the act. Arizona Packing Co. v. A. E. R. R. Co., 74 I. C. C. 223.

(b) Under the amendment to Interstate Commerce Act, § 15, by Act June 29, 1906, § 4, providing for compensation to the owner of property transported for services rendered by such owner, the owner of the goods, who loaded them into the cars, though the loading was included in the services for which the tariff rate was fixed is entitled to reasonable compensation for such services, even though the agreement it should load the goods was for the mutual benefit of the owner and the carrier, and the statue requires the Commission to fix a reasonable allowance for such services, and was not intended merely to prohibit an excessive allowance. United States v. Interstate Commerce Commission, 277 Fed. 538.

ALL OTHER CITATIONS

Swift & Co. v. A. C. L. R. R. Co., 42 I. C. C. 83; Cuneo Importing Co. v. New York Cent. R. R., 170 N. Y. S. 940; Swift & Co. v. B. & O. R. R., 50 I. C. C. 103; Waste Merchants' Asso. v. Director General, 57 I. C. C. 686.

§8. (5) Spotting Cars.

See Facilities and Privileges §12½; Spotting.

IMPORTANT CASES SINCE 1908

(a) Spotting cars is a special service of value to shipper. Industrial Railways Case, 29 I. C. C. 212, 226.

(b) Performance by line carriers of plant industry service and the payment by them of allowances for the performance of such services by the industries, held to constitute an illegal rebate. Industrial Railways Case, 29 I. C. C. 212, 237.

(c) Whatever transportation service or facility the law requires the carriers to supply they have the right to furnish, and it does not follow, therefore, that because the line-haul rate covers the movement of cars incident to the receipt and delivery of carload freight on industry spurs, or on the interior tracks of industrial plants, that the owner of the property transported may in every case receive an allowance from the carrier when he performs that service. Car Spotting Charges, 34 I. C. C. 609, 617.

(d) There may be cases in which the spots at which cars are placed for loading and unloading in complex industries are so located that the request for the receipt and delivery of carload freight at such spots could not, in view of general usage, be regarded as reasonable, and where a charge for the spotting service in addition to the line-haul rate might therefore be justified. But the mere fact that an industry is complex, or that it requires an interplant service in addition to the receipt and delivery of carload freight is not sufficient to justify an additional charge for the placing of cars at the door of the industrial plant for the receipt or delivery of carload freight.

The line-haul rate, however, covers only one placement of the car for loading or unloading, and an additional charge should be made for each additional placement of the car for that purpose. Car Spotting Charges, 34 I. C. C. 609, 618.

(e) The mere size or complexity of the industry is not controlling in determining whether or not the line-haul rate covers the receipt or delivery of freight at the door of the plant. The service involved in the placement of cars for loading or unloading at an isolated industry to which a single spur leads may be as great as that rendered in the placement of cars for loading or unloading in a large plant having an intricate system of interior tracks. At the large industries the trunk line may render interplant services in the movement of cars from place to place within the plant during the processes of manufacture which it has no occasion to render at smaller industries, and for such services an additional charge should be made; but where the service rendered is merely a substitute for the service which would be required if the movement were to or from a team track, an industry spur, or a private siding, nothing should be added to the charge for the line haul. Car Spotting Charges, 34 I. C. C. 609, 616.

(f) It has long been the custom of carriers in this country to receive and deliver carload freight upon spur tracks leading to private industries at convenient points for loading and unloading without imposing any charge for that service in addition to the line-haul rate, and where this service is merely a substitute for team-track receipt and delivery of carload freight the line haul rate covers the service for the reason that rates generally in this country have been constructed upon that basis. Car Spotting Charges, 34 I. C. C. 609, 616.

(g) Where an industry has continuously for years performed the terminal or spotting charges and apparently has preferred to do so, it can not now be heard in a demand for compensation from the carriers for such past services. Empire Steel & Iron Co. v. Director General, 56 I. C. C. 158, 180.

(h) And a carrier is ordinarily under a legal obligation to effect delivery under a transportation rate. The nature and extent of delivery of carload traffic has differentiated with the increasing complexity in the development of industrial enterprise. Perhaps the most common, if not the standard, form of delivery for carload freight is the setting of a car on the so-called team tracks of the carrier, where it may be conveniently unloaded, usually by the consignee. Another common form and a substitute for team track delivery is the switching of a car to the private siding of a consignee whose place of business is contiguous to the trunk line, clear of the main track. It is indisputable that the trunk line carrier may be required to perform these or equivalent services of delivery without charge in addition to the transportation rate; or, if it choose, may employ an agent to render the service for it. This agent may be the shipper or owner of the property transported, with the limitation that the charge or allowance for the service may be no more than just and reasonable. With the rapid growth of many industries and their extension over large areas, the places for the discharge of inbound freight and the loading of outbound goods have receded farther and farther within the plants and from the rails of the trunk lines. Facilities became necessary to transport materials or partly manufactured articles from one point within the plant to another and there grew up, primarily for the convenience of operation of the industries, a system of tracks on their private property over which, in many instances, they employed their own cars and motive power. Where the trunk line attempted with its motive power to continue the carriage to the designated point of unloading, increasingly distant from the trunk line, and involving greater and greater service, it became less and less practical for its engines to operate within the plant. The next step was a natural consequence of the physical situation. The increase in the service, particularly in the great industrial centers, was rarely attended by an increase in the transportation rate of the carrier by reason of the larger spotting service. Frequently the industry, finding that the operation of the carriers' locomotives embarrassed intraplant activities, and the carrier no longer wishing to continue with its own engines a service which had become so complex, mutually agreed that the motive power of the industry should be employed in the accomplishment of the spotting and in certain cases that reimbursement should be made for this equipment. U. S. Cast Iron Pipe & Foundry Co. v. Director General, 57 I. C. C. 677, 681.

(i) Giving an allowance in lieu of performing spotting service is optional with the carriers. United Chemical & Organic Products Co. v. Director General, as Agent, 60 I. C. C. 523, 524.

(j) Where complainant, in undertaking to perform spotting service, relied upon an agreement that it would be granted an allowance therefore, carrier can not be heard to say that it has always been ready and willing to perform the spotting, and that complainant voluntarily relieved it from performing the service. United Chemical & Organic Products Co. v. Director General, as Agent, 60 I. C. C. 523, 525.

(k) If defendants continue to do the spotting for complainants' competitors at the convenience of their industries, complainant is entitled to like accommodation. Any unjust discrimination or undue prejudice which may exist might be removed by according complainant the same spotting service as defendants performed for its competitors. Its refusal to permit defendants to perform such service would absolve them from the obligation to do so. Stewart Furnace Co. v. P. R. R. Co., 68 I. C. C. 528, 530.

(l) No legal obligation rests upon a carrier to perform switching and spotting services solely at a shipper's convenience, and a shipper is not entitled to an allowance for these services if the carrier is ready and willing to perform them but is not permitted to do so by shipper. Stewart Furnace Co. v. P. R. R. Co., 68 I. C. C. 528, 530.

(m) Nonallowance of reasonable compensation for spotting and switching service performed by complainant at its plant at Jackson, Ohio, within the plant area, not shown unreasonable or otherwise unlawful. Complainant has not established as a matter of reasonableness that the line-haul rates include any greater service than that now rendered, and testimony falls short of establishing similarity of circumstances and conditions with competing industries located at other points at which the service is performed or allowances therefor are made by carriers. Jackson Iron & Steel Co. v. Director General, as Agent, 77 I. C. C. 110.

(n) Where shipper did not demand either the restoration of a former allowance for switching and spotting, discontinued following Industrial Railways case, 29 I. C. C., 212, or a performance of the service by the carrier, except during a stated period and for a special reason of its own, and has not established as a matter of reasonableness that the line-haul rates include any greater service than now rendered, it is not in position to demand reparation for the past on the ground that carrier has not justified the increased rates resulting from such discontinued allowance. Jackson Iron & Steel Co. v. Director General, as Agent, 77 I. C. C. 110.

(o) Fact that a complainant at whose plant a carrier fails to perform a spotting service or make an allowance therefor is in competition with other industries at which such service is performed or allowances are made does not of itself establish unjust discrimination or undue prejudice. In addition, a showing of similarity of circumstances and conditions is necessary. Jackson Iron & Steel Co. v. Director General, as Agent, 77 I. C. C. 110, 114.

(p) Where receivers of a railway company opposed an allowance to a shipper of switching charges for switching done by him as agreed to by the carrier, on the ground that no tariff covering the same had been filed with the Interstate Commerce Commission, the burden is on the receivers to show that the tariff with respect to which the charge was claimed was interstate commerce. Texas & P. Ry. Co. v. Thompson, 288 Fed. 167.

(q) An allowance by a railway company to a shipper of a switching charge for switching done by the shipper, which barely covered the cost of the service rendered, was legitimate and proper, and the fact that the shipper, in rendering such service, used the track of another railroad company, which he had acquired the right to use instead of building a spur track of his own, does not affect the legitimacy of the charge. Tex. & P. Ry. Co. v. Thompson, 288 Fed. 167.

§8. (6) Staking.

IMPORTANT CASES SINCE 1908

(a) It is not incumbent upon the carrier to provide car stakes. Frequently, however, the carriers provide by tariff for the granting of such allowances. Southwestern Millers' Club v. St. L. & S. F. R. R. Co., 26 I. C. C. 245, 251.

(b) Generally, when it is necessary to secure upon the car freight which the shipper loads, it is the duty of the shipper to provide the necessary material and do the work. Shands v. S. A. L. Ry., 34 I. C. C. 214, 215.

ALL OTHER CITATIONS

Duluth Log Co. v. M. & I. Ry. Co., 15 I. C. C. 627, 629; Southwestern Millers' Club v. St. L. & S. F. R. R. Co., 26 I. C. C. 245, 251; H., T. & W. R. R. Co. v. D. & H. Co., Unrep. Op. §8. (7) Transfer.

See Transfer.

CASES 1887-1908

(a) Carriers operating lines to points west of the Mississippi River make rates to such points, which are the same from East St. Louis, Ill., as from St. Louis, Mo. Most of the freight is carried from East St. Louis to the St. Louis depots by transfer companies, who receive from the carriers 5 cents per 100 pounds for such transfer. The Grant Chemical Company, a shipper, receives a like sum for a similar transfer by it of its shipments to East St. Louis, which payment is refused to other shippers. The Eclipse Transfer Company was organized for the sole purpose of obtaining this payment; it uses teams owned by the Simmons Hardware Company, and uses the storehouse of the latter for a receiving depot. These payments to the Grant Chemical Company and the Eclipse Transfer Company are illegal. Re Division of Joint Rates, Etc., 10 I. C. C. 661.

(b) In holding that an allowance of compensation to a shipper by the carrier for transferring his shipment from East

St. Louis to the carrier's St. Louis depot, where similar compensation was denied other carriers, was illegal, no opinion was expressed as to whether lines leading west from St. Louis may properly apply the St. Louis rate to the station of a bona fide transfer company in East St. Louis and absorb the cost of transfer to St. Louis; neither was any opinion expressed as to whether the rail carriers may, by proper schedules, allow all shippers from East St. Louis a fixed sum per 100 pounds for transporting their merchandise to the carrier's depots in St. Louis, those questions not being presented by the record in the same proceeding. Re Division of Joint Rates, Etc., 10 I. C. C. 661.

(cdefg) Carriers operating lines to points west of Mississippi River make rates to such points which are the same from East St. Louis, Ill., as from St. Louis, Mo. A large portion of less than carload traffic is hauled by team from E. St. Louis to depots of the rail carriers in St. Louis, mostly by regularly organized transfer companies, but to some extent by teams owned by shippers. The rail carriers accept delivery at depots of the transfer companies in East St. Louis, pay the transfer companies 5 cents per 100 pounds for such transfer to St. Louis, and also pay a like sum to the Grant Chemical Company, a shipper, for a similar transfer of that company's shipments from East St. Louis, but refuse to make such payments to other shippers. The Eclipse Transfer Company was organized for the sole purpose of obtaining these payments; it uses teams owned by the Simmons Hardware Company, and uses the storehouse of the latter for a receiving depot. Under the circumstances, HELD: That the payments to the Grant Chemical Company and the Eclipse Transfer Company are illegal. No opinion is expressed as to whether lines leading west from St. Louis may properly apply the St. Louis rate to the station of a bona fide transfer company in East St. Louis and absorb the cost of transfer to St. Louis; nor whether the rail carriers may, by proper schedules, allow all shippers from East St. Louis a fixed sum per 100 pounds for transporting their merchandise to the carriers' depots in St. Louis, those questions not being presented by the record in this proceeding. Matter of Division of Joint Rates, 10 I. C. C. 661.

(h) The Commission instituted an investigation as to divisions allowed transfer companies by common carriers. Carriers operating lines to points west of the Missippi River make rates to such points which are the same from East St. Louis, Ill., as from St. Louis, Mo. A large portion of the less carload traffic is hauled by team from East St. Louis to the depots of the rail carriers at St. Louis, mostly by regularly organized transfer companies, but to some extent by teams owned by shippers. The rail carriers pay the transfer companies 5c per 100 pounds for such transfer to St. Louis, and also pay a like sum to the Grant Chemical Company, a shipper for a similar transfer of that companys shipments from East St. Louis, but refuse to make such payments to other shippers. The Eclipse Transfer Company was organized for the sole purpose of obtaining these payments; it uses teams owned by the Simmons Hardware Company, and uses the storehouse of the latter as a receiving depot. HELD: That the payments to the Grant Chemical Company and the Eclipse Transfer Company are illegal. In the matter of divisions of joint rates and other allowances to terminal railroad. 10 I. C. C. 661.

(i) Allowances of free services in the transfer, cleaning and other handling of grain at Kansas City, Mo., Argentine, Leavenworth and Kansas City, Kan., are withheld by defendants at Atchison, Kan., to which point they have established the same rates as those in force at said other cities. HELD: That defendants should not furnish at such points allowances or services which are not at the same time granted or furnished to the same degree and extent at Atchison. City Council of Atchison v. Mo. Pac. Ry. Co., 12 I. C. C. 111.

IMPORTANT CASES SINCE 1908

(j) Reasonable compensation may be allowed for the transfer of a car. Cotton Oil Co. v. St. L., I. M. & S. Ry. Co., 27 I. C. C. 117, 120.

(k) Transfer of coal from coal cars to box cars not found to be a service of transportation for the performance of which by the owner, the carrier, could lawfuyy pay an ollowance. Lehigh Valley Coal Sales Co. v. L. V. R. R. Co., 39 I. C. C. 339, 340.

(l) Complainant attacked the refusal of carriers to make an allowance to complainant for transferring imported fresh

meats from vessels into cars on car floats at the port of New York. A tariff rule provided an allowance of 12c per ton to consignors or consignees loading or unloading cars, except on fresh meat in bulk which consignees were to unload at their own expense; but complainant contended that this exception could apply only to the unloading of cars. Certain carriers had entered into an arrangement whereby the Hoboken Mfrs. R. R. was to act as their agent in distributing carloads of fresh meats from shipside to their lines, shippers to pay for this service 2c or 3c in addition to the freight rate. HELD: (1) That the tariff rule did not forbid an allowance for loading fresh meat into cars; that under the tariff rule the complainant was entitled to an allowance of 12c per ton, minimum $2 per car, on all fresh meats in bulk loaded by it into car floats at the port of New York; (2) subsequent tariff provision requiring shippers to load into cars on car floats for forwarding via the H. M. R. R., without allowance for such loading, found not justified. Swift & Co. v. A. C. L. R. R., 42 I. C. C. 83.

§8. (8) Yardage, Drayage and Wharfage.

See Drayage; Wharfage; Yarding-in-Transit.

CASES 1887-1908

(a) The defendant railway company had for some time paid the cost of hauling coal shipped by the complainant, from complainant's wharf to defendant's freight station in Providence, without any contract obligation to that effect, but now refuses so to do. HELD: That defendant can not be compelled to contine paying for such hauling; that what defendant did for a time as a favor or by way of encouragement, it might discontinue at pleasure, and that there is nothing in the nature of a binding usage about it. Providence Coal Co. v. Providence & W. R. Co., 1 I. C. R. 363.

IMPORTANT CASES SINCE 1908

(b) Carrier not bound to make allowances merely because other carriers make allowances for yardage services at points on their lines. Felin & Co. (Inc.) v. P. & R. Ry. Co., 37 I. C. C. 231, 233.

(c) Where shippers chose for its own convenience to take delivery at team tracks of carriers, rather than at its plant, which delivery carriers would have effected without additional cost, the transportation contract terminated when the goods were given into complainant's possession. Failure of carriers to make an allowance for draying from team tracks to the plant not found unjust or unreasonable. Geisel Mfg. Co. v. B. & O. R. R. Co., 59 I. C. C. 193.

(d) A carrier can not pay a shipper for wharfage services unless charges therefor are specified in a duly published schedule tariff. Southern Cotton Oil Co. v. Central of Georgia Ry. Co., 228 Fed. 335.

§8. (9) Insurance.

See Insurance.

IMPORTANT CASES SINCE 1908

(a) Complainants attacked the failure of the Pennsylvania R. R. to reimburse them to the amount which the insurance charges on grain stored in elevator B at Girard Point, Philadelphia, Pa., exceeded the charges which would have accrued had the grain been stored in the new concrete elevator at the same point, as unreasonable and illegal. The insurance rate on grain stored in elevator B, which was not fireproof, was $1.85 per $100; on grain stored in the concrete elevator, 25c. Congestion of traffic necessitating the reopening of elevator B, the carrier provided that it would "equalize" the fire insurance on grain stored in elevator B with the rate charged on grain stored in the concrete elevator, but did not state the rate. HELD: That the failure of the carrier to properly provide for equalization subjected complainant to undue prejudice and unduly preferred shippers whose grain was stored in the new elevator. Reparation awarded. Graff & Son v. Pennsylvania R. R. Co., 43 I. C. C. 200.

§8. (10) Weighing.

See Allowances §7 (ff), (gg).

IMPORTANT CASES SINCE 1908

(a) Complainant alleged that since two years prior to Federal control it has rendered a valuable service in connection with the interstate transportation of grain by weighing inbound shipments at industries, warehouses and mills at St. Louis, Mo., and East St. Louis, Ill., and

that by reason of defendants' failure to make compensation for such service while providing allowances to the Chicago Board of Trade for a similar service at Chicago, Ill., it has been subjected to unfair practices and undue preferences in violations of sections 1, 3 and 15 of the act. Complainant in addition to weighing exercises a general supervision over the loading and unloading of grain, including the taking of seal records, inspection of cars for leakage, inspection and testing of scales, examination and sweeping of empty cars before loading, advising the carriers of the improper condition of cars, and certain policing. These services are performed for the owners of the grain shipped outbound from St. Louis, and commission firms at this point acting as agents for country shippers of the inbound grain, which owners and commission firms are included among complainants' members. The weights as ascertained by complainant are accepted generally by the defendants in the adjustment of overcharge claims, and most of the defendants assess their freight charges upon such weights, sending a messenger each day to this department, which furnishes a duplicate copy of the original weight certified. There is no showing that defendants are unable to render such weighing service on grain at St. Louis or East St. Louis as is incumbent upon them under their tariffs or the provisions of the act, while the record strongly suggests that because of the demand of shippers to this market, rather than accept defendants' track scale weights complainants would prefer to continue the existing arrangements without an allowance. HELD: Defendants, in the absence of unlawful discrimination, were and are under no obligation to make complainant an allowance for the service in question. C. & A. publishes tariff authority for an allowance of 5c per car to the weighmaster at Chicago and likewise to complainant at St. Louis and East St. Louis for furnishing weights on grain unloaded in elevators, while the C., P. & St. L., which serves St. Louis, East St. Louis and Peoria, Ill., makes a similar allowance to the board of trade at Peoria. With these exceptions no allowance or compensation of any character is made by any of the defendants at any point on their lines, although it appears that a number of the defendants have innumerable weight agreements in effect under which they accept the weights furnished by the shippers on carload traffic for which no payments are made. Complainants prejudice, if any, could hardly be undue by reason of the small allowance of 5c or 7c per car. There is no appreciable difference between the general plan of weighing operations at St. Louis and at Chicago, nor is it shown that there is substantial similarity in the transportation conditions attendant upon delivery of grain at these respective markets. HELD: Refusal of defendants to make an allowance for weighing services at St. Louis can not be made a basis for a finding of undue prejudice against that point and undue preference of Chicago. Complaint dismissed. Merchants Exchange of St. Louis v. Director General, 69 I. C. C. 465.

ALL OTHER CITATIONS

Merchants Exchange of St. Louis v. Director General, 69 I. C. C. 465, 468.

IV. LEGALITY OF ALLOWANCES.

See Common Carrier; Legality; Tap Lines §9, §10.

§9. In General.

See Terminal Facilities §9.

IMPORTANT CASES SINCE 1908

(a) In determining whether a shipper is entitled to an allowance from a railroad for services performed by the shipper in moving cars between the storage tracks and the shipper's buildings and factories, no special weight is to be given to the fact that for a number of years the railroad actually paid the complainant for such service, since the question is one of general application and must be determined not by the practice of partacular shippers, but by considerations applicable to all carriers. General Electric Co. v. N. Y. C. & H. R. R. R., 14 I. C. C. 237, 242.

(b) Allowances under section 15 must not be above reasonable cost of service performed by shipper. Mfrs. Ry. Co. v. St. L., I. M. & S., 28 I. C. C. 93, 101.

(c) Allowances, under section 15, can only be made to "the owner of property transported." Mfrs. Ry. Co. v. St. L., I. M. & S. Ry. Co., 28 I. C. C. 93, 102.

(d) Allowances cannot be made, under section 15, to industrial line which is a common carrier, as railway is no longer "the owner of property trans-

ported." Mfrs. Ry. Co. v. St. L., I. M. & S., 28 I. C. C. 93, 102, 108.

(e) That provision of section 15 under which shippers may be compensated by the trunk lines for their facilities used in the handling of their own shipments was enacted to give the Commission a means of eliminating certain unjust discriminations. The gradual elimination of discriminatory practices by other processes leaves this provision of the law to be used as a cloak for various payments which but for it would be looked upon as rebates. Second Industrial Railways Cases, 34 I. C. C. 596, 608.

(f) That a carrier may by contract employ the owner of property transported to perform a portion of the section 15 of the act. The effect of transportation service is recognized by such a contract is to determine the amount to be paid for the service rendered. The Commission's duty is to take care lest the sum paid becomes so large as to amount to an unlawful concession from the transportation rate; and it may determine what is a reasonable charge as the maximum to be paid by the carrier and fix the same by appropriate order. Cambria Steel Co. v. Director General, 64 I. C. C. 737, 740, 741.

(g) An allowance in excess of the cost of the trunk line of switching to and from the plant would be unlawful. By granting more the trunk lines would in that measure be depleting their revenues. The allowances is further limited in that it may not exceed the reasonable cost to the industry of performing the service. Stewart Furnace Co. v. P. R. R. Co., 68 I. C. C. 528, 532.

(h) Tap lines connecting timber districts and lumber mills with trunk lines are common carriers of proprietary as well as non-proprietary lumber, and as such entitled to participate in joint rates, where the fact that the tap lines are owned by persons who also own the timber and mills which they principally serve, is not shown to be inconsistent with the laws of the state in which they are organized and operated, lumber being excepted from the "commodities" clause. United States v. L. & P. Ry. Co., 34 Sup. Ct. 741, 748; 234 U. S. 1; 58 L. Ed. —.

(i) Lumber being excepted from the "commodities" clause, it was HELD, affirming the decision of the Commerce Court in 209 Fed. 260, reversing 23 I. C. C. 277, 549, that a "tap line" railroad is entitled to the same allowance from a trunk line out of the joint through rate for logs and lumber offered the tap line by its proprietary company as it receives out of the rate for non-proprietary logs and lumber. United States v. Butler County R. R. Co., 34 Sup. Ct. 748, 750; 234 U. S. 29, 58 L. Ed. —.

(j) The test of the right of a shipper to compensation for services rendered is whether there was a reasonable and proper basis for the performance of the services, and there was such basis when the shipper loaded goods which it was the carrier's duty to load under its published tariff, on the carrier's suggestion that, because of labor shortage due to the war, there would otherwise occur delay in loading. United States v. Interstate Commerce Commission, 277 Fed. 538.

(k) And since reasonable compensation by a carrier to a shipper for legitimate services rendered by the shipper is not a rebate or discrimination, the Interstate Commerce Commission may not allow compensation for such services in one case, and withhold it in another case, where similar services have been performed, for such a course would constitute discrimination. United States v. Interstate Commerce Commission, 277 Fed. 538.

C. 273; Lay Fish Co. v. Director General, as Agent, 80 I. C. C. 45.

§10. Transportation Service Performed By Shipper.

See Tap Lines §3 (1); Transportation §1, §11.

IMPORTANT CASES SINCE 1908

(a) To comply with the legal obligation of delivery, a carrier may employ the owner of the property transported and pay an allowance not more than is just and reasonable. Any service performed by a shipper in excess of the carrier's legal obligation as to delivery is a voluntary service for the shipper's own convenience and for which it is entitled to receive no compensation. Hence, a proper switching or spotting allowance represents payment for the difference between the service in delivery which a carrier actually performs and the service which the carrier is legally obligated to render. United States Cast Iron Pipe & Foundry Co. v. Director General, 57 I. C. C., 677, 683.

(b) And a common carrier can not be compelled to delegate to a shipper the performance of any part of the service of transportation required of it under the law and its tariffs and to make an allownce under section 15 of the Interstate Commerce Act for such performance; it has the right, if it so elects, to perform the full transportation service itself. Sharon Steel Hoop Co. v. Pa. Co., 59 I. C. C. 378, 380.

(c) The Commission can require the carriers to perform the interchange switching if it finds it to be a reasonable transportation service incident to the line haul, but it can not compel them to act as a unit, or to do the work at the convenience and to the satisfaction of complainant. It can not order defendants to make an allowance. Whether a shipper shall receive an allowance in lieu of such

switching service is optional with the carriers. Sun Co. v. Director General, 63 I. C. C. 11, 16.

(d) Under section 15 of the act provision is made for payment to the owner of property transported for any service he may render directly or indirectly connected with such transportation. American Manufacturing Co. v. Director General, 77 I. C. C. 52, 58.

(e) Congress has provided that if shipper furnishes an instrumentality used in transportation of property owned by him, charge and allowance therefor shall be no more than is just and reasonable and has authorized the commission to fix maximum reasonable charge to be paid by carrier for use of instrumentality so furnished. Assigned Cars for Bituminous Coal Mines, 80 I. C. C. 520, 556.

See Supra §10; Tap Lines §3 (1), §4; Transportation §1.

IMPORTANT CASES SINCE 1908

(a) Under their tariffs the public carriers interpret the lumber rate as applying from mills west of the Mississippi River, as far as three miles from their own lines. If a lumber company having a mill within that distance of a trunk line undertakes by arrangement with the trunk line to use its own power to set the empty car at the mill and to deliver it when loaded to the trunk line, it is doing for itself what the trunk line under its tariffs offers to do under the rate. In such a case the lumber company may therefore fairly be said to furnish a facility of transportation for which it may reasonably be compensated under section 15, whether its tap line is incorporated or unincorporated. But an allowance under such circumstances is lawful only when the trunk line prefers for reasons of its own and without discrimination to have the lumber company perform the service. It is not lawful when the lumber company refuses to permit the trunk line to do the work. No allowance, however, ought to be made by a trunk line to a lumber company where the mill is within 1,000 feet of the trunk line. An allowance under such circumstances would be a mere device to effect an unlawful payment to the lumber company. The same rule would apply where a short switch track to the mill has been torn out or is still available, but not used, in order to give the appearance of a longer haul to the mill over a spur or switch

track constructed by the lumber company or by its tap line, to secure an allowance. The Tap Line Case, 23 I. C. C. 277, 294.

(b) Where a mill is distant more than three miles from a trunk line, and is connected with the latter by a tap line not recognized by the Commission as a common carrier, no allowance or division may lawfully be made by a trunk line either to the lumber company or to its tap line. Such a lumber company, although using rails, stands in no better position under the law with respect to its lumber than does a lumber company that uses other means of delivering its lumber to a public carrier. Where a mill is more than three miles distant from a trunk line and is connected with it by a tap line organized as a common carrier and so recognized by the Commission, the mill is to be regarded as a shipping point equally with all other mill points in its rate group; and the lumber rate is to be regarded as in effect from the mill, the tap line being entitled to a division thereof, according to the extent of its participation in the through service under the through rate. The Tap Line Case, 23 I. C. C. 277, 295.

(c) The lumber rate west of the Mississippi River applies from the mill. In those cases where the mill is situated a reasonable distance of not less than 1,000 feet from the trunk line, that carrier may arrange with the lumber company to perform the service for it of transporting the loaded cars from the mill to the trunk line and may make a reasonable allowance to the lumber company for such service under section 15. The Tap Line Case, 23 I. C. C. 549, 552, 553, 559, 568, 596, 599, 603, 605, 607, 608, 611.

(d) No service can lawfully be required of a line carrier beyond the point of interchange with an industry, and therefore a line carrier cannot be required to make an allowance to the industry out of the rates for doing the service for itself with its own facilities. Industrial Railways Case, 29 I. C. C. 212, 230.

(e) Under Section 15 of the act the Commission is authorized to fix a reasonable maximum charge or allowance for any service rendered by the owner of property transported in connection with such transportation or for furnishing any instrumentality used therein. But it must be shown that the service is rendered in connection with transportation or is an instrumentality used therein. Inman, Akers & Inman v. A. C. L. R. R. Co., 32 I. C. C. 146, 148.

(f) If the service is public transportation, defendant may be compensated, even though it be not a common carrier. Atchison, Topeka & Santa Fe Ry. Co. v. Kansas City Stock Yards Co., 33 I. C. C. 92, 98.

(g) The fact that the several carriers could not perform the spotting service individually is convincing that said service is greater than the equivalent of team track or simple switching delivery, and, in fact, beyond the scope of the carrier's legal obligation. Standard Oil Co. v. Director General, 59 I. C. C. 620, 623.

(h) Whether the spotting at complainant's plant is a duty required of defendant under its line haul rates must be determined by the the controlling facts. In determining that question two circumstances are entitled to primary consideration: One is the extent of the service involved in a typical team track delivery; the other, the extent of the service rendered in the typical switching of a car upon the siding of a shipper clear of the main track—the substitute for team track delivery. Philip Carey Mfg. Co. v. Director General, 59 I. C. C. 640, 643.

(i) It is the right of carriers to perform any transportation service which it is their duty to perform, and in the absence of undue prejudice the Commission is without power to require them to make an allowance. U. S. Cast Iron Pipe & Foundry Co. v. Director General, as Agent, 62 I. C. C. 339, 343, 344.

(j) Due to harbor strike at New York City, cars could not be floated to destination in Brooklyn. To expediate movement, complainant accepted delivery at points where held and carted them to destination. HELD: Defendants' obligation to perform further transportation, after complainant's accepting delivery short of billed destination, was terminated by complainant's waiver of the complete service. Defendants' failure to make allowance for cost of cartage was not unjust or unreasonable. Geisel Mfg. Co., 59 I. C. C., 193. Tidewater Paper Mills Co. v. B. T. R. R. Co., 80 I. C. C. 493.

294, 295, 549, 552, 553, 559, 568, 596, 599, 603, 605, 607, 608, 611, 650; Industrial Railways Case, 29 I. C. C. 212, 230; Dow Chem. Co. v. P. M. R. R., 51 I. C. C. 1, 2; Riter Conley Mfg. Co. v Director General, 58 I. C. C. 327, 330; Geisel Mfg. Co., 59 I. C. C. 193.

§12. What Is Not Transportation Service.

(1) Accessorial or Incidental Service.

IMPORTANT CASES SINCE 1908

(a) Arbuckle Bros. operate their own property under a contract for the carriers, as the carriers' Jay St. terminal in Brooklyn. Under their contract, Arbuckle Bros. carry their sugar to this terminal in their own lighters, receiving an allowance therefor. The carriers are under no liability until the tonnage is delivered to them in New Jersey. Two-thirds of the traffic handled through the Jay St. terminal by Arbuckle Bros. as agent for the carriers is for the public generally. HELD: That in lightering their sugar to the Jersey shore and there delivering it to the carriers, Arbuckle Bros. perform a purely accessorial service towards their own shipments and merely incident thereto and do not perform a transportation service as agents of the carriers. It therefore may not be paid for by them under section 15 of the act, while refusing a similar allowance to another shipper providing a similar facility and performing the same service in the transportation of his property. Federal Sugar Refining Co. v. B. & O. R. R. Co., 20 I. C. C. 200, 209, 212.

(b) Plant service is private service. Its distinguishing characteristic is that it it performed in the interest of particular shippers. Atchison, Topeka & Santa Fe Ry. Co. v. Kansas City Stock Yards Co., 33 I. C. C. 92, 99.

(c) Where complainant for its own convenience has provided private facilities of its own which are mere plant facilities they do not entitle complainant to compensation for its service performed by means of them. Felin & Co. (Inc.) v. P. & R. Ry. Co., 37 I. C. C. 231, 233.

(d) Service of loading waste paper stock, provided for in tariffs, was not rendered, due to congestion and labor shortage growing out of the world war. Under an arrangement, complainants furnished such service. HELD: Complainants would not have been able to ship as much as they did had they insisted on their rights under the tariffs, and expense incident to delays of trucks standing waiting to unload, outweighed expense of loading with their own employes, for which service there was no obligation on the part of the carriers to make an allowance. Waste Merchants' Asso. v. Director General, 57 I. C. C. 686.

(e) Complainant, a corporation operating a grain elevator, and performing a transportation service, not as an independent entity, but as agent of a railroad, under contract, which service such railroad holds itself out to perform by the publication of charges in its tariffs, alleges that allowances made to it were unreasonably low. HELD: Since complainant has no interest in traffic handled through the elevator, it can not be considered a shipper or "owner of property transported." It stands in much the same position as an employee of the railroad and can not be considered a common carrier whose compensation is to be derived from divisions of joint rates. Keystone Elevator & Warehouse Co. v. Director General, as Agent, 73 I. C. C. 273.

ALL OTHER CITATIONS

In the Matter of Allowances to Elevators by the U. P. R. R. Co., 14 I. C. C. 315, 316; Barrett Mfg. Co. v. C. R. R. Etc. Co., 17 I. C. C. 464, 466; Gund & Co. v. C., B. & Q. R. R. Co., 18 I. C. C. 364, 367; Federal Sugar Refining Co. v. B. & O. R. R. Co., 20 I. C. C. 200, 209, 212; Pittsburgh Forge & Iron Co. v. Director General, as Agent, 59 I. C. C. 29; Geisel Mfg. Co., 59 I. C. C. 193; Tidewater Paper Mills Co. v. B. T. R. R. Co., 80 I. C. C. 493.

§12. (2) Operation of Plant Facility.

See Common Carrier §9; Industrial Railroads; Tap Lines §4; Transportation III.

IMPORTANT CASES SINCE 1908

(a) An allowance to an industrial line acting only in capacity of a plant facility in excess of cost to trunk line of switching to and from the plant would be unlawful. Chicago, West Pullman & Southern R. R. Co. Case, 37 I. C. C. 408, 414.

(b) Complainant having engine with which it pulls truck loads of material into and out of creosoting tanks and over an incline to and from its wharf adjacent to the plant, held to be an industry per-

forming its own switching. American Creosote Works v. I. C. R. R. Co., 41 I. C. C., 751.

(c) Obligation of a common carrier service does not extend through the network of interior switching tracks, and any service by line carriers within the plant, without charge in addition to line-haul rate or any compensation to complainant or its industrial railway for performing the service, is unduly preferential of complainant and unlawful. National Tube Co. v. B. & O. R. R., 50 I. C. C. 489, 500.

(d) Where service of spotting cars within a plant is private in character and is performed by the shipper over a network of intra-plant tracks for its own convenience and in its own interest, the trunk lines are under no obligation to perform that service under the line-haul rate or to make an allowance therefor. Pittsburg Forge & Iron Co. v. Director General, as Agent, 59 I. C. C. 29, 32.

(e) Complainant alleged refusal of defendant to switch and spot cars moving to and from its plant, or to make it an allowance for such service, was unreasonable, unjustly discriminatory and unduly prejudicial. Fordwick, Va., is a local station on the C. & O. Complainant constructed a system of tracks extending from a point of connection with the C. & O. to the various points of loading and unloading within the plant. Complainant operates 2.96 miles of standard gauge track in and about its plant. Inbound cars are placed by the C. & O. on the interchange tracks, from which they are switched to the points of unloading by complainant's power. Outbound loaded and empty cars are switched by complainant from the points of loading and unloading to the interchange tracks. The C. & O. spots no cars at complainant's plant, although the sack house and bag house are reached only by that carrier's rails. In 29 I. C. C. 212, the Commission found the Virginia Portland Ry. Co. to be a private facility and not a common carrier. If the C. & O. were to undertake the spotting service the present methods would probably be adhered to, and as complainant can do the work more cheaply than can defendant, an order requiring the C. & O. to extend its transportation service to the several loading and unloading points would doubtless result in the retention of the present manner of handling the traffic and in the payment of an allowance to complainant. It appears that there are no cement manufacturing plants other than that of complainant which are served directly by defendant. There appears to be no general practice on the part of carriers in this territory to perform or pay for the switching and spotting service at plants similar to that of complainant. HELD: Defendants' refusal to perform the service of switching and spotting or to compensate complainant for the service is not unreasonable, unjustly discriminatory or unduly prejudicial, complainant dismissed. Lehigh Portland Cement Co. v. Director General, 62 I. C. C.231.

ALL OTHER CITATIONS

Solvay Process Co. v. D., L. & W. R. R. Co., 14 I. C. C. 246, 249; General Electric Co. v. N. Y. C. & H. R. R. R. Co., 14 I. C. C. 237, 242, 243, 244; Crane Iron Works v. Central R. R. Co., 17 I. C. C. 514, 518, 520; Star Grain & Lumber Co. v. A., T. & S. F. Ry. Co., 17 I. C. C. 338, 345; Kaul Lumber Co. v. C. of Ga. Ry. Co., 20 I. C. C. 450; Colonial Salt Co. v. M. I. & I. L., 23 I. C. C. 358; The Tap Line Case, 23 I. C. C. 549, 552, 555, 569, 587, 594, 597, 599, 601, 602, 606, 608, 611, 613, 618, 632, 635, 641, 642, 645, 646, 649, 650; N. Y. C. & H. R. R. Co. v. Gen. C. 231, 233; Waste Merchants' Asso. v. Director General, 57 I. C. C. 686; United States Gypsum Co. v. C. & P. C. R. R., 61 I. C. C. 117.. Merchant Shipbuilding Corp. v. Pa. R. R., 61 I. C. C. 214.

V. REASONABLENESS OF ALLOWANCES.

See Common Carrier §9; Tap Lines.

§13. In General.

See Tap Lines §6½.

IMPORTANT CASES SINCE 1908

(a) Allowances, under section 15, must not be above reasonable cost of service performed by shipper. Mfrs. Ry. Co. v. S. L., I. M. & S. Ry. Co., 28 I. C. C. 93, 101.

(b) Even on nonproprietary traffic divisions or allowances must not be abnormal. Chestnut Ridge Railway, 37 I. C. C. 558, 560.

(c) Excessive allowances to carriers controlled by shippers are tantamount to departures from the published rates and

entitle competing shippers who pay the published rates to reparation for damages actually sustained as a result of the discrimination. Divisions of Joint Rates for Transportation of Stone, 41 I. C. C. 321, 330.

(d) The act makes it unlawful for carriers to allow more than just and reasonable compensation to an industry for transportation services or facilities furnished by it. Stewart Furnace Co. v. P. R. R. Co., 68 I. C. C. 528, 532.

(e) To go into the matter of allowances between the parties would lead the Commission away from the direct results of the act of the carrier in the exaction of an unreasonable rate into the domain of indirect and remote consequences and perhaps into questions of equity between the vendor and vendee. Standard Oil Co. v. Director General, 89 I. C. C. 7, 10.

C. 490, 493; Chicago, West Pullman & Southern R. R. Co. Case, 37 I. C. C. 408, 414, 415; Chestnut Ridge Railway, 37 I. C. C. 558, 560; Iron Ore Rate Cases, 41 I. C. C. 181, 221; Divisions of Joint Rates for Transportation of Stone, 41 I. C. C. 321, 330; Graff & Son v. P. R. R. Co., 43 I. C. C. 200; Johnstown, Pa., Switching, 43 I. C. C. 654, 660; Ohio Cut Stone Co. v. N. Y. C. R. R., 48 I. C. C. 69, 74; Class Rates from Chestnut Ridge Ry. Stations, 50 I. C. C. 152; U. S. Cast Iron Pipe & Foundry Co. v. Director General, 57 I. C. C. 677, 684, 683, 685; Culver & Port Clinton R. R. Co., 58 I. C. C. 402, 404; Buckeye Steel Castings Co. v. H. V. Ry. Co., 58 I. C. C. 500, 502; Western Meat Co. v. Director General, as Agent, 58 I. C. C. 743; U. S. Cast Iron Pipe & Foundry Co., Inc., v. Director General, 59 I. C. C. 59; Sharon Steel Hoop Co. v. Pa. Co., 59 I. C. C. 378, 380; Philip Carey Co. v. Director General, 53 I. C. C. 640, 642; Carey Mfg. Co. v. Director General, 59 I. C. C. 640, 648; United Chemical & Organic Products Co. v. Director General, as Agent, 60 I. C. C. 523, 525; Whitaker-Glessner v. B. & O., 63 I. C. C. 47, 55; Swift & Co. v. Director General, as Agent, 61 I. C. C. 183; Cambria Steel Co. v. Director General, 64 I. C. C. 737, 740, 742.

§13. (1) Competition.

See Competition.

IMPORTANT CASES SINCE 1908

(a) Competition at one milling center may make proper the granting of an elevation allowance, while the same is denied to another milling center where the same points of origin of the grain and points of destination of the product are involved, but where such competition is not present. Suffern Grain Co. v. I. C. R. R. Co., 27 I. C. C. 192, 195.

(b) Defendant's refusal to make allowance to complainant for spotting cars at Harriman shipyard, near Bristol, Pa., while making allowance to other industries in the same rate district, found not unreasonable, discriminatory, or unduly prejudicial, as such industries are not in competition with complainant, and circumstances and conditions at the respective plants are dissimilar. Merchant Shipbuilding Corp. v. P. R. R. Co., 61 I. C. C. 214.

§13½. Retroactive Application.

IMPORTANT CASES SINCE 1908

(a) Complainant is not a party to joint rates, or, in its own right, a participant in through routes. The Commission is not empowered to abrogate retroactively, by an award of reparation, contracts which were voluntarily entered into, under which complainant acts as agent for defendants, performing for them on their own rails a part of their transportation service. Keystone Elevator & Warehouse Co. v. Director General, 73 I. C. C. 273, 274.

ALL OTHER CITATIONS

Moshassuck Valley R. R. Co. v. N. Y., N. H. & H. R. R. Co., 69 I. C. C. 368.

VI. DAMAGES AND REPARATION.

See Claims; Reparation.

§14. In General.

IMPORTANT CASES SINCE 1908

(a) Excessive allowances to carriers controlled by shippers are tantamount to departures from the published rates and entitle competing shippers who pay the published rates to reparation for damage actually sustained as a result of the discrimination. Reparation, however,

may be denied for want of proof of damage. Divisions of Joint Rates for Transportation of Stone, 41 I. C. C. 321, 330.

(b) Principle announced in General Electric Co. Case, 14 I. C. C. 297, reaffirmed and applied; and complaint of the National Tube Co., for reparation on traffic of its plant at Lorain, Ohio, during the period of 12½ months that allowances out of the line-haul rate to its industrial railway were discontinued, dismissed. Demands of the same nature by the Carnegie Steel Co. for reparation also dismissed. National Tube Co. v. B. &. O. R. R., 50 I. C. C. 489.

(c) Where injustice and hardship to innocent shippers results from unreasonable acts, misconduct, or default of carriers in failure to make proper delivery of shipments, the shipper is entitled to recover from the carrier at fault damages in the sum of the actual or fixed but not more than the reasonable costs of making such delivery. Guyton & Harrington Mule Co. v. L. & N. R. R., 50 I. C. C. 546, 550.

(d) Where the Commission renders a decision prohibiting the granting of allowances for the cartage of sugar, but enters no formal order, merely directing the carriers to conform in tariffs with the decision, the effect is to eliminate the allowances from the filed tariffs and to make it impossible for a shipper to recover such allowance on shipments made between the date of the decision and the formal change in the tariffs by the carriers. American Sugar Refining Co. v. D., L. & W. Ry. Co., 200 Fed. 652, 654.

(e) Where carriers had discriminated against a steel company by refusing to spot cars for it, or to make an allowance to it for the expense of spotting cars, as they did for its competitors in the same switching district, and the evidence showed that the steel company was unable to control the market price, so that it could not pass such charges on to its customers, it is manifest that the discrimination against that company had resulted in damage to it, by diminishing its profit to the extent of the cost of spotting its cars. Donner Steel Co. v. Interstate Commerce Commission, 285 Fed. 955.

(f) Where shipper did not demand either restoration of a former allowance for switching and spotting, discontinued following Industrial Railways case, 29 I. C. C., 212, or a performance of the service by the carrier, except during a stated period and for a special reason of its own, and has not established as a matter of reasonableness that the line-haul rates include any greater service than now rendered, it is not in position to demand reparation for the past on the ground that carrier has not justified the increased rates resulting from such discontinued allowance. Jackson Iron & Steel Co. v. Director General, as Agent, 77 I. C. C. 110.

ALL OTHER CITATIONS

Mitchell Coal & Coke Co. v. Penn. R. R. Co., 181 Fed. 403, 410; Balfour, Guthrie & Co. v. O. W. R. R. & Nav. Co., 21 I. C. C. 539, 540; Merriam & Holmquist v. U. P. R. R. Co., 16 I. C. P. Ry. Co., 15 I. C. C. 147, 157; General Electric Co. v. N. Y. C. & H. R. R. R. Co., 14 I. C. C. 237, 242; Laning-Harris Coal & Grain Co. v. St. L. & S. F. R. R. Co., 13 I. C. C. 148, 151; LaSalle & Bureau County R. R. Co. v. C. & N. W. R. R. Co., 13 I. C. C. 610, 612; Mitchell Coal & Coke Co. v. Penn. R. R. Co., 33 Sup. Ct. 916, 230 U. S. 247; Flour City S. S. Co. v. L. V. R. R., 38 I. C. C. 729; Buckeye Steel Castings Co. v. H. V. Ry. Co., 58 I. C. C. 500, 502; Western Meat Co. v. Director General, as Agent, 58 I. C. C. 743; Philip Carey Mfg. Co. v. Director General, 59 I. C. C. 640, 643; United Chem. & Org. Products Co. v. Director General, as Agent, 73 I. C. C. 100.

§14½. Court Proceedings.

Action at Law; See Courts.

IMPORTANT CASES SINCE 1908

(a) Plaintiff, mining company, located in the Clearfield district of Pennsylvania, sued defendant carrier for damages for unjust discrimination in paying to plaintiff's competitors allowances which were refused to plaintiff. (See L. & M. Digest, pages 68 to 429, for decisions of the lower courts). Three of the competitors were located in the Clearfield district; two others were located in the Latrobe district, where the rates to destinations in question were about 20 cents higher than from the Clearfield district. The allowances in question were paid between the years 1897 and 1901. The evidence indicated

that the published rate applied from the mines of the various companies in the Clearfield district, and not from the station. The allowance complained of was paid to the plaintiff's competitors for services in hauling the coal from their mines over spur tracks to the station. With respect to the two competitors located in the Latrobe district, it appeared that the carrier itself performed the service of hauling coal from the mines to the station, but that it, nevertheless, made these companies the allowance complained of. HELD: That with respect to the competitors in the Clearfield district, plaintiff could not recover damages for unjust discrimination without first applying to the Interstate Commerce Commission for a determination as to whether the allowance paid these competitors was a reasonable one, since, as the statute stood between 1897 and 1901, it did not require the railroad to publish what free cartage or accessorial service it would furnish, or what sums it would pay shippers for transportation service rendered by them to the carrier, that, therefore, a question of the reasonableness of the allowance complained of was presented, which must first be passed upon by the Commission; but that with respect to the so-called allowance paid to the plaintiff's competitors located in the Latrobe district, plaintiff might sue in the courts without first applying to the Commission, since such allowance was not paid for any service rendered by the shipper, the haul from the mine to the station being performed by the carrier, and the allowance was, therefore, a mere gift or rebate. (Pitney, J., dissenting.) Mitchell Coal & Coke Co. v. Penn. R. R. Co., 33 Sup. Ct. 916; 230 U. S. 247.

(b) Where the Interstate Commerce Commission refused to award compensation for the services rendered to the carrier, because it misconceived the effect of the statute requiring such compensation as that statute had been interpreted by the Supreme Court, the shipper is entitled to mandamus to compel said Commission to make such allowance. U. S. v. Interstate Commerce Commission, 277 Fed. 538.

(c) State courts have jurisdiction in actions to recover the amounts due shippers of interstate freight for repairing cars, to put them in condition for holding the shipment, where the maximum charge for such repairs is fixed by the tariff on file with the Interstate Commerce Commission. Rock Milling & Elevator Co. v. Atchison, T. & S. F. Ry. Co. (Kan. 1916), 154 Pac. 254.

(d) An interstate tariff which provides the carrier will reimburse the shippers "actual cost" of repairing grain cars means the cost of material and labor of making repairs and does not include the inspection and cleaning of cars. Rock Milling & Elevator Co. v. Atchison, T. & S. F. Ry. Co. (Kan. 1916), 154 Pac. 254, 255.

ALL OTHER CITATIONS

United Verde Extension Mining Co. v. Director General, as Agent, 68 I. C. C. 271, 272; Loomis v. L. V. R. R. Co. (N. Y. 1913), 101 N. E. 907, 912; Penn. R. R. v. Puritan Coal Co. 237 U. S. 121, 35 Sup. Ct. 484, 59 L. Ed. 867; Illinois C. R. Co. v. Mulberry Hill Coal Co., 238 U. S. 275, 35 Sup. Ct. 760, 59 L. Ed. 1306; United States v. Interstate Commerce Commission, 277 Fed. 538.

VII. AS REBATES.

See Crimes VI; Rebates.

§15. In General.

IMPORTANT CASES SINCE 1908

(a) Whenever an abnormal division is allowed to a railroad which is tied up with an industry, there results an indirect and hidden rebate to shippers, because of their ownership of the railroad. In Re Divisions of Joint Rates on Coal, 22 I. C. C. 51, 55.

(b) If there is a holding out as a common carrier for hire, and if there is an ostensible and actual movement of traffic for the public for hire, the status of a common carrier exists, whether the holding out is by a company or by an individual. But such a holding out and the existence of an actual traffic is not conclusive in all cases. Where the holding out is in furtherance of a plan to secure unlawful advantages and the alleged carrier is able to pick up some traffic that is incidental to that purpose, it must be regarded simply as a cloak or device to effect unlawful results. The Tap Line Case, 23 I. C. C. 277, 292.

(c) Allowances by common carriers for plant facilities or plant service are unlawful. Atchison, Topeka & Santa Fe Ry. Co. v. Kansas City Stock Yards Co., 33 I. C. C. 92, 98.

(d) Allowances made to a shipper are unlawful rebates unless published.

Rates on Railroad Fuel and Other Coal, 36 I. C. C. 1, 13.

(e) Trunk line carriers can not lawfully compensate shippers directly or indirectly where service is a plant service. Second Industrial Railways Case, 34 I. C. C. 596, 601.

(f) That a carrier may by contract employ the owner of property transported to perform a portion of the transportation service is recognized by section 15 of the act. The effect of such a contract is to determine the amount to be paid for the services rendered. The Commission's duty is to take care lest the sum paid becomes so large as to amount to an unlawful concession from the transportation rate; and it may de termine what is a reasonable charge as the maximum to be paid by the carrier, and fix the same by appropriate order. Cambria Steel Co. v. Director General, 64 I. C. C. 737, 740, 741.

ALL OTHER CITATIONS

C. C. 248, 252; In Re Divisions of Joint Rates on Coal, 22 I. C. C. 51, 55; The Tap Line Case, 23 I. C. C. 277, 292, 549, 586, 589, 632, 646; American Sugar Refining Co. v. D., S. & W. R. R. Co., 207 Fed. 733, 742, 744; American Sugar Refining Co. v. D., L. & W. Ry. Co., 200 Fed. 652, 656; Divisions Received by Brimstone R. R. & Canal Co., 68 I. C. C. 375, 386, 387; Allowances on Anburg, 35 Sup. Ct. 675, 238 U. S. 56, 59 L. Ed. 56.

VIII. CRIMINAL LIABILITY.

See Crimes.

§16. In General.

IMPORTANT CASES SINCE 1908

(a) Under the Elkins Act, which requires that the act of rebating must be wilful in order to constitute a criminal offense, it is not sufficient to support a contention against a carrier that it knowingly granted a rate by means of an elevation allowance lower than the published rate without proof that the defendant acted in bad faith. C., St. P., M. & O. Ry. Co. v. U. S. 162 Fed. 835, 842.

(b) Deviation from legally applicable rate is not permitted by the act under any pretext; an allowance can not be made except under provisions of lawfully filed tariff. Lay Fish Co. v. Director General, as Agent, 80 I. C. C. 4, 5.

ALL OTHER CITATIONS

Mitchell Coal & Coke Co. v. Penn. R. R. Co., 181 Fed. 403, 410; Wisconsin Central Ry. Co. v. U. S., 169 Fed. 76, 78; C., St. P., M. & O. Ry. Co. v. U. S., 162 Fed. 835, 839, 842.

ALTERNATIVE RATES

I. ESTABLISHMENT AND REASONABLENESS.

See Released Rates.

IMPORTANT CASES SINCE 1908

(a) The method of stating rates by an alternative clause giving the shipper the right to elect a combination rate when that one is cheaper than the class rate is an indefinite method of stating rates that the Commission condemns. Railroad Commission of Nevada v. S. P. Co., 19 I. C. C. 238, 240.

(b) But it is sometimes reasonable to make varying rates on same commodity, dependent upon value. Norcross Bros. Co. v. L. & N. R. R. Co., 29 I. C. C. 109, 112.

(c) Where rate depends upon release of carrier's liability tariff should provide for exercise of choice of rates by means of a statement in bill of lading, signed by shipper, that shipment is released to value stated in tariff. Norcross Bros. Co. v. L. & N. R. R. Co., 29 I. C. C. 109, 113.

(d) The Carmack amendment does not prohibit carriers from entering into reasonable contracts with shippers for a release from liability as an alternative to other tariff provisions, under which the carriers will accept this responsibility themselves. Protection of Potatoes in Winter, 29 I. C. C. 504, 507.

(e) Where alternative rates apply duty rests upon agent of carrier to call attention of shipper to different rates and secure his signature to bill of lading. Harmon & Co. v. N. P. Ry. Co., 33 I. C. C. 370, 371.

(f) A carrier may be given the choice of two routes over which a rate prescribed should be made applicable. Black Mountain Corn v. L. & N. R. R. Co., 39 I. C. C. 153, 158.

(g) Complainant seeks reparation on carload shipments of wood board or wall board from Cornell, Wis., to various destinations, in that the applicable rates

were those named in the tariffs to cover wood pulp board, or, in the alternative, that if the rates on wall board were applicable, they were unjust, unreasonable and unduly discriminatory to the extent that they exceeded the rates on wood pulp board. In the Commission's decision, 49 I. C. C. 91, it was held that the rates on wall board were applicable to the shipments made by complainant and were not shown to have been unreasonable, and that evidence of damage sufficient to support an award of reparation upon a finding of undue prejudice had not been introduced. Complaint was dismissed. Complainant filed a petition for rehearing, which was granted. The commodity shipped was a multiple-ply pulp board, used principally as a wall covering, although put to several uses. Complainants' wall board is shipped packed flat in packages or bundles, with the corners and edges protected and is less liable to damage than wood pulp boards which are shipped in rolls. Wall boards load more heavily than the wood pulp boards, which are shipped in rolls because practically all the space in the car can be utilized. There is never any difficulty in loading wall board above the minimum carload weight of 40,000 pounds, while only one tier of some wood pulp boards shipped in large rolls can be loaded into a car, leaving considerable space unoccupied. Wood pulp boards which are shipped in the larger rolls are also more difficult to handle than the wall board in flat packages. Upon being advised by the Inspection Bureau that the wood pulp board rates were not properly applicable on the wall board shipped by complainant, the defendant carriers, took steps to establish the same rates upon wall board as applied on other wood pulp boards. Since the date of the Commission's ruling in Wall Board Rating, 43 I. C. C. 189, rates on wall board in all of the territories to which complainants ship have been established on the same basis as applies on wood pulp board. HELD: Rates attacked were unreasonable and unduly prejudicial to the extent that they exceeded the rates contemporaneously maintained upon wood pulp board. Reparation with interest awarded. Cornell Wood Products Co. v. A., T. & S. F. Ry., 55 I. C. C. 257.

(h) Two rates published in different sections of the same tariff, each section providing that if a rate therein made a lower charge than a rate in the other the rate therein would be applied. Since the tariff provided for the alternative application of rates in the different sections, the rate producing the lowest charge on a particular shipment was the rate applicable. Shipments found overcharged and reparation awarded. Rothschild Co. v. Director General, as Agent, 73 I. C. C. 126, 127.

Co., 28 I. C. C. 237, 239; Norcross Bros. Co. v. L. & N. R. R. Co., 29 I. C. C. 109, 112; N., C. & St. L. Ry. v. C. B. Truitt Co. (Ga. App. 1914), 82 S. E. 465; Great Western Smelting & Refining Co. v. B. & O. S. W. R. R. Co., Unrep Op. 2051; Henderson v. M., L. & T. R. R. & S. S. Co., 39 I. C. C. 483, 484; Swanson v. T. & P. Ry. Co., 39 I. C. C. 725; Russi & Co. v. O. S. R. R., 45 I. C. C. 77, 78; Asphalt from New Orleans, 83 I. C. C. 424.

AMENDMENT

See Tariffs §8½.

ANALOGOUS COMMODITIES

See Classification §17.

ANTI-TRUST LAWS AND MONOPOLIES

See Clayton Act; Evidence §10.

CASES 1887-1908

(aa) The language of this provision of the Constitution of Texas evinces that control in any manner and to any extent was intended to be prohibited—provided it was such as is calculated to enable one railroad, by means of a contract or agreement for interference in the other's affairs, to keep down competition between them. Gulf, Colorado & Santa Fe R. Co. v. State of Texas, 2 I. C. R. 335.

(ab) An agreement between several

railroad companies, some of which own and control competing lines, for the appointment of a common governing committee, or an association (composed of one member from each company) to fix the rates for which freights should be carried to and from points within the State of Texas, is illegal because contrary to article 10, §5, of the Constitution of Texas, which provides that "No railroad . . . or managers of any railroad corporation shall consolidate the stock, property or franchises of such corporation with . . . or in any way control any railroad corporation owning or having under its control a parallel or competing line." Gulf, Colorado & Santa Fe R. Co. v. State of Texas, 2 I. C. R. 335.

(ac) Such agreement is not relieved from illegality by the fact that any company party to the agreement has the right of withdrawal, or that it cannot be punished for a failure to obey the regulations, or that it has not been shown that the companies have made charges in excess of the limits allowed by law. Gulf, Colorado & Santa Fe. R. Co. v. State of Texas, 2 I. C. R. 335.

(ad) The State of Texas has the right to prohibit and interfere with a contract in restraint of competition, some of the parties to which are corporations created by the State, although it regulates charges upon freight carried to and fro between Texas and other States. The agreement, being illegal as to some, is illegal as to all. Gulf, Colorado & Santa Fe R. Co. v. State of Texas, 2 I. C. R. 335.

(ae) Prescribing a minimum weight for a carload, and then charging by the hundred pounds in proportion to the carlot rate for any excess over the minimum, is not unlawful. Leonard v. Chicago & A. R. Co., (Com.) 2 I. C. R. 599.

(af) The fact that by the action of certain state commissioners a car is permitted to be loaded by the shipper at discretion without the carlot rate being affected thereby is not a reason for adopting a like rule in interstate traffic if that course is found not to be most just and politic. Leonard v. Chicago & Alton R. Co., 2 I. C. R. 599.

(b) The complainants are large manufacturers of common soap at Cincinnati, Ohio. In the Official Classification common soap stands in the fifth class in carload lots. The defendant Railroad Companies have always given it the rate of fifth class articles, but for many years prior to May 1889, they charged the complainants for only net weight, the gross weight being one sixth more than net weight, but since said date they have charged for gross weight without diminishing the rate per hundred pounds. The effect of this was to charge one sixth more for the same service than had before been charged. The charge for transportation under the net weight practice was reasonable and just, and without complaint on the part of shippers or carriers. HELD: That the increased charge by the device of charging for the gross weight being one-sixth advance for the same service, was unwarranted, as it operated to make the rate unreasonable. Proctor & Gamble v. Cincinnati, H. & D. R. Co., 3 I. C. R. 131.

(cd) Contracts between rival and competing railroad companies, which prevent unhealthy competition, but do not raise rates of transportation above the standard of fair compensation, or violate any duty that is owing to the public from noncompeting roads, are not void as against public policy. Manchester & L. R. Co. v. Concord R. Co. (N. H.), 3 I. C. R. 319.

(e) A railroad company which continues to operate a rival and competing line under a prior contract after the passage of a statute prohibiting such contracts, and making the company which operates a rival line subject to penalty, although such continuation was illegal, cannot retain the money acquired by such operation when called upon by the owner of the road for an accounting, but the latter, not being in pari delicto, is entitled to an equitable share of the earnings. Manchester & L. R. Co. v. Concord R. Co. (N. H.), 3 I. C. R. 319.

(fg) A combination between coal producers in one state and coal dealers in another, to regulate prices of coal in a certain city and to divide any advances in price in excess of the advances in freights, and tending to monopolize the coal trade of the city among members of the combination, is in violation of the Act of Congress of July 2, 1890, prohibiting conspiracies in restraint of trade and commerce. U. S. of America v. Jellico Mt. Coke & Coal Co., 3 I. C. R. 627.

(fga) An association of railroad companies for mutual protection by establishing and maintaining reasonable rates, rules and regulations is not illegal as a

restraint of trade, under the Anti-Trust Act of Congress, merely because it incidentally tends to restrict competition in some degree, where each member of the association must still compete with other members for business, and while regular monthly meetings are provided for, at which action may be taken, five days' notice of any proposed reduction of rates or change of rules must be given, and members are bound by the decision of the association, unless they give written notice in ten days thereafter to the contrary, and any member may withdraw on thirty days' notice. United States v. Trans-Missouri Freight Association, 4 I. C. R. 443.

(fgb) An alleged violation of the Anti-Trust Act of Congress must be clearly within its provisions, as the statute is a criminal one. United States v. Trans-Missouri Freight Association, 4 I. C. R. 443.

(fgc) An association of railroad companies cannot be held to create a monopoly, within the meaning of the Anti-Trust Act of Congress, where it is not intended to have any trade of its own, but to be a mere advisor of its members, who are competitors of each other. United States v. Trans-Missouri Freight Association, 4 I. C. R. 443.

(fgd) A contract between competing railroad companies is not necessarily "in restraint of trade" and illegal, within the meaning of the Anti-Trust Act of Congress, because it in some manner imposes a restriction upon competition United States v. Trans-Missouri Freight Association, 4 I. C. R. 443.

(h) Railway companies which enter into an association to control traffic to a common market and maintain rates higher than are reasonable, unjustly prejudicial, and preferential, if not jointly liable, are at least severally liable. Cincinnati Freight Bureau v. Cincinnati, N. O. & T. P. R. Co. (Com), 4 I. C. R. 592.

(i) An indictment for conspiracy in restraint of trade or commerce, under the Act of Congress of July 2, 1890, must declare the means by which it is intended to engross or monopolize the market; and it is not sufficient to declare the conspiracy in the words of the enactment. United States v. Patterson, 4 I. C. R. 775.

(j) Allegations of what was done in pursuance of an alleged conspiracy cannot enlarge the necessary allegations of an indictment for conspiracy under a particular statute, such as the Act of Congress against conspiracies in restraint of commerce. United States v. Patterson, 4 I. C. R.775.

(k) A conspiracy to drive certain competitors out of the field by violence, annoyance, intimidation or otherwise is not within the prohibition of the Act of Congress against conspiracies in restraint of trade, where there is no aim to engross, monopolize or grasp the market. United States v. Patterson, 4 I. C. R. 775.

(l) Violence and intimidation are as much within the mischief of the Act of Congress against conspiracies in restraint of trade or commerce as negotiations, contracts or purchases, if such means are used for the purpose of engrossing, monopolizing or grasping a particular trade. United States v. Patterson, 4 I. C. R. 775.

(m) Wilful failure of railroad companies to carry the mails is within U. S. Rev. Stat. § 3995, making it an offense to unlawfully and wilfully retard or obstruct the passage of the mail, although their employes refuse to move trains having certain sleeping cars thereon, where the situation is of an extraordinary character, and the interruption to commerce has been serious and long continued, and the employes are willing to move trains without such cars. Re Charge to Grand Jury (No. 3) (D. C. N. D. Cal.), 4 I. C. R. 784.

(n) The conspiracies in restraint of trade or commerce among the several states, declared illegal by Act of Congress of July 2, 1890, § 1, embrace all which are contrived with intent, or of which the necessary or probable effect shall be, to restrain, hinder, interrupt, or destroy interstate commerce, embracing all instrumentalities and subjects of transportation among the states. United States v. Debs, 5 I. C. R. 163.

(o) An injunction will lie under the Act of Congress of July 2, 1890, §§ 1, 4, declaring conspiracies in restraint of trade or commerce among the several states illegal, and empowering the circuit courts to restrain violations of the act, in proceedings instituted by the district attorney to enjoin a conspiracy of striking employes to prevent the operation of railroads engaged in interstate commerce. United States v. Debs, 5 I. C. R. 163.

(p) All members of a union of railway employes which have conspired to strain interstate commerce by preventing the operation of railroads engaged therein, and all who join in the movement, are each criminally responsible for the acts of others done in furtherance of the common purpose, whether they intend them or not. United States v. Debs, 5 I. C. R. 163.

(q) Persons who, in combination with a union of railway employes and others, are engaged in a conspiracy in restraint of interstate commerce over railroads, in furtherance of which design those actively engaged use threats, violence, and unlawful means of interference, from which they are commanded to desist by injunction, are guilty of contempt in persisting in their purpose without essential change of conduct until compelled to yield to superior force. United States v. Debs, 5 I. C. R. 163.

(r) The "fines" or "penalties" imposed by the provisions of the agreement of the Southern Railway & Steamship Association on members for violation of association rules appear on the face of that agreement to be available as substitutes for payments which would be exacted under a regular pooling system, and the arrangement under which they are imposed is tantamount to a combination, contract or agreement "for the pooling of freights of different and competing railroads, or to divide between them the aggregate or net proceeds of the earnings of such railroads or any portion thereof," which are forbidden by the statute. Freight Bureau v. Cincinnati, N. O. & T. P. R. Co. et al., 6 I. C. C. 197.

(s) Combinations between railway companies not within Act July 2, 1890: The Act of July 2, 1890, relating to trusts and combinations in restraint of trade, does not include combinations or agreements between railway companies. United States v. Trans-Missouri Freight Asso. et al., 7 I. C. C. App. xi.

(t) Agreement looking toward monopoly of manufacturing business, not an interference with commerce or with the act of July 2, 1890: The court, following the case of United States v. E. C. Knight Company, 156 U. S. 1, 39, L. Ed. 325, holds that an agreement by certain corporations and persons engaged in manufacturing gelatine capsules, that the entire property and business should be conveyed to a new corporation for the purpose of controlling the price of the output, and each of the individual manufacturers should become simply an employe of the new corporation, subject to its dominion and control, was not an unlawful interference with commerce, or illegal under the act of July 2, 1890. Merz Capsule Co. v. U. S. Capsule Co., 7 I. C. C. App. xxv.

(u) Act of July 2, 1890, not applicable to monopoly of the business of sugar refining: The act of July 2, 1890, to protect trade and commerce against unlawful restraints and monopolies does not apply to a combination of sugar refineries located throughout the United States, which gives them a practical mopoly of the business of sugar refining. The court says: "Commerce succeeds to manufacture, and is not a part of it. The power to regulate commerce is the power to prescribe the rule by which commerce shall be governed, and is a power independent of the power to suppress monopoly. But it may operate in repression of monopoly whenever that comes within the rules by which commerce is governed, or whenever the transaction is itself a monopoly of commerce. It is vital that the independence of the commercial power and of the police power, and the delimitation between them, however sometimes perplexing, should always be recognized and observed. Congress did not, by the Act of July 2, 1890, attempt to assert the power to deal with monopoly directly as such; or to limit and restrict the rights of corporations created by the States or the citizens of the States, in the acquisition, control, or disposition of property; or to regulate or prescribe the price or prices at which such property or the products thereof should be sold; or to make criminal the acts of persons in the acquisition and control of property, which the states of their residence or creation sanctioned or permitted. Aside from the provisions applicable where Congress might exercise municipal power, what the law struck at was combinations, contracts, and conspiracies to monopolize trade, and commerce among the several States or with foreign nations; but the contracts and acts of the defendants related exclusively to the acquisition of the Philadelphia refineries and the business of sugar refining in Philadelphia, and bore no direct relation to commerce between the States or with foreign nations. It

does not follow that an attempt to monopolize, or the actual monopoly of, the manufacture was an attempt, whether executory or consummated, to monopolize commerce, even though, in order to dispose of the product, the instrumentality of commerce was necessarily invoked. United States v. E. C. Knight Co., 7 I. C. C. App. xxiv.

(v) Competing roads cannot agree to maintain rates: Competing and nonconnecting railroads are not authorized by the commerce act to make an agreement for maintenance of rates and the curbing of competition. U. S. A. v. Trans-Mo. Freight Asso., 7 I. C. C. App. ci.

(w) Combinations in restraint of trade are prohibited: All combinations in restraint of trade or commerce are prohibited by the Act of Congress of July 2, 1890, whether they are in the form of trusts or in any other form. U. S. A. v. Trans-Mo. Freight Asso., 7 I. C. C. App. ci.

(x) Unlawful restraints not limited to those unlawful at common law: The words "unlawful restraints and monopolies" in the title of the Act of Congress of July 2, 1890, do not show that the purpose of the act was to include only contracts which were unlawful at common law, but refer to and include those restraints and monopolies which are made unlawful in the body of the act. U. S. A. v. Trans-Mo. Freight Asso., 7 I. C. C. App. ci.

(y) All contracts in restraint of trade prohibited: The term "contracts in restraint of trade" as used in the Act of Congress of July 2, 1890, does not refer only to contracts which were invalid at common law, but includes every kind of contract in restraint of trade and is not limited to that kind of contract which is an unreasonable restraint of trade. U. S. v. Trans-Mo. Freight Asso., 7 I. C. C. App. ci.

(z) Combination to maintain reasonable rates illegal: The right of the railroad company to charge reasonable rates does not include the right to enter into a combination with competing roads to maintain rates. U. S. A. v. Trans-Mo. Freight Asso., 7 I. C. C. App. ci.

(aa) Agreement between competing roads to maintain reasonable rates illegal: An agreement between railroad companies for the purpose of mutual protection by establishing and maintaining reasonable rates, rules, and regulations on all freight traffic both through and local is by its necessary effect an agreement to restrain trade or commerce within the meaning of the Act of Congress of July 2, 1890, no matter what the intent was on the part of those who signed it. U. S. A. v. Trans-Mo. Freight Asso., 7 I. C. C. App. ci.

(bb) Statute not applied to pre-existing contract: Retroactive effect is not given to a statute making combinations in restraint of trade illegal by applying the statute to a continuance after its passage of a pre-existing contract. U. S. A. v. Trans-Mo. Freight Asso., 7 I. C. C. App. ci.

(cc) United States may bring action to dissolve unlawful combination: The United States is authorized by the Act of July 2, 1890, to bring an action for the dissolution of an unlawful combination of carriers in violation of such act and for an injunction against continuing such a combination. The court says: "The language of the act includes every contract, combination in the form of trust or otherwise, or conspiracy in restraint of trade or commerce among the several states or with foreign nations. So far as the very terms of the statute go, they apply to any contract of the nature described. A contract, therefore, that is in restraint of trade or commerce is by the strict language of the act prohibited, even though such contract is entered into between competing common carriers by railroad and only for the purposes of thereby affecting traffic rates for the transportation of persons and property. If such an agreement restrain trade or commerce it is prohibited by statute unless it can be said that an agreement, no matter what its terms, relating only to transportation, cannot restrain trade and commerce. We see no escape from the conclusion that if any agreement of such a nature does restrain it the agreement is condemned by this act. U. S. A. v. Trans-Mo. Freight Asso., 7 I. C. C. App. ci.

(dd) United States act against monopolies not applicable to acts of a State: A State for the purpose of monopolizing to the State the business of selling intoxicating liquors is not within the prohibition of the United States Act of July 2, 1890, forbidding every contract, combination in the form of trust

or otherwise, or conspiracy in restraint of trade or commerce among the several states or with foreign nations. The court says: "By this act the State makes no contract, enters into no combination or conspiracy. She declares and asserts in herself the monopoly in the purchase and sale of liquors. The section of the Act of 1890 gives a right of action for any injury by any other person or corporation. The state is not a corporation. Nor can it be said that the state is a person in the sense of this act. Even were this the case, as the monopoly now complained of is that of the state, no relief can be had without making the state a party and this destroys the jurisdiction of this court." Lowenstein v. Evans et al., 7 I. C. C. App. xlviii.

(dda) An association of commission merchants engaged in business at certain stock yards, intended to restrict, control, and monopolize for its members that class of trade and commerce, is within the act of Congress against monopolies or conspiracies when such trade is interstate commerce, although it does not directly require any person engaged in the business to become a member, where in practice its rule prohibiting any member from dealing with a person violating any of its rules and regulations prevents shippers and growers of stock from shipping their stock to a person not a member. U. S. V. Hoppins et al 8. I. C. C. App. XXII.

(ddb) A secret combination to prevent competition and deceive the public by a pretended competition in bidding for contracts is a conspiracy in restraint of trade, within the maning of the act of 1890. U. S. v. Addyston Pipe & Steel Co. 8 I. C. C. App XL.

(ddc) A combination of manufacturers in different States to regulate sales and prices of their commodities in a large number of States in which it was their invariable custom to bid for the contracts and deliver the goods at the home of the buyer, is a combination in restraint of interstate trade within the condemnation of the act of 1890. And the absence of intention to restrain interstate commerce will not save from condemnation a scheme of manufacturers to control the whole commerce in their commodity, within a large number of States. U. S. v. Addyston Pipe & Steel Co. 8. I. C. C. App. XL.

(ddd) Contracts unenforceable at common law because in restraint of trade are, if the trade restrained is interstate, made unlawful in an affirmative and positive sense by the act of 1890, so as to be punishable as a misdemeanor and create a right of civil action for damages in favor of those injured thereby, and a civil remedy by injunction in favor of private persons and the public. U. S. v. Addyston Pipe & Steel Co., 8 I. C. C. App. XL.

(dde) A forfeiture of property under the anti-trust act of 1890 cannot be declared in an equity suit. U. S. v. Addyston Pipe & Steel Co. 8 I. C. C. App. XL.

(ddf) A combination of manufacturers to limit competition and control trade and prices in a large number of States is not legal because the restraint is but partial and limited in territory, and does not make a complete monopoly, but is tempered by fear of competition, and affects only a part of the price. U. S. v. Addyston Pipe & Steel Co., 8 I. C. C. App. XL.

(ddg) An association of coal dealers stifling and restricting competition and trade in coal imported from other States and from foreign countries is in restraint of commerce within the act of Congress of July 2, 1890, although the coal is not sold until imported, delivered, and bulk-broken, as the principle of the original package does not apply to the sale of coal, and it is no defense that the contract or combination involved imposes only a fair and reasonable restraint upon trade and commerce, but the question is, Does it impose any restraint whatever. U. S. v. Coal Dealers' Asso. of California et al. 8. I. C. C. App. XLII.

(ddh) An association of coal dealers establishing arbitrary rates for coal, from which the dealer is not permitted to deviate in any particular, and stifling all competition between retail dealers, assuming jurisdiction over those who are not members, and imposing fines upon those found guilty of selling coal in violation of card rates or rules,—constitutes a restraint of trade which is injurious to the public interest, against public policy, and unlawful. U. S. v., Coal Dealers' Asso. of California et al 8 I. C. C. App. XLII.

(ddi) A restraining order may be issu-

ed by the court or judge without notice, under circumstances sanctioned by the established usage of equity practice in a suit under the act of Congress of July 2, 1890, denouncing trusts and monopolies in restraint of commerce, and by §4, giving the circuit court of the United States jurisdiction to prevent and restrain violations of the act, and providing that pending the petition and before final decree the court may at any time make such restraining order or prohibition as shall be deemed just in the premises. U. S. v. Coal Dealrs' Asso. of California et al., 8 I. C. C. App. XLII.

(ddj) A suit against an unincorporated association claimed to constitute a trust in restraint of commerce is properly brought as to parties against such association and all its members, and against a number of individuals who are designated as members and officers of the association with service upon such individuals, and the president individually as president. U. S. v. Coal Dealers' Asso. of California et al. 8 I. C. C App XLII.

(ddk) Suits in equity, are injunction suits by others than the government, are not authorized by act of 1890, prohibiting conspiracies and monopolies in restraint of trade and interstate commerce. Gulf, Colorado & Santa Fe R. R. Co., x. Miami Steamship Co. 8 I. C. C. App. XLVII.

(ddl) The declaration of Federal anti-trust act that every contract, combination in the form of trust or otherwise, or conspiracy in restraint of trade or commerce, among several States or foreign nations shall be illegal does not extend to a stipulation incidental to the sale of the business of a shipbroker not to solicit freight within a certain territory for shipment to foreign ports. Brett v. Ebel, 8 I. C. C. App. L.

(ee) The Commission has no authority to administer the anti-trust law, or even to determine whether it has been violated. Spring v. Baltimore & O. R. Co., 8 I. C. C. 443.

(ff-gg) The Commission has no authority to administer the anti-trust law, or even to determine whether it has been violated. If an investigation discloses a violation of that law, the power of the Commission is not enlarged nor its duty changed in respect of the rate involved in the inquiry. No relief could be afforded the complainants in this proceeding upon the theory that the quarterly ticket was withdrawn under an agreement between the carriers in violation of the anti-trust law, even if the facts were found in support of that contention. Sprigg v. B. & O. R. R. Co., 8 I. C. C. 443, 456.

(hh) It is contrary to public policy, as well as unlawful, for railways to acquire control of parallel and competing lines. Consolidations and Combinations of Carriers, 12 I. C. C. 277, 306.

(hha) The Interstate Commerce Commission does not extend to violation of antitrust act by carriers of interstate commerce. Warren Mfg. Co. v. Southern R. Co., 12 I. C. C. 381.

(ii) The absorption of a competing line of railway by another in alleged violation of the statutes of a state is a matter within the control of the state courts and can be considered by the Commission only in its ultimate results of inducing unreasonable rates. Warren Mfg. Co. et al. v. Southern Ry. Co. et al., 12 I. C. C. 381.

(jj) The violation of the so-called anti-trust act by unwarranted agreements in restraint of trade by carriers of interstate commerce is not within the jurisdiction of the Commission, but only the correction of unreasonable rates which may be the purpose and effect of such illegal act. Warren Manufacturing Co. v. Southern Ry. Co., 12 I. C. C. 381.

IMPORTANT CASES SINCE 1908

(jja) Neither the consolidation of the New York Central and the Lake Shore & Michigan Southern nor the exchange of bonds on the basis of increased interest rate indicated, incident thereto, would offend any federal statute. Proposed Bond Issue by N. Y. C. & H. R. R. R. Co., 30 I. C. C. 147, 151.

(jjb) The Temple Iron Company was an agency used by carriers for unlawful purposes of gaining a monopoly on sale of anthracite coal. Rates for Transportation of Anthracite Coal, 35 I. C. C. 220, 231.

(jjc) It has been the policy of the carriers to gain a monopoly of production and sale of anthracite coal. Rates for Transportation of Anthracite Coal, 35 I. C. C. 220, 232.

(jjd) Small shipper or shippers who had no transportation affiliations could not compete with mines favored by the carrier. Rates for Transportation of Anthracite Coal, 35 I. C. C. 220, 247.

(kk) If it had been intended that the

provisions of section 5 of the act should merely afford a means of escaping from the restraints of the "anti-trust laws" and other state or federal statutes, much simpler machinery would have been devised for accomplishing the purpose. The "plan of consolidation" is incompatible with such an interpretation of the section and embodies a policy of far greater breadth and vision. Securities Application of P. & W. V. Ry., 70 I. C. C. 688.

(ll) A railroad rate is not necessarily illegal because it is the result of a conspiracy in restraint of trade, in violation of the Anti-Trust Act (Comp. St., sections 8820-8823, 8827, 8830), as the legality of rates is determined by the Interstate Commerce Act. Keogh v. Chicago & N. W. Ry. Co., 43 Sup. Ct. 47.

(mm) Under Anti-Trust Act, §7 (Comp. St. § 8829), giving a right of action to one injured in his business or property by violation thereof, recovery cannot be had, unless it is shown that as a result of defendant's acts damages in some amount susceptible of expression in figures resulted, and the damages must be proved by facts from which their existence is logically and legally inferable, and cannot be supplied by conjecture. Keogh v. Chicago & N. W. Ry. Co., 43 Sup. Ct. 47.

(nn) A shipper's damages from a conspiracy between carriers to fix a higher rate on a certain class of goods than would otherwise have prevailed, but found by the Interstate Commerce Commission to be reasonable and nondiscriminatory, are too conjectural for recovery, as his competitors would have been entitled to the same rate, and an adjustment of the rate on articles competing with such class of goods would have been required. Keogh v. Chicago & N. W. Ry. Co., 43 Sup. Ct. 47.

(oo) Under the Anti-Trust Act, a combination of carriers to fix rates may be illegal, though the rates fixed are reasonable and nondiscriminatory, and if illegal, the government may have redress by criminal proceedings under section 3 (Comp St. Sec. 8822), by injunction under section 4 (Comp. St. Sec. 8823), and by forfeiture under section 6 (Comp. St. Sec. 8828). Keogh v. Chicago & N. Y. Ry. Co., 43 Sup. Ct. 47.

(pp) Where railroad rates, though fixed pursuant to conspiracy between carriers, have been approved as reasonable and nondiscriminatory by the Interstate Commerce Commission, a private shipper may not, under Anti-Trust Act, sec. 7 (Comp St. sec. 8829), recover damages because of his loss of benefit of a rate still lower, which but for the conspiracy he would have enjoyed, in view of Interstate Commerce Act, sections 8, 9, 16 (Comp. St. sections 8572, 8573, 8584), relative to the rights of persons injured, the fact that the recovery of damages might operate to give him a preference, the necessity of determining whether the hypothetical lower rate would have been nondiscriminatory, and the impossibility of obtaining such a determination from the Commission, and the speculative character of his damages. Keogh v. Chicago & N. W. Ry. Co., 43 Sup. Ct. 47.

(qq) Within Anti-Trust Act, Sec. 7 (Comp. St. Sec. 8829), giving a right of action to one injured in his business or property by violations thereof, "injury" implies violation of a legal right, and the legal rights of a shipper as against the carrier in respect to a rate are measured by the published tariff. Keogh v. Chicago & N. W. Ry. Co., 43 Sup. Ct. 47.

(qqa) Under Anti-Trust Act, §7 (Comp. St. §8829), giving a right of action to one injured in his business or property by violations thereof, recovery cannot be had, unless it is shown that as a result of defendant's act damages in some amount susceptible of expression in figures resulted, and the damages must be proved by fact from which their existence is logically and legally inferable, and canot be supplied by conjecture. Keogh v. Chicago & N. W. Ry. Co. (1922) 43 Sup. Ct. 47.

(qqb) A shipper's damages from a conspiracy between carriers to fix a higher rate on a certain class of goods than would otherwise have prevailed, but found by the Interstate Commerce Commission to be reasonable and nondiscriminatory, are too conjectural for recovery, as his competitors would have been entitled to the same rate, and an adjustment of the rate on articles competing with such class of goods would have been required. Keogh v. Chicago & N. W. Ry. Co. (1922), 43 Sup Ct. 47.

(qqc) The mere fact that uniform freight rates are established by carriers forming the Western Trunk Line Committee, does not give a shipper damaged thereby, a right of action under Sec. 7

of the Sherman Anti-Trust Law. Keogh v. Chicago & N. W. Ry. Co., (1922), 43 Sup. Ct. 47.

(rr) Injury implies violation of the legal rights. The legal rights of a shipper as against carrier in respect to a rate are measured by the published tariff Unless and until suspended or set aside, this rate is made, for all purposes, the legal rate, as between carrier and shipper. Keogh v. Chicago & N. W. Ry. Co., 43 Sup. Ct. 47, 49.

(ss) A shipper of excelsior at St. Paul brought suit under section 7 of the Federal Anti-Trust Act against the carriers and the Western Trunk Line Committee for damages in establishing uniform rates on excelsior and flax tow from St. Paul, which rates had been approved by the Interstate Commerce Commission. Keogh claims that he was not only entitled to reasonable rates, but was entitled to competitive rates, but for the action of the Western Trunk Line Committee, one or more of these railroads would have maintained lower rates. The Supreme Court held that the fact the rates fixed were reasonable and non-discriminatory were settled by the proceedings before the Interstate Commerce Commission. That under the Anti-Trust Act the contention of carriers to fix reasonable and non-discriminatory rates might be illegal and also the government could have redress by criminal proceedings in section 3, by injunction in section 4 and by forfeiture in section 6 and the fact that such rates had been approved by the Commission would not bar proceedings by the Government, but that because of these things the shipper could recover damages under Section 7 because he lost the benefit of rates still lower, which but for the conspiracy he would have enjoyed. The Supreme Court held that if the conspiracy claimed of had resulted in rates becoming unreasonably high and discriminatory, the full amount of damages whatever their nature, would have been recovered, but from whom legal rates had been exacted with the additional remedy under the Anti-Trust Act. The court further held that furthermore the damages complained of were too speculative and conjectural to be made certain with such proof as the law demands. Keogh v. Chicago & N. W. Ry. Co., 43 Sup. Ct. 47, 49.

(tt) Under Section 7 of the Federal Anti-Trust Act, as under Section 8 of the Interstate Commerce Act to recover damages, it must be shown that as a result of the defendant's acts, the damages in some amount susceptible of expression in figures resulted. These damages must be proved by facts from which their existence is logically and legally inferable. They cannot be supplied by conjecture. In this respect this case is different from those instances where shipper recovers from the carrier the amount by which its exaction exceeded the legal rate. Keogh v. Chicago & N. W. Ry. Co., 43 Sup. Ct. 47, 50.

(uu) Interference with operation of brick factory, which in the ordinary course of business shipped brick out of state. HELD: Not to constitute restraint of trade or commerce among the several states," within Sherman Anti-Trust Act, §§ 1, 4 (Comp. St. §§ 8820, 8823), declaring combinations or conspiracies in restraint of such trade illegal, and giving the federal courts jurisdiction to prevent violations of the act, since the production of goods destined for shipment out of the state does not constitute interstate commerce, and interference with such production does not constitute a restraint of interstate commerce, where purely local in character and confined to a single local industry, so that the effect on interstate commerce is not immediate and applicable. Danville Local Union No. 115 of United Brick and Clay Workers of America v. Danville Brick Co., 283 Fed. 909.

(vv) Persons purposely engaging in a conspiracy which necessarily and directly operates to restrain interstate commerce, which the Anti-Trust Act is designed to prevent, are in legal contemplation chargeable with intending that result. United Leather Workers' International Union v. Herkert & Meisel Trunk Co., 284 Fed. 446.

ANY-QUANTITY RATES

I. REASONABLENESS AND APPLICATION.

CASES 1887-1908

(a) Commission instituted an investigation as to the rates on cotton, the complaint arising out of different modes of preparing that article for transportation. Cotton is transported by defendants and carriers generally at the same rate per hundred pounds, whether shipments are made by the carload or in less quantities. The usual shipment weighs about 25,000 pounds, when the common method of square bale compression is used, though considerable greater weight may be loaded in the ordinary car. The round bale process permits the shipment of 45,000 pounds or more per car, and complainant sought a ruling which would in effect require one rate on cotton as ordinarily loaded and a lower rate based upon a carload minimum of 45,000 pounds or more. The reasonableness of the defendants' rates as applied to all cotton is not questioned, and the sole object of this proceeding is a carload differential based upon a high carload minimum, which could not be complied with by shippers using the square hole process without considerable difficulty and greater expense. The cotton grower would benefit by a general reduction of cotton rates, but no advantage would result to either the cotton grower or the middleman from such a differential, and complainants' proposals would not advance the interests of the public. HELD: While carriers may lawfully establish carload and less carload rates on cotton, with a reasonable difference between the two rates and a reasonable carload minimum securing to shippers generally the lower carload rates, it does not follow that they are bound to do so, much less that they can be required to establish a differential based upon an unusual carload minimum. Defendants' refusal to grant lower rates on cotton in carloads of 45,000 pounds or more is not a violation of the statute. Planters' Compress Co. v. C., C., C. & St. L. Ry., 11 I. C. C. 382.

(b) Cotton is transported by defendants and carriers generally at the same rate per hundred pounds, whether shipments are made by the carload or in less quantities. The usual shipment weighs about 25,000 pounds, when the common method of square-bale compression is used, though considerably greater weight may be loaded in the ordinary car. The round-bale process permits the shipment of 45,000 pounds or more per car, and complainant seeks a ruling which would in effect require one rate on cotton as ordinarily loaded and a lower rate based upon a carload minimum of 45,000 pounds or more. The reasonableness of the defendants' rates as applied to all cotton is not questioned, and the sole object of this proceeding is a carload differential based upon a high carload minimum, which could not be complied with by shippers using the square-bale process without considerable difficulty and greater expense. The cotton grower would benefit by a general reduction of cotton rates, but no advantage would result to either the cotton grower or the middleman from such a differential, and complainants' proposal would not advance the interests of the public. After considering all the conditions and circumstances, including the effect of the proposed differential upon carriers from producing territory as well as the defendants, HELD: 1. No classification can be so minute as to conform to the differing varieties and conditions of traffic, and to separate different grades or densities of the same article into different classes with varying rates, even if it could be accomplished, would go far to defeat the real purpose of classification. 2. If the rate on an article is reasonable to those who ship the great bulk of that article in the form in which it is commonly prepared for transportation, that rate does not become unreasonable to the shipper of a small quantity of the same article merely because he chooses to prepare his shipments in a form which affords the carrier a greater profit per hundred pounds, particularly when the preparation of that article in the more profitable form would impose some degree of hardship upon a large majority of shippers because of its greater expense or for other reasons. 3. While carriers may lawfully establish carload and less than carload rates on cotton, with a reasonable difference between the two rates and a reasonable carload minimum securing to shippers generally the lower carload rates, it does not follow that they are bound to do so, much less that they can be required to establish a differential based upon an unusual carload minimum. 4. Defendants' refusal to grant lower rates on cotton in carloads of 45,000 pounds or more is not a violation

of the regulatory statute. Planters' Compress Co. v. C., C., C. & St. L. R. Co., 11 I. C. C. 382.

(c) The fact that a carload rating has been established on cotton-piece goods from the East to Pacific Coast points because of water competition, and the fact that duck and denims have been given carload rates to Salt Lake City and Denver to encourage manufacturing industries at those points, while elsewhere throughout the country the rate on cotton-piece goods is the same for any quantity, do not indicate that the action of defendants in denying a carload rating on tickings, drills and sheetings to Denver is unlawful. Kindel v. Boston & A. R. Co. et al., 11 I. C. C. 495.

(d) The application by defendants of uniform rates on cotton in any quantity, and their refusal to conceed lower rates based upon car loadings, was not in violation of the regulating statute. Planters' Compress Co. v. Missouri, K. & T. R. Co., 11 I. C. C. 606.

IMPORTANT CASES SINCE 1908

(e) One of the benefits, if not one of the objects, of an 'any-quantity rate" is that it leaves the carrier with some freedom in the use of its equipment. Such a tariff gives the shipper no right to demand a car of a given size. Falls & Co. v. C., R. I. & P. Ry. Co., 15 I. C. C. 269, 272.

(f) The any-quantity rate rests upon sound public policy. It enables the small shipper to compete on fairly equal terms with his powerful competitor, thereby counteracting in a measure the prevalent tendency toward monopoly. While the Commission has consistently sustained the legality of a differential between carload and less-than-carload rates upon the ground that the difference in the cost of service justifies a reasonable difference in charge, it is highly significant that no order has ever been issued requiring that an any-quantity basis be superseded. Commercial Club of Omaha v. B. & O. R. R. Co., 19 I. C. C. 397, 401.

(g) When a carrier instead of providing a carload and less-than-carload rate provides only an any-quantity rate, the presumption is that it is higher than a carload rate and lower than a less-than-carload rate would be. Mutual Rice Trade & Devel. Assn., Houston v. I. & G. R. R., 23 I. C. C. 219, 224.

(h) A through carload rate should not be based on an any-quantity rate. Mutual Rice Trade & Development Assn. v. I. & G. N. R. R. Co., 23 I. C. C. 219, 224.

(i) There is no necessity for the establishment of a carload rate if the any-quantity rate in effect is a reasonable one for the transportation of the commodity in carloads. Schmidt-Peters v. A., T. & S. F. R. R., 28 I. C. C. 376, 378.

(j) The unit of transportation is one for the carriers to decide as long as they publish reasonable any-quantity rates, and they will not ordinarily be required to apply different rates to carloads than to less than carloads, especially if to do so would tend to increase the prevailing rates for less than carloads. Stuarts Draft Co. v. S. Ry. Co., 31 I. C. C. 623, 631.

(k) The fact that carloads are offered for shipment does not prove the unreasonableness of any-quantity rates, for there are a number of commodities, such as cotton piece goods and boots and shoes, which move under any-quantity rates in carload quantities. Wyeth Hdw. & Mfg. Co. v. A., T. & S. F. Ry., 39 I. C. C. 697, 700.

(l) The application of any-quantity rates on traffic moving by freight is proper in the absence of a showing that the public could not be adequately served without carload rates. The same rule applies to shipments by express. Kimberly Clark Co. v. American Express Co., 45 I. C. C. 7.

(m) An occasional carlot movement of a commodity under an any-quantity rating does not of itself demonstrate the unreasonableness of the any-quantity basis. Jonas & Naumburg, Inc., v. Director General, 69 I. C. C. 29, 30.

(n) Rates on cotton uncompressed, any quantity, found not unreasonable or unduly prejudicial as compared with rates on cotton compressed in transit at expense of carrier. More cars are required to handle uncompressed than compressed cotton, and service rendered on the former cost more than on the latter. Reduction of rates on uncompressed cotton to level of those on cotton compressed in transit would result in increased movement of the uncompressed commodity, requiring additional cars and resulting in congestion at the port during the cotton-shipping season. Galveston Commercial

Asso. v. A. & V. Ry. Co., 77 I. C. C. 388, 407, 410.

(o) Fact that cotton is produced at small centers and moves in relatively light volume constitutes principal justification for any-quantity rates maintained throughout Southwest. American Round Bale Press Co. v. A., T. & S. F. Ry., 32 I. C. C., 458, 464. Kempner v. Director General, as Agent, 80 I. C. C. 347, 349.

(p) N. C. & St. L., and L. & N., and T. C., proposed new individual and joint regulations and practices relating to any quantity transit at Nashville, Tenn., and other points in the southeast on interstate shipment of phosphated flour. Phosphated flour is composed of plain flour and not more than one half of one per cent phosphate. Respondents provided for any quantity transit on plain or self rising flour. The transit is limited to the plain flour content of the shipment, the foreign substances not being accorded transit. Respondent proposed that on every 100 pounds of self rising or phosphated flour outbound, transit privileges will be applied on 95 pounds; and the rate from Nashville proper, to destination, in effect on date of shipment will be assessed on five pounds. HELD, the rule authorizing full transit on flour containing not more than one half of 1 per cent of phosphate will be reasonable for application on interstate shipments of phosphated flour, any quantity, transit at Nashville, Tenn., and other points on respondent lines. Transit on phosphated flour, 81 I. C. C. 738.

ASSIGNMENT

See Loss and Damage §5¾.

ASSOCIATION

CASES 1887-1908

(a) HELD: That the persons composing the Vermont State Grange of the Patrons of Husbandry had such an interest that it was proper that they, as an association, should raise the question as to the justice of the high rates complained of by them, and that the proceeding was maintainable upon their petition. Boston & A. R. R. Co. v. Boston & L. R. R. Co., 1 I. C. R. 571.

(b) A fruit and produce exchange is a mercantile society, such as is described in the Act to Regulate Commerce, § 13, and as such has the right to maintain a proceeding to determine the reasonableness of rates to that place. Boston Fruit & P. Exchange v. New York & N. E. R. Co. (Com.), 3 I. C. R. 493.

(c) The complaining Milk Producers' Association, whether representing its own members, or specially authorized to represent other shippers, or assuming in addition to represent shippers engaged in the same industry on some of the de-

fendant lines, was entitled to bring and maintain this proceeding, affecting rates on milk supplied for a common market, against all the defendants engaged in carrying for that market. A defendant carrier is not entitled to have a complainant dismissed as to it "because of the absence of direct damage to the complainant," and it is the duty of the Commission, under express direction in the act, to "execute and enforce" the provisions of the statute. Milk Producers' Protective Asso. v. Delaware, L. & W. R. Co., 7 I. C. C. 92.

(d) A milk producers' association, whether representing its own members or specially authorized to represent other shippers, or assuming in addition to represent shippers engaged in the same industry may bring and maintain a proceeding before the Interstate Commerce Commission affecting rates on milk supplied for a common market, against all engaged in carrying for that market. Milk Producers' Protective Asso. v. Delaware, L. & W. R. R. Co., 7 I. C. C. 92.

(e) A corporation whose object is to promote the marketing of live stock at Chicago in the interest of its members may, under the Act to regulate Commerce, §13, maintain a proceeding to correct an unreasonable freight rate on live stock shipped to Chicago, as its members, for whose general benefit and protection it was formed, have a vital interest in such a proceeding. Cattle Raisers' Asso. v. Fort Worth & D. C. R. Co., 7 I. C. C. 513.

(f) That the members of a corporation organized to promote the marketing of live stock at a given city are violating the anti-trust law will not prevent the corporation from maintaining a proceeding to correct an unreasonable freight rate on live stock shipped to such city. Cattle Raisers' Asso. v. Fort Worth & D. C. R. Co., 7 I. C. C. 513.

(g) The Chicago Live Stock Exchange, a corporation whose members are persons engaged in the sale of live stock upon commission at Chicago, and the object of which is to promote the interests of its members in the sale of such live stock, may, under section 13 of the Act to Regulate Commerce, maintain a proceeding to correct an unreasonable freight rate upon live stock from various points to Chicago; and this, notwithstanding that certain by-laws and proceedings of the corporation are in violation of that statute of the United States commonly known as the anti-trust law. Cattle Raisers' Association v. Fort Worth & D. C. R. Co., 7 I. C. C. 513.

(ga) Any person or association is entitled to complain before the Commission of failure on the part of carriers to publish and enforce transportation or terminal charges, rules and regulations, and that such failure results from special privileges allowed to shippers on many important lines. American Warehousemen's Asso. v. Illinois Cent. R. Co., 7 I. C. C. 556.

(gb) The Cattle Raisers' Association of Texas asked in its original petition for reparation in behalf of its members, and whatever may be said of the right or status of shippers generally as to reparation for damages resulting from a rate or charge declared by the Commission to be unlawful, in this case the Cattle Raisers' Association of Texas is entitled to show damages to its members and upon such showing it will be the duty of the Commission to order the defendant carriers to make reparation, but in view of the unsettled state of the law in this respect, and in order that all phases of the question may be presented to the court, the members of the association seeking damages should file claim in the nature of an intervening petition showing their membership in the association and payment by them of the charges in question, accompanied by a specification giving as definitely as possible the dates and amounts paid. Cattle Raisers' Asso. v. C., B. & Q. R. Co., 10 I. C. C. 83.

(h) While an association of shippers has no direct interest in a determination of the question as to whether divisions or allowances from published tariff rates, made by defendants to tap lines owned or controlled by other shippers, constitutes departures from the published rates, it has such an indirect interest as entitles it, under the statute, to maintain a proceeding to have such division declared unlawful. Central Yellow Pine Asso. v. Vicksburg, S. & P. R. Co., 10 I. C. C. 193.

(i) An incorporated association whose members are engaged in the purchase, shipment, and sale of live stock has the right, under section thirteen of the Act to Regulate Commerce, to institute and maintain a proceeding to have live stock

rates declared unreasonable, even though the purpose of the organization is to restrain, limit and destroy competition in trade. Chicago Live Stock Exchange v. Chicago G. W. R. Co., 10 I. C. C. 428.

(j) The complainant, an incorporated association, is entitled under section 13 of the Act to Regulate Commerce to bring and maintain a proceeding of this character. Chicago Live Stock Exchange v. C., G. W. R. Co. et al., 10 I. C. C. 428.

(k) The complainants are entitled to bring and maintain a proceeding on behalf of themselves and in the interest of all shippers of the traffic involved, to have an advance in freight rates declared unlawful, notwithstanding their membership in an unlawful trade association, as, in the first place, the complainants constitute but a small portion of the membership of the association, and, in the second place, such a proceeding is not a strictly private or personal suit into which a party complainant must enter with "clean hands," but is a proceeding for the enforcement of a public duty, as well as of an individual or private right. Tift v. Southern R. Co., 10 I. C. C. 548.

IMPORTANT CASES SINCE 1908

(l) A voluntary association cannot by claiming reparation generally in behalf of its members stop the running of the statute of limitations. Michigan Hardwood Mfrs. Assn. v. Transcontinental Freight Bureau, 27 I. C. C. 32.

(m) A voluntary association cannot file a complaint in favor of its members without naming specifically those persons in whose favor the complaint was brought. While other members of the association, or other shippers not members may become parties to the original proceeding, the period of limitation will be reckoned from the date when they appeared as parties to the record. International Agricultural Corporation v. L. & N. R. R. Co., 29 I. C. C. 391, 394.

(n) Contention that members of an association in whose behalf complaint was filed are barred from reparation because complainant took position that it would await decision on merits before offering detailed evidence as to payment and bearing of freight charges by its members. HELD: While ordinarily complainants should present entire cases at time of original hearings, in a case involving numerous shipments by many shippers it is often to the best interest of the commission that parties defer taking testimony on details of damage until main issue has been decided. National Preserves & Fruit Products Asso. v. A. & S. Ry. Co., 74 I. C. C. 179, 183.

(o) The Interstate Commerce Act provides that any association, body politic, or municipal organization, complaining of anything done or omitted to be done by any carrier subject thereto, may apply to the Commission by petition. Act Feb. 19, 903, c. 708, §2, 32 Stat. 848 (Comp. St. 1913, § 8598), provides that in any proceeding for the enforcement of statutes relating to interstate commerce, whether instituted before the Commission or in any Circuit Court, it shall be lawful to include as parties all persons interested or affected, and that investigations, decrees, etc., may be made with reference to and against them. Equity rule 37 (198 Fed. xxviii, 115 C. C. A. xxviii) provides that all persons having an interest in the subject of the action and in obtaining the relief demanded may join as plaintiffs, and that persons having a united interest must be joined on the same side as plaintiffs or defendants. Equity rule 38 (198 Fed. xxix, 115 C. C. A. xxix) provides that when the question is one of common or general interest to many persons, constituting a class so numerous as to make it impracticable to bring them all before the court, one or more may sue or defend for the whole. HELD: That where an order of the Interstate Commerce Commission authorized, and a tariff filed thereunder provided, higher rates to four certain cities than to certain other cities, one of such cities, representing the interest of its citizens, and traffic associations formed for the purpose of representing jobbers and merchants in the three other cities, could maintain a suit to enjoin the enforcement of such order and tariff, as they were within the rule that bills may be filed in the name of unincorporated associations and parties in behalf of others similarly situated, and moreover the equity rules seem to contemplate such a suit for the common benefit of all, where the parties are numerous and have a common or general interest. Merchants' & Manf. Traffic Assn. v. United States, 231 Fed. 292.

(p) Reparation awarded to complainant corporation, organized to render general commercial and traffic services

to its subscribers without profit, in its representative capacity. Detroit Coal Exchange v. Director General, as Agent, 80 I. C. C. 258, 260.

ALL OTHER CITATIONS

United States, 231 Fed. 292; National Preservers & Fruit Products Asso. v. A. & S. Ry. Co., 74 I. C. C. 179, 183.

ASSORTING PACKAGES

See Additional Services; Proportional Rates IV.

IMPORTANT CASES SINCE 1908

(a) Services rendered by the defendant in providing a place where consignments of perishable produce can be handled and in assorting into lots the packages marked with the names of the single dealers to whom they are consigned is a thing of value to the shipper for which he may properly be required to pay. Davies v. I. C. R. R. Co., 17 I. C. C. 186, 188.

(b) In Wholesale Fruit & Produce Assn. v. A., T. & S. F. Ry. Co., 14 I. C. C. 410, the Commission held that on consolidated carloads of fruit consigned to Chicago the carriers should remove same from the cars to the station platforms and distribute the fruit in lots to the various owners and might charge one cent per hundred pounds for this service. HELD: Under this order the carrier discharged its obligation by removing the fruit to the platform and assorting the packages in piles for the various owners, and that it was not bound to deliver the same to the owners by checking off the packages as called for. Davies v. I. C. R. R. Co., 17 I. C. C. 186, 188.

(c) Complainants, relying on the decision in Wholesale Fruit & Produce Assn. v. A., T. & S. F. Ry. Co., 14 I. C. C. 410, asked that the order in said case requiring railroads at Chicago to bring packages of fruit and vegetables to the car door for unloading be extended to package freight of all kinds, and further asked that the order with respect to the unloading of fruit and vegetables be applied to St. Paul and Minneapolis. It appeared that at Chicago the fruit and vegetable traffic was very congested; these products being shipped in packages of estimated weight, it was necessary for the carriers to count said packages upon unloading, and that the men stationed to do this could perform the service of carrying the packages to the car door without additional expense to the carrier. At Minneapolis and St. Paul different conditions prevailed. Fruit and vegetables were allowed to be kept in the care for a longer free time than at Chicago and were unloaded at no definite time, but at whatever time the shipper desired. To compel the carriers at those points to bring the packages to the car doors for unloading would impose a hardship on them in compelling them to have men ready at all times to perform such service. At said cities no custom as fixed and definite had grown up for the performance of said service as at Chicago. Dealers in fruit and vegetables at St. Paul and Minneapolis were not in competition with those at Chicago. HELD, the rule applying to Chicago requiring the carrier to assist in unloading fruit and vegetables should not be applied to other package fruit; that on account of different conditions at Minneapolis and St. Paul carriers at those points should not be required to perform such service with respect to fruit and vegetables. Wholesale Fruit and Produce Ass'n v. A. T. & S. F. Ry. Co., 17 I. C. C. 596, 600-602.

ALL OTHER CITATIONS

Wholesale Fruit and Produce Ass'n v. A. T. & S. F. Ry. Co., 14 I. C. C. 410, 420.

ATTORNEY FEES

See Overcharges §6; Procedure Before Commission §9.

CASES 1887-1908

(a) Permitting the recovery of attorneys' fees on recovery against a railroad company for violation of a statute regu-

lating rates does not violate the constitutional provision as to equality. Burlington, Cedar Rapids & R. R. Co. v. Dey, 3 I. C. R. 584.

(b) A provision allowing attorneys' fees on recovery by the plaintiff for the violation by a railroad company of the statutory schedule of rates does not impose a "penalty for exercising the right of defense." Burlington, Cedar Rapids & N. Ry. Co. v. Dey, 3 I. C. R. 584.

(c) Attorneys' fees cannot be allowed for the prosecution of a suit before the Interstate Commerce Commission. Mills v. Lehigh Valley R. Co., 35 Sup. Ct. 888, 892; 238 U. S. 473, 59 L. ed.

(d) The service for which an attorney's fee is to be taxed and collected under the act, in case of the plaintiff's final success in an action to recover from a carrier the damages alleged to have been sustained by a shipper and awarded by the Interstate Commerce Commission by reason of the carrier's violation of the provisions of those statutes, must be deemed to be those incident to the action in which the recovery is had, and not to those before the Commission, in view of the fact that the Commission is not to allow a fee, but only to find the amount of the damages and fix a time for payment, and that if the carrier pays the award within the time named no right to an attorney's fee arises. Mills v. Lehigh Valley R. Co., 35 Sup. Ct. 888, 889, 892; 238 U. S. 473; 59 L. ed 628.

(e) An attorney who had a contract for a contingent fee for recovering damages for the death of a railway employee, which under Rev. St. Mo. 1919, §691, made the company settling the claim after notice of such contract without the consent of the attorney liable to the attorney, cannot enforce his claim against the railway company, where the railway was being operated by the Director General at the time the injury was caused, so that the liability was that of the Director General, and not of the railway company, under Federal Control Act March 21, 1918, §10 (Comp. St. 1918, Comp. St. Ann. Supp. 1919, §3115¾j), and General Order No. 50 of the Director General, the settlement was made by the Director General's check, and the claim agent who made it was in the Director General's employ, though the railway company was included in the release signed by the representative of the deceased employee, and the claim agent signed as attorney for the company a stipulation for dismissal of the suit begun against the company. Wabash Ry. Co. v. Elliott, 43 Sup. Ct., 406.

AUCTION COMPANY

IMPORTANT CASES SINCE 1908

(a) The complainant attacked the action of the Penn. R. R. in granting to the Union Fruit Auction Co. the sole right to auction off consignments of fruit in the carrier's produce yards at Pittsburgh. One Fanning, the principal spirit of the auction company, was also a large buyer at the auctions. The institution was of great service to shippers, receivers and purchasers of fruit, as well as to the carrier. HELD: (1) That employment by the company of one company only as its auction agency was not illegal; (2) that the mere fact that certain stockholders of the auction company were receivers of fruit did not necessarily constitute undue discrimination against other receivers; and (3) that no undue discrimination or preference had

been shown; but (4) that the carrier should require the auction company to publish the rules and rates of commission governing auction sales. Complaint dismissed. Andrews Bros. Co. v. Penn. R. R., 38 I. C. C. 165.

(b) That a carrier may contract with one agency to the exclusion of others for the performance of a function which is not transportation is established; and such arrangement does not, of itself, suffice to establish a charge of undue or unreasonable preference or advantage; nor does the mere fact that certain stockholders in the Union Fruit Auction Company are receivers of fruit necessarily constitute undue discrimination against receivers of fruit not interested in the auction. Andrews Bros. Co. v. P. R. R. Co., 38 I. C. C. 165, 167.

ALL OTHER CITATIONS

Southwestern Produce Distributors v. Wabash R. R. Co., 20 I. C. C. 458, 460, 462.

AVERAGE DEMURRAGE PLAN

See Demurrage §13.

BACK HAUL

See Evidence §5½; Facilities and Privileges §7.

BAD ORDER CARS

See Cars and Car Supply §7⅛.

BAGGAGE CAR SERVICE

IMPORTANT CASES SINCE 1908

(a) Refusal to accord baggage-car service to shipments of condensed skimmed milk from Richmond, Petersburg, and Suffolk, Va., to Wilson and Rocky Mount, N. C., or to receive at such originating points mixed shipments of milk, cream, and condensed skimmed milk from connecting lines for further transportation to above destinations in baggage cars, found not unreasonable or unduly prejudicial. Present means of transportation accorded by express are not shown inadequate, and carrier should not be compelled to extend milk baggage-car service to other commodities simply because they are somewhat similar in character where same compelling reasons do not exist. Chapin-Sacks Corp. v. A. C. L. R. R. Co., 80 I. C. C. 255.

(b) Milk traffic in baggage cars is not an incident to passenger transportation. Chapin-Sacks Corp. v. A. C. L. R. R. Co., 80 I. C. C. 255, 256.

(c) Maintenance of baggage-car service on milk, cream, and buttermilk is justified on grounds that they are used in practically every home as daily items of food, and from their perishable nature require prompt transportation. This service was not intended to serve private concerns at commercial centers, but in interest of public to provide small communities which are without adequate service by express with expeditious service necessary to movement of cream and milk to the cities. Chapin-Sacks Corp. v. A. C. L. R. R. Co., 80 I. C. C., 255, 256, 257.

BAGGAGE TRANSFER

I. CONTROL AND REGULATION.
- §1. Jurisdiction of Commission.

II. EXCLUSIVE CONTRACT TO SOLICIT.
- §2. In general.

CROSS REFERENCES

See Passenger Fares and Facilities §10.

I. CONTROL AND REGULATION.

§1. Jurisdiction of Commission.

IMPORTANT CASES SINCE 1908

(a) The Commission has no jurisdiction over local baggage transfer agencies. Cosby v. Richmond Transfer Co., 23 I. C. C. 72, 74.

(b) If a carrier undertook to make delivery of passenger baggage, and to issue baggage checks at residences for the rate of fare stated in its tariffs, this would be a service over which the Commission would have jurisdiction, and which must in all regards become subject to the mandates and prohibitions of the Act, even though the service in whole or in part was not performed by the carrier itself but was rendered by some agency under contract or otherwise. But in merely granting the exclusive privilege of soliciting on its trains, and issuing baggage checks at residences, to one baggage transfer company, a carrier does not undertake an additional service to the public. The carrier's duty to the public as to baggage begins and ends in the baggage room provided by it. Baggage transfer is prior or subsequent to the transportation service, as to which the carrier owes a duty to the public, and is therefore outside the jurisdiction of the Commission. Cosby v. Richmond Transfer Co., 23 I. C. C. 72, 75.

(c) The Commission has no jurisdiction over alleged unreasonable charges of a transfer company where the railroad carrier does not undertake to make delivery of passenger baggage at residences for a rate of fare stated in a tariff. Cosby v. Richmond Transfer Co., 23 I. C. C. 72, 74.

(d) The Commission has no jurisdiction to order a railroad to give a local baggage transfer company an opportunity to bid against another one for the privilege of soliciting on trains, any more than it would have power to compel a railroad to place its fruit venders' privilege up at auction, for neither one is transportation under the Act, and over neither one has the Commission jurisdiction. Cosby v. Richmond Transfer Co., 23 I. C. C. 72, 77.

(e) The soliciting of baggage on trains by a transfer company is no part of the transportation service. Cosby v. Richmond Transfer Co., 23 I. C. C. 72, 74.

(f) Unless the railroad carrier undertakes to make delivery at residences a transfer company is the agent of the passenger in transporting the latter's baggage. Cosby v. Richmond Transfer Co., 23 I. C. C. 72, 76.

II. EXCLUSIVE CONTRACT TO SOLICIT.

§2. In General.

IMPORTANT CASES SINCE 1908

(a) Although defendant carriers give to one transfer company, which is controlled by their officers, the exclusive privilege of soliciting baggage transfer on their trains without any monetary consideration, there is no undue discrimination against a competitive company which is willing to pay for such privilege, because defendants owe no duty to provide such service either under statute, common law or custom, and have performed what is required of them when they accept baggage at their depot, transport it and make delivery at destination upon their own terminals. Cosby v. Richmond Transfer Co., 23 I. C. C. 72.

BARGE RATES

IMPORTANT CASES SINCE 1908

(a) Barge rates are available only to shippers who contract for large quantities of coal. Coal to Rhode Island Points, 37 I. C. C. 650, 651.

I. APPLICATION.

See Advanced Rates §7 (8); Application of Rates.

§1. In General.

CASES 1887-1908

(a) Combination rates always afford an advantage to the basing point, and entail some disadvantage upon the town to which the combined rates are applied; and when traffic is brought to the two places to be distributed in common territory, the preferences and prejudices resulting from such rates must generally be held unreasonable and undue. Gustin v. Atchison, T. & S. F. R. Co., 8 I. C. C. 277.

(b) In a territory where the basing point system has been in operation since the advent of railroads, rates to a complaining point made by a combination of the through rate to the nearest trade center and the local beyond need not, under the act, be reduced to the basis of every neighboring point of like distance when the other points in the group whose rates are sought have the advantage of water or other competition. Commercial and Industrial Asso. of Union Springs, Ala., v. L. & N. R. R., 12 I. C. C. 372.

(c) In a territory under the basing-point system, rates to a complaining point made by a combination of the through rate to the nearest trade center and the local beyond need not, under the construction of the fourth section of the act by the Supreme Court, be reduced to the basis of every neighboring point of like distance, when the other points have the advantage of water or other competition. Commercial and Industrial

Ass'n of Union Springs v. L. & N. R. R. Co., 12 I. C. C. 372.

(d) In a territory where the basing point system has been in operation since the advent of railroads, rates to a complaining point made by a combination of the through rate to the nearest trade center and the local beyond need not, under the construction of the fourth section of the act by the Supreme Court, be reduced to the basis of every neighboring point of like distance when the other points in the group whose rates are sought have the advantage of water or other competition. C. & I. Asso. of Union Springs v. L. & N. R. R. Co., 12 I. C. C. 372.

IMPORTANT CASES SINCE 1908

(e) The basing point system of rates under which rates to the basing points, generally commercial centers, were lower than to intermediate points on the same lines, was condemned by the fourth section of the original Act. As this section under the construction given it by the Supreme Court of the United States, did not prove efficacious in correcting the evils sought to be corrected by it, the Congress, under the 1910 amendment, laid an absolute inhibition upon a departure from the long-and-short-haul rule, subject only to the exception that this Commission might in special cases authorize a departure from this rule. Green v. A. & V. Ry. Co., 43 I. C. C. 662, 677.

(f) The appearance in a tariff of arbitraries to be allowed connecting carriers beyond a certain gateway does not define the route to be used in reaching that gateway. Lumber from the Southeast, 50 I. C. C. 191, 193.

(g) Where practicable establishment of in-and-out rates is desirable in lieu of transit arrangements, every point can not be made a rate-breaking point. Cairo Board of Trade v. A. T. & S. F. Ry. Co., 61 I. C. C. 219, 222.

(h) The general, although not universal, practice throughout the southeast appears to be to make rates from local points on independent short lines by adding an arbitrary to the rate from the junction point. Swift Lumber Co. v. F. & G. R. R. Co., 61 I. C. C. 485, 487.

(i) As a general rule rates on grain through primary markets break into definite inbound and outbound components, and commission has expressed approval of this method of constructing them. Routing on Grain and Grain Products, 81 I. C. C. 725, 728.

C. 209, 213.

II. ESTABLISHMENT.

§2. In General.

CASES 1887-1908

(a) Carrier need not give the merchants of town on its line the privilege of shipping their goods from the point of purchase to their own locality and from there to the place of sale of the goods, at the same rate as would have been charged from the point of purchase to the point of ultimate delivery. Crews v. Richmond & D. R. Co., 1 I. C. R. 703.

(aa) Taking the though rate to recognized "basing points," and adding thereto that local rate which will give the lowest combination, is not a proper method of determining a rate, as it treats continuous traffic as consisting of two kinds of service. Hamilton v. Chattanooga R. & C. R. Co. (Com.) 482; Perry v. Florida C. & P. R. Co. (Com.), 3 I C. R. 740.

(b) The system of rate making, under which a comparatively few places, arbitrarily selected, are designated competitive points, or basing points, and given preferential rates, while adjacent and less distant points are classed as local and made to pay very much higher rates, is at variance with all the equality provisions of the act, including that which requires all rates to be reasonable and just. Cordele Machine Shop v. L. & N. R. Co., 6 I. C. C. 361, 376.

IMPORTANT CASES SINCE 1908

(c) The line of demarcation between the so-called rate-breakihg points and other points was not always natural or real, but purely artificial and arbitrary. Many grain centers are now rate-breaking points because the carriers have made them so by giving them reshipping rates and not because of special characteristics which do not exist at other points. On the other hand, many centers possessing all the attributes of rate-breaking points have been denied reshipping rates. Buffalo Grain Cases, 46 I. C. C. 570, 582.

(d) Rates should not be erected as a barrier between a consuming point and a source of supply, but should in general be a medium for effecting the movement of traffic. Coal to South Dakota, 47 I. C. C. 750, 754.

(e) And the Commission has said that when distances are relatively great and transfer at rate-breaking points is not attended by unusual costs, the combination basis, using local rates, ordinarily is abnormal and unscientific and often discriminatory. Intermediate Rate Asso. v. Director General, 61 I. C. C. 226, 246.

(f) The Commission has recognized the general desirability of having rates on grain and grain products make and

break on important primary markets. This method of making rates does not afford such markets unreasonable preference nor subject points where transit arrangements apply to undue prejudice. Grain, Grain Products and Feeds, 78 I. C. C. 209, 213.

(g) Where practicable grain rates should break on recognized markets. Grain, Grain Products, and Feed from Chicago, 81 I. C. C., 209. On other hand, the commission has declined to approve increased joint rates on grain, proposed chiefly for purpose of equalizing them with combinations on primary markets, where such increased rates would be unreasonable. Grain, Grain Products, and Feeds, 78 I. C. C., 209; Grain and Grain Products from Minnesota Points, 81 I. C. C. 338. Grain and Grain Products to Texas, 83 I. C. C. 695, 699.

A. & S. Ry. Co., 81 I. C. C. 96, 99. Grain and Grain Products, and Feed from Chicago, 81 I. C. C. 209, 210.

III. REASONABLENESS AND DISCRIMINATION.

See Discrimination; Reasonableness of Rates.

§3. In General.

CASES 1887-1908

(a) The rates on freight from interstate points to Kramer, Ga., via the Chattanooga, Rome & Columbus Railroad, are made by taking the through rate to recognized "basing points," and adding thereto that local rate which will give the lowest combination. This method of determining a rate criticised, and, as applied to such traffic to Kramer, operates as an unjust discrimination against that locality. Hamilton & Brown v. Chattanooga, Rome, & Columbus R. Co., 3 I. C. R. 482.

(b) The competitive and basing point system under which railroad companies operating in the Southern Railway & Steamship Association territories elect distributing centers and competing points

reviewed, again condemned and found to result in unreasonable and unlawful rates to points classed as local, and give favored business rivals unreasonable advantage. S. J. Hill & Bro. v. Nashville, C. & St. L. R. R. Co. et al., 6 I. C. C. 343.

(c) The system of rate making, under which a comparatively few places, arbitrarily selected, are designated competitive points, or basing points, and given preferential rates, while adjacent and less distant points are classed as local and made to pay very much higher rates, is at variance with all the equality provisions of the Act to Regulate Commerce, including that which requires all rates to be reasonable and just. In this case it results in rates to Cordele which are unreasonable and unlawful, prejudicial to complainant, and gives its more favored rivals in Macon, Albany and Americus unreasonable advantages. Cordele Machine Shop v. Louisville & N. R. Co. et al., 6 I. C. C. 361.

(d) Upon complaint the defendants violate the act by charging higher freight rates to Dawson, Ga., than to Eufaula, Ala., and Americus and Albany, Ga., towns in the section of the country surrounding Dawson, and after giving full and due consideration to the conditions and circumstances, including situation of the localities, possible transportation via the Chattahoochie River, railway competition and the competition of markets, and the basing point system of rate making as practiced in the south. HELD: That it is undue preference for the Central of Georgia Ry. to charge any higher rates on freight from New York and other eastern cities to Dawson than those which are maintained from the same points .of shipment to Eufaula That it is undue preference for the Central of Georgia Ry. or the Georgia & Alabama Ry. to charge any higher rates on freight from Nashville, Cincinnati and Chattanooga to Dawson than those in effect from the same points to Albany. That it is undue preference for the C. of Ga., or G. & A., to charge any higher rates from New Orleans to Dawson than those which are in force from New Orleans to Americus or Albany. That so long as the southern basing point system of rate making is ahered to, it is undue preference for the C. of Ga., or G. & A. to charge any higher freight rates to Dawson than those which may be in effect to Americus from any of the points of shipment above mentioned. Board of Trade of Dawson, Ga., v. Central of Georgia Ry. Co., 8 I. C. C. 142.

(e) Defendant instructed its agents to disregard the regular published tariff rates to Gallatin, and to charge the lower combination of rates to and from Nashville. It also had this rule of applying combination rates when less than tariff rates in force at other stations on its line. Instructions to that effect were issued in a separate printed circular, and did not appear, nor were they referred to in any way, upon its regular printed tariffs. HELD: That this practice is unlawful, and that, to be in compliance with the act, any rule which operates to alter, modify or change established rates must be fully and clearly set forth upon the published tariffs of rates and charges to be affected thereby. Spillers & Co. v. Louisville & N. R. Co., 8 I. C. C. 364.

(f) The system of rate-making into Southern territory, under which, on traffic from St. Louis, Chicago and other points, the rates to Danville are the sums of locals to and from the Ohio River, and the rates to Lynchburg are made on a much lower joint-rate basis, is utterly unreasonable. No opinion is expressed as to the system as a general scheme, but if the carriers desire to make rates in that manner they must so adjust their charges as not to annihilate the city of Danville. Rates to Danville must be adjusted with relation to rates to competitive localities, like Lynchburg, and the carriers from the point of origin to destination should prorate in these rates if they participate in either Lynchburg or Danville business. Danville v. Southern R. Co., 8 I. C. C. 409.

(g) Complainant attacked rates on lumber from Saginaw, Mich., to points on the New York & Long Branch R. R. as unreasonable and unjustly discriminatory. Rates from Saginaw are made by adding to the rate to New York, N. Y., an arbitrary of 5c per 100 pounds, while the arbitrary is only 2c when the shipping point is Buffalo, N. Y. Water competition between Buffalo and New York affects the rates to New York, but it justifies no wider difference in the rates from Saginaw and Buffalo to these interior destinations than exists in the rates from these shipping points to New York. HELD: The discrimination is un-

due and in violation of the act. Mershon, Schuette, Parker & Company v. C. R. of N. J., 10 I. C. C. 456.

(h) Defendant's rate of $1.25 per 100 pounds on oranges in carloads carried from southern California to points on and east of the Missouri River is unreasonable and unjust. Consolidated Forwarding Co. v. Southern P. Co., 10 I. C. C. 590.

IMPORTANT CASES SINCE 1908

(i) A basis which imposes comparatively high rates for short distances and comparatively low rates for long distances can not be sustained on the ground that the business had developed thereunder and has become adjusted thereto. Milk and Cream Rates to New York City, 45 I. C. C. 412, 429.

(j) To the effect that basing or proportional tariffs must be specific, and that tariffs may specify basing points or factors for a combination rate is not limited to proportional rates. American Agricultural Co. v. H. & B. V. Ry. Co., 57 I. C. C. 177, 178.

(k) When distances are relatively great, and when transfer at rate breaking points is not attended by unusual costs, the combination basis, using local rates, ordinarily is abnormal and unscientific and often discriminatory. Andrews Brothers v. A., C. & Y. Ry., 74 I. C. C. 448, 459.

(l) Complainant attacked rates on all commodities except fresh fruit between points on the Boise Valley Traction Co., an electric line in Idaho to interstate destinations, as unjust and unreasonable to extent they exceeded rates from the trunk line junction point from which blanket rates apply. No evidence was introduced with respect to the unreasonableness per se of the rates. Defendant does not, and can not without cooperation of the traction line, establish the rates from those points. The traction line is willing to join in establishing the blanket rates from the points which it serves provided it continues to receive its full revenue for its local haul. HELD, rates attacked not unreasonable or unduly prejudicial, complaint dismissed. State of Idaho v. O. S. L. R. Co., 83 I. C. C. 4.

I. CONTROL AND REGULATION.

See Control and Regulation.

§1. Jurisdiction of Commission.

See Infra §6; Interstate Commerce Commission I; Jurisdiction of Commission.

CASES 1887-1908

(a) Bills of lading over connecting lines to points beyond the state, issued by a railroad whose line is entirely within one state, are subjects of interstate commerce. Re Annapolis, W. & B. R. Co., 1 I. C. R. 315.

IMPORTANT CASES SINCE 1908

(b) The Commission has power and authority under the act (section 12 and the amendment thereto of and the provisions of sec. 15 as amended June 29, 1906, and June 18, 1910), to determine the reasonableness of rules, regulations, and practices of the carriers, and to require them to cease and desist from the enforcement of rules and regulations, and the continuance of practices found unreasonable or unjustly discriminatory, or unduly prejudicial. And herein lies the Commission's power to lay hands upon the "issuance, form and substance" of bills of lading. The act specifically requires carriers subject thereto to issue bills of lading. The Commission has undoubted authority to enforce this requirement in a proper proceding. It can require carriers to file with it the rules and regulations which they write into their bills of lading. It can, by due process, require that uniform rules and regulations be adopted by carriers subject to its jurisdiction. It can determine whether such are, in and of themselves, or as interpreted in the practices of the carriers, reasonable and nondiscriminatory, and, if otherwise, condemn them and prescribe reasonable rules and regulations, in which event the carriers must obey. Bills of Lading, 52 I. C. C. 671, 686.

(c) Carriers challenge the Commissions' power to do more than prescribe the "form" as distinguished from the substance of a bill of lading, but such interpretation would imply that each carrier could insert its own peculiar phraseology in its bill of lading. The intention of Congress to have a uniform bill of lading prescribed by the Commission is clearly indicated in section 25, under which the Commission is also required to "preserve for carriers by water the protection of limited liability provided by law," and this can not be done by specifying color of paper or size of type. Export Bill of Lading, 64 I. C. C. 347, 352.

(d) The conditions of a bill of lading

regarding the liability of the carriers affect "the value of the services rendered to the * * * shipper, or consignee" within the meaning of section 6 of the act. Export Bill of Lading, 64 I. C. C. 347, 352.

(e) The Commission's power to prescribe rules and regulations, not inconsistent with the act, which shall constitute and determine the form of the bill of lading, covers the terms or tenor of that instrument, and is, as the transportation until delivery to the ocean carrier, adequate and complete. And the intent of Congress to require a uniform through export bill of lading and to have the terms thereof prescribed by the Commission seems clear. Export Bill of Lading, 61 I. C. C. 347, 352.

(f) The courts determine the validity of provisions in bills of lading just as they do in the case of other contracts and do not consider whether or not particular provisions, not contrary to the law, should be included or omitted. The Commission must deal with the terms of the bill of lading as rules and regulations which affect the value of the service rendered to the shipper in the same way as it is affected by rules and regulations published in the carriers' tariffs. Export Bill of Lading, 64 I. C. C. 347, 353.

(g) Viewed as an administrative matter, the question of what rules and regulations are or will be reasonable in connection with transportation covered by a bill of lading, depends principally upon the adjustment of the carrier's compensation to the degree of risk, reflected in operating expenses, which it incurs. The fair return as contemplated in section 15a of the act must also be borne in mind. Export Bill of Lading, 64 I. C. C. 347, 354.

ALL OTHER CITATIONS

In the Matter of Bills of Lading, 14 I. C. C. 346, 349; Shaffer & Co. v. C., R. I. & P. Ry. Co., 21 I. C. C. 8, 10; Larkin Co. v. E. & W. T. Co., 24 I. C. C. 645, 647; Western Classification Case, 25 I. C. C. 442, 492; Galveston Commercial Asso. v. A., T. & S. F. Ry. Co., 25 I. C. C. 216, 222, 225; Aransas Pass Channel & Dock Co. v. G., H. & S. A. Ry. Co., 27 I. C. C. 403, 415; Mesilla Valley Produce Exchange, Inc., v. A., T. & S. F. Ry. Co., Unrep. Op. A-229; In Re Bills of Lading, 29 I. C. C. 417; Wolverton v. U. P. R. R. Co., 31 I. C. C. 23, 24; Alaska S. S. Co. v. U. S., 259 Fed. 713; Decker & Sons v. Director General, 55 I. C. C. 453, 455; First Nat. Bank of Ripley, Tenn. v. Tchula Commercial Co. (Miss. 1923) 742.

§2. Recommendation of Certain Forms.

IMPORTANT CASES SINCE 1908

(a) The Commission must deal with the terms of the bill of lading as rules and regulations which affect the value of the service rendered to the shipper in the same way it is affected by rules and regulations published in the carriers' tariffs. In the Matter of Bills of Lading, 64 I. C. C. 347, 353.

(b) Viewed as an administrative matter, the question of what rules and regulations are reasonable, or will be reasonable for the future, in connection with the transportation covered by the bill of lading, depends principally upon the adjustment of the carriers compensation to the degree of risk which it incurs. That degree of risk is reflected in operating expenses. The greater the risk, the greater is the value to the shipper of service rendered, which should be rewarded correspondingly. A lesser compensation is appropriate in cases where the carrier is to a large extent relieved from the full liability of common carrier. In the Matter of Bills of Lading. 64 I. C. C. 347, 353.

(c) Viewed as an administrative matter, the question of what rules and regulations are or will be reasonable in connection with transportation covered by a bill of lading, depends principally upon the adjustment of the carrier's compensation to the degree of risk, reflected in operating expenses, which it incurs. The fair return as contemplated in section 15a of the act must also be borne in mind. Export Bill of Lading, 64 I. C. C. 347, 354.

(d) The desirability of uniform bills of lading is acknowledged by all. Uniformity necessarily involves subordination of some individual views to the general good. In the Matter of Bills of Lading, 64 I. C. C. 357, 363.

(e) Previous decision, 64 I. C. C. 357, Domestic Bills of Lading and Live Stock Contract. First sentence of section 7 of domestic bills of lading and section 3 of uniform livestock contract changed as follows: "The owner or consignee shall pay the freight and average, if any, and all other lawful charges accruing on said property." The word "duplicate" before the word "Original" also eliminated from

the face of the uniform domestic bill of lations were prescribed for a through "Original" in the livestock contract. Domestic Bill of Lading and Live Stock Contract, 66 I. C. C. 63.

(f) In 64 I. C. C. 347, rules and regulations were prescribed for a through export bill of lading, effective February 15, 1922, postponed until March 15, 1922. Case was set for further hearing on application of the United States Shipping Board who presented four amendments. HELD: Renumber paragraph 3 as paragraph 3 (a) and change $100 to read $250. Add a new paragraph numbered § (b) to read: Notice of loss, damage, or delay must be given in writing to the carrier receiving the goods for transportation between Port A and Port B within 30 days after the removal of the goods from the custody of such carrier, or, in case of failure to make delilvery, within 30 days after the goods should have been delivered, provided, that if such loss or damage is apparent at the time of the removal of the goods from the custody of the carrier, the notice of loss, damage, or delay must be given before the goods are so removed, in which case notation of the loss or damage made on the receipt given to the carrier for the goods shall constitute the notice herein required. Written claim must be filed with such carrier within nine months after giving the aforesaid written notice. Unless such notice is given and the claim filed as above provided, the carrier shall not be liable. No suit to recover for such loss, damage, or delay shall be maintained unless instituted within one year after the giving of the written notice of loss, damage or delay above provided for. Add a new paragraph numbered 3 (c) to read: "The carrier shall not be entitled to the benefit of any insurance that may have been effected by the shipper upon the goods shipped thereunder." Substitute the following paragraph 14 for the present paragraph 14 of the export bill of lading: "The property covered by this bill of lading is subject to all conditions expressed in the regular form of port bill of lading in use by the steamship company on the date of execution of this document and on file, in accordance with the rules and regulations of the United States Shipping Board and for the Interstate Commerce Commission, but if any of such conditions are in conflict with conditions 1-15 of part 11 of this bill of lading the latter conditions shall control." Export Bill of Lading, 66 I. C. C. 687.

(Minn. 1915), 154 N. W. 506; In the Matters of Bills of Lading, 52 I. C. C. 671; Alaska S. S. Co. v. United States, 259 Fed. 713; Perishable Freight Investigation, 56 I. C. C. 449, 599; Domestic Bills of Lading and Livestock Contract, 64 I. C. C. 357; In the Matter of Bills of Lading, 64 I. C. C. 354.

II. DUTY OF CARRIER TO ISSUE.

§2½. In General.

See Through Routes and Joint Rates §12.

CASES 1887-1908

(a) One railroad company has a right to issue bills of lading for freight and through tickets for passengers over a connecting road, although there is no contract between the companies. Ore. Short Line & V. N. R. Co. v. N. P. R. Co., 3 I. C. R. 205.

(b) Common carriers may, within the limits of fairness and impartiality, consult their own interests in making contracts for the carriage of goods. Cleveland, C., C. & I. R. Co. v. Closser (Ind), 3 I. C. R. 387.

(c) It is irregular not to issue bills of lading. Shiel & Co. v. Ill. Central R. R. Co., 12 I. C. C. 210.

IMPORTANT CASES SINCE 1908

(d) The Commission has repeatedly held that the obligation rests upon carrier's agent to refrain from executing bills of lading which are contradictory and therefore impossible of execution. American Bridge Co. v. N. & W. Ry., 47 I. C. C. 235, 236.

(e) It is the duty of a carrier to issue a bill of lading free from ambiguity or uncertainty. Gill Andrews Lumber Co. v. Director General, 57 I. C. C. 493, 494.

(f) The fact that the P. & P. U., does not issue bills of lading for shipments originating on its rails and routed via tenants from Peoria or East Peoria has little significance, as originating carriers which perform switching services only do not usually issue bills of lading. Minne-

apolis & St. Louis R. R. Co. v. P. & P. U. Ry., 68 I. C. C. 412, 416.

ALL OTHER CITATIONS

Aransas Pass Channel & Dock Co. v. G., H. & S. A. Ry. Co., 27 I. C. C. 403, 415; Parlin & Orendorff Plow Co. of St. Louis v. U. S. Exp. Co., 26 I. C. C. 561, 562; Aton Piano Co. v. C., M. & St. P. Ry. Co. (Wis. 1913), 139 N. W. 743, 745; Jung & Sons Co. v. L. & N. R. R. Co., 31 I. C. C. 455, 457; Mobile Chamber of Commerce v. M. & O. R. R. Co., 32 I. C. C. 272, 281; Louisiana State Rice Milling Co. v. M., L. & T. R. R. & S. S. Co., 34 I. C. C. 511, 513; Western Trunk Line Rules, 34 I. C. C. 554, 577; Adams v. Croninger, 226 U. S. 409, at page 504, 33 Sup. Ct. 148, 57 L. Ed. 314, 44 L. R. A. (N. S.) 257; De Rochemont v. Boston & M. R. Co., 157 N. Y. S. 177, 180; Atwood & Co. v. C., B. & Q. R. R. Co., 42 I. C. C. 385, 387; Davis v. Norfolk & Sou. R. R. (N. C. 1916), 90 S. E. 123; Evans Lumber Co. v. C. of G. Ry. Co., 43 I. C. C. 476, 480; Morris & Co. v. Southern Exp. Co. 189 N. Y. S. 26.

§3. Rail-and-Water Transportation.

See Export Rates and Facilities II; Rail and Water.

IMPORTANT CASES SINCE 1908

(a) There is no legal obligation on a rail carrier to give a through bill of lading covering movement by water beyond its line. Such practice is, however, of great advantage to shippers, and if given in the name of one boat line, should be given in the name of others who are similarly circumstanced. A railroad may entirely destroy the export traffic of a port by refusing to issue through bills of lading; and to say that it may exercise this great power wantonly and arbitrarily is contrary to the spirit and letter of the act. Mobile Chamber of Commerce v. M. & O. R. R. Co., 23 I. C. C. 417, 424, 425.

(b) If a rail carrier makes a rate and issues a bill of lading for ship-side delivery at a port, that rate, and a similar bill of lading, should be open to all who conform to the reasonable conditions of the carriers. A railroad cannot adopt a policy or practice which will put its facilities and its rates at the exclusive service of one line of steamships, or of one set of shippers patronizing that line. Mobile Chamber of Commerce v. M. & O. R. R. Co., 23 I. C. C. 417, 426, 427.

(c) Eastern carriers are required to honor through bills of lading issued by western carriers via an independent lake line. Flour City S. S. Co. v. L. V. R. R. Co., 24 I. C. C. 179, 190.

(d) It is of first importance to the handling of the Texas cotton crop that through bills of lading be issued. Galveston Commercial Asso. v. A., T. & S. F. Ry. Co., 25 I. C. C. 216, 221, 222.

§4. At Transit Points.

IMPORTANT CASES SINCE 1908

(a) When carriers are parties to a milling-in-transit privilege, it is proper for the inbound carrier to issue and sign the bills of lading for the outbound movements, because, the records of the inbound shipments being in its possession, in no other way could the transit privilege be protected against abuse. Brook-Rauch Mill & Elevator Co. v. St. L., I. M. & S. Ry. Co., 21 I. C. C. 651, 652.

§5. One Lading for Several Shipments.

See Cars and Car Supply §7; Demurrage §6; Follow-Lot Shipments.

IMPORTANT CASES SINCE 1908

(a) Two separate bills of lading were taken out by complainant covering two cars of machinery shipped on the same day to the same consignee. Under rule 8 of the Western Classification, defendants assessed charges thereon on the basis of the minimum carload weight for each. HELD: That under the rule, the established rate for a carload can only apply on the entire lot when the shipments are covered by one bill of lading, that this rule having been considered and approved in prior cases cannot be held unreasonable, and the charges were properly assessed. Goodman Mfg. Co. v. C., B. & Q. R. R. Co., 21 I. C. C. 583.

(b) Complainant loaded first car to visible capacity and forwarded shipments under separate bills of lading, but failed, through oversight, to comply with tariff requirements or make cross reference to the separate shipments in the actual billing which would indicate that commodities were offered as a single shipment. HELD: Follow-lot rule not applicable and charges legally applicable not found unreasonable. United Verde Extension Mining Co. v. Director General, 57 I. C. C. 483.

(c) Complainant attacks as unreasonable charges on two cars loaded with

pipe bends and fittings from Philadelphia, Pa., to Clarkdale, Ariz. Shipments comprised various parts of a circulating steam system, were loaded into two cars and moved under separate bills of lading, neither of which made reference to the other, over the B. & O., C. B. & Q., and Santa Fe. Parts loaded in one of the cars consisted of 49,950 pounds of wrought steel pipe, 2,300 pounds of bolts, and 50 pounds of packing. Those in the other car consisted of 11,085 pounds of wrought steel pipe, 6,255 pounds of iron steam separators, 1,610 pounds of fittings and 50 pounds of gauges, charges collected on the first car based on actual weight and commodity rate of $1.08 applicable to pipe fittings and connections; on the other car minimum weight of 30,000 pounds rate $1.75 applicable to mining machinery. Sole claim of complainant is that the commodities loaded in the second car constituted a part lot of those loaded in the first car and that the charges thereon should be governed by the follow lot rule of the applicable tariff, but he failed not only to comply with the literal requirements of the rule, but also failed to make cross reference to the separate shipments in the actual billing or to take any step which would indicate that all the commodities were offered as a single shipment. HELD: Rate charged not unreasonable, but there was an overcharge which should be refunded based on the legal tariff rates. United Verde Extension Mining Co. v. Director General, 57 I C. C. 483.

(d) It is testified for complainant that the first car was loaded to visible capacity, that the forwarding of the shipments under separate billing was due to oversight of the shipper, and that the rule was complied within every other particular. Defendants concede that the second car was handled in the identical manner in which it would have been handled had the rule been fully complied with. Nevertheless, it is apparent that to grant the relief asked would be tantamount to the waiver of an essential requirement of the rule, as the shipper failed not only to comply with its literal requirements, but also failed to make cross reference to the separate shipments in the actual billing or to take any step which would indicate that all the commodities were offered as a single shipment. United Verde Extension Mining Co. v. Director General, 57 I. C. C. 483, 484.

(e) Three separate l. c. l. shipments loaded in one car were billed to three consignees at two destinations, and three separate bills of lading and three separate freight bills were issued. Failure of carriers, after shipment left point of origin, to divert to one of the consignees as a c. l. shipment or to provide by rule for such diversion, found not unreasonable or otherwise unlawful Consolidated Rendering Co. v. B. & M. R. R., 77 I. C. C. 101.

(f) Two cars were furnished by carrier for its convenience in lieu of larger car ordered. Shipment moved under bill of lading for each car, second bill bearing notation in reference to first: Part car lot UP 121567—weight and charges ahead." Contention that since "two-for-one" rule in tariff required as condition precedent that but one bill of lading be issued, it was not applicable to this shipment. HELD: Since second bill of lading referred to first for weight and charges, this was a substantial compliance with requirement. Stone-Fisher Co. v. Director General, as Agent, 77 I. C. C. 369, 370, 371.

ALL OTHER CITATIONS

Vulcan Steam Shovel Co. v. M. P. Ry. Co., 18 I. C. C. 265; Consolidated Water Power Co. v. S. P., L. A. & S. L. R. R. Co., 20 I. C. C. 169; Scudder v. T. & P. Ry. Co., 22 I. C. C. 60, 61; Sheldon & Co. v. Wabash R. R. Co., 38 I. C. C. 569, 570.

III. CONSTRUCTION.

§6. In General.

CASES 1887-1908

(a) There is nothing in the interstate commerce law which vitiates bills of lading, or which, by reason of an allowance of a rebate to the agents of the owners or consignees of goods, if actually made, would invalidate the contract of affreightment or exempt a railroad company from liability on its bills of lading. Merchants Cotton Press & S. Co. v. Insurance Co. of North America, 4 I. C. R. 499.

IMPORTANT CASES SINCE 1908

(b) The billing should show what has been charged for transportation and what has been charged for the transit. Mixed Car Dealers Asso. v. D., L. & W. R. R. Co., 33 I. C. C. 133, 140.

(c) Bill of lading constitutes a receipt for the property and a contract for its carriage. The Cummins Amendment, 33 I. C. C. 682, 685.

(d) A contention that where articles included in a shipment are not specifically stated in the bill of lading to constitute household goods it would be proper to consider each item as an individual shipment, is met by the fact that the articles are offered as one shipment and move under one bill of lading in which only the aggregate weight is shown. Perdue v. B. & O. S. W. R. R., 47 I. C. C. 210, 211.

(e) An important function of the bill of lading is to give formal expression to the stipulations and conditions under which the carrier seeks to obtain a modification or limitation of the liability that otherwise would be imposed upon it under the common law. While the limitations of the carrier's liability must be agreed to by the shipper and the agreement be invested with the sanctity of a valid contract, neither by common law nor by federal statute in this country is any particular form of contract or solemnity of execution required. Contracts between shipper and carrier, however, are almost invariably evidenced by the more or less formal bill of lading, written or printed, which serves three distinct functions: First, a receipt for the goods; second, a contract for their carriage; and, third, documentary evidence of title to the goods. As a receipt for the goods, it recites the place and date of shipment; describes the goods, their quantity, weight, dimensions, identification marks, condition, etc., and sometimes their quality and value. As a contract, the bill names the contracting parties, specifies the rate or charge for transportation, and sets forth the agreement and stipulations with respect to the limitations of the carrier's common-law liability in the case of loss or injury to the goods and other obligations assumed by the parties or to matters agreed upon between them. That part of the bill which constitutes a receipt may be treated as distinct from the part incorporating the contractual terms. Porter, Law of Bills of Lading § 14, citing Myer v. Peck, 1 Tiffany (28 N. Y.), 590; Higgins v. U. S. M. S. S. Co., 3 Blatchf. (U. S. C. C.), 282. Ordinarily parol evidence will not be admitted to vary the terms or legal effect of a bill of lading, considered as a contract between parties to it, although it seems that, as a receipt for the goods, it may be contradicted by oral testimony. The Delaware, 14 Wall 579. It is sufficient if the shipper accepts the carrier's bill of lading without himself signing it. It becomes binding upon him by his acceptance, he being presumed to know and accept the conditions of the written bill of lading. The bill of lading is regarded as representative of the goods while they are in the carrier's possession. It is not a negotiable instrument in the common acceptation of the term, but it may be, and frequently is, made negotiable in form and thus becomes invested with peculiar attributes of great practical importance commercially. Bills of Lading, 52 I. C. C. 671, 681.

(f) Carrier's contention that bills of lading must govern in determining the rate legally applicable, and that shipper can not show by parol evidence that shipments were of something other than as described by it or its agent in the transportation contract contained in the bills of lading, found to be without merit. Harris Bros. Co. v. Director General, as Agent, 60 I. C. C. 428, 430.

(g) It would be difficult, if not impossible, to prevent the unjust discrimination and undue prejudice forbidden by the act if carriers could vary the terms of the contract of transportation at will in dealing with different shippers of the same commodity. Export Bill of Lading, 64 I. C. C. 347, 352.

(h) It is well settled that under the Interstate Commerce Act it is not the bill of lading alone which constitutes the contract between the shipper and the carrier, but it is the bill of lading, plus the schedule and tariffs filed as required by law. American Sugar Refining Co. v. D., L. & W. R. R. Co., 207 Fed. 733, 125 C. C. A. 251; D'Utassy v. Sou. Pac. Co., 161 N. Y. S. 222.

(i) Recitals in a bill of lading for an interstate shipment, signed by both parties, that alternate rates, based upon specified values, are offered by the carrier's published freight rates, constitute admissions by the shipper and sufficient prima facie evidence of a choice of rates, and cast upon him the burden of proving, in case he wishes to contradict his admissions, that the carrier had not complied with the requirements of controlling federal legislation respecting the filing and publishing of its rate schedules. Cincinnati, N. O. & T. P. Ry. Co. v. Rankin, 36 Sup. Ct. 555; 241 U. S. 319; 60 L. Ed. 1022.

(j) Congress has so asserted, by the

Carmack Amendment, its power over the subject of interstate shipments, the duty to issue bills of lading, and the responsibilities thereunder, as to preclude the application to an interstate commerce shipment of a local and exceptional rule of law which invests the innocent holder of a bill of lading with rights not available to the shipper, such as the right to rely on erroneous recitals in the bill of lading as to the date of the carrier's receipt of the goods. Atchison, T. & S. F. R. Co. v. Harold, 36 Sup. Ct. 665, 668; 241 U. S. 371; 60 L. Ed. 1050.

(k) The question as to the proper construction of a bill of lading for an interstate shipment issued under the Carmack Amendment is a Federal one which will sustain the appellate jurisdiction of the Federal Supreme Court over a state court. Georgia, F. & A. R. Co. v. Blish Milling Co., 36 Sup. Ct. 541; 241 U. S. 190; 60 L. Ed. 948.

(l) A bill of lading is both a receipt and a contract of carriage and delivery. King v. Barbarin, 249 Fed. 303.

(m) Since it is required by the Interstate Commerce Act that a bill of lading or receipt for an interstate shipment must be issued by the carrier, the consignor of an interstate shipment must be presumed to know the terms of the bill of lading. New York Cent. & H. R. R. Co. v. York & Whitney Co. (Mass. 1918), 119 N. E. 855.

(n) Bills of lading or waybills are mere incidents of service which in no wise determine its character whether linehaul or switching. Western Meat Co. v. Director General, as Agent, 78, I. C. C. 77, 80.

(N. Y. 1915), 108 N. E. 837, 838; Larkin Co. v. E. & W. Transp. Co., 34 I. C. C. 106, 109; Sheldon & Co. v. Wabash R. R., 38 I. C. C. 569; Coal & Coke Ry. Co. v. Buckhannon River 87 S. E. 376; D'Utassy v. Southern Pacific Co., 161 N. Y. S. 222; Aradlou v. New York, N. H. & H. R. Co. (Mass. 1916), 114 N. E. 297, 299; Columbian Iron Works v. S. Ry., 45 I. C. C. 173, 174; Bers v. Erie R. R., 163 N. Y. S. 114; Pa. R. R. v. Townsend (N. J. 1917), 100 Atl. 855; Cudahy Packing Co. v. Bixby (Mo. 1918), 205 S. W. 865; Clark v. Southern Ry. Co. (Ind. 1918), 119 N. E. 539; Strahs v. New York Cent. R. Co., 184 N. Y. S. 362; Big Sandy & C. R. Co. v. Ball (Va. 1922), 113 S. E. 722; Taylor v. Central of Georgia Ry. Co. (Ga. 1923), 121 S. E. South & Central American Commercial Co., Inc. v. Panama R. Co. (New York, 1923) 142 N. E. 666; J. F. Twanley, Son & Co. v. Chicago Great Western R. Co., (Nebr., 1923), 196 N. W. 319.

§7. Statement of Weight.

See Weights and Weighing.

CASES 1887-1908

(a) Where a bill of lading specified the rate per 100 pounds to be paid for the goods carried, but did not state the weight of the goods, but the weight was readily ascertainable, HELD: That the sum to be paid for freight was sufficiently specified in the bill of lading to accomplish the object of the act. Little Rock & Fort Smith R. Co. v. Hanniford, 1 I. C. R. 58.

(b) The material part of a bill of lading on the subject of the freight rate is that which fixes the rate per 100 pounds. Weighing the freight is purely a mechanical process, and may be done at the point of shipment, or at the point of delivery. Where the weight of the merchandise is uniformly the same, the carrier or the consignee may ask to have the weight verified up to the moment of delivery, and it is the weight disclosed by the scales, and not the weight marked on the bill of lading, that controls. Baird v. St. Louis, I. M. & S. R. Co., 4 I. C. R. 422.

IMPORTANT CASES SINCE 1908

(c) When a car is weighed at origin and the weight stated in the bill of lading, the shipper has a right to rely on that weight, subject to correction only by proof of the correct weight. Duluth

Log Co. v. C., St. P., M. & O. Ry. Co., 16 I. C. C. 38, 39.

(d) The bill of lading, as a receipt between the original parties, is prima facie evidence of the truth of the statements contained therein. Recitals of quantity and weight of the articles received are not, however, conclusive and the carrier is not estopped from showing that the amount or quantity stated was never in fact delivered for transportation. In Re Suspension of Western Classification No. 51, 25 I. C. C. 442, 491.

(e) Complainant attacked the charges assessed on a shipment of cast-iron service boxes shipped from Chattanooga, Tenn., to Jacksonville, Fla., as unreasonable and discriminatory. The bill of lading contained the following notation: "1 car C. I. service boxes—weight 30,000 lbs., rate 15c." The actual weight was only 16,000 lbs. Charges were imposed at the carload rate of 15c per 100 lbs., minimum 30,000 lbs., and complainant contended that they should have been collected at the rate of 21c, l. c. l., applied to the actual weight, the notation in the bill of lading having been inserted through error of an inexperienced shipping clerk. But it did not appear that the carriers had been advised of the error. Complainant had ordered a 40-ft. car, and the packages were not marked with name and address of the consignee. HELD: That the charges attacked were not shown to have been unreasonable or unlawful. Complaint dismissed. Columbian Iron Works v. S. Ry., 45 I. C. C. 173.

§7½. Shippers Load and Count Provision.

IMPORTANT CASES SINCE 1908

(a) The bill of lading act authorizes common carriers to insert in bills of lading the words "shippers weight load and count" or other words of like import, to indicate that the goods were loaded by the shipper and the description made by him, and if such notation be true the carrier is absolved from liability for damages caused by improper loading, or by the nonreceipt or misdescription of the goods. The Commission has declined to condemn the carriers' practice of issuing shippers load and count bills of lading. San Francisco Dairy Produce Exchange v. American Railway Express, 78 I. C. C. 737, 739.

(b) Carrier's practice of noting "shipper's load and count" on receipts for c. l. shipments of eggs, butter, cheese, and dressed poultry found not unreasonable. Issuance of unqualified receipts would necessitate checking packages as loaded into car to assure absolute accuracy, and would entail additional expense upon carrier. If carrier be required to issue unqualified receipts for dairy products, it is reasonable to assume that shipments of other commodities would demand and be entitled to similar treatment. San Francisco Dairy Produce Exch. v. Am. Ry. Exp. Co. 78 I. C. C. 737.

§8. Statement of Shipping Point.

IMPORTANT CASES SINCE 1908

(a) Where no evidence is submitted by defendant carrier to show that the point of origin stated in the bill of lading was not the actual point of origin, the charge must be assessed according to the rate from the point of origin therein stated. Duluth Log Co. v. C., St. P., M. & O. Ry. Co., 16 I. C. C. 38, 39.

§9. Conflicting Provisions.

See Conflict of Rates; Conflicting Provisions; Routing and Misrouting §3, §3½.

IMPORTANT CASES SINCE 1908

(a) So the insertion in the bill of lading of a certain rate makes it the duty of the initial carrier to inquire of the shipper what route is desired before shipping by a route involving a higher rate. Bruner Co. v. S. Ry., 40 I. C. C., 549, 551.

(b) Where a shipper tenders a bill of lading containing routing instructions and a specific rate, and the rate does not apply via the route designated, it is the duty of the carrier's agent to call shipper's attention to the fact that the rate specified can not be accorded via the route designated and to secure further instructions. Conf. Rule 286 (f). Earle Fruit Co. v. O. S. L. R. R., 46 I. C. C. 510, 511.

§9 (½). In General.

See Conflict of Rates.

IMPORTANT CASES SINCE 1908

(a) The obligation lawfully rests upon the carrier's agent to refrain from executing a bill of lading which contains provisions that can not lawfully be complied with or provisions which are contradictory, and therefore impossible of execution. Hutton & Bourbonnais Co. v. S. Ry., 50 I. C. C. 434, 435.

(b) It is the duty of the agent of a carrier to refrain from executing bills of lading containing contradictory provisions. Republic of France v. M. K. & T. Ry., 77 I. C. C. 383, 384.

(c) It is duty of carrier to refrain from executing bills of lading containing provisions which can not be complied with or provisions which are contradictory. Conf. Ruling 474-c. Dixie Portland Cement Co. v. Director General, as Agent 83 I. C. C. 417, 419.

(d) Conference ruling 474 provides in effect that if a carrier accepts a bill of lading containing provisions which are conflicting or impossible of execution it is liable for all damage resulting from that act. Empire Lumber Co. v. Director General, 88 I. C. C. 424, 425.

§9. (1) Between Rate and Route.

See Routing and Misrouting §3.

IMPORTANT CASES SINCE 1908

(a) It is the affirmative duty of a carrier to apply the rate named in the bill of lading when a route carrying such a rate is available, and in case there is an inconsistency between a rate and a route when both are named in the bill of lading furnished by the shipper, the carrier should request of the shipper which one is to be followed, and if the initial carrier fails to inquire of the shipper and routes the freight over a route which carries a higher rate than shown in the bill of lading, it is responsible for misrouting. Block-Pollock Iron Co. v. H. E. & W. T. Ry. Co., 19 I. C. C. 505.

(b) On shipments moving during Federal control, some of the bills of lading contained instructions as to both rate and route, and others as to rate only. Rate named was not applicable over any route of the originating carrier, but applied in connection with a competing line to which shipper might have tendered shipments. HELD, following Mulkey Salt Co., 66 I. C. C. 441, shipments misrouted where both of the carriers at point of origin were federally controlled, since they were "being operated under a unified and coordinated national control and not in competition." Reparation awarded. American Hominy Co. v. Director General, as Agent, 74 I. C. C. 204.

(c) When both rate and route are inserted by the shipper in the bill of lading and they do not coincide it is the duty of the initial carrier's agent to ascertain from the shipper before forwarding the shipment whether he desires that the instructions as to the rate or the route shall govern, and the carrier is responsible for any damages which may result from the failure of its agent to follow his course. Conference Ruling 474(c). American Hominy Co. v. Director General, as Agent, 74 I. C. C. 204, 205.

(d) Shipper specified rate and route in bills of lading, and shipments moved via such route. Rate designated did not apply via route of movement, but was applicable over other routes. HELD: When both rate and route are inserted by shipper in bill of lading and they do not coincide, it is the duty of initial carrier's agent, before forwarding shipments, to inquire of shipper which he desires to govern. Moreover, it is the duty of the agent to refrain from executing bills of lading containing contradictory provisions. Conf. Ruling 474 (c). Shipments found misrouted and reparation awarded. Republic of France v. M. & T. Ry. Co. of T., 77 I. C. C. 383.

ALL OTHER CITATIONS

Gibson Fruit Co. v. C. & N. W. Ry. Co., 21 I. C. C. 644, 645; Isbell-Brown Co. v. G. T. W. Ry. Co., Unrep. Op. 226; American Agricultural Chemical Co. v. Bangor & Aroostook R. R. Co., 28 I. C. C. 398, 400; Bruner Co. v. S. Ry. Co., 40 I. C. C. 549, 551; Union Saw Mill Co. v. St. L. I. M. & S. Ry., 40 I. C. C. 661, 666; Riverside Western Oil Co. v. Midland Valley R. R. Co., 42 I. C. C. 589; Rudiger, Assignee v. I. C. R. R. Co., 43 I. C. C. 149; Earle Fruit Co. v. O. S. L. R. R., 46 I. C. C. 510, 511; American Bridge Co. v. N. & W. Ry., 47 I. C. C. 235, 236; Republic of France v. M., K. & T. Ry. Co. of T., 77 I. C. C. 384.

§9. (2) With Tariff.

See Tariffs.

IMPORTANT CASES SINCE 1908

(a) A provision in a bill of lading being outside the tariff announcement, was in no sense a limitation upon the right of the shipper to have his commodity transported in the manner, and at the rate, specified in the rate schedule. Woodward & Dickerson v. L. & N. R. R. Co., 15 I. C. C. 170, 172; decision of Commission sustained, 187 Fed. 874; 191 Fed. 705.

(b) In previous cases and conference rulings Commission has held that when both rate and route are inserted by

shipper in bill of lading and they do not coincide, it is the duty of initial carrier's agent to ascertain from shipper before forwarding shipment whether instructions as to rate or route shall govern. Bangor National Slate Co. v. L. V. R. R. Co., Unrep. Op. A-794.

(c) Notation of two rates on bill of lading put the initial carrier's agent upon inquiry, and it was his duty to ascertain the wishes of the shipper. Beloit Iron Works v. C. M. & St. P. Ry. Co. Unrep. Op. 1896.

§9. (3) With Shipping Ticket.

See Shipping Ticket.

IMPORTANT CASES SINCE 1908

(a) Where bills of lading and shipping orders are prepared by the shipper and the shipper notes upon the bill of lading certain instructions which it fails to note on the shipping order, the carrier cannot be held liable for misrouting if it complies with the instructions shown on the shipping order. American Agricultural Chemical Co. v. B. & A. R. R. Co., 28 I. C. C., 398 401.

(b) When a shipper prepares a bill of lading providing for the carriage of property to a particular destination and marks a different and erroneous address on the package, the carrier will not be held responsible for the freight charges incurred in transporting the property to the destination shown on the package, although the correct destination is shown on the bill of lading. American Agricultural Chemical Co. v. Bangor & Aroostook R. R. Co., 28 I. C. C. 398, 401.

ALL OTHER CITATIONS

Evans & Howard Fire Brick Co. v W. R. R. Co., 26 I. C. C. 152, 153; American Agricultural Chemical Co. v. B. & A. R. R. Co., 28 I. C. C. 398, 401.

§9½. Inspection.

IMPORTANT CASES SINCE 1908

(a) Wire fence from Adrian, Mich., intended for delivery at San Angelo, Texas, delivered at Menard, Tex., was misrouted. The bill of lading was defective, its provisions impossible of execution, and it was the duty of initial carrier's agent to call upon consignor for further instructions before forwarding shipment. Peerless Wire Fence Co. v. Wabash R. R. Co., 38 I. C. C. 721, 722.

(b) Bill of lading contained the following clause: "Hold Chicago for inspection. Allow inspection." The shipment was not held and the shipment reached its original destination before reconsignment instructions were received. HELD, charges collected were not unreasonable. Miller & Co. v. C. St. P. M. & O. Ry. Co., Unrep. Op. A462.

ALL OTHER CITATIONS

Thompson v. Hiberian Bank & Trust Co. (La., 1920), 86 So. 652.

§10. Route Designated by Shipper.

See Routing and Misrouting §7.

IMPORTANT CASES SINCE 1908

(a) No stipulation in the bill of lading can operate to exempt a carrier from the duty imposed by sec. 15 of the Act to route the shipment as directed by the shipper. Weyl-Zuckerman & Co. v. C. M. Ry. Co., 27 I. C. C. 493, 495.

(b) Where bills of lading and shipping orders are prepared by the shipper, and the shipper notes upon the bill of lading certain instructions which it fails to note on the shipping order, the carrier cannot be held liable for misrouting if it complies with the instructions shown on the shipping order. American Agricultural Chemical Co. v. B. & A. R. R. Co. 28 I. C. C., 398, 401.

(c) When a shipper prepares a bill of lading providing for the carriage of property to a particular destination, and marks a different and erroneous address on the package, the carrier will not be held responsible for the freight charges incurred in transporting the property to the destination shown on the package, although the correct destination is shown on the bill of lading. Brackett Co. v. G. N. Exp. Co., 29 I. C. C., 667, 668.

(d) Where the bill of lading specified a legal rate of 10 cents, and there was only one route over which the shipment could be made at such rate, carrier was sufficiently apprised of the route desired by shipper. Ex Parte Louisville & N. R. Co., (Ala. 1918), 79 So. 139.

(e) Where goods are tendered with a bill of lading showing the route, but no rate, and the goods are moved as routed, and the consignee pays the legal rate over that route, and thereafter files a claim or demand against the carrier, alleging that a lesser rate was the full lawful rate over another and different route, and that the carrier had contracted with him through its agents to meet this competitive rate, and a refund is made to the consignee, such payment, made either by mistake of the carrier or through the

illegal act of an agent of the carrier, may be recovered in a proceeding brought for that purpose. C. of G. Ry. Co. v. Curtis (Ga. App. 1914), 82 S. E. 318.

(f) Shipper inserted in bill of lading wrong car number. Returned upon discovery of the error. Carriers collected the published rate from point of origin to destination and return. Not in violation of Act, and complaint dismissed. Swedish Iron & Steel Corporation v. Bush Terminal Co., Unrep. Op. A-323.

ALL OTHER CITATIONS

Chicago Sewer Pipe Co. v. Director General, 73 I. C. C. 511.

IV. LIMITATION OF LIABILITY.

See Limitation of Liability; Loss and Damage §9; Released Rates.

§11. In General.

IMPORTANT CASES SINCE 1908

(a) The "shipper's load and count" provision is not such a limitation upon carriers' liability as is contemplated by the prohibitions of the Cummins Amendment. It does not appear that this rule operates to limit the liability of the carrier for the full value of the property shipped, but, in its application to a claim for loss because of alleged failure to deliver the whole amount transported, has the effect of placing the burden upon the shipper who loads on his private sidetrack to prove that the amount specified was loaded and that a less amount was taken out of the car by the consignee; whereas in the case of a receipt not so qualified the burden is upon the carrier to prove that the amount specified in the bill of lading was either not in fact loaded, or was delivered, or otherwise to settle for the full value thereof. Louisiana State Rice Milling Co. v. M. L. & T. R. R. & S. S. Co., 34 I. C. C. 511, 513.

(b) Bill of lading provisions with respect to filing of claims or institution of suits on account of loss, damage, or delay found not to prohibit payment of meritorious claims seasonably filed with the carrier, after the two year and one day period has elapsed, but in that they do not accord the shipper the right to a reasonable period after declination of a claim within which to institute suit, where carrier fails to promptly adjust claims, found unreasonable, Discriminatory, and unduly prejudicial. Reasonable provision prescribed. Decker & Sons v. Director General, 55 I. C. C. 453.

(c) Defendants may reasonably and properly provide that the period prescribed within which suit shall be instituted after the declination of a claim shall date from the definite declination in writing of the claim. Decker & Sons v. Director General, 55 I. C. C. 453.

(d) Contention that section 10 of the uniform bill of lading permits a waiver of any of the terms or conditions of the bill of lading, and that carriers have waived the two year and one day period by having paid certain claims after more than two years and one day had elapsed, although suit had not been instituted, not sustained. Decker & Sons v. Director General, 55 I. C. C. 453, 457.

(e) While the limitations in bill of lading must be strictly adhered to and may not lawfully be waived, the provisions of the Cummins amendment do not evidence any intent on the part of Congress to erect a statute of limitations barring payment of seasonably filed claims after any given period. Decker & Sons v. Director General, 55 I. C. C. 453, 458.

(f) No ruling ever made by the Commission prohibiting carriers from paying claims reasonably filed, on the ground that shipper permitted two years and one day to elapse without instituting suit. Decker & Sons v. Director General, 55 I. C. C. 453, 461.

(g) The conditions of a bill of lading regarding the liability of the carriers affect "the value of the service rendered to the * * *, shipper or consignee" within the meaning of section 6 of the act. Export Bill of Lading, 64 I. C. C., 347, 352.

(h) The greater the risk incurred by carriers in connection with transportation covered by bills of lading, the greater the value to the shipper of the service rendered, which should be rewarded correspondingly. A lesser compensation is appropriate in cases where the carrier is to a large extent relieved from full liability. Export Bill of Lading, 64 I. C. C. 347, 354.

N. Y. P. & N. Ry. (Ind., 1914), 89 Atl. 437, 438; G. C. & S. F. Ry. Co. v. Brackett- Fielder Mill & Grain Co. (Tex. Civ App., 1914), 162 S. W. 1191, 1192; I. & G. N. Ry. Co. v. Rathblath (Tex. Civ. App., 1914), 167 S. W. 751; Larkin Co. v. E. & W. Transp. Co., 34 I. C. C. 106, 110; Brockman Commission Co. v. Missouri Pac. Ry. Co., (Mo. 1916), 188 S. W. 920; Perdue v. B. & O. S. W. R. R., 47 I. C. C. 210.

§11½. Miscellaneous Provisions.

IMPORTANT CASES SINCE 1908

(a) "Shipper's load and count" provision not such a limitation of carrier's liability as is contemplated by Cummins amendment. Louisiana State Rice Milling Co. v. M. L. & T. R. R. & S. S. Co., 34 I. C. C., 511, 513.

(b) In case cars move through to destinations or distant transfer points, the billing is based on "Shipper's Load and Count." Trap or Ferry Car Service Charges, 34 I. C. C., 516, 527.

(c) Rule providing that the notation "shipper's load and count," must be entered on bill of lading covering shipments loaded by shippers without check by carrier, may be canceled. Western Trunk Line Rules, 34 I. C. C., 554, 574, 575.

(d) Complainants' tonnage not sufficient to warrant refrigerator or heated car service, and notation on bills of lading exempting carriers from damage caused by freezing not found unlawful. Longo Fruit Co. v. I. T. System, 38 I. C. C. 487, 489.

(e) Where a shipper has complied with the carrier's requirements with respect to duly filing a claim, he is entitled to a reasonable period after the declination of the claim within which to institute suit if he so desires. Decker & Sons v. Director General, 55 I. C. C. 453, 460.

(f) The right of a carrier to require reasonable notice of claims against it is well recognized. Decker & Sons v. Director General, 55 I. C. C. 453, 459, 460.

V. ORDER-NOTIFY SHIPMENTS.

See Demurrage §7.

§12. In General.

IMPORTANT CASES SINCE 1908

(a) An order-notify shipment is notification to the carrier that title to the consignment is retained in the consignor until delivery of the bill of lading properly endorsed. Ordinarily the order-notify bill of lading is forwarded to the banks with sight draft attached for the value of the shipment and the person notified at destination can only obtain possession of it by payment of the draft. The carrier cannot, without incurring liability, deliver such a shipment until the bill of lading is properly surrendered. Harlow, Trustee, v. Washington Southern Ry. Co., 26 I. C. C. 511.

(b) Complainant, a manufacturer of roofing tile, assailed as unreasonable and discriminatory, defendants' rule embodied in a circular of instructions to freight agents, requiring agents to decline to receive shipments of freight "to order" with instructions to notify parties residing elsewhere than at the point to which shipment is made, except export shipments and shipments of cotton, cotton linters or regins. Traffic in the Southeast is handled largely on card waybills, containing condensed information as to point of origin, destination, consignees, etc., and confusion would result from showing thereon a notification point other than that of destination. The exception as to export traffic was established because such traffic is usually promptly unloaded at the ports for delivery to water carriers. The exception as to cotton, etc., grew out of a practice among New England cotton mills when there were no mills in the South, of considering a general office for a group of mills as a common destination point. HELD, that the rule was not unreasonable, nor discriminatory because of the exception thereto. To make an exception of roofing tile, however, would be to discriminate against other like kinds of traffic. The rule should be filed with the Commission, modified so as to require agents to accept shipments, as a common carrier cannot decline traffic offered to it, and the exceptions as to cotton should be eliminated. The carrier may provide that it will not execute a bill of lading which

contains a provision for notifying a person at a point other than the destination of the shipment. Ludowici-Celadon Co. v. A. C. L. Ry. Co., 28 I. C. C. 693.

(c) Carriers may provide rule that bill of lading will not be executed which contains a provision for notifying a person at a point other than the destination of shipment. Ludowici-Celadon Co. v. A. C. L. R. R. Co., 28 I. C. C. 693, 696.

(d) By the so-called Pomerene bill, or bills of lading Act, approved August 29, 1916, and made effective January 1, 1917, relating to bills of lading in interstate foreign commerce, it is provided that a bill in which it is stated that the goods are consigned to a specified person is a "straight" bill, and one in which it is stated that the goods are consigned or destined to the order of a person is an "order" bill. The primary purpose of this law is to enlarge and enhance the negotiability features of "order" bills of lading and by definitely fixing the law with respect to negotiability, and the imposition of greater responsibility upon carriers, to afford greater protection to those who in the course of commercial transaction handle and deal in such bills. The "order" bill, which is made negotiable by this law, differs from the straight bill in common usage, and from the form to be prescribed to the commission, only in the fact that by endorsement printed on the face of the bill it is denominated an "order" bill. Bills of Lading, 52 I. C. C. 671, 690.

(e) Modification of provision to the effect that the issuance of bills of lading for freight consigned to shipper's order at one point, notify consignee at another point, except where consignee is located at a prepay station or off-line, suggested. Consolidated Classification Case, 54 I. C. C. 14.

(f) To require "notify consignees" to surrender original bills of lading as a condition precedent to an order, designating place of unloading when carrier is able to make delivery, would burden this class of shippers without saving to carrier, other than that which could be affected by providing that such orders may be given, without surrender of original bill or execution of an indemnity bond, by party designated on billing as the notify consignee, or any party able to establish his identity as the assignee of such notify consignee. Reconsignment and Diversion Rules, 58 I. C. C. 568, 576.

(g) While rule providing that order designating delivery must be accompanied by a surrender of bill of lading, or execution of suitable indemnity bond, may be entirely reasonable as related to ordinary reconsignments, where new bill of lading is issued upon surrender of original bill there can not be any warrant in law for requiring surrender of a bill of lading unless carrier is able to make delivery of the freight covered by such bill. Reconsignment and Diversion Rules, 58 I. C. C. 568, 576.

(hi) Rule proposing that shipments covered by "order notify" bills of lading, placed on hold tracks awaiting surrender of bill of lading, or for inspection before delivery, necessitating subsequent movement to delivery point, will be considered as reconsignments within switching limits before placement found justified, provided that surrender shall not be a condition precedent to placement or giving of order designating placement, except where delivery designated is other than local team tracks, original bills must be surrendered or indemnity bond executed or satisfactory assurance given carrier. Reconsignment and Diversion Rules, 58 I. C. C. 568, 577.

(j) Where the consignee of order notify bill has long been in business he must have established credit with carriers and no greater burden should be imposed on him than on the consignee of a shipment under a regular bill of lading. In other words, the order notify billing, which is recognized as a business necessity, ought not to be used as a means of imposing additional burdens on consignors or consignees where no additional service or obligation is placed on the carrier. Reconsignment and Diversion Rules, 58 I. C. C. 568, 577.

(k) Order notify billing, which is recognized as a commercial necessity, ought not to be used as a means of imposing additional burdens on consignors or consignees where no additional service or obligation is placed on the carrier. Diversion and Reconsignment Rules, 61 I. C. C. 385, 390.

(l) No reason is perceived why order notify shipments placed for inspection upon the request of consignee or in conformity with billing instructions, and which require a subsequent movement, should not be subject to the same rule and charges as "straight" consignments placed for inspection. Diversion and Re-

consignment Rules, 61 I. C. C. 385, 392.

(m) In order to facilitate the movement of order notify cars through hold yards to the place of unloading, if within the switching limits, carriers should accept disposition orders prior to their arrival without requiring the surrender of the bills of lading, providing the place designated for unloading is a public team track. A. B. Alpirn v. Director General, 62 I. C. C. 486, 487.

(n) Inasmuch as these were order notify shipments, complainants title thereto depended upon possession of the bills of lading properly endorsed, and defendant was justified in declining to accept disposition orders until the bills had been surrendered or other satisfactory assurance given. A. B. Alpirn v. Director General, 62 I. C. C. 486, 487.

(o) Request received too late to accomplish diversion, and shipment arrived at originally billed destination, where it was placed upon public delivery tracks. Refused by order notify consignee and subsequently reconsigned. HELD, fact that this was an order notify shipment did not preclude carrier from placing car for unloading prior to surrender of bill of lading in absence of instructions to the contrary, and as tariff provided that if a car was placed at original destination and reforwarded without being unloaded it would be subject to rates to and from reconsignment point, combination charged found not unreasonable or unlawful. Sullivan Lumber Co. v. Director General, as Agent, 66 I. C. C. 119.

(p) Shipments moved to ports of exit on shipping receipts or domestic bills of lading, which were exchanged, in conformity with the governing tariffs, for through export bills of lading. Shipments were all consigned "order notify" consignees at foreign ports, but export bills contained no direction to notify any party at ports of exit. Demurrage and storage charges assessed but not paid found illegal. There were no parties to be notified at the ports and no parties were notified of the arrival of the shipments or that carriers were ready to deliver. United States Steel Products Co. v. Director General, as Agent, 73 I. C. C. 505.

(q) Shipments moved to San Francisco, Calif., under "order notify" bills of lading, for export, and were unloaded into private warehouse at consignee's request. Shipments subsequently exported. Tariff provided export rate where domestic bills of lading exchanged for export bills at port of exit. HELD, delivery to warehouse at consignee's order tantamount to delivery to consignee, and carrier justified in demanding surrender of negotiable bills of lading for its protection. Domestic rates assessed found applicable. Rolph, Mills & Co. v. Director General, as Agent, 74 I. C. C. 751, 752, 753.

(r) Provision in a bill of lading to notify one other than the consignee does not warrant the carrier in delivering the shipment, save by order of the lawful holder of the bill of lading. King v. Barbarin, 249, Fed. 303.

(s) A car billed "to order" is notification to the carrier that title to the property remains in the consignor until delivery of the bill of lading, properly endorsed. And such a rule is not found unreasonable. Scattergood & Co. v. C. M. & St. P. Ry. Co., Unrep. Op. A412.

(t) Following Ludlowici-Celadon Co. v. A. C. L. R. R. Co., 28 I. C. C., 693, rule of western classification under which carrier declines to execute order bills of lading for shipments consigned to one point with instructions to notify another party at another point, not found unreasonable. Michigan Steel Boat Co. v. A. T. & S. F. Ry. Co., Unrep. Op A—832.

(u) Rule of western classification under which carrier declines to issue order bills of lading for shipments consigned to one point with instructions to notify another party at another point, not found unreasonable. Michigan Steel Boat Co. v. A. v. A. T. & S. F. Ry. Co., Unrep. Op. A-832.

VI. REPARATION AND DAMAGES.

See Reparation.

§13. In General.

IMPORTANT CASES SINCE 1908

(a) An error of the T. & P. Ry. Co. in refusing to issue the regular bill of lading as required by its tariff found to have resulted in the exaction of unreasonable charges on cottonseed oil from Louisiana and Texas to Chicago. Damages awarded. Seaboard Refining Co. v. A. G. S. R. R. Co., 25 I. C. C. 702.

(b) Shipper's agent, without knowledge of specially quoted rate, signed bill of lading bearing higher rate. Reparation awarded on account of unreasonable

rate charged. Hill Grain Co. v. I. C. R. R. Co., 42 I. C. C. 321.

(c) Bill of lading for brass ingots, described by shipper as "scrap brass," altered enroute to read "brass ingots." Charges not found unreasonable or unlawful. Great Western Smelting & Refining Co. v. A. T. & S. F. Ry. Co. Unrep. Op. 1900.

(d) Plaintiff shipped goods from Vancouver, Wash., to Canton, Ohio, via the S. P. & S. Ry. and Penn. R. R., and forwarded the bill of lading to the consignee. The latter returned the bill of lading to plaintiff with notice that it would not receive the goods; whereupon plaintiff gave notice to the S. P. & S. Ry., of the consignee's action, surrendered to it the bill of lading, and directed a return of the goods. The S. P. & S. Ry. communicated such to the Penn. R. R., but the latter failed to observe it and eventually delivered the goods to the consignee, and the goods were lost to plaintiff. Plaintiff brought action against the S. P. & S. Ry. for the damages. HELD, that plaintiff was the lawful holder of the bill of lading within the provisions of the Carmack Amendment; that the Penn. R. R. in delivering the goods to consignee without productions of the bill, did so at its peril; and that the S. P. & S. Ry., as initial carrier, was liable in damages. Coovert v. S. P. & S. Ry. Co. (Wash. 1914), 141 Pac. 324.

§14. Correcting of Bill of Lading.

IMPORTANT CASES SINCE 1908

(a) Carrier's contention that bills of lading must govern in determining the rate legally applicable, and that shipper can not show by parol evidence that shipments were of something other than as described by it or its agent in the transportation contract contained in the bills of lading, found to be without merit. Harris Bros. Co. v. Director General, as Agent, 60 I. C. C. 428, 430.

ALL OTHER CITATIONS

Domestic Bill of Lading and Live Stock Contract 66 I. C. C. 63; Stoppage of Goods in Transit, 66 I. C. C. 423; Great Western Smelting & Refining Co. v. A. T. & S. F. Ry. Co., Unrep. Op. 1900.

§15. Filing With Commission.

IMPORTANT CASES SINCE 1908

(a) The courts determine the validity of provisions in the bill of lading just as they do in the case of other contracts, and do not consider whether or not particular provisions, not contrary to the law, should be included or omitted. In the matter of bills of lading 64 I. C. C. 347, 353.

(b) Upon petition for modification of the Commission's former report, 64 I. C. C., 357, service of which was made in compliance with rule XV of the Rules of Practice, and to which no objections have been raised, rules and regulations prescribing forms of uniform domestic bill of lading and live-stock contract, so as to eliminate doubt as to the liability of the consignee for charges and remove any opportunity for confusion, approved. Domestic Bill of Lading and Live Stock Contract, 66 I. C. C. 63.

(c) Proposed rule under which shipper is required to execute agreement for stoppage of goods in transit, and where shipper is unknown or irresponsible, the agent must require one or more sureties to sign with him, found not justified. Such rule indefinite as to number of sureties required, reposes too much arbitrary power in agents to decide who is or is not "responsible," compliance therewith might require considerable time and result in loss of right to stop, because of delivery at destination, and terms of agreement are inconsistent with recognition by respondent of any duty to obey the order to stop. Stoppage of Goods in Transit, 66 I. C. C. 423.

(d) There is a presumption that copies of forms of bills of lading in use by interstate carriers have been filed with the Interstate Commerce Commission. Southern Ry. Co. v. Lewis & Adcock Co., (Tenn. 1918), 201 S. W. 131.

I. CONTROL AND REGULATION.

See Control and Regulation.

§1. Jurisdiction of Commission.

See Interstate Commerce Commission I.

CASES 1887-1908

(a) Complainant attacked rates on pig iron from furnaces in the state of New York and from furnaces in Ohio and Pennsylvania to New England points as unjust, unreasonable and discriminatory. HELD, rates from Poughkeepsie, N. Y. are in themselves, as well as relatively, the same in substance as rates charged other manufacturers of pig iron at the producing furnaces in New York. The cost of the production of pig iron at a furnace situated at Poughkeepsie is much greater than at Youngstown, Ohio, or Birmingham, Ala., or at other points west and south; and while the aggregate charge to New England mills is a great deal lower than the aggregate rate charged on these western and southern irons to the same mills, yet it is not sufficiently so to overcome the difference in the cost of production; The Commission can not order the defendant to lower these rates from Poughkeepsie to points on the B. & A., one half, and to Holyoke, Mass., one half, in order to overcome the difference in the cost of production of pig iron now existing against complainant. Complaint dismissed. Poughkeepsie Iron Co. v. N. Y. C. & H. R. Co., 3 I. C. C., 248.

IMPORTANT CASES SINCE 1908

(b) While the Commission has authority to deal with group rates, it is doubtful if it can entirely ignore substantial differences in distances upon short hauls. Anadarko Cotton Oil Co. v. A., T. & S. F. Ry. Co., 24 I. C. C., 327, 330.

(c) While under the Act, as amended by the Hepburn Act of June 29, 1906, the Interstate Commerce Commission may have power to enter upon a plan looking toward a system of rates wherein the rates, for longer and shorter hauls, will taper downward according to distance, provided such tapering is both comprehensive and symmetrically applied, it has no power by the use of differentials to artificially divide up the country into trade zones, tributary to given trade and manufacturing centers so as to give the Commission power to pre-determine what the trade and manufacturing centers shall be. Orders of the Interstate Commerce Commission in 14 I. C. C., 299 and 15 I. C. C., 555, enjoined. C., R. I. & P. Ry. Co. v. I. C. C., 171 Fed. 680, 683 Reversed 218 U. S. 88, 30 Sup. Ct. 651. 54 L. ed. 946.

(d) Seventeen carriers applied to the Commission for relief from the provisions of the 4th section, their applications covering the whole territory from the Atlantic seaboard to the Pacific coast and the Gulf of Mexico, embracing practically the entire country. They asked authority to continue all rates on the tariffs presented, from Atlantic to Pacific and contrariwise, and to and from interior points, lower than rates concurrently in effect from and to intermediate points. The Commission refused to grant their petitions unquali-

fiedly, but entered an order permitting in some respects a charge of a lower rate for the longer haul than was asked for the shorter, provided a proportionate relation was maintained between them, the proportion to be upon the basis of percentages which were fixed. For the purpose of the order the Commission adopted in substance a division of the entire territory into separate zones, which division had been resorted to by the carriers for the purpose of establishing the rates in relation to which the petitions were filed. The carriers contended that under the 4th section as amended by the Act of June 18, 1910, the Commission was limited to ascertaining the existence of competition and to authorizing the carrier to meet it, without any authority to do more than exercise its general powers concerning the reasonableness of rates at all points. HELD, that under the 4th section as amended, the Commission is not only authorized to consider competitive conditions and their relation to persons and places, but also the right to do that by which alone it could be exerted, namely, the establishment of zones and percentages. United States v. A., T. & S. F. Ry. Co., 34 Sup. Ct. 986, 994; 234 U. S. 476; 58 L. ed.—; reversing 191 Fed. 856, enjoining the orders of the Commission in the so-called Intermountain Cases.

(e) Interstate Commerce Commission's order requiring railroads to cease unfair discrimination, in charging higher through rate from one point than from other points within blanket territory held not violative of the due process clause, because lower rate would be confiscatory as to one of the connecting roads, since the order could be complied with by increasing the lower rate from the other points, or by increasing such road's share of the rate. United States v. Illinois Cent. R. Co. 44 Sup. Ct. 189.

C., 149, 155; Waukesha Lime & Stone Co. v. C., M. & St. P. Ry. Co., 26 I. C. C., 515, 518; Newport Mining Co. v. C. & N. W. Ry., 33 I. C. C., 645, 657.

II. LEGALITY OF GROUP RATES.

See Legality of Group Rates.

§2. In General.

CASES 1887-1908

(a) The propriety of the application of the principle of grouping is properly open to challenge in every case and every case must be justified upon its own facts and peculiar circumstances. Howell v. New York, Lake Erie & Western R. Co., 2 I. C. R. 162.

(b) The system of grouping is not of itself necessarily illegal; it only becomes illegal when it can be shown that illegal results flow from it, in the infliction of actual injury. Howell v. New York, Lake Erie & Western R. Co., 2 I. C. R., 162.

(c) Group rates may be properly made from a large number of mines practically composing a coal mining district extending across the State of Illinois to points in Western Wisconsin, Minnesota, and Dakota, the distance from each part of the group by some route being substantially a fair equivalent of the distance from other points, and the commercial necessities being substantially the same for all. Rend. v. Chicago & Northwestern R. Co., 2 I. C. R., 313.

(d) The group rate so established is properly extended to coal shipped to the same territory locally from Chicago, on account of the operation of the fourth section of the Act, some of the lines passing through the mining district en route from Chicago to the points of distribution. Rend v. Chicago & Northwestern R. Co., 2 I. C. R., 313.

(e) A group rate for a particular district upon a commodity for which a large demand exists, and intended to place producers in the district upon an equality among themselves and with producers of the same commodity from other districts, all competing in a common market, is not unlawful merely on account of differences in the geographical location of different producers and their respective distances from the market. Imperial Coal Co. v. Pittsburgh & L. E. R. Co., 2 I. C. R., 436.

(f) The practice of making one rate on the same product over a large district is only justifiable under special and exceptional circumstances and is not to be encouraged when the difference in the transportation expense from the various parts of such district is considerable and substantial. Newland v. Northern P. R. Co., (Com.), 4 I. C. R., 474.

(g) The practice of making one rate on the same product over a large district is only justifiable under special and exceptional circumstances, and is not to be encouraged when the difference in the transportation expense from the various parts of such district is considerable and substantial. Newland v. Northern P. R. Co., 6 I. C. C., 131; Evans v. Union P. R. Co., 520.

(h) The rule that while the aggregate rate should increase, the rate per ton per mile should decrease as distance increases is not one required by the statute and is subject to qualifications and exceptions. Group rates extending over considerable areas disregard that rule and yet such rates are not considered illegal unless they operate to subject some shipper, locality or species of traffic to undue and unreasonable advantage. Hilton Lumber Co. v. Wilmington & W. R. R., 9 I. C. C., 17, 31.

IMPORTANT CASES SINCE 1908

(i) The Commission has often approved blanket rates. It undoubtedly should, in so far as it consistently can, approve such a rate upon citrus and deciduous fruits from California. That feature of the rate is highly satisfactory to the grower, and brings this article into more general use at remote points than would otherwise be possible. In passing upon the reasonableness of the blanket rate, the Commission must undoubtedly offset the rate to the nearer point against that to the more distant point, but where the application of such a rate clearly results in imposing unjust and unreasonable transportation charges at the nearer point this fact cannot be ignored or excused simply because a rate less than is just is granted at the more distant points. Commercial Club of Salt Lake City v. A. T. & S. F. Ry. Co., 19 I. C. C. 218, 226.

(j) Group adjustments are not unlawful so long as the discriminations between the groups and between the several points in the same group are not undue. An undue degree of inequality may be shown only by substantial evidence dealing with the situation as a whole, and mere comparisons of distance, without other material and supporting facts adduced of record, do not justify a further division of the grouping. Galion Iron Wks. & Mfg. Co. v. B. & O. R. R., 47 I. C. C. 136, 139, 140.

(k) Carriers must not discriminate in disregarding distance and other factors and blanket an extensive territory served by their own lines, and in some instances by independent lines as well, and refuse to accord similar treatment to points served by other proprietary or nonproprietary lines within the general geographical and distance limits of the blanket territory. Pacific Lumber Co. v. N. W. P. R. R., 51 I. C. C. 738, 759.

(l) The Commission has never held that it is necessary, in order to preserve advantages of location, that rates should be based rigidly on mileage or on cost of service. There are limits of reasonableness in the making of rates which admit of a certain degree of flexibility in their adjustment for the sale of convenience and simplicity or for the purpose of meeting commercial and competitive conditions. Out of such conditions rate blankets grow, and there is nothing unlawful in their construction, provided they are well balanced and their advantages and disadvantages fairly distributed. Portland Traffic & Transportation Asso. v. Director General, 69 I. C. C. 165, 170.

(m) Most adjustments of rates on a group basis result in some inequalities when distance alone is considered, but such inequalities are not of necessity unreasonable and unjust. Weirton Steel Co. v. Monongahela Ry. Co., 77 I. C. C. 622, 626.

(n) Group rates disregard distance to some extent, and it is not infrequent that localities within a group suffer thereby. Ohio-Michigan Coal Rates, 80 I. C. C. 663, 677.

(o) The commission has consistently refrained from breaking up a group where it has not been made to appear that party seeking such action is actually damaged by discrimination which results from the group rate. Newport Mining Co., 33 I. C. C., 645, 657, and cases cited. Perry County Coal Corp. v. E. St. L. & S. Ry. Co., 80 I. C. C. 711, 715.

Co., 41 I. C. C. 317, 320; Eastern and Western Lumber Company v. O. W. R. R. & N. Co., 41 I. C. C. 545, 550; LaCrosse Shippers' Asso. v. C. & I. L. Ry., 43 I. C. C. 520, 523; Sergeant Glass Co. v. Penn. R . R. 43 I. C. C. 622, 624; The New York Harbor Case, 47 I. C. C. 643, 712; Western Trunk Line Potatoes, 50 I. C. C. 407, 411; Sheboygan Asso. of Commerce v. C. & N. W. Ry. Co., 55 I. C. C. 140, 144; National Tube Co. v. L. T. R. R., 55 I. C. C. 469, 479; Silica Sand Producers' Asso. v. Director General, as Agent, 58 I. C. C. 549, 552; Inland Empire Shippers League v. Director General, 59 I. C. C. 321, 339, 341; James A. Coad v. C. St. P. M. & O. Ry. Co., 64 I. C. C. 178, 180; Sand and Gravel from Michigan City, 64 I. C. C. 512, 514; Clinton Paving Brick Co. v. Director General, 66 I. C. C. 338, 344; Belber Trunk & Bag Co. v. W. J. & S. R. R., 66 I. C. C. 490, 493, 494; Hagerstown Chamber of Commerce v. W. M. Ry. Co., 74 I. C. C. 741; Milwaukee Chamber of Commerce v. B. & Q. R. R. Co., 78 I. C. C. 110, 117, 118.

§3. Justification.

CASES 1887-1908

(a) The practice of making one rate on the same product over a large district is only justifiable under special and exceptional circumstances and is not to be encouraged when the difference in the transportation expense from the various parts of such district is considerable and substantial. Newland Hauschild & Reeder v. N. P. R. R. Co., 4 I. C. C. 474, 480.

(aa) The practice of making one rate on the same product over a large district is only justifiable under special and exceptional circumstances, and is not to be encouraged when the difference in the transportation expense from the various parts of such district is considerable and substantial. Evans v. U. P. R. R. Co., 6 I. C. C. 520, 546.

IMPORTANT CASES SINCE 1908

(b) Blanket rates put in competition producers throughout the producing district, and provide a guaranty against exorbitant prices or undue profits. Wisconsin & Arkansas Lumber Co. v. St. L., I. M. & S. Ry. Co., 33 I. C. C., 33, 38.

(c) Where, under the pleadings the rate from every point in a blanket to every destination involved is put in issue, testimony pointing out that the blanket has been developed more by adding points nearer to the destinations than by adding points further away, is relevant and material and therefore admissible. Oklahoma Cottonseed Crushers' Assn. v. M. K. & T. Ry. Co., 39 I. C. C. 497, 500.

(d) While the Commission has in some instances approved group adjustments and other plans initiated by the carriers to provide a common rate for shippers differently located, it has uniformly condemned attempts on the part of the carriers to use their transportation rates as a means of equalizing commercial conditions. Utah-Idaho Millers & Grain Dealers Assn. v. R. R. Co., 42 I. C. C. 648, 656.

(e) The chief justification for a rate zone is that it places all producers on the same footing in a given market. Blanket or group rates in many cases are of great advantage to the public without serious injustice to any interest, though there is of necessity more or less disregard of distance and varying degrees of inequality. The New York Harbor Case, 47 I. C. C., 643, 712, 713.

(f) Blanket or group rates very often

grow out of commercial, competitive, or transportation conditions. In some instances natural or geographical conditions, such as rivers and state lines, form the boundaries of rate groups. Many districts with a characteristic traffic, such as lumber, grain or fruit, under current tariffs are divided into one or more rate groups. Areas underlaid with coal, ore or other minerals are often broken up into rate zones according to their grade or quality. Blanket or group rates resting on such conditions have many times been commended by the Commission, because, although they usually involve some disregard of distance, they nevertheless promote a healthy competition and put producers and consumers on a more or less equal basis. But rate groups ordinarily should be neither broader nor narrower than is required by the conditions on which they are based. Humphrey Brick & Tile Co. v. Penn. R. R., 50 I. C. C. 457, 464.

(g) Whether or not rates in any district should be grouped so as to equalize points on trunk lines and their connections in that district is essentially a ratemaking matter involving exercise of judgment. National Tube Co. v. L. T. R. R., 55 I. C. C. 469, 479.

(h) The Commission has recognized the system of group-rate making as proper, within limits, except where shippers or consignees are really damaged by the rates thus afforded while others are correspondingly benefited, and has generally refrained from breaking up a group where it has not been made to appear that the party seeking such action is actually damaged by the discrimination that results from the group rate. South Dakota Ry. Commissioners v. A. & W. Ry. Co., 74 I. C. C. 295, 306, 307.

(i) Commercial competition and the conditions under which industries are compelled to conduct their business as distinguished from transportation conditions are important considerations in the adjustment of group rates. Melcroft Coal Co. v. Indian Creek Valley Ry., 81 I. C. C. 251, 258.

ALL OTHER CITATIONS

Ferguson Saw Mill Co. v. St. L. I. M. & S. Ry. Co., 18 I. C. C. 396, 398; Sawyer & Austin Lumber Co. v. St. L. I. M. & S. Co., 21 I. C. C. 464, 466; Suffern Grain Co. v. I. C. R. R. Co., 22 I. C. C. 178, 181; Waukesha Lime & Stone Co. v. C., M. & St. P. Ry. Co., 26 I. C. C. 515, 518, 519; Kaufman Commercial Club v. T. & N. O. R. R. Co., 31 I. C. C. 167, 170; Public Utilities Commission of Idaho v. O. S. L. R. R. Co., 33 I. C. C. 103, 106; American Sand & Gravel Co. v. C. & N. W. Ry., 48 I. C. C. 1, 2, 4; Natchez Chamber of Commerce v. L. & A. Ry., et al., 52 I. C. C. 105, 124.

§4. Public Benefit.

See Evidence §44½.

IMPORTANT CASES SINCE 1908

(a) It is by no means certain that postage-stamp rates, as applied to the distribution of the products of the Pacific Coast states, are not upon the whole for the general public good. Arlington Heights Fruit Exchange v. S. P. Co., 22 I. C. C. 149, 156.

(b) If the cost of mining coal is considered by the carriers in fixing the rates from one district, the same consideration cannot lawfully be denied by the same carriers serving another district in which there are mines operating under the same conditions. San Toy Coal Co. v. A. C. & Y. Ry., 34 I. C. C. 93, 98.

(c) The fact that on one commodity moving outbound, several points constitute a single group is pertinent in considering the reasonableness of an adjustment on another commodity moving inbound under which such points are divided into two or more groups, but such a showing is not convincing, even though it appear that the second commodity is used largely in the manufacture of the first, in the absence of proof of substantial similarity of conditions, transportation and otherwise, surrounding their movement, for it might be that competition has influenced the establishment of an adjustment on the one which it would not be just to the carriers to require on the other. Alpha Portland Cement Co. v. B. & O. R. R., 34 I. C. C. 414, 421.

(d) The practice of embracing many points within the same group or zone has been so generally adopted by the carriers and so frequently recognized as proper that its general propriety can hardly be challenged. Not only does this practice greatly simplify the publication of tariffs, to the convenience of both the carriers and the public, but the application of a common rate to a number of points in the same general territory effects an equality of opportunity which is usually most desirable; and this is

particularly true where the points in question produce and ship the same commodity or derive their raw materials from the same sources. The New York Harbor Case, 47 I. C. C. 643, 712.

(e) Grouping or blanket arrangements are of great advantage to the public, and once established groups should not be lightly or unnecessarily disturbed. But the Commission has never approved a group rate that resulted in undue prejudice to any part of the group; and whether or not the grouping of points constitutes undue or unjust discrimination must be determined from the facts in each case. The New York Harbor Case, 47 I. C. C. 643, 713.

(f) Blanket or group rates resting on commercial, competitive, transportation, natural or geographical condition, or characteristic traffic, have many times been commended by the Commission, because although they usually involve some disregard of distance, they nevertheless promote a healthy competition and put producers and consumers on a more or less equal basis. Humphrey Brick & Tile Co. v. P. R. R., 50 I. C. C. 457, 464.

(g) The system of group rate making has been recognized as proper, within limits, except where shippers or consignees are really damaged by the rates thus afforded while others are correspondingly benefited, and the Commission has generally refrained from breaking up a group where it has not been made to appear that the party seeking such action is actually damaged by the discrimination that results from the group rate. South Dakota Railway Commissioners v. A. & W. Ry., 74 I. C. C. 295, 306.

(h) The Commission has frequently recognized the principle that group or blanket adjustments of rates are justified upon the theory that they are of benefit to commerce. Under such adjustments obviously some shippers will be farther from a given point than others in the same blanket. Union Sulphur Company v. A. & W. R. Co., 81 I. C. C. 382, 390.

C. 321, 341; Salt from Louisiana Mines to Chicago, 66 I. C. C. 81, 93.

§5. Custom.

See Custom; Evidence §19½.

CASES 1887-1908

(a) While like or "group" rates are frequently applied to cities considerably further apart than are Omaha and Council Bluffs, the usage in this regard is not so uniform and well established as to make an exception at those cities even prima facie unlawful. Commercial Club of Omaha v. Chicago & N. R. Co., 7 I. C. C. 386.

IMPORTANT CASES SINCE 1908

(b) In transportation of low-grade commodities that move in large quantities it is a long-established custom to group or blanket a number of stations or a large expanse of territory. Kansas City Transportation Bureau v. A. T. & S. F. Ry. Co., 16 I. C. C. 195, 204.

(c) Where points are properly grouped with respect to rates to common markets, distances are fairly to be computed on the average distances of the points in the group. State of Iowa v. Wabash Ry., 46 I. C. C. 703, 709.

(d) The practice of embracing many points within the same group or zone has been so generally adopted by the carriers and so frequently recognized as proper by the Commission that its general propriety can hardly be challenged. New York Harbor Case, 47 I. C. C. 643, 712.

(e) The system of rate making by joining various points into a given group, and establishing the same rate from each point in the group to any given destination, has long been followed by the carriers. This system has contributed largely to the development of the natural resources of the country. It has served to put various producers of a given product in the same territory on an equality as to products destined to any common point of consumption. This system could

not exist if distance were made the primary factor. Inland Empire Shippers League v. Director General, 59 I. C. C. 321, 339.

ALL OTHER CITATIONS

Moise Bros. Co. v. C. R. I. & P. Ry. Co., 16 I. C. C. 550, 556; City of Spokane v. N. P. Ry. Co., 19 I. C. C. 162, 177; Rates for Transportation of Anthracite Coal, 35 I. C. C. 220, 226; Hutchinson Traffic Bureau v. A. T. & S. F. Ry., 40 I. C. C. 160, 163.

III. EXTENSION OF ZONE.

§6. In General.

CASES 1887-1908

(a) Competition between carriers from producing points in the Middle West and the Atlantic Seaboard over the right to serve different portions of the State of Texas was finally adjusted by making the rates to all parts of the common-point territory the same, with a few exceptions; but Amarillo, situated in the Pan Handle of Texas, 142 miles north and west of Quanah, the last common-point station of one of the defendants, does not properly fall within the competitive lines, and therefore complainants' contention that Amarillo should be placed in Texas common-point territory should not be sustained. Nobles Bros. Gro. Co. et. al. v. F. W. & D. C. Ry. Co. et al., 12 I. C. C. 242.

(b) Amarillo, Tex., put in Burnt District group as to commodity rates from Kansas City, but not as to class rates from St. Louis. Nobles Bros. Grocer Co. v. Ft. W. & D. C. Ry. Co., 12 I. C. C. 242.

(c) Lancaster, Tex., transferred from group 2 to group 1 of Texas destination points. Farmers, Mechanics & Shippers Club v. A. T. & S. F. Ry. Co., 12 I. C .C. 351.

IMPORTANT CASES SINCE 1908

(d) Relative distances alone are not controlling. Commercial competition and the interests of consumers also are pertinent considerations. Consumers may properly have the widest possible market consistent with justice to the carriers, and to that end and also in their own interests carriers may, within reasonable limits, as a matter of traffic policy, accord competing producing centers located at different distances from common centers of consumption identical rates. Carriers may not, of course, disregard all differences in distances. Groups cannot be extended indefinitely, and the discrimination inherent in all group adjustments must not be undue. Groups long maintained, however, are presumably fair and are not to be disrupted unless substantial justice clearly requires it. Dissatisfied producers deprived of the benefit of their proximity to common markets must show that they are actually injured and by an unjust and unlawful discrimination. Galloway Coal Co. v. A. G. S. R. R. Co., 40 I. C. C. 311, 321.

(e) It does not follow that because a point is grouped with other points on some commodities it should be grouped on all commodities. Alton Merc. Co. v. I. C. R. R., 48 I. C. C. 668, 669.

(f) In establishing the boundary lines of groups, carriers should follow some measure of principle, such as radical or operating distance, competition, character of freight, physical features of the country, and the location of transportation lines. Humphrey Brick & Tile Co. v. P. R. R., 50 I. C. C. 457, 462.

(g) There is no requirement of law that origin and destination groups shall be coextensive in area. Except, perhaps, in the adjustment of transcontinental rates it may be said to be the usual practice for origin group rates to apply to destination points singly or groups of only a few together. St.Louis Chamber of Commerce v B. & O., 57 I. C. C. 639, 648.

(h) The commission has consistently refrained from breaking up a group where it has not been made to appear that party seeking such action is actually damaged by discrimination, which results from the group rate. Newport Mining Co., 33 I. C. C., 645, 657, and cases cited. Perry County Coal Corp. v. E. St. L. S. Ry. Co. 80 I. C. C. 715.

(i) Groups of long standing are presumably fair and ought not to be disrupted unless substantial justice requires it. Galloway Coal Co., 40 I. C. C., 311, 320, and cases there cited. Perry County Coal Corp. v. E. St. L. S. Ry. Co. 80 I. C. C. 715.

(j) In absence of proof of tangible injury to complainants or of positive evidence that rates are unjustly discriminatory or unduly prejudicial, a group adjustment should not be disturbed. Phelps Dodge Corp., 57 I. C. C., 714, 720, and

cases cited. Perry County Coal Corp v. E. St. L. S. Ry. Co. 80 I. C. C. 715, 716.

(k) In any group adjustment lines must be drawn somewhere, and the difference in distance between the most distant point in one group and the least distant point in the next more distant group must be comparatively small. Indiana Public Service Commission v. A. T. & S. F. Ry. 88 I. C. C. 709, 718.

Co., 78 I. C. C. 445, 450; Anaconda Copper Mining Co. v. Director General, as Agent, 78 I. C. C., 549, 552; Rules for Protective Service on Perishable Freight, 83 I. C. C. 275, 279.

§7. Equalizing Advantage of Location.

See Equalization of Rates §3.

CASES 1887-1908

(a) A group rate for a particular district upon a commodity for which a large demand exists, and intended to place producers in the district upon an equality among themselves and with producers of the same commodity from other districts, all competing in a common market, is not unlawful merely on account of differences in the geographical location of different producers and their respective distances from the market. Imperial Coal Co. v. P. & L. E. R., 2 I. C. C. 436, 443.

(b) The same rate over a district quite extensive denies to the producer near the market the advantages of his location, for which he receives no compensation in the fact that such rate was established to enable a railroad company to sell its lands more distant from markets at better prices. Newland, Hauschild & Reeder v. N. P. R. R. Co., 4 I. C. C. 474, 480.

IMPORTANT CASES SINCE 1908

(c) It is improper to place a particular commodity in a given zone without due regard to geographical boundaries of production. Ferguson Saw Mill Co. v. St. L., I. M. & S. Ry. Co., 18 I. C. C. 391, 394.

(d) Because carriers have constructed a system of rates on a zone or blanket system is not sufficient reason to justify the collection of unreasonable charges to any point. Every city is entitled to the advantage of its location and may not lawfully be subjected to high freight charges, merely because carriers, for reasons of convenience or otherwise, include it with a number of other points in surrounding territory, which latter points are not similarly situated. Corporation Commission of North Carolina v. N. & W. Ry. Co., 19 I. C. C. 303, 309.

(e) When general rate adjustments, in and between large territories, which contemplate substantial justice between all shippers generally, result in individual instances of disproportionate inequality, they fail in their purpose, and their strict observance in such cases upon no other ground than the arbitrary theory of their existence should yield to the extent necessary to prevent injustice. Alpha Portland Cement Co. v. B. & O. R. R. Co., 22 I. C. C. 446, 449.

(f) The bulk of the rice crop of the United States is produced in Texas, Louisiana and Arkansas, and New Orleans has been the leading milling and marketing point. The milling interests for Houston and Texas mill cities attacked the rates on clean rice from Texas milling points to the Southwest, to Central Freight Association territory, to Illinois territory, and to the Pacific Coast territory, as discriminatory against them when compared with the corresponding rates from New Orleans. To the Southeast the through rates were combinations made of a local carload rate of 15c from Houston, and Texas points east thereof, or 19c from Texas points west thereof, to New Orleans, and in most instances a local any quantity rate from New Orleans. To Central Freight Association territory (east of the Illinois-Indiana state line) there were joint rates applying from Houston, which were 10c on carloads, and 20c on less-than-carloads, higher than the corresponding rates to New Orleans. To Illinois territory the rates from Houston were 5c on carloads, and 10c on less-than-carloads, higher than from New Orleans. To the Pacific Coast the rates from Houston were the same as from New Orleans. New Orleans is on the average about 150 miles nearer to Illinois points, and about 200 miles nearer Central Freight Association territory points than are the Texas milling centers. Houston is 350 miles nearer the Pacific Coast than New Orleans, but the rice rates, like all other rates to the Pacific Coast, are blanketed, so that all Louisiana and Texas points have the same rate to all coast markets. In hauls to the Pacific Coast only one carrier is involved, while in hauls from Houston to the Southwest at least two carriers participate. The average haul from the rice belt to the Coast approximates 2,000 miles. The rates from Texas points to the Southeast were combination rates based on New Orleans or other Mississippi gateways. It appeared that each of the local rates included in the through rates had been lowered by competition either of markets or of other carriers. The local rates from New Orleans were in most instances any-quantity rates. The shipments from Texas points to the Southeast were made only in carload lots. Generally speaking, the carload rates that apply from the river to southeastern points were relatively lower than the any-quantity rates. On Texas shipments no terminal service was performed at New Orleans, while on a local shipment, in and out, such service would be substantial. HELD: As to the rates applying to Illinois and Central Freight Association territory, New Orleans possesses natural advantages entitling it to lower rates than Texas points; that while the Texas points are nearer Pacific Coast points than New Orleans, they are not entitled to lower rates because the rates are blanketed over a large territory, and, hence, can be justified, which they might not be were the haul shorter, as is the case to Central Freight Association territory; that the through carload rates of which any-quantity rates are factors from Texas points to the Southeast are unreasonable and discriminatory because the New Orleans shipper in less-than-carload lots gets the same rate as the Texas shipper of carloads, and in addition has a substantial terminal service performed for him, and that joint carload rates from Texas milling points to this territory should be at least 5c less than the lowest combination of locals contemporaneously in effect to and from Mississippi River points. Mutual Rice Trade & Devel. Assn., Houston, v. I. & G. N. R. R., 23 I. C. C. 219.

(g) Carriers have followed the principle that whenever distance between cer-

points constitutes a relatively small percentage of distance between any of those points and ultimate market, such originating points should be grouped for rate-making purposes. Rates on News Print Paper from Sault Ste. Marie, Ont., 26 I. C. C. 13, 19.

(h) Complainant attacked rate on coarse grain and sorghum grain from all points in Texas to all points in Mississippi Alabama, Georgia, South Carolina and Jacksonville, Fla., as unreasonable and in violation of the fourth section and unduly prejudicial as compared with rates from points in states north of Texas. The rates from points in Texas to the above destinations are published from groups of origin to specific points of destination via the Mississippi River crossings, Memphis, Vicksburg and New Orleans, and are in nearly all instances combinations on the river crossings or joint rates equal to or based upon the lowest combination on the river. For much of the traffic the distance is shorter via Vicksburg. The establishment of joint rates from Texas groups to points in the southwest would result in a demand for a like adjustment from other territories, from which the rates for many years have been made by combination on the river crossings, thus facilitating the equalization of the various grain markets by rates inbound and outbound which result in the same through rates through all markets. Texas grain shippers are in competition with those in other states. No reason appears why a proportional rate from Vicksburg to points in a large portion of the southeast, applicable only to grain originating in Texas, the same as from Memphis, should necessarily affect the rates on grain from Ohio and upper Mississippi river crossings, through which no grain moves from Texas. HELD: Rates attacked from Texas groups 1 and 3 to points in question unreasonable to extent the component from Texas to Vicksburg exceeds 28c, rates from other groups to be made by arbitraries over. Texas Grain Dealers' Asso. v. A. & S. Ry., 81 I. C. C. 96.

Ste. M. Ry. Co., 27 I. C. C. 696; Clinton Mfrs. & Shippers' Asso. v. C. & A. R. R. Co., 27 I. C. C. 230, 232, 233; Trans-Continental Rates from Group F, 28 I. C. C. 1; Kansas Wholesale Grocery Co. v. A. & W. Ry. Co., 32 I. C. C. 139; Chamber of Commerce, Moss Point, Miss., v. V. & N. R. R. Co., 57 I. C. C. 112; Authority to Increase Rates, 58 I. C. C. 220, Ex Parte 74, 302.

§8. Proximity to Established Group.

CASES 1887-1908

(a) Group rates of 70 cents on second-class articles and 44 cents on third-class applying within a distance of 271 miles from Prichard, Ala., to Verona, Miss., on shipments over an extreme distance of 640 miles to East St. Louis, and which in the next 200 miles fall to 30 cents second class, and 22 cents third class. HELD: Prima facie unreasonable and unjustly discriminating against points within the group which are nearer to East St. Louis and unlawful as to shipments from Verona. Rea v. Mobile & Ohio R. Co., 7 I. C. C. 43.

(b) Complainant attacked rates on classes from eastern territory to Amarillo, Tex., as unreasonable in that they were higher than those in effect to Texas common points. Competition between carriers from producing points in the Middle West and the Atlantic Seaboard over the right to serve different portions of the state of Texas was finally adjusted by making the rates to all parts of the common point territory the same, with a few exceptions; but Amarillo, situated in the Pan-Handle of Texas, 142 miles north and west of Quanah, the last common point station of one of the defendants, does not properly fall within the competitive lines, and complainants' contention that Amarillo should be placed in Texas common point territory should not be sustained. HELD: Complaint dismissed. A certain defined territory in the northern part of Texas, commonly

known as the Burnt district, takes from Kansas City and other Missouri River points lower rates than are made to the balance of the state, in recognition of greater proximity to these Texas points; the class rates from Kansas City to Fort Worth, representative of the Burnt district, are higher than from Kansas City to Amarillo, though Amarillo is less than the average distance to the Burnt district, and that the Santa Fe system is rebuilding its road to Amarillo, which will soon be situated upon its main line. HELD: The present class rates from Kansas City to Amarillo are unreasonable and unjust and the commodity rates between said points should not exceed those from Kansas City to Fort Worth; but the class rates from St. Louis to Amarillo may properly be higher than from St. Louis to Fort Worth. Nobles Bros. Grocer Co. v. Ft. W. & D. C. Ry., 12 I. C. C. 242.

(c) Amarillo, situated in the Pan-Handle of Texas, 142 miles north and west of Quanah, the last common-point station of one of the defendants, does not properly fall within the competitive lines of carriers from producing points in the Middle West and the Atlantic seaboard, and therefore should not be placed in Texas common-point territory. Nobles Bros. Grocer Co. v. Ft. W. & D. C. Ry. Co., 12 I. C. C. 242.

(d) Application to place Amarillo, Texas, in Texas common-point territory, denied. Noble Bros. Grocer Co. v. Ft. W. & D. C. Ry. Co., 12 I. C. C. 242.

(e) Complainant attacked rates, commodity, charged on wheat, carloads, from Oklahoma City, Okla., to Gainesville and Fort Worth, Tex., as unreasonable. Short line distances are 140 miles to Gainesville and 202 miles to Fort Worth, rate charged 28½c. Rates to the Texas territory in question are made on the group basis and in previous decisions the Commission has refused to make any changes therein, but the communities involved in this case are in such proximity that they are entitled to have established between one another a reasonable rate. In the fixing of this charge the Commission may properly have reference to the fact that the group system prevails from points farther north, and that this is transition territory. HELD: Rate attacked unreasonable to extent it exceeded 20c to Gainesville and 22c to Fort Worth. W. O. Mitchell v. A., T. & S. F. Ry., 12 I. C. C. 325.

(f) Santa Barbara, Cal., not entitled to benefit of rates to Pacific terminals. Commercial Club of Santa Barbara v. Southern Pacific Co., 12 I. C. C. 495.

IMPORTANT CASES SINCE 1908

(g) The proximity of one city to competing points in the same region makes higher rates thereto unlawful. Frederick & Kempe Co. v. N. Y., N. H. & H. R. R. Co., 18 I. C. C. 481, 484.

(h) But granting there must be a line drawn somewhere to mark the limits of the application of blanket rates, and that it does not follow, because industries in certain territories are given stated rates, carriers must extend the same rates to all factories of the same kind wherever located; nevertheless, it is indefensible that shippers immediately outside the favored zone should be denied as favorable rates to coveted markets as are accorded throughout a considerable portion of the country to competitors producing the same class of goods, selling in the same manner, and no more advantageously located geographically or commercially. Southern Furniture Mfrs. Assn. v. S. Ry. Co., 25 I. C. C. 379, 386.

(i) And the boundary line to mark the limits of application of blanket rates may not be so artificially drawn as to subject shippers immediately outside the favored zone to unjust discrimination. Southern Furniture Mfrs. Assn. v. S. Ry. Co., 25 I. C. C. 379, 386.

(j) Where an extensive group of origin lies close to an extensive group of destination the points lying nearest each other in both groups are subject to the highest ton-mile charges, and points lying on opposite extremes of the two groups enjoy the lowest ton-mile charges. Wisconsin & Arkansas Lumber Co. v. St. L., I. M. & S. Ry. Co., 41 I. C. C. 642, 647.

(k) A rate from points located on or near the line forming the boundary of a rate group of any considerable extent, if considered alone, is frequently subject to unfavorable comparisons with rates from points in close proximity just across the line. However, the group plan has often met the requirements of commercial conditions and rate uniformity and a group adjustment of long standing should not be lightly or unnecessarily disturbed. Orange Rice Mill Co. v. T. & N. O. R. R., 49 I. C. C. 250, 254.

(l) It is true that all groupings for rate purposes are more or less arbitrary. Group lines generally have the appearance of injustice to some plant just across the line. Belber Trunk & Bag Co. v. W. J. & S. W. R. R., 66 I. C. C. 490, 494.

C. 275, 276; Chicago Coal Merchants Asso. v. Director General, 89 I. C. C. 137.

§9. Grading Rates.

See Distance Rates.

CASES 1887-1908

(a) The method of grouping stations and grading stations for a continuous haul of freight by a railway carrier is one that is very common in this country and is not necessarily illegal, unless the results that flow from it are illegal. Business Men's Asso. of Minnesota v. C., St. P., M. & O. Ry., 2 I. C. C. 41, 48.

(b) Complainant attacked rates charged on potatoes from Cadillac, Mich., via Grand Rapids, Mich., to Texas common points as unreasonable and unjustly prejudicial. A combination rate of 72c on

potatoes in carloads from Cadillac, Mich., via Grand Rapids, Mich., to Texas common points, made effective since this proceeding was instituted, was a reduction of 5c in the rate complained of, and was a substantial satisfaction of the complaint; but it appeared that local rates in force to and from the Mississippi River were charged on said shipments from Cadillac; while defendants operating west of that river, accepted less than their said charges west of the river on like shipments, which originated at Grand Rapids, Mich., and other points in so-called Detroit-Cleveland territory. HELD: That without approving defendants' system of shrinking rates, complainant dismissed. Freeman v. A., T. & S. F. R. Co., 7 I. C. C. 202.

IMPORTANT CASES SINCE 1908

(c) Occasionally, when sufficient justification appeared, the Commission has broken up a blanket and graded rates to the communities involved. So it HELD: That the blanket system of making rates on wool from the west and eastern points should be broken up and graded rates established. In Re Transportation of Wool, Hides and Pelts, 23 I. C. C. 151, 165.

(d) Rates for long hauls, particularly on low grade traffic, are often blanketed over extensive territories, and even if the rates to the coast were found to be reasonable maximum rates it would not necessarily follow that all of them should be graded. Intermediate Rates Association v. Director General, 61 I. C. C. 226, 245.

(e) Necessarily points on the farther edge of a group have more favorable rates relatively, than under a distance scale, and points on the nearer edge have less favorable rates. Corporation Commission of N. C. v. Director General, 62 I. C. C. 64, 70.

ALL OTHER CITATIONS

Corn Belt Meat Producers' Assn. v. C., B. & Q. Ry. Co., 14 I. C. C. 376, 393, 394; Indianapolis Freight Bureau v. C., C., C. & St. L. Ry. Co., 16 I. C. C. 254, 264; Kalispell Lumber Company v. G. N. Ry. Co., 16 I. C. C. 164, 171; R. R. Com. of Tenn. v. Ann Arbor R. R., 17 I. C. C. 418, 420, 421; Coal Rates from Virginia Mines, 30 I. C. C. 635, 642; San Toy Coal Co. v. A., C. & Y. Ry. Co., 34 I. C. C. 93, 96; Second Industrial Railway Case, 34 I. C. C. 596, 604; Rates on Lumber from Southern Points, 34 I. C. C. 659; Bonner's Ferry Lum. Co. v. G. N. Ry. Co., 38 I. C. C. 268; Memphis Freight Bureau v. St. L., I. M. & S. Ry. Co., 39 I. C C. 224, 244.

§10. Differentials.

See Differentials.

CASES 1887-1908

(a) Upon complaint that a rate of 75 cents per hundred pounds on cotton from Dallas, Tex., to New Orleans, La., is unreasonable and should not exceed 55 cents per hundred pounds, it appeared that such rate also applied as a common-point rate from substantially all the cultivated portion of Texas, and that reduction of the rate from Dallas would involve corresponding reductions from nearly the whole State; that the rate to New Orleans is determined by adding a differential of 10 cents to the rate to Galveston, and that such differential is reasonable; that the Texas Railroad Commission fixes the Galveston rate and has reduced such rate from 65 to 60 cents during the pendency of this proceeding, such action resulting, under maintenance of the differential, in like reduction of the rate to New Orleans; that about 65 per cent of Texas cotton passes through Galveston and about 25 per cent through New Orleans, and reducing only the New Orleans rate would result in diverting more of the traffic from the port of Galveston. HELD: That while the rate from Dallas to New Orleans does not appear to be altogether reasonable, the Commission is not satisfied, in view of the control exercised and the action taken by the Texas Commission, that it ought to interfere with the present adjustment. Dallas Freight Bureau v. Texas & P. R. Co., 3 I. C. C. 33.

(b) Complainant attacked as unreasonable rates on grain from Wichita and other Kansas points to Kansas City, Mo., to Galveston, Tex., for export, and to various destinations in Texas for domestic consumption. RATES TO THE MISSOURI RIVER: Rates to Kansas City, Kan., are intrastate and therefore not within the jurisdiction of the Commission, and as the rates to Kansas City, Mo., may not be any higher than the rates to Kansas City Kan., which are fixed by the Kansas Commission, the Commission should not interfere with the basis fixed locally in Kansas. EXPORT RATES TO GALVESTON: Prior to January 1, 1907, export rate on wheat from Wichita was 28½c, from Kansas City 17¼c, the Rock Island having a route

through Wichita. Distance from Wichita, 724 miles; from Kansas City through Wichita, 950 miles. The rates from Kansas City are highly competitive, which does not obtain at Wichita. The rates from Wichita to Galveston should not exceed the rate from Wichita to Kansas City, added to the rate from that point, or 30½c. HELD: Rate attacked unreasonable to extent it exceeds 25c. DOMESTIC RATES TO TEXAS POINTS: Texas is divided into four groups, the rates to group 1 being from Wichita, 33c; group 2, 35½c; group 3, 38c, and group 4, 38c. No suggestion was made as to a change in the grouping system. The question arises as the reasonableness of the rates themselves. HELD: Rates to group 4 may properly be 10c higher than the export rate to Galveston, the other groups being graded. Farmers, Merchants & Shippers Club of Kansas v. A., T. & S. F. Ry., 12 I. C. C. 351.

IMPORTANT CASES SINCE 1908

(c) With particular force as applied to grouped points of origin and grouped points of destination, differentials either above or below rates from any given point become less and less important as distance to ultimate destination increases. Williams Co. v. V. S. & P. Ry. Co., 16 I. C. C. 482, 487.

(d) Rates from points located within a group but on a branch line, based on an arbitrary over existing group rates, found unreasonable and unduly prejudicial to extent they exceed rates on like traffic from other points in the same group to same destinations. Relationship of rates prescribed. Western Petroleum Refiners' Asso. v. Director General, as Agent, 59 I. C. C. 38.

(e) When points distributed over an extensive area are grouped and a blanket rate applied to or from all such points, the fact that points lying within that blanket are on a branch line does not argue as strongly that there should be a branch line differential as when the rates are applied on a graded basis. The question of whether or not there should be such a differential in connection with blanket rates depends in a large measure upon how extensive the blanket is. United Verde Mining Co. v. A. T. & S. F. Ry., 88 I. C. C. 5, 9.

ALL OTHER CITATIONS

Portland Lumber Co. v. O. W. R. R. & N. Co., 21 I. C. C. 292; Fox River Valley Mfrs. Assn. v. M. C. R. R. Co., 32 I. C. C. 547; Scott v. C. C. R. R., 38 I. C. C. 467; Natchez Chamber of Commerce v. C. 505; West Kentucky Coal Bureau v. L. & N. R. R. Co., 83 I. C. C. 180; Commercial Coal Co. v. L. & N. R. R. Co., 83 I. C. C. 464, 467; Western Coal Rates, 88 I. C. C. 13; Southern Appalachian Coal Operators' Asso. v. L. & N. R. Co., 83 I. C. C. 136.

IV. REASONABLENESS.

See Percentage Rates; Reasonableness of rates.

§10½. In General.

CASES 1887-1908

(a) On complaint of an unreasonable rate on butter in less carloads from Lincoln, Kan., to Denver, Colo., it appears that defendant's line between those points runs through a sparsely settled country, furnishing comparatively little business to the carrier, and also that the rate is common to numerous towns of importance at an equal or greater distance from Denver, and is maintained by all the roads extending into that territory. HELD: The charge made is not unreasonable. Lincoln Creamery v. U. P. R. Co., 3 I. C. C. 794.

(b) Defendant's rate of $1.25 per 100 pounds on oranges in carloads carried from southern California to points on and east of the Missouri River is unreasonable and unjust. Consolidated Forwarding Co. v. Southern P. Co., 10 I. C. C. 590.

(cd) Texas divided into four groups for wheat rates. Mitchell v. A., T. & S. F. Ry. Co., 12 I. C. C. 324.

(e) The destination points in Texas are divided into groups numbered 1, 2, 3 and 4. At the hearing representatives of the city of Lancaster contended that that city should be transferred from group 2 to group 1, and the contention was upheld. Farmers, Etc., Club v. A., T. & S. F. Ry. et al., 12 I. C. C. 351.

(f) Complainant attacked as unreasonably and unduly discriminatory commodity rates on agricultural implements, axes, sad irons, etc., from St. Louis, Mo., to Dallas, Tex. Traffic moves from interstate points to destination in the Texas common point territory under a system of rates that obtains in no other part of the United States of equal extent. In general, all points in this vast area take the same rates from any given point of origin on or east of the Missouri and Mississippi Rivers. A change in the rates to one common point necessarily involves an extensive disturbance of rates to other common points or might tend to disrupt the common point system upon which commercial conditions in Texas are based. A controversy that questions the reasonableness of rates to one common point ought therefore to be presented in all its aspects, and receive the fullest consideration before action is taken. HELD: Complainant dismissed. Dallas Freight Bureau v. M., K. & T. Ry., 12 I. C. C. 427.

IMPORTANT CASES SINCE 1908

(g) So to justify a blanket the length of the hauls from points within to its edge ought to bear a reasonable relation to the entire haul. Wisconsin & Arkansas Lumber Co. v. St. L., I. M. & S. Ry., 33 I. C. C. 33, 38.

(h) That on one commodity moving outbound several points constitute a single group, while on another moving inbound such points are divided into one or more groups is not convincing, even though the second commodity is used in the manufacture of the first. Alpha Portland Cement Co. v. B. & O. R. R. Co., 34 I. C. C. 414, 421.

(i) The propriety of a group rate in any case must depend upon the conditions upon which it is predicated. Oklahoma Cottonseed Crushers Asso. v. M., K. & T. Ry. Co., 35 I. C. C. 94, 106.

(j) An appearance of inequality in rates at group boundaries is necessarily incident to this method of rate making. In establishing such boundaries, however, it is usual and desirable to follow some measure or principle, such as radial or operating distance, competition, character of freight, physical features of the country, or location of transportation lines. Brown v. V. R. R. Co., 41 I. C. C. 317, 320.

(k) The group system of rate making disregards to some extent, differences in distances and other elements that go to make up the cost of service. Eastern & Western Lumber Co. v. O.-W. R. R. & N. Co., 41 I. C. C. 545, 550.

(l) No group adjustment of commodity rates can bear a uniform relation to the class rates, from each shipping point in a group, unless, as seldom is the case, precisely the same grouping controls the class scale. Western Trunk Line Potatoes, 50 I. C. C. 407, 411.

(m) Where rates are constructed by the use of combinations upon gateways between any two groups, the through rates should be increased by applying to each factor its respective percentage. Increased Rates, 1920, 58 I. C. C. 220, 246.

(n) In passing upon the reasonableness of a blanket rate the Commission must undoubtedly offset the rate to the nearer point against that to the more distant point. But where the application of such a rate clearly results in imposing unjust and unreasonable transportation charges at the nearer point this fact can not be ignored or excused simply because a rate less than is just is granted at the more distant points. Holmes & Hallowell v. G. N., 60 I. C. C. 687, 698.

(o) A proper rate relationship between competitive groups is in many respects of greater importance to the shipping public than the measure of the rate itself. Salt from Louisiana Mines to Chicago, 66 I. C. C. 81, 93.

(p) The principle of group rates, particularly when applied to areas containing natural resources, has long been sanctioned, but such rates have frequently been condemned when the minimum hauls are so disproportionate to the

maximum hauls as to impose unreasonable or otherwise unlawful charges for the shorter distances. Clinton Paving Brick Co. v. Director General, as Agent, 66 I. C. C. 338, 344.

(q) Blanketed areas must be reasonable and must not unjustly discriminate between points similarly situated. Hagerstown Chamber of Commerce v. W. M. Ry., 74 I. C. C. 741, 744.

(r) Most adjustments of rates on a group basis result in some inequalities when distance alone is considered, but such inequalities are not of necessity unreasonable and unjust. Weirton Steel Co. v. M. Ry. Co., 77 I. C. C. 622, 626..

§11. Reasonableness of Group.

See Reasonableness of Rates.

CASES 1887-1908

(a) Augusta suburban points. Class rates from North Atlantic ports to suburban mills, which, before the absorption of the South Carolina & Georgia Railroad by the Southern Railway Company, were recognized as a group; it appearing that such group is still recognized on shipments in the opposite direction, that the grouping system is still effective to the extent of classing together some of these suburban points which are as far apart as Augusta is from the nearest, and that a restoration of the Augusta rates to these suburban points would divert considerable heavy and bulky freight from water lines on the Savannah River to the defendant lines, held unjust and unreasonable. Quimby v. Clyde S. S. Co., 12 I. C. C. 392.

IMPORTANT CASES SINCE 1908

(b) The adjustment of a group of rates as a whole might be just and reasonable, even though each rate might not of itself be just and reasonable. Monroe Progressive League v. St. L., I. M. & S. Ry. Co., 15 I. C. C. 534, 538.

(c) While the group or zone principle of rate-making is often of mutual advantage to shippers and carriers and will not ordinarily be disturbed where the rates are reasonable and non-discriminatory, yet the relative situation of contiguous points cannot be wholly disregarded in rate-making, without incurring the risk of creating unjust discrimination or advantage to the favored points. Carriers may lawfully make a rate applicable to a group of points within a defined zone and treat them all as one point for rate-basing purposes, but the proximity of points just without or beyond this zone cannot be ignored when the question of through rates to the latter points comes up for consideration. Hammerschmidt & Franzen Co. v. N. W. Ry. Co., 30 I. C. C. 71, 81.

(d) The grouping of a number of points does not justify the maintenance of a rate which is unreasonable per se from any of such points, but in the absence of a conclusive showing that the rates challenged from a point included in a group are in fact unreasonable it is impracticable to consider the reasonableness of the group rates except as applied from all points in the group. Atlas Portland Cement Co. v. B. & M. R. R., 44 I. C. C. 416, 422.

(e) Complainant attacked the 1½ times first class rate of $5.55 per 100 pounds charged on a less-than-carload shipment of household goods from Fairmont, W. Va., to Portland, Ore., as unreasonable. The western classification rated household goods first class "actual value on each article not to exceed $10 per 100 pounds," otherwise 1½ times first class, "subject to rule 2," which rule required a declaration of value. The carrier's agent had quoted complainant the first class rate of $3.70, but the shipment was delivered to the carrier by a drayman, who signed the bill of lading as complainant's agent. It contained no statement of value. HELD: (1) That it had not been established that any rate other than that attacked would have been applicable had the value been inserted; and (2) that the agent erred in permitting the shipment to move without a notation on the bill of lading stating its value. Complainant dismissed. Perdue v. B. & O. S. W. R. R., 47 I. C. C. 210.

(f) Rate groups ordinarily should be neither broader nor narrower than is required by the conditions on which they are based. Humphrey Brick & Tile Co. v. P. R. R., 50 I. C. C. 457, 464.

(g) In a grouping system it necessarily follows that rates at nearer points to the edge of the group are lower, distance considered, and the revenue per ton mile less than at the other points in the group. South Bend Chamber of Commerce v. Director General, 57 I. C. C. 215, 219.

(h) Consumers may properly have the widest possible market consistent with justice to the carriers, and to that end and also in their own interests carriers may, within reasonable limits, as a matter of traffic policy, accord competing producing centers located at different distances from common centers of consumption identical rates. Carriers may not disregard all differences in dis-

tances. Groups cannot be extended indefinitely, and the discrimination inherent in all group adjustments must not be undue. Monroe Shingle Co. v. Director General, 62 I. C. C. 714, 717.

(i) Groups long maintained are presumably fair and are not to be disrupted unless substantial justice requires it. Monroe Shingle Co. v. Director General, 62 I. C. C. 714, 717.

(j) Commission does not approve a comparatively narrow grouping of points of origin because the length of the group in the direction of the movement was nearly as great as the hauls from the nearest point in the group to the destinations involved. Salt from Louisiana Mines to Chicago, 66 I. C. C. 81, 92.

(k) When points distributed over an extensive rate are grouped and a blanket rate applied to or from all such points, the fact that points lying within that blanket are on a branch line does not argue as strongly that there should be a branch-line differential as when the rates are applied upon a graded basis. Whether or not there should be such a differential in connection with blanket rates depends in a large measure upon how extensive the blanket is. State of Idaho ex rel v. Director General, 66 I. C. C. 330, 336, 337.

(l) The boundaries of a blanket should not be so drawn as to include within it a large number of producing points, while other points similarly situated are excluded, especially when the area of production has clearly defined geographical limits. East Coast Potato Distributors v. N. Y., P. & N. R. R. Co., 77 I. C. C. 607, 610.

(m) In absence of proof of tangible injury to complainants or of positive evidence that rates are unjustly discriminatory or unduly prejudicial, a group adjustment should not be disturbed. Phelps Dodge Corp., 57 I. C. C., 714, 720, and cases cited. Newport Mining Co., 33 I. C. C., 645, 657, and cases cited. Perry County Coal Corp. v. E. St. L. S. Ry. Co. 80 I. C. C. 711, 715, 716.

(n) In considering reasonableness of group rates, distances and ton-mile earnings between selected points can not be regarded as controlling. Reasonableness of such rates must be judged by average conditions. Indiana State of Commerce v. B. & O. R. R. Co., 83 I. C. C. 591, 595.

§12. Reasonableness of Individual Rate.

See Reasonableness of Rates.

CASES 1887-1908

(a) Investigation by the Commission under a resolution of the Congress as to alleged excessive freight rates and charges on food products. HELD, transportation charges now made on corn and oats between the Mississippi River and eastern cities, based on 20 cents per 100 pounds from Chicago, and 23 cents from East St. Louis to New York City, are less than 4.4 mills per ton per mile and are not excessive. The charge of 20 cents on corn and oats from Missouri River to Chicago and 5 cents less to Mississippi River is excessive and to be reasonable should not exceed 17 cents to Chicago and 12 cents to Mississippi River, east side. The rates on corn and oats in force from stations in Kansas and Nebraska to the Mississippi River east side, and to Chicago are two cents in excess of reasonable rates. Any transportation charges between the Mississippi River and New York City on wheat and flour based on a higher rate than 23 cents from Chicago to New York City is unreasonable, and any rate on wheat and flour carried from any one place to another which is more than 15 per cent above the rate on corn and oats between the same points is unreasonable. The rates of 46 cents on grain and 51 cents on flour and meal between the grain region in Kansas and a large district in Texas are the same for distances shorter than 250 miles and longer than 800 miles, and are unreasonably high for the longer and grossly excessive and extortionate for the shorter distances. In the Matter of Alleged Excessive Freight Rates and Charges on Food Products, 3 I. C. C. 93.

(b) Complainant attacked rates on wheat and barley of 50 and 56 cents from Ritzville, Wash., to St. Paul, Minn., as unreasonable. HELD, in view of the distance of 1,576 miles and the circumstances and conditions surrounding the traffic, rate attacked not unreasonable, complaint dismissed. Buchanan v. N. P. R. Co., 3 I. C. C. 655.

(c) In a total haul of 640 miles a rate which for the first 271 miles is the same and in the next 200 miles falls from 70 to 30 cents upon second-class and

from 44 to 22 cents upon third-class shipments is prima facie unjust and unreasonable and a discrimination against the nearer points in the group. Rea v. Mobile & O. R. Co., 7 I. C. C. 43.

(d) Defendants' present rate of $1 per 100 pounds on lemons in carloads from Southern California to points on and east of the Missouri River is apparently reasonable. Consolidated Forwarding Co. v. Southern P. Co. et al, 10 I. C. C. 590.

(e) Complainant attacked as unreasonable rates charged on citrus fruits from Southern California to points east of the Missouri River and also the minimum weight of 26,000 pounds as unreasonably high. At present forty foot cars are generally in use and the minimum is not unreasonable. Rate charged $1.25 per 100 pounds. This rate has been in effect approximately the whole time since the citrus fruit industry became the subject of any considerable movement by rail to eastern cities. It is as high today as oranges (which constitute the great bulk of citrus fruit shipments) when the shipments aggregate between 20,000 and 30,000 cars annually as it was when but a few hundred cars were moved during the season and when the rate as applied to that movement was low. The citrus fruit business in Southern California has developed into an industry of great magnitude from which the carriers derive a large and growing traffic shipped only in carload lots loaded by shippers and unloaded by consignees, which is steadily offered for shipment and which the carriers can arrange to move during the season from November to August, with the bulk of the crop often moving in train loads in the four months, December to March inclusive. Unquestionably the citrus fruit traffic, as well as other perishable freight requiring care, refrigeration and expedition in transit and the carriage in heavy refrigerator and ventilator cars, does cost the carrier more to transport than ordinary freight. The rate on lemons of $1.25 having been made $1 for most of the shipping season, the transportation rate applied to that commodity does not appear to be unreasonable. The rate of $1.25 upon oranges is unreasonably high and works injustice to growers of that fruit in California. HELD, the rate on lemons of $1 not unreasonable, but rate of $1.25 on oranges unreasonable to extent it exceeded $1.10. Consolidated Forwarding Company v. Southern Pacific Co., 10 I. C. C. 590.

(f) Complainant attacked as unreasonable rates charged on coal from points in Indian Territory to Enid, Okla., as unjust and unreasonable. There are four fields in Indian Territory, Henryette, Lehigh, Sans Bois and the McAlester. The Frisco extends from the Henryetta field to Enid, distance 180 miles. The M. K. & T. extends from the Lehigh field to Guthrie, distance 180 miles, beyond D. E. & G., 55 miles. Ft. S. & W. runs from the Sans Bois field to Guthrie, distance 170 miles, beyond D. E. & G., 55 miles. The M. K. & T., and D. E. & G., afford a route from McAlester field, 290 miles, the short line being via the Rock Island 208 miles, the latter line not being a party to the complaint. From McAlester rates are $2.10 per ton on coal and $1.40 on slack coal; from Sans Bois district, $2.10 on coal and $1.50 on slack coal; from Lehigh district $1.95 per ton on coal and $1.35 on slack coal and from Henryetta district $1.95 on coal and $1.50 per ton on slack coal. While the M. K. & T., has met the rate of the Rock Island in the past from the McAlester field, this Commission ought not to compel it to do so for the future. HELD, rates from McAlester to Enid via M. K. & T., not unreasonable. Rates from Lehigh not unreasonable. Rates from Sans Bois district unreasonable and should not exceed $1.85 for lump and $1.35 for slack. Rates from Henryetta unreasonable to extent they exceed $1.60 on lump and $1.25 on slack, this rate being subsequently published, reparation awarded. W. B. Johnson v. St. L. & S. F. R. R., 12 I. C. C. 73.

IMPORTANT CASES SINCE 1908

(g) A blanket rate must not be such as to make an unreasonable rate from any given point. Ferguson Saw Mill Co. v. St. L. I. M. & S. Ry. Co., 18 I. C. C. 391, 393.

(h) In making a blanket adjustment, the burden rests on the carrier to provide rates that shall not be unreasonable from any point of origin. Sawyer & Austin Lumber Co. v. St. L. I. M. & S. Ry. Co., 21 I. C. C. 464, 466.

(i) Distance is, of course, a factor to be considered in determining the reasonableness of rates, and when rates are constructed upon this basis and other things are equal it may become a very important factor. When, however, rates

are constructed and maintained upon the group system, and the subject matter is a heavy commodity, like coal, and the differences in distance are relatively inconsiderable, such differences do not, of themselves, compel differences in rates. Victor Mfg. Co. v. S. Ry. Co., 27 I. C. C. 661, 663.

(j) While a commodity rate in excess of the class rate is regarded as unusual, special circumstances and conditions may justify such a departure from the general rule. This is especially true in the case of a commodity rate which applies from or to a number of points that are grouped or blanketed. It might exceed the class rate from one or more points in the blanket and still be reasonable. Rice Rates from Helena, Ark., 31 I. C. C. 614, 615.

(k) While entitled to reasonable rates from its nearest source of supply, proof that rates from some of the points from which blanket rates are maintained, which rates are made to meet competition from nearer points, yield lower tonmile earnings, is insufficient to establish that the rates for the shorter distances are unreasonable or unduly prejudicial. Traffic Bureau, Sioux Falls Commercial Club v. G. N. Ry., 50 I. C. C. 611, 612.

(l) In passing upon the reasonableness of a blanket rate, the rate from or to the nearer point must be offset against the rate from or to the more distant point. Murphey Co. v. C. M. & St. P. Ry. Co., Unrep. Op. A-631.

§12a. Relation to Section 4.

See Long and Short Hauls.
CASES 1887-1908

(a) The group rate established from a coal-mining district extending across the whole State of Illinois is properly extended to coal shipped to the same territory locally from Chicago,, or by way of Chicago from mines in the eastern part of the group, on account of the operation of §4 of the Interstate Commerce Act, some of the lines passing through the mining district en route from Chicago to the points of distribution. Rend v. Chicago & N. W. R. Co. (Com.) 2 I. C. R. 313.

(b) The "blanket rate," as it is called, by which the same rate is charged by the all-rail lines from the City of New York, and from all points in the oil producing regions in the States of Pennsylvania, Ohio and West Virginia, and from all the territory in the United States east of the 97th meridian of longitude, in the carriage of petroleum and and its products to San Francisco, Oakland, Sacramento, Stockton, Marysville, San Jose, Los Angeles and San Diego, in the State of California, is a rate that has its origin in and is based upon actual competition for the carriage of this large traffic, on the one side, by the all-rail lines, and on the other side, by the lines part rail and part water, and also, in some instances, all-water lines, and also in other instances, part-pipe lines and part-water lines, and it is a rate of which petitioner has no right to complain as being a violation of the fourth section of the Act to Regulate Commerce, because it does not appear from the evidence that it is a violation of that section. Rice v. Atchison, Topeka & Santa Fe R. Co., 3 I. C. R. 263.

(c) Unusual grades and difficulty of operation justify an order permitting a certain railroad to charge "fourth-group rates" on milk and cream for distances for which other lines are only entitled to charge the lower "third-group rates." Brockway v. Ulster & D. R. Co., 8 I. C. C. 21.

(d) Petitioners alleged error in that part of the decision and order in Milk Producers' Protective Association v. Delaware, L. & W. R. Co., 7 I. C. C. Rep. 92, which authorizes a line composed of the Ulster & Delaware and West Shore railroads to charge four-group rates on milk and cream shipped to Weehawken from stations on the Ulster & Delaware railroad which would otherwise take the lower rates ordered in that case for third group distances over other lines; such exception having been granted by the Commission on account of unusually difficult grades over the Catskill Mountains and the further fact that all of the milk carried by the Ulster & Delaware is gathered beyond the mountains at distances of 132 to 175 miles from the Weehawken terminal. HELD, that there was no material error in the original decision, and that the petitions should be

dismissed. Brockway v. Ulster & D. R. Co., 8 I. C. C. 21.

§12½. Relativity of Group Rate.

See Relative Rates.

(1) In General.

IMPORTANT CASES SINCE 1908

(a) A proper rate relationship between competitive groups is in many respects of greater importance to the shipping public than the measure of the rate itself. Salt from Louisiana Mines to Chicago, 66 I. C. C. 81, 93.

(b) Complainant attacked combination rates charged on soft coal, carloads, from points of production in eastern Kentucky, particularly Jenkins and McRoberts, to Davenport, Muscatine, Ottumwa, Iowa City and Fort Dodge, Iowa, as unreasonable and unduly prejudicial. Jenkins and McRoberts are located on opposite sides of a mountain about 1.5 miles apart. The rates from Jenkins in Big Sandy Group 5 and from McRoberts in Group 4 of the L. & N., are the same to Chicago, Peoria and Mississippi River crossings. These group rates are part of a general adjustment of rates from the Crescent. With few exceptions, no joint through rates on coal are maintained from the Ohio mines or the Crescent to the territory west and northwest of Chicago, Peoria and East St. Louis, the general basis for through rates to such territory being the lowest combination to and beyond the various gateways. The principal grievance is that each factor was increased on July 1, 1917, and subsequent dates. HELD, rates attacked not unreasonable, complaint dismissed. United Light & Railways Co. v. Director General, 69 I. C. C. 414.

(c) When a complaint challenges the reasonableness of rates on a commodity from only one point and it appears that, because of competitive or other practical trade or transportation considerations, a number of points of origin of the particular commodity are grouped under common rates, and also that there is a relationship in rates between two or more groups, the Commission must give due consideration to other factors than rate comparisons. The grouping of a number of points does not, of course, justify the maintenance of a rate which is unreasonable per se from any of such points, but in the absence of a conclusive showing that the rates challenged from a point included in a group are in fact unreasonable it is impracticable to consider the reasonableness of the group rates except as applied from all points in the group. Wierton Steel Co. v. Monongahela Ry. Co., 77 I. C. C. 622, 627.

(d) When a complaint challenges the reasonableness of rates on a commodity from only one point and it appears that, because of competitive or other practical trade or transportation considerations, a number of points of origin of the particular commodity are grouped under common rates, and also that there is a relationship between two or more groups, the Commission must give due consideration to other factors than rate comparisons. Atlas Portland Cement Co., 44 I. C. C. 416, 422; Perry County Coal Corporation v. E. St. L. & S. Ry., 80 I. C. C. 711, 715.

(e) Group rates on bituminous coal from O'Fallon and Belleville, Ill., to St. Louis, Mo., found not prejudicial by intrastate rates for short distances from mines in Indiana. Rates for such distances between points in Indiana can not have any definite competitive relationship with rates for equal distances from mines here under consideration to St. Louis, over lines of different carriers, and do not warrant finding of undue preference of Indiana mines and undue prejudice to Illinois mines on traffic to St. Louis. Perry County Coal Corp. v. E. St. L. & S. Ry. Co., 80 I. C. C. 711.

(f) In absence of proof of tangible injury to complainants or of positive evidence that rates are unjustly discriminatory or unduly prejudicial, a group adjustment should not be disturbed. Phelps Dodge Corp., 57 I. C. C. 714, 720, and cases cited. Perry County Coal Corp. v. E. St. L. & S. Ry. Co. 80 I. C. C. 711, 715, 716.

The Chamber of Commerce of the City of Milwaukee v. C. B. & Q. R. R., 78 I. C. C. 110; Phelps Dodge Corp., 57 I. C. C. 714, 720; Perry County Coal Corp v. E. St. L. & S. Ry. Co., 80 I. C. C. 711, 715, 716.

V. DISCRIMINATION.

See **Discrimination.**

§13. In General.

CASES 1887-1908

(a) Complainant attacked as unreasonable and unjustly discriminatory the rate charged on coal to Providence and East Providence, the latter being 10 cents less. HELD, this is an unjust discrimination and that if it is fair and reasonable for the defendant to make the charge to Valley Falls from the two termini the same, there can be no justification for making different rates to stations beyond, based on the fact that the coal comes from one terminus rather than from the other. The evidence fails to support the contention of defendant that the extra rate upon coal received at Providence is only a fair equivalent for the additional cost of handling it there. That under all the circumstances it is not admissible for defendant to impose on its patrons at Providence, whose investments were made before the East Providence line was constructed, an additional charge because of the inconvenience attending the transaction of its business at that station and for which they are in no way responsible. The defendant had for some time paid the cost of hauling coal shipped by complainant, from complainant's wharf to defendant's freight station in Providence, without any contract obligation to that effect, but now refuses to do so. HELD, that defendant can not be compelled to continue paying for such hauling; that what defendant did for a time as a favor or by way of encouragement, it might discontinue at pleasure, and, that there is nothing in the nature of a binding usage about it. Providence Coal Co. v. Providence & Worcester R. Co., 1 I. C. C. 363.

(b) Complainant attacked rates as unjust and unreasonable for the transportation of milk to New York City. The practice of making a uniform rate upon milk destined for the daily consumption of the New York City market, from all stations within a distance of about 200 miles upon railroads running through the southern counties in New York, west of the Hudson River to Jersey City is not an unjust discrimination in favor of the more distant shipping points, as against those nearer the common terminus. Howell v. N. Y. L. E. & W. R. R., 2 I. C. C. 162.

(c) Complainant attacked as unjust and excessive rates on coal. A rate of 90 cents per ton on coal shipped to Lake Erie, for a district covering a radius of forty miles around Pittsburgh, Pa., embracing a large number of mines of substantially like cost of production and like character of coal, has prevailed since the Act took effect. The coal from the different mines is in competition at Lake Erie, and is transported over several different and competing lines of railroad, all carrying at the same rate. The coal from this district is also in competition with similar coal from the Hocking Valley district in Ohio, and from other districts. The complainant's mines are near the center of the district, and some mines in competition with them are at a greater distance from the lake, varying from 20 to 43 miles. HELD, rate in itself not being unreasonable it does not appear that it subjects the complainants to undue prejudice, or that it gives an unreasonable preference to the more distant mines, complaint dismissed. Imperial Coal Co. v. P. & L. E. R., 2 I. C. C. 436.

(d) Actual undue prejudice or damages of which the rate is the cause must

result to the more favorably situated producers to render a group rate unlawful. Imperial Coal Co. v. Pittsburgh & L. E. R. Co., 2 I. C. R. 436.

(e) It is often impracticable to establish different rates on the same commodity from practically the same locality to the same market, and the owners of mines in the Lehigh anthracite region are subjected to no unreasonable disadvantage from the present grouping of mines based on more than actual distance when shipping east and less than actual distance when shipping west. Coxe Bro. & Co. v. Lehigh Valley R. Co., 3 I. C. R. 460.

(f) Complainant attacked as relatively unreasonable and discriminatory rates on salt from Kansas fields to various points in Western Trunk Line territory as compared with the rates to the same points from the salt fields in Michigan. HELD, that any advantages which inure to Michigan salt manufacturers from rates to points in Iowa, Illinois, Missouri and Nebraska are advantages arising from natural situation, and that the low rate to Missouri River is influenced by conditions which are beyond defendant's control and existed before Kansas salt was discovered. HELD, further, that rates on salt to points south and southwest of Hutchinson, Kas., and St. Louis, Mo., do constitute undue preference in favor of Michigan as against Kansas and that they should be readjusted by the Santa Fe so that, while observing the law as to the long and short haul, the advantages of distance belonging to Kansas shall be given to them in any territory supplied by its lines which lies as near or nearer to Hutchinson than St. Louis. Anthony Salt Co. v. M. P. R. R., 4 I. C. C. 33.

(g) A uniform or blanket rate of 32 cents on milk and 50 cents on cream per can of 40 quarts from all stations to the city in which the market is located, regardless of distance or difference in amount of service rendered, is unreasonable, unjust, and unduly prejudicial and disadvantageous to producers and shippers nearer the points of delivery, and violates the Interstate Commerce Act, §§ 1, 3. Milk Producers' Protective Asso. v. Delaware, L. & W. R. Co., 7 I. C. C. 92.

(h) A uniform or blanket rate on milk and also on cream from all stations on the defendant lines to Weehawken, Hoboken, and Jersey City, N. J., or through Jersey City to New York, N. Y., namely, 32 cents on milk and 50 cents on cream per can of 40 quarts, regardless of distance or difference in amount of service rendered. HELD, to be unreasonable, unjust, and unduly prejudicial and disadvantageous to producers and shippers nearer the points of delivery, and in violation of sections 1 and 3 of the Act to Regulate Commerce. Milk Producers Protective Asso. v. Delaware, L. & W. R. Co., 7 I. C. C. 92.

(i) On complaint that defendants' rates on oak lumber in carloads to Philadelphia are unlawfully higher from Afton, Va., and points east thereof, to and including Gordonsville, Va., than those for the longer distances over the same line from Staunton and Basic City, Va., it appeared that a rate of 14 cents per hundred pounds applied over the whole territory for a period of about nine years between November 1, 1892, and August 1, 1901. Effective competition was shown by defendants' witnesses at Basic City and Staunton, and complainants failed to offer any testimony. Upon the record as made in this case, HELD, that the higher rate from the Afton-Gordonsville group does not constitute unlawful discrimination. George M. Spiegle & Co. v. Chesapeake & O. R. Co., 11 I. C. C. 367.

(j) Group rates must of necessity result in a certain amount of discrimination, but should produce as little as possible. Desel-Boettcher Co. v. K. C. S. Ry. Co., 12 I. C. C. 220.

(k) Change of Siloam Springs, Ark., from Little Rock group on Kansas City Southern Railway to Kansas City group, resulting in an advance of rates on green apples in carloads from 49 cents to 58 cents per 100 pounds to Houston, Tex., not unduly discriminatory. Desel-Boettcher Co. v. K. C. S. Ry. Co., 12 I. C. C. 220.

(l) For the purpose of naming rates to various points in Texas, stations upon the Kansas City Southern Railway are grouped in territories as follows: Coming south from Kansas City all stations up to, but not including Siloam Springs, are in Kansas City territory, while Siloam Springs and stations for a certain distance south are embraced in Little Rock territory. Defendants transferred Siloam Springs from Little Rock territory into Kansas City territory. Complainant alleges that this change, resulting in an advance of the rates on green

apples in carloads from 49 cents to 58 cents per 100 pounds from Siloam Springs to Houston, Tex., are unwarranted. HELD, that group rates must of necessity result in a certain amount of discrimination, but they should produce as little discrimination as possible; and HELD FURTHER, that upon the facts of this case, the change of Siloam Springs from the Little Rock group to the Kansas City group did not result in undue discrimination. Desel-Boettcher Co. v. Kans. City So. Ry. Co., et al., 12 I. C. C. 221.

(m) Complainant attacked as overcharges rates on apples from Siloam Springs, Ark., to Houston, Tex. All stations up to but not including Siloam Springs are in Kansas City territory while Siloam Springs and stations for a certain distance south are in Little Rock territory. Green apples moved under class C. rate of 58 cents from Kansas City territory and 49 cents from Little Rock territory. Distance from Siloam Springs to Houston is 581 miles. The apple producing section on the K. C. S., begins at Goodman, 185 miles south of Kansas City and ends at Siloam Springs, 229 miles from Kansas City. The placement of Siloam Springs in the Kansas City territory brings all the apple producing territory in one rate group. HELD, no unjust discrimination is shown and as the reasonableness of the rate charged is not attacked, complaint dismissed. Desel-Boettcher Company v. K. C. S. Ry., 12 I. C. C. 221.

(n) Group rates must of necessity result in a certain amount of discrimination. Such rates are not for this reason necessarily unlawful, since the discrimination may not be undue; but certainly, in the construction of groups, care should be taken to produce as little discrimination as possible. Desel-Boettcher Co. v. K. C. S. R. Co., 12 I. C. C. 221, 222.

(o) It is evident that every system of group rates must occasion more or less discrimination. The rate to the nearer edge is of necessity discriminatory. This discrimination grows relatively more in proportion as the distance from the group decreases, and plainly there must come a point when the point of origin is so near the group that the discrimination will become undue. W. O. Mitchell v. A. T. & S. F. Ry., 12 I. C. C. 325, 326.

IMPORTANT CASES SINCE 1908

(p) A carrier cannot lawfully so group its mines with respect to rates as to unduly discriminate against any locality. The duty imposed by law is to give equal treatment to all shippers who are in position to demand it, and this includes the right to reach competitive markets on relatively equal terms. Where the same carrier serves two districts which by their location, the character of their output and distance from markets, are in substantially similar circumstances and conditions, it cannot lawfully prefer one to the other in any manner whatsoever. Black Mountain Coal Land Co. v. S. Ry. Co., 15 I. C. C. 286, 292.

(q) It is evident that every system of rate group must occasion more or less discrimination. The rate to the nearer edge of the group as compared with the more distant edge is of necessity discriminatory. This discrimination grows relatively more in proportion as the distance from the group decreases, and there must come a point when the place of origin is so near the group that the discrimination will become undue. Kaufman Commercial Club v. T. & N. O. R. R. Co., 31 I. C. C. 167, 170.

(r) Carriers, in blanketing a given territory under a common rate, must avoid unjust discrimination. The boundaries of a blanket should not be so drawn as to include within it a large number of producing points while other points similarly situated are excluded; and this is especially true when the area of production has clearly defined geographical limits. Scott v. C. C. R. R., 38 I. C. C. 467, 471.

(s) A broadening of competitive fields by the creation of large groups is often helpful, both in the development of commerce and in the development of traffic; but when carriers on their own initiative and with the desire to stimulate the movement of traffic in all directions undertake to lay aside transportation conditions and to create a rate relationship based largely, if not altogether, on commercial factors, they must do it consistently so as to avoid artificial and undue advantages for some shippers to the prejudice and disadvantage of others. Pardee Works v. C. R. R. of N. J., 39 I. C. C. 162, 165.

(t) Groups can not be extended indefinitely, and discrimination inherent in all group adjustments must not be undue. Groups long maintained, however,

are presumably fair and are not to be disrupted unless substantial justice clearly requires it. Galloway Coal Co. v. A. G. S. R. R. Co., 40 I. C. C. 311, 320.

(u) In various cases the Commission held group rates subject to the condition that they do not result in undue preference or prejudice. An appearance of inequality in rates at group boundaries is necessarily incident to this method of rate making. In establishing such boundaries, however, it is usual and desirable to follow some measure of principle such as radial or operating distance, competition, character of freight, physical features of the country, or location of transportation lines. Brown v. Vandalia R. R. Co., 41 I. C. C. 317, 320.

(v) Blanketed areas must be reasonable and must not unjustly discriminate between points similarly situated. Hagerstown Chamber of Commerce v. W. M. Ry. Co., 74 I. C. C. 741.

(va) Carriers in blanketing a given territory under a common rate must avoid undue prejudice, and the boundaries of a blanket should not be so drawn as to include within it a large number of producing points, while other points similarly situated are excluded, especially when the area of production has clearly defined geographical limits. East Coast Potato Distributors v. N. Y., P. & N. R. R. Co., 77 I. C. C. 607, 610.

(vb) In absence of proof of tangible injury to complainants or of positive evidence that rates are unjustly discriminatory or unduly prejudicial, a group adjustment should not be disturbed. Phelps Dodge Corp., 57 I. C. C., 714, 720, and cases cited. Galloway Coal Co., 40 I. C. C. 311, 320 and cases there cited. Perry County Coal Corp. v. E. St. L. & S. Ry. Co. 80 I. C. C. 715, 716.

(w) The Commission has consistently refrained from breaking up a group where it has not been made to appear that the party seeking such action is actually damaged by discrimination which results from the group rate. Perry County Coal Corporation v. E. St. L. & S. Ry., 80 I. C. C. 711, 715.

(x) Where through rate charged by a railroad from certain points in blanket territory on its branch lines and certain independent short lines was lower than the rate charged from a point within the territory on another independent short line, though the cost of transportation from such point was no greater, the Interstate Commerce Commission could include such independent short line in an order to cease and desist from the discrimination though it did not join in making the lower rates from other points, since by joining in establishing a through rate it became a party to the discrimination. United States v. Illinois Cent. R. Co. 44 Sup. Ct. 189.

(y) Where a railroad company established blanket rates on its main and branch lines within certain territory for transportation of lumber, but did not grant blanket rate to points on connecting lines, except where necessary to meet competition, the Interstate Commerce Commission was warranted in finding that the refusal to grant the same through rate to point on independent short line wholly dependent on the railroad, where cost of transportation and other conditions were the same, constituted unfair discrimination, in violation of Act to Regulate Commerce, §3 (Comp. St. §8565), though the higher rate was reasonable, and the only motive of the railroad in making the discrimination was that of self-interest, in view of Transportation Act 1920 (Comp. St. Ann. Supp. 1923, §10071¼ et seq.). United States v. Illinois Cent. R. Co. 44 Sup. Ct. 189.

C. C. 251.

VI. REMEDY FOR UNLAWFUL GROUPING.

§14. In General.

CASES 1887-1908

(a) A change in the rates in the Texas common-point territory, which will necessarily involve an extensive disturbance of rates to other common points, or must tend to disrupt the common-point system, upon which commercial conditions in Texas are based, will not be made without the fullest consideration. Dallas Freight Bureau v. M., K. & T. Ry. Co., 12 I. C. C. 427.

ALL OTHER CITATIONS

Stiritz v. N. O. & C. R. R. Co., 22 I. C. C. 578, 581; Bartlesvelle Salvage Co. v. M., K. & T. Ry. Co.,, 25 I. C. C. 672, 674; Southern Hardwood Traffic Bureau v. I. C. R. R. Co., 31 I. C. C. 6, 8; Class and Commodity Rates to and from Quincy, Ill.,, 32 I. C. C. 471, 476, 478; Gulf Lumber Co. v. G. & S. R. R. R. Co., 53 I. C. C. 369.

§15. Scope of Complaint.

See Complaint.

CASES 1887-1908

(a) Issuance of order in regard to defendant's group-rate practice suspended, and case held open to permit readjustment of rates by defendant, but with leave to complainant to file such application for an order in that respect as may be necessary, and with leave, also, to either party to introduce further evidence. Rea v. Mobile & Ohio R. Co., 7 I. C. C. 43.

(b) Original complaint herein was mainly directed to the claim that Amarilla, Tex., should be made a Texas common point, but one paragraph alleged unreasonable rates from points within the State of Texas to Amarillo, and complainants attempted to show upon the hearing under this paragraph that certain specific rates were too high. HELD: That the complaint should have explicitly directed attention of defendants to the rates which were to be put in issue and passed upon by the Commission, and that therefore the testimony offered was inadmissible. Complainants allowed to amend complaint and defendants given opportunity to introdudce further testimony upon the issues thus made. Nobles Bros. Gro. Co. et al. v. F. W. & D. C. Rwy. Co. et al., 12 I. C. C. 242.

IMPORTANT CASES SINCE 1908

(c) When a complainant challenges reasonableness of the rates on a commodity from only one point and it appears that a number of points of origin of the particular commodity are grouped under common rates, and also that there is a relationship between two or more groups, the Commission must give due consideration to other factors than rate comparisons. Atlas Portland Cement Co. v. B. & M. R. R., 44 I. C. C. 416, 422.

ALL OTHER CITATIONS

Corn Belt Meat Producers Assn. v. C., B. & Q. Ry. Co., 14 I. C. C. 376, 396; Wisconsin & Arkansas Lumber Co. v. St. L., I. M. & S. Ry., 33 I. C. C. 33, 35.

VII. EVIDENCE.

See Evidence.

§15½. In General.

CASES 1887-1908

(a) The propriety of the application of the principle of grouping is properly open to challenge in every case, and every case must be justified upon its own facts and peculiar circumstances. Howell v. N. Y., L. E. & W. R. R., 2 I. C. C. 162, 174.

(b) The grouping of a place requiring a shorter haul with one requiring a longer haul does not estop a carrier to assert that transportation to the two places is not under substantially similar circumstances and conditions; but merely admits that an equal rate is not prejudicial. Detroit, Grand Haven & Milwaukee Ry. Co. v. Interstate Commerce Commission, 7 I. C. C. App. lxxiv.

IMPORTANT CASES SINCE 1908

(c) It is seldom that ton-mile earnings alone are a decisive test of the unreasonableness of a rate, and this is especially true in the case of group rates. Empire Coke Co. v. B. & S. R. R. Co., 31 I. C. C. 573, 578.

(d) Wherever two lines from the same or different groups of mines inter-

sect, the rate of the line having the longer haul has been made the same as, or with relation to, the rate of the shorter line. Rates on Bituminous Coal, 36 I. C. C. 401, 403.

(e) Groups long maintained are presumably fair and are not to be disrupted unless substantial justice clearly requires it. Dissatisfied producers deprived of the benefit of their proximity to common markets must show that they are actually injured and by an unlawful discrimination. Galloway Coal Co. v. A. G. S. R. R. Co., 40 I. C. C. 311, 320.

(f) On long-haul traffic, group rates may be more extensive than where short hauls are the rule, yet it does not necessarily follow in instances where a group rate is extended that the subsequent reduction establishes unreasonableness of the rate formerly in effect. Cambria Steel Co. v. Director General, as Agent, 60 I. C. C. 459, 463.

(g) Prescribing rates as a whole in rate groups necessarily means that the return will not be the same for each carrier. New England Divisions, 62 I. C. C. 513, 526.

(h) In considering group rates weight is given to the average distance over route not unduly circuitous. Ohio-Michigan Coal Cases, 80 I. C. C. 663, 671.

(i) Group rates disregard distance to some extent, and it is not infrequent that localities within a group suffer thereby. Ohio-Michigan Coal Cases, 80 I. C. C. 663, 677.

(j) In the absence of proof of tangible injury to complainants or of positive evidence that rates are unjustly discriminatory or unduly prejudicial, a group adjustment should not be disturbed. Perry County Coal Corporation v. E. St. L. & S. Ry., 80 I. C. C. 711, 715.

(k) Groups of long standing are presumably fair and ought not to be disrupted unless substantial justice requires it. Perry County Coal Corporation v. E. St. L. & S. Ry., 80 I. C. C. 711, 715.

(l) When a complaint challenges reasonableness of rates on a commodity from only one point and it appears that, because of competitive or other practical trade or transportation considerations, a number of points of origin of the particular commodity are grouped under common rates, and also that there is a relationship between two or more groups, the commission must give due consideration to other factors than rate comparisons. Atlas Portland Cement Co., 44 I. C. C., 416, 422. Perry County Coal Corp. v. E. St. L. & S. Ry. Co., 80 I. C. C., 711, 715.

(m) Groups of long standing are presumably fair and ought not to be disrupted unless substantial justice requires it. Galloway Coal Co., 40 I. C. C., 311, 320, and cases there cited. Perry County Coal Corp. v. E. St. L. & S. Ry. Co. 80 I. C. C., 711, 715.

(n) Commercial competition and conditions under which industries are compelled to conduct their business as distinguished from transportation conditions are important considerations in adjustment of group rates, and this is particularly true of such rates on coal. Melcroft Coal Co. v. I. C. V. Ry. Co., 81 I. C. C., 251, 258.

(o) In considering reasonableness of group rates, distances between selecting points can not be regarded as controlling. Reasonableness of such rates must be judged by average conditions. Indiana State Chamber of Commerce v. B. & O. R. R. Co., 83 I. C. C. 591, 595.

ALL OTHER CITATIONS

Ladd & Co. v. Gould S. W. Ry. Co., 36 I. C. C. 179, 183; Memphis Freight Bureau v. St. L., I. M. & S. Ry. Co., 39 I. C. C. 224, 244; Milling Logs in Transit on Tap Lines, 40 I. C. C. 597, 601; Galloway Coal Co., 40 I. C. C. 311, 320; Riverside Coal Co. v. Director General, as Agent, 68 I. C. C. 205, 209; National Paving Brick Mfrs. Asso. v. A. & V. Ry. Co., 68 I. C. C. 230, 246.

§16. Burden of Proof.

See Burden of Proof; Evidence I.

CASES 1887-1908

(a) On transcontinental traffic, rates that are just and reasonable from selected manufacturing points, through the entire territory east of the Missouri River and west of the Atlantic Seaboard are prima facie just and reasonable from all other points in the same territory. Re Tariffs of the Transcontinental Lines, 2 I. C. C. 203, 207.

(b) A tariff naming a rate from one locality lower than that enjoyed by its neighbor, when the circumstances are the same, renders a preference or advantage to the first; and when any shipper is damaged by the exaction of an additional burden the preference becomes undue and unreasonable, unless it can be justified

upon some sound and substantial ground. Re Tariffs of the Transcontinental Lines, 2 I. C. C. 203, 207.

(c) Traffic moves from interstate points to destinations in the Texas common point territory under a system of rates that obtains in no other part of the United States of equal extent. In general, all points in this vast area take the same rates from any given point of origin on or east of the Missouri and Mississippi Rivers. A change in the rates to one common point necessarily involves an extensive disturbance of rates to other common points or must tend to disrupt the common-point system upon which commercial conditions in Texas are based. A controversy that questions the reasonableness of rates to one common point ought therefore to be presented in all its aspects and receive the fullest consideration before action is taken. Dallas Freight Bureau v. Mo., Kan. & Tex. Ry. Co., 12 I. C. C. 428.

IMPORTANT CASES SINCE 1908

(d) A group rate will not be disturbed or be held to constitute an undue preference against a point lying a short distance outside the group without proof of tangible injury resulting to the complainant. Bovaird Supply Co. v. A., T. & S. F. Ry. Co., 13 I. C. C. 56, 66.

(e) It may be generally true that a system of blanket rates from a producing section is fair and just to all parties concerned, although it necessarily involves rates that are somewhat high for the distance from points on the edge of the blanket nearest the points of distination, but in making such an adjustment the burden rests upon the carrier to provide rates that shall not be unreasonable from any point of origin. Ferguson Saw Mill Co. v. St. L., I. M. & S. Ry. Co., 18 I. C. C. 391, 393.

(f) The contention that the reasonableness of blanket rates are not to be determined by the amount of revenue received on traffic to certain points within the blanket is sound in cases where blanket rates are so adjusted as to work no undue prejudice to any shipper, receiver, or locality. Lincoln Commercial Club v. C. & S. Ry., 47 I. C. C. 557, 560.

ALL OTHER CITATIONS

Commercial Club of Omaha v. Southern Pacific Co., 20 I. C. C. 631; Pueblo Commerce Club v. A., T. & S. F. Ry. Co., Unrep. Op. 427; Lion Coal Co. v. U. Ry. Co., 60 I. C. C. 674, 681.

§17. Extent of Zone.

CASES 1887-1908

(a) The grouping of two stations by a railroad company as stations to which the freight rates from the far east may properly be made the same is a conclusive admission by it that so far as the transportation from the east to its warehouses at such stations is concerned, it is under substantially similar conditions and circumstances. Interstate Commerce Commission v. Detroit, G. H. & M. R. Co. (C. C. W. D. Mich.), 4 I. C. R. 722.

IMPORTANT CASES SINCE 1908

(b) Differences in distance are relatively inconsiderable when rates are constructed and maintained upon the group system and the subject matter is a heavy commodity like coal. Victor Mfg. Co. v. S. Ry. Co., 27 I. C. C. 661, 663.

(c) In testing the reasonableness of rates from producing points to a blanket territory of destination, consisting of arbitraries to a common point and a "stem rate" beyond, the fact that the producing points are also served by carriers whose hauls are longer than the short-line distances and whose lines do not pass through the common point upon which the rates are based, is entitled to consideration. Northern Pine Mfrs. Asso. v. C. & N. W. Ry., 33 I. C. C. 360, 369.

(d) Where, under the pleadings, the rate from every point in a blanket to every destination involved is put in issue, testimony pointing out that the blanket has been developed more by adding points nearer to the destinations than by adding points further away, is relevant and material and therefore admissible. Oklahoma Cottonseed Crushers' Assn. v. M., K. & T. Ry. Co., 39 I. C. C. 497, 500.

ALL OTHER CITATIONS

Williams Co. v. V., S. & P. Ry. Co., 16 I. C. C. 482, 484; Muskogee Traffic Bureau v. A., T. & S. F. Ry. Co., 17 I. C. C. 169, 172, 173; R. R. Commissioners of Nev. v. S. P. Co., 19 I. C. C. 238, 239; Oregon & Washington Lumber Mfrs. Co. v. S. P. Co., 21 I. C. C. 389, 392; Arlington Heights Fruit Exchange v. S. P. Co., 22 I. C. C. 149, 152; Mutual Rice Trade & Devel. Assn., Houston, v. I. & G. N. R. R. Co., 23 I. C. C. 219, 224; Michigan Hardwood Mfrs. Assn. v. Freight Bureau, 27 I. C. C. 32, 34; Mount Pleasant Fertilizer Co. v. L. & N. R. R. Co., Unrep. Op. A-748; Meeker & Co. v.

C. R. R. of N. J., 57 I. C. C. 414-416; Grain and Grain Products from Idaho, 77 I. C. C. 225.

§18. Comparisons.

See Comparative Rates; Evidence §12, §13; Relative Rates.

IMPORTANT CASES SINCE 1908

(a) A comparison of a blanket rate with rates in other parts of the country where different physical, competitive and traffic conditions exist is insufficient to establish the unreasonableness of the blanket rate. Rhinelander Paper Co. v. N. P. R. R. Co., 13 I. C. C. 633, 634, 637.

(b) Where a comparison is made with a group rate for the purpose of testing the reasonableness of the rate attacked on the basis of relative ton-mile earnings the distance assumed for the group rate should be the average distance from the point of origin to the various points in the group. Board of R. R. Commissions of Montana v. D. & R. G. R. R. Co., 27 I. C. C. 522, 523.

(c) Rate comparisons based on distances are open to criticism where points selected are upon the edge of some territorial group so as to make the distance involved not fairly representative of the average distance from the entire group. Iowa State Board v. A. E. R. R. Co., 28 I. C. C. 193, 195.

(d) A proper comparison cannot, of course, be made with distances running to or from a blanket unless a mean point of the blanket is taken as the standard of measure. This is obvious because a group adjustment necessarily implies disregard of distance, and comparisons with points lying on the edges of the group would not fairly represent the relation as a whole. Northern Pine Mfrs. Asso. v. C. & N. W. Ry., 33 I. C. C. 360, 369.

(e) If a blanket or group arrangement is a reasonable one, founded upon sound business and transportation considerations, the reasonableness of a rate from the group to a given point is properly to be determined with respect to the average distance from all points in the group. The selection for comparative purposes of the shortest distance point would be as unjust to the carriers as the selection of the longest distance point would be unjust to the shippers. The group must be treated as a whole. Milliken Refining Co. v. T. Ry., 36 I. C. C. 109, 115.

(f) Mere distance comparisons of the nearer points in one group with specific points in lower rated groups without reference to the group adjustments as a whole, held not to warrant the making of another group to include the complaining points. Galion Iron Works & Mfg. Co. v. B. & O. R. R., 47 I. C. C. 136.

(g) It is difficult to compare a rate applicable to a large blanket with rates graduated according to distance. The only fair way to make such a comparison is to ascertain as nearly as possible the center of distribution on the blanket rate and contrast the revenue per ton-mile on the short-line distance at the graduated rates. California Walnut Growers' Assn. v. A. & R. R. R., 50 I. C. C. 558, 569.

(h) While entitled to reasonable rates from its nearest source of supply, proof that rates from some of the points from which blanket rates are maintained, which rates are made to meet competition from nearer points, yield lower ton-mile earnings, is insufficient to establish that the rates for the shorter distances are unreasonable or unduly prejudicial. Traffic Bureau, Sioux Falls Commercial Club, v. G. N. Ry., 50 I. C. C. 611, 612.

(i) The theory of a group rate adjustment is that the rate to the shortest haul point in a group is somewhat higher than it might be if it were considered as a rate in and of itself, and the rate to a long haul point in the same group may be somewhat lower than it might otherwise be if considered a rate applicable only to that point, so that the proper comparison in determining the reasonableness of group rates is to take the average distance of the whole origin group and compare it with a like distance to the destination group. Chamber of Commerce of the City of Milwaukee v. C. B. & Q. R. R., 78 I. C. C. 110, 117.

(j) Group rates disregard distance to some extent, and comparisons made between specific points in a group and nearby points in another group do not reflect the relation as a whole. Davison & Namack Foundry Co. v. Pennsylvania R. R. Co., 81 I. C. C. 345, 346.

ALL OTHER CITATIONS

Oregon & Washington Lumber Mfrs. Assn. v. S. P. Co., 21 I. C. C. 389, 392; Ohio Foundry Co. v. P., C., C. & St. L. Ry. Co., 19 I. C. C. 65, 67; Idaho Commercial Clubs v. O. S. L. R. R. Co., 18 I. C. C. 562, 564; Anthony v. Philadel-

phia & Reading Ry. Co., 14 I. C. C. 581, 583; Victor Mfg. Co. v. S. Ry. Co., 27 I. C. C. 661, 664; Iowa State Board of Railroad Commissioners v. A. E. R. R. Co., 28 I. C. C. 193, 195; Wisconsin & Arkansas Lum. Co. v. St. L., I. M. & S. Ry., 33 I. C. C. 33, 39; Lindsay & Co. v. N. P. Ry. Co., 32 I. C. C. 287, 289; Northern Pine Mfrs. Asso. v. C. & N. W. Ry. Co., 33 I. C. C. 360, 369; Brush Creek Mining & Mfg. Co. v. L. & N. R. R. Co., 39 I. C. C. 449, 453; State of Iowa v. Wabash Ry., 46 I. C. C. 703, 709; National Petroleum Asso. v. M., K. & T. Ry., 47 I. C. C. 355, 358; West Virginia Rail Co. v. Penn. R. R., 50 I. C. C. 304, 306; Tribune Co. v. G. N., 53 I. C. C. 745, 746; Cambria Steel Co. v. Director General, 60 I. C. C. 459, 463; Goodman Drilling Co. v. Director General, as Agent, 61 I. C. C. 164, 167; Milwaukee Chamber of Commerce v. C. B. & Q. R. R. Co., 78 I. C. C. 110, 117, 118.

§19. Competition.

See Competition.

IMPORTANT CASES SINCE 1908

(a) Competition alone is not the only factor to be considered in the fixing of groups and rates. To take into consideration commercial and competitive conditions only would be to disregard distance and transportation conditions and to revert to the discarded equalization of cost theory; and to carry this theory to its logical conclusion would compel the consideration of the cost to the industry of manufacturing its products, which, of course, is clearly beyond the Commission's powers under the law. The Grouping of Monessen and Donora, 48 I. C. C. 650, 653.

(b) In refusing to disrupt a group adjustment upon complaint, the Commission considers the effect of commercial competition, and the fact that business conditions have become adapted to a rate equality, which does not, on the whole, unduly prejudice the near, or unduly prefer the far, points in the group, and the disruption of which would bring serious consequences to the farther points. If the Commission may thus consider commercial reasons for continuing a group, it may also consider such reasons for creating a group. If the Commission may not create a group which, if already created, it could sanction, the general similarity of conditions in the two instances would be counteracted by the tactical and artificial advantage which the existing group would have by virtue alone of its having been voluntarily created and maintained by the carriers. Anaconda Copper Mining Co. v. Director General, 78 I. C. C. 549, 552.

ALL OTHER CITATIONS

Pacific Coast Gypsum Co. v. O. W. R. R. & N. Co., 30 I. C. C. 135, 138; Wisconsin & Arkansas Lumber Co. v. St. L., I. M. & S. Ry. Co., 33 I. C. C. 33, 38; Memphis Freight Bureau v. St. L., I. M. & S. Ry. Co., 39 I. C. C. 224, 242.

§19¼. New Decisions of Commission.

See Prior Decision of Commission.

ALL CITATIONS

Stewart Sand Co. v. A. T. & S. F. Ry. Co., 68 I. C. C. 111; Democrat Printing Co., v. Director General, as Agent, 74 I. C. C. 595; Gila Water Co. v. A. E. R. R. 78 I. C. C. 15; Adriatic Mining Co. v. C. & N. W. Ry., 78 I. C. C. 611; Melczer Co. v A. E. R. R., 78 I. C. C. 319; Arkansas Jobbers & Manufacturers Asso. v. C., R. I. & P. Ry., 80 I. C. C. 620.

§19½. Reparation.

See Reparation.

CASES 1887-1908

(a) Reparation on shipments of hay and grain from Morganfield, Henshaw, Corydon, Grove Center and other nearby Kentucky points, during the period when higher rate was in effect than to other group points. Harth v. Ill. Cent. R. R. Co., 12 I. C. C. 448.

(b) For several years defendants maintained uniform rates on shipments of grain and kindred products to Atlanta, Ga., and points beyond, from a group of towns on their lines beginning on the north with Henderson and Uniontown, Ky., and including Morganfield, Henshaw, Corydon, Grove Center, and other nearby points; but on December 15, 1904, defendants increased the rates to said destination points by adding 4 cents per 100 pounds on all shipments originating at any point in the group described except Henderson and Uniontown. This gave to Henderson and Uniontown lower rates than those applicable from the intermediate points. On April 5, 1905, defendants canceled the increased rates from the intermediate points, restoring the former rates, and thus again putting all points in this

group upon an equal rate basis. Complainants filed petitions to obtain reparation on their shipments of hay and grain made from said points under the increased rates. Defendants stipulated that they would submit to a reparation order on the basis of 3 cents per 100 pounds on all shipments made during the period of the effectiveness of the higher rates. Upon that basis final adjustment of the controversy was agreed to, and reparation orders aggregating $1,333.28 were entered. Enterprise Mfg. Co. et al. v. Georgia R. R. Co. et al., 12 I. C. C. 450.

IMPORTANT CASES SINCE 1908

(c) Complainant attacks as unreasonable and unduly prejudicial rates on fuel oil from the Mid Continent field to Keokuk, Iowa, in preference to Granite City, Pekin and Argo, Ill. Fuel oil is a low grade petroleum product. Rates are the same on fuel oil as on gasoline, a higher refined product. In Mid Continent Oil Rates, 36 I. C. C. 109, the Commission found that the rates on gasoline should be 20c to St. Louis, 21c to Keokuk, and that the maximum rates on low grade oils, including fuel oil, should be 15c to St. Louis and 20c to Chicago and also stated that rates on lower grades of oil to other points covered in the decision should be applied in just relationship as gasoline. Carriers did not comply with this part of the order in publishing rates to Keokuk. HELD: Rates on fuel oil to Keokuk are unreasonable and unduly prejudicial to extent they exceeded or may exceed rates 5c per 100 pounds less than rates on gasoline, and also that rates under attack should be the same as the rates on fuel oil to St. Louis from Group 1 and not more than 1c in excess of rates to St. Louis from Groups 2 and 3. As to reparation, shipments moving under certain contracts were not entitled to reparation because complainant did not ultimately bear the freight charges, but if any shipments moved where the situation shows that they did bear the freight charges, reparation may be handled on the special docket. Hubinger Bros. Co. v. Director General, 58 I. C. C. 53.

VIII. REGROUPING.

§20. In General.

CASES 1887-1908

(a) Where a system of rates is made by a number of carriers, covering a widely extended territory, which seem to be reasonable in themselves and relatively fair, so far as the evidence shows, the Commission will not order them to be changed at one important point, thereby rendering other changes unavoidable at a large number of other points, and throwing the rates of the entire system into confusion and upsetting values, unless a case arises in which it is necessary that this should be done in order to enforce compliance with the law and to reach the ends of substantial justice. Detroit Board of Trade v. G. T. R. R., 2 I. C. C. 200, 203.

IMPORTANT CASES SINCE 1908

(b) Where the group arrangement is of long standing and business has adjusted itself thereto, the Commission is loath, in the absence of a clear discrimination resulting therefrom, to disturb the arrangement. If, however, differences growing out of rivalry and internecine competition between the shippers from the different groups can no longer be composed among the parties themselves, the Commission may have no alternative but to break up the group arrangement and substitute for the existing adjustment a rate basis which will give to each of the several districts its just relation to all districts. Bituminous Coal to C. F. A. Territory, 46 I. C. C. 66, 143.

(c) Rates between points located at the extremities of their respective groups not found unreasonable and objection by carriers to a proposed detachment of these particular points or origin and destination from their respective groups held to be well founded. Empire Refineries (Inc.) v. Director General, as Agent, 60 I. C. C. 379.

(d) The Commission has recognized the system of group-rate making as proper, within limits, except where shippers or consignees are really damaged by the rates thus afforded while others are correspondingly benefited, and has generally refrained from breaking up a group where it has not been made to appear that the party seeking such action is actually damaged by the discrimination that results from the group rate. South Dakota Ry. Commissioners v. A. & W. Ry. Co., 74 I. C. C. 295, 306, 307.

(e) Groups of long standing are presumably fair and ought not to be disrupted unless substantial justice requires it. Galloway Coal Co., 40 I. C. C., 311, 320, and cases there cited. Perry County

Coal Corp. v. E. St. L. & S. Ry. Co., 80 I. C. C. 711, 715.

(f) The commission has consistently refrained from breaking up a group where it has not been made to appear that party seeking such action is actually damaged by discrimination which results from the group rate. Newport Mining Co. v. C. & N. W. Ry. Co., 33 I. C. C., 645, 657, and cases cited. Galloway Coal Co., 40 I. C. C., 311, 320 and cases there cited. Perry County Coal Corp. v. E. St. L. & S. Ry. Co., 80 I. C. C. 715.

(g) Where the arrangement is of long standing, the grouping should not be lightly or unnecessarily disturbed. Lincoln Gas Coal Co. v. B. & O. R. R., 88 I. C. C. 379, 383.

ALL OTHER CITATIONS

Cement Rates from Mitchell, Ind., 32 I. C. C. 93; The Illinois Coal Cases, 32 I. C. C. 659; Sand and Gravel Rates from Wisconsin Points, 34 I. C. C. 467; Milliken Refining Co. v. M., K. & T. Ry., 36 I. C. C. 109, 115; Peet Bros. Mfg. Co. v. A., T. & S. F. Ry., 36 I. C. C. 208; Colorado Class Rates, 37 I. C. C. 203, 209, 211; Drain Tile from Illinois Points (No. 2), 42 I. C. C. 707, 711; Lake Cargo Coal Rates, 46 I. C. C. 159, 172, 175, 177; The New York Harbor Case, 47 I. C. C. 643, 713; The Grouping of Monessen and Donora, 48 I. C. C. 650; Bituminous Coal Rates to the Southeast, 50 I. C. C. 1; Sheboygan Association of Corn v. C. & N. W. Ry., 55 I. C. C. 140, 144; Illinois Classification, 55 I. C. C. 290, 303, 304; Memphis Southwestern Investigation, 55 I. C. C. 515, 522, 524, 528, 551, 555, 566; Bartlett-Colline Glass Co. v. St. L. & S. F., 56 I. C. C. 236, 245; Illinois Classification, 56 I. C. C. 687; Goodman Drilling Co. v. Director General, 61 I. C. C. 164, 167; Austin Abbott v. Director General, 61 I. C. C. 296; South Bend Chamber of Commerce v. Director General, 61 I. C. C. 67; James A. Coad v. C., St. P., M. & O. Ry. Co., 64 I. C. C. 178; Interstate Rates on Grain, Grain Products and Hay, Carloads, Between Points in the Western and Mountain Pafic Rate Groups, 69 I. C. C. 562; Newport Mining Co. v. C. & N. W. Ry. Co., 33 I. C. C. 645, 657; Galloway Coal Co., 40 I. C. C. 311, 320; Anaconda Copper Mining Co. v. Director General, as Agent, 78 I. C. C. 549, 552.

BOILER INSPECTION ACT

IMPORTANT CASES SINCE 1908

(a) Report of the Commission to the United States Senate in response to Senate Resolution No. 327, in respect of whether and to what extent the boiler inspection act, as amended, is being violated, and whether inspection of locomotive boilers is being made in all federal locomotive boiler inspection districts and upon the roads of all common carriers engaged in interstate commerce as required by said act. Inspection of Locomotive Boilers, 73 I. C. C. 761.

(b) It is not possible for the commission to make a determination as to the extent to which the boiler inspection act currently is being violated. Such a determination would involve ascertainment of the condition of each locomotive and information as to the uses being made thereof. The condition varies even as to the same locomotive from day to day. There are approximately 70,000 locomotives within the general purview of the act, housed or repaired at approximately 4,000 different points and operated on more than 265,000 miles of track. Inspection of Locomotive Boilers, 73 I. C. C. 761, 762.

(c) The boiler inspection act does not contemplate that the Commission's inspectors shall inspect all locomotives. Under that act their services are general in character, and they are given such direction as is designed to bring about a compliance with requirements by the carriers. Inspection of Locomotive Boilers, 73 I. C. C. 761, 762, 763.

(d) It is the "use" of a locomotive not found to be in proper condition and safe to operate, and not the condition itself, which is a violation of the boiler inspection act. Inspection of Locomotive Boilers, 73 I. C. C. 761, 763.

(e) A locomotive may be defective and in need of repairs and yet be in a condition in which it is "safe to operate . . . . without unnecessary peril to life or limb." In many instances defects discovered and brought to the attention of carrier representatives are immediately repaired without retiring the locomotive. Under section 6 of the boiler inspection act notice is given of the more serious defects and the locomotives are required to be retired. Inspection of Locomotive Boilers, 73 I. C. C. 761, 763.

(f) In pursuance of the duty of inspectors to see that requirements of the boiler inspection act are complied with and that equipment is kept in safe condition, the inspectors deal with the vary-

ing situations and conditions in that manner which is deemed likely to accomplish the best practical results. The exercise of discretion and judgment is always involved. Inspection of Locomotive Boilers, 73 I. C. C. 761, 763.

I. REASONABLENESS OF RATES.

§1. In General.

CASES 1887-1908

(a) A branch road must be accessible to interstate shippers on equal and reasonable terms, and cannot be used to discriminate between mine owners on its line. Heck v. East Tennessee V. & G. R. Co., 1 I. C. R. 775.

(b) It can hardly be successfully claimed that a railroad company can maintain a separate equipment and carry from points on branch lines to the main line for transfer and forwarding, at as low cost as it could take up and carry a like quantity of freight from points equally distant on its main line, as from the points where the freight was taken up on the branches. Northwestern Iowa Grain & Stock Shippers Asso. v. C. & N. W. Ry. Co., 2 I. C. C. 431, 434.

(c) A higher rate may be maintained to a branch-line point off a direct through line without unjust discrimination. Lehmann v. Texas & P. R. Co. (Com.), 3 I. C. R. 706.

(d) As a general rule the operating expenses per ton per mile are greater on branch lines than on main lines. Eau Claire Board of Trade v. C., M. & St. P. R. Co., 4 I. C. C. 65, 73.

(e) A departure from equal mileage rates on different branches or divisions of a road is not conclusive that the rates are unlawful, but the burden is on the company making such departure to show its rates to be reasonable when disputed. James & Abbott v. Canadian Pacific, 4 I. C. R. 274.

(f) Complaint attacked rates on wheat from Pullman, Wash., to Portland, Ore., as unjust and unreasonable. Pullman is a branch line station 19 miles from defendant's line extending from Spokane to Portland, distant from each other about 450 miles. On 135 miles of this route between Pullman and Walla Walla the grades are heavy. The evidence presented by complainant had to do with rates on wheat between Kansas and Nebraska points to Chicago, where the cost of operation is not nearly as high as in the western country, where the rates attacked apply. Substantial reductions have been made since the case was heard which justify the expectation that further reasonable modifications will follow, and further reductions of the rate attacked by order of the Commission are not now deemed justifiable. HELD: Complaint dismissed. Morrell v. U. P. R. Co., 4 I. C. C. 469.

(g) Higher rates on commodities to a more distant point located on a branch line than to a nearer point, where the competition is greater, are justified. Holmes & Co. v. Southern R. Co., 8 I. C. C. 561.

(h) A passenger fare charge by defendant over its branch line from a point in Canada to a point in the United States, amounting to about 3 cents per mile for a distance of 35.3 miles, and including a 6-cent bridge charge by an independent company is not unreasonable upon the facts shown. Cist v. Michihgan C. R. Co., 10 I. C. C. 217.

IMPORTANT CASES SINCE 1908

(i) It is necessary that carriers be permitted to charge rates on branch lines that are fully compensatory for the services so long as they are not unreason-

able. Morgan Grain Co. v. A. C. L. R. R. Co., 19 I. C. C. 460, 471.

(j) The Commission has frequently recognized the justification for some additional charge for branch-line hauls. Page Milling Co. v. N. & W. Ry. Co., 30 I. C. C. 605, 610.

(k) Density of traffic over branch line is said to be about one-eighth of that over the main lines. American Coal & Supply Co. v. C. & N. W. Ry. Co., 30 I. C C. 492, 493.

(l) While rates from points on short branches may be somewhat higher than rates for like distances from points on main division of system, yet this rule should be applied without undue discrimination. Lumber to Nashville, Tenn., 31 I. C. C. 186, 189.

(m) Cost of service on branch line is greater than on main line. Reshipping Rates on Grain from Omaha, 32 I. C. C. 590, 595.

(n) The Commission has required extension of junction point rates to points on branch and connecting lines, where carriers had adopted such practice with respect to other points similarly located and circumstanced. In instant case as no similarity of transportation and operating conditions affecting rates assailed and rates cited disclosed, rates to branch line points on basis of combination rates not found unreasonable or unduly prejudicial. Caroon & Campbell v. Director General, as Agent, 57 I. C. C. 474, 478.

(o) Where a trunk line carrier publishes the same blanket rate on a specific commodity to destinations located on its branch lines, a shipper situated on an independent branch line connecting with this blanketed stretch of the main line is entitled to the blanket rate, especially where the service over the independent branch line is not in excess of the average service over the trunk line's own branches. Pioneer Lumber Co. v. Director General, as Agent, 64 I. C. C. 485, 489.

(p) Shortest distance applies via a branch line, a portion of which is of narrow gauge construction. Contended that the physical situation is immaterial and that shipper is lawfully entitled to use the shortest distance in the application of distance rates in view of the tariff being unrestricted. HELD: Such unrestricted distance rates would clearly be applicable via the branch line, but the charging of such rates on shipments moving via the longer route is not a violation of section 6, but rather involves unreasonableness under section 1. Since the branch line does not constitute a reasonable route, the moving of shipments via the longer route did not constitute misrouting. Calivada Fertilizer Co. v. S. P. Co., 73 I. C. C. 496, 501, 502.

(q) Disadvantageous operating conditions and light traffic may justify higher rates on a branch line than on a main line. Jackson Lumber Co. v. L. & N. R. R. Co., Unrep. Op. A-220

(r) In cases where establishment or maintenance of district rates from points on independent short lines is sought, no rule of general application can be followed, but each situation must be judged in accordance with its particular facts and circumstances. Big Mandy Coal & Mining Co. v. L. R. R. Co., 78 I. C. C., 445, 450.

(s) Extension of junction-point rates to points on branch lines is not unusual but generally has not been required unless it has appeared that carriers had adopted such practice with respect to other points similarly located and circumstanced, or that rates to junction points were made on group basis and applied over a considerable territory when conditions of operation and transportation on main and branch lines were substantially similar. Western Coal Rates, 80 I. C. C. 383, 450.

§2. Compared With Main Lines.

See Comparative Rates; Evidence §57½; Reasonableness of Rates §32.

CASES 1887-1908

(a) Where the roads and branches of two companies extend to and penetrate a wheat producing district, from which they make a joint rate for distances of 480 miles and each company makes the same rate separately for the same district, one for distances of 450 and the other for distances of 650 miles over their respective lines to the same destination. HELD: That it may be fairly assumed that the rates so jointly and separately made are reasonably remunerative and profitable. HELD FURTHER: That what is reasonable compensation for this longer and more expensive branch line service is excessive for the shorter distance of 311 miles over a less expensive route from the same district to the same destination. Newland v. Northern Pacific R. Co., 4 I. C. R. 474.

IMPORTANT CASES SINCE 1908

(b) A new line is not required to establish as low a rate as a more firmly established road. Du Mee, Son & Co. v. A., T. & N. R. R. Co., 19 I. C. C. 575, 576.

(c) The Commission does not feel justified in requiring a newly constructed line with a comparatively meager traffic to join in the establishment of rates on cotton linters as low as those applying from points located on the rails of carriers more firmly established. Du Mee, Son & Co. v. A. T. & N. R. R. Co., 19 I. C. C. 575, 576.

(d) That a given point, otherwise similarly circumstanced, is located on a branch line, while other points enjoying lower rates are located on main lines, does not create dissimilarity of circumstances. Santa Rosa Traffic Assn. v. S. P. Co., 24 I. C. C. 46, 48.

(e) While rates from points on short branches may be somewhat higher than rates for like distances from points on the main division of the system, yet that rule should be applied without undue discrimination. Lumber to Nashville, Tenn., 31 I. C. C. 186, 189.

(f) When transportation conditions warranted it the Commission has allowed a difference between branch line rates and contemporaneous rates for equal distances on the main line. Railroad Commissioners of North Dakota v. N. P., 53 I. C. C. 437, 440.

(g) There is no substantial difference between the cost of service from points on short-line connections not operated by trunk lines and that from points on branch lines. Hollingshead Co. v. Director General, as Agent, 62 I. C. C. 147, 149.

§3. As Part of System.

See Evidence §57½.

CASES 1887-1908

(a) The service may be rendered under such dissimilar circumstances as to make it lawful to charge more for the same distance on one line or branch than on another line or branch of the same road. Northwestern Iowa Grain & Stock Shippers' Asso. v. C. & N. W. R., 2 I. C. C. 431, 434.

(aa) The Chicago, Milwaukee & St. Paul Railway Company owns and operates an extensive system of Railroads. One of its lines, used largely for the transportation of wheat, runs from a point in Dakota Territory through Minneapolis and St. Paul, to Milwaukee and Chicago. Between Minneapolis and Milwaukee defendant has two routes, one by way of Red Wing and other towns, called the River Division, and being the shorter route; the other by the way of Northfield, Faribault and other towns, and called the Iowa and Minnesota Division. The through rate on wheat from the western terminus in Dakota to Milwaukee and Chicago is twenty-five cents per 100 pounds, with the privilege of milling in transit on both the above mentioned divisions. The rate on wheat from said western Territory to Minneapolis and St. Paul when consigned there, and most, if not all of which is carried by other roads, is seventeen and a half cents a hundred. The rate on the River Division of defendant's road and other competing roads from Minneapolis to Milwaukee and Chicago, and from all intermediate and connecting points on that route, is seven and a half cents a 100 pounds. The rate on wheat on the Iowa and Minnesota Division from Minneapolis and the intermediate towns on that division is fifteen cents per 100 pounds, except from Farmington, which has thirteen and a half cents. The rate on other commodities is the same by both routes. The fact that the rates on wheat on the Iowa and Minnesota Division is double the rate enjoyed by neighboring towns on the other division works practically to their disadvantage and prejudice. On complaint of millers and others on the Iowa and Minnesota Division of unjust discrimination, HELD: (a) That the complaint is well founded; that the rate on wheat on that division is relatively too high; that while a reasonable differential may be allowed on that division, on account of greater distance and probable larger expense of transportation and the greater stringency of the competitive forces on the River Division, the difference above the present rate on the River Division should not exceed two and a half cents a hundred. (b) That it is not a sufficient compliance with the Law that rates are reasonable in themselves, but they should be so relatively reasonable as to protect communities and business against unjust discrimination. (c) That when the same carrier operates parallel lines, and for any cause accepts low rates on one line, it should furnish sufficient corresponding advantages to the patrons of the other line to prevent undue prejudice and disadvantage, and to preserve the substantial equality contemplated by the statute. Boards of Trade Union v. Chic., Milwaukee & St. P. R. R. Co., 1 I. C. R. 608.

(ab) A railroad company cannot complain of an act fixing the rate of charge for the carriage of passengers, as unjust, upon the ground that it denies it the right to fix such rates as will yield a profit upon a particular branch of the road. Missouri P. R. Co. v. Smith (Ark.) 5 I. C. R. 348.

IMPORTANT CASES SINCE 1908

(b) What might perhaps have been proper as between companies operating separate and distinct short lines may become unreasonable and unjust when both are absorbed by a large system which serves an extensive territory. Black Mountain Coal Land Co. v. Sou. Ry. Co., 15 I. C. C. 286.

(c) The fact that rates on other parts of the carrier's system are forced down by competition to a very low point does

not justify a higher rate to a point located on a branch line, since such point is entitled to the reasonable rate which its location and other advantages dictate without taking into account conditions which bring about lower rates to other points. Board of Trade of Winston-Salem v. N. & W. Ry. Co., 16 I. C. C. 12, 16.

(d) Commission rates are usually the same for all lines, both main lines and branches. It is fair that the main line should in a degree contribute to the support of the branch line, for the branch-line business when it reaches the main line is surplus traffic from which a larger profit is made. It is in the public interest that rates shall be so adjusted that population and industries may freely diffuse themselves. In determining the reasonableness of rates upon a main line based upon earnings, reference must be made to the earnings of branch lines which contribute to it. Receivers & Shippers Assn. of Cincinnati v. C., N. O. & T. P. Ry. Co., 18 I. C. C. 440, 465.

(e) The fact that a rate is made applicable to certain destinations irrespective of whether most of them are located on branch lines does not justify an unreasonable rate to any of the destinations involved, but the reasonableness of the rate is to be tested as a whole. League of Southern Idaho Commercial Clubs v. O. S. L. R. R. Co., 18 I. C. C. 562, 564.

(f) If the branch lines of a railroad are judiciously planned and constructed they should certainly be taken into account in determining the value of the railroad, for although they may not earn a large return upon the cost considered as an independent proposition, they do add to the traffic and the earning power of the entire system; but it must be assumed that the new branches which have been constructed are good investments, otherwise they would not have been built, and that they will add to the earnings of the property in proportion as they have added to its cost. No increase in rate should be called for on this account. City of Spokane v. N. P. Ry. Co., 19 I. C. C. 162, 171.

(g) The carrier cannot claim the right to earn a net profit from every mile, section or other part into which the road might be divided. L. & N. R. Coal and Coke Rates, 26 I. C. C. 20, 30.

(h) If railroads were free to transfer all their expenses of competition to shippers, they would be relieved of the necessity of exercising proper judgment and care in laying out new lines and operating old ones. Lumber Rates from Memphis and other Points to New Orleans, 27 I. C. C. 471, 481.

(i) Where traffic originates upon a branch line, the main line should accept for its haul from the junction point something less than it receives upon business originating at the junction point. Rail road Commissioners of Florida v. A. C. L. R. R. Co., 28 I. C. C. 356, 359.

(j) Rates should not be fixed for a main line without reference to branch lines contributing to it. Atlanta Freight Bureau v. N. C. & St. L. Ry., 29 I. C. C. 476, 485.

(k) The law does not impose upon a carrier the duty in all cases to give to points on a connecting independent railroad the same rates to markets that it gives to points on its own branch lines in the same region. McGowan-Foshee Lumber Co. v. F. A. & G. R. R., 51 I. C. C. 317, 322.

(l) In an extensive blanket a branch-line haul of 30 miles loses its significance unless it is made to appear that the branch-line operation is much more expensive than main-line operations from remoter parts of the blanket. State of Idaho, ex rel v. Director General, 66 I. C. C., 330, 337.

§4. In Competition With Main Lines.

CASES 1887-1908

(a) Two of the south branch lines of said Railway Company are crossed by the main line of the Chicago, Milwaukee & St. Paul R. R. Co. From points on these branch lines the Northwestern Company comes in competition with the St. Paul Company, from its main line points; HELD, that the charges on these branches do not establish a standard of reasonable rates for like distances from points on the north branch of the same company where no such competition exists. Northwestern Iowa Grain & Stock Shippers' Asso. v. Chicago & N. W. R. Co., 2 I. C. R. 431.

(b) Where branch lines of a railway company are crossed by the main line of another company, and from these points the company comes in competition with the other company from its main-line points, the charges on these branches do not establish a standard of reasonable rates for like distances from points on another branch of the same company where no such competition exists. Northwestern Iowa Grain & Stock Shippers Asso. v. Chicago & N. W. R. Co., (Com.) 2 I. C. R. 431.

(c) Where the roads and branches of two companies extend to and penetrate a wheat-producing district, from which they make a joint rate for distance of 480 miles, and each company makes the same rate separately from the same district, one for distances of 450 and the other for distances of 650 miles over their respective lines to the same destination, the rates so jointly and separately made must be held excessive for a shorter distance of 311 miles over a less expensive route, from the same district to the same destination. Newland v. Northern P. R. Co. (Com.), 4 I. C. R. 474.

(d) Where the roads and branches of two companies extend to and penetrate a wheat producing district, from which they make a joint rate for distances of 480 miles and each company makes the same rate separately from the same district, one for distances of 450 and the other for distances of 650 miles over their respective lines to the same destination. HELD, that it may be fairly assumed that the rate so jointly and separately made are reasonably remunerative and profitable. HELD FURTHER, that what is reasonable compensation for this longer and more expensive branch line service is excessive for the shorter distance of 311 miles over a less expensive route from the same district to the same destination. A. S. Newland v. Northern Pacific R. R. Co., et al, 6 I. C. C. 131.

IMPORTANT CASES SINCE 1908

(e) In establishing a reasonable rate the strongest line should not alone be considered; the necessities of the weaker line must also be taken into account. City of Spokane v. N. P. Ry. Co., 15 I. C. C. 376, 394.

(f) It is almost axiomatic that rates cannot be made so as to give high earnings to a poorly placed, indifferently operated, or an isolated road, without making rates extortionate. In Re Advances in Rates—Western Case, 20 I. C. C. 307, 377.

(g) So it has been decided that branch lines may be established by applying the same mileage scale as upon the main line, plus an additional charge. In this case branch lines of the Southern Pacific were to charge $2.50 per car in addition to the mileage scale for the main line. American National Live Stock Asso. v. So. P. Ry. Co., 26 I. C. C. 37, 40.

(h) Where traffic originates upon a branch line the main line should accept for its haul from the junction point something less than it receives upon business originating at the junction point, for unless such a practice is applied branch lines cannot be maintained without the imposition of extravagant charges. Railroad Commissioners of Florida v. A. C. L. R. R. Co., 28 I. C. C. 356, 359.

(i) Millers located on branch lines may be subjected to some disadvantage in comparison with competitors located along respondents main line if they are required to pay higher rates to and in from the various markets in which they deal, but the disadvantage would arise from their location. Indianapolis Board of Trade v. B. & O. R. R., 64 I. C. C. 416, 419.

III. CONTROL AND REGULATION.

See Control and Regulation.

§6. Jurisdiction of Commission.

See Interstate Commerce Commission; Jurisdiction of Commission

CASES 1887-1908

(a) Short road used as means of conducting interstate traffic in coal by companies owning connecting interstate roads is subject to Act to Regulate Commerce. Heck v. East Tennessee, V. & G. R. Co., 1 I. C. R. 775.

IMPORTANT CASES SINCE 1908

(b) Commission can establish through routes and joint rates to and from industries upon a belt railroad. St. Louis Springfield & Peoria R. R. v. P. & P. U. Ry. Co., 26 I. C. C. 226, 238.

(c) Where a railroad is not a "lateral branch line," within the meaning of the Act, the Commission cannot order a physical connection. Morris Iron Co. v. B. & O. R. R. Co., 26 I. C. C. 240, 243.

(d) Complainant seeking order requiring narrow-gauge line to restore part of tracks it had destroyed, dismissed for want of jurisdiction. Richmond-Eureka Mining Co. v. Eureka Nevada Ry. Co., 29 I. C. C. 62, 64.

ALL OTHER CITATIONS

St. Louis, Springfield & Peoria R. R. v. P. & P. U. Ry. Co., 26 I. C. C. 226, 230; Clay County Coal Asso. v. C. & M. R. R. Co., 81 I. C. C. 414, 422.

IV. DUTY TO FURNISH FACILITIES.

See Facilities and Privileges.

§7. In General.

See Cars and Car Supply.

IMPORTANT CASES SINCE 1908

(a) Contention that a lateral branch line is under no obligation to furnish cars, not sustained. Campbell's Creek Coal Co. v. A. A. R. R. Co., 29 I. C. C. 682, 690.

(b) Complainant alleged that the Alabama Central Ry., operating a line between Antaugaville and Booth, Ala., 8.5 miles, failed to supply them sufficient cars to transport lumber from Antaugaville to interstate destinations, and unduly preferred their competitors in the distribution of available cars. The A. C. Ry., connected at Booth with the M. & O. R. R. upon which it depended for its supply of freight cars. The A. C. served four lumber concerns; complainants, Whitewater Lum. Co., Felton Lum. Co., and James Miller. Complainants capacity was less than 25,000 ft. per day, and they had at date of hearing 175,000 ft., at Antaugaville; the Whitewater Lum. Co's. capacity was 40,000 ft., on hand 1,500,000 to 2,000,000 ft. Felton Lum. Co., capacity 10,000 ft. The A. C. published no rules for car distribution; but the conductor of its train made what he considered an equitable distribution, by which the Whitewater Lum. Co., was to receive 4 cars; complainants, 1 or 2 cars; and the Felton Lum. Co., 1 car. During the period from June, 1916, to September, 1917, inclusive, complainants received 118 cars; the Whitewater Lumber Co., 506 cars; the Felton Lum. Co., 72 cars; and Miller, 42 cars. It appeared that complainants held cars longer on the average than any of the others. During the latter part of the period involved complainants were not producing lumber; all they had was a supply of lumber, previously accumulated and constantly diminishing. This lumber had not been properly stacked so as to resist the elements. HELD (1) that without passing upon the question of jurisdiction to award damages for the alleged failure to furnish cars upon reasonable request as required by section 1, under the circumstances, disclosed of record it could not with propriety be found that defendant should respond in damages for its inabil-

ity to furnish a full car supply; (2) defendants practices with respect to the distribution of available cars, while meriting criticism, not shown to have unduly preferred complainant's competitors with resulting damage to complainants. Complaint dismissed. Oden-Elliott Lum. Co. v. A. C. Ry., 51 I. C. C. 403.

(c) In a typical case the complaint was dismissed because it was not proven that there existed unlawful discrimination as between carriers, in the sense that they failed to afford all reasonable proper and equal facilities for the interchange of traffic. There was unrestricted interchange between the narrow gauge line and the standard gauge line to the full extent that the difference in gauges would permit, and between them they maintained in constant operation a through route. The Commission HELD the lack of joint rates is not in itself a discrimination of the nature alleged. United States v. S. S. V. Ry., 53 I. C. C. 607, 618.

(de) Complainant attacked the rates, rule, regulations and practices applicable to the transportation of milk and cream, less carloads, from Cloverdale, Vt., to Hartford, Conn., as unreasonable, unjustly discriminatory and unduly prejudicial. Cloverdale is on the branch of the C. V., extending east from Essex Junction to Cambridge Junction, 18 miles from the former point; and Middlesex is on the main line of the same carrier, 27 miles south of Essex Junction. Shipments move over the C. V., to Windsor, Vt., the B. & M., to Springfield, Mass., and the N. Y. N. H. & H. beyond. Charges were exacted at the applicable per can rates, the reasonableness of which was not upon hearing questioned. Charges at the per can rate for the actual number of cans shipped were collected daily from complainant. Where shipments were made in open iced milk cars, from points on the C. V., additional charges at the per can rates, reduced to a per quart basis, were collected at the end of each month, for the difference between the number of quarts actually shipped and 5,100 quarts. There was and is no provision made by defendant's tariff for the exaction of charges based upon the minimum number of quarts shipped. Charges assessed and collected in excess of those accruing on the basis of the actual number of cans transported therefore were not and are not legally applicable and must be refunded. Shipments from Cloverdale are transported in baggage cars to Essex Junction, and thence to destination in open iced cars; those from Middlesex are transported the entire distance in open iced cars. Open iced cars are those for which the carriers supply ice in summer and which are stopped en route to pick up less than carload shipments. In April, 1919, complainant was notified by the C. V., that daily open iced cars service between the points involved would be re-established for the summer only upon condition that daily shipments of not less than 5,100 quarts would be guaranteed by complainant. To this complainant agreed. In November, 1919, complainant was notified that the same minimum quantity would be required for every other day open iced car service during the late fall and winter months. Defendants have offered, and still offer, baggage car service for shipments not in excess of 25 cans from and to the points involved on days when the Hartford car is not operated. Under the arrangement proposed, shipments would be handled in C. V., open iced cars to White River Junction and thence to destination in baggage cars of the B. & M., and N. Y. N. H. & H. The B. & M. refused to accept for transportation in this way shipments of more than 25 cans, maintaining that a greater number, on account of the lack of available space in baggage cars, would be subjected generally to long lay over at White River Junction; and that, when space was available, the loading of cans would delay passenger trains. Daily baggage car service is provided for shipments of milk and cream from Barton, Vt., which is on the B. & M., 90 miles north of White River Junction, to Springfield, Mass. From Northfield, Vt., a point on the main line of the C. V., intermediate to White River Junction from Middlesex, shipments to New Haven, Conn., are carried in the same car which complainant uses, and occasional shipments from two other points on the C. V., were made in this car during 1919. No guaranty of a minimum daily shipment is required of shippers at these points. Complainant competes with the consignee of shipments from Barton. No open iced car service is provided from Barton to Springfield and shipments of milk and cream from Barton are carried in baggage cars at baggage car milk rates on the regular passenger trains of the B. &

M. Shipments of milk and cream from Northfield to New Haven average 8 to 10 cans a day. Defendants insist that these shipments do not require through service, and could be carried in the open iced cars of the Boston milk train to White River Junction and thence in baggage cars to destinations. HELD, the assessment of charges in excess of those which would have accrued on the basis of the actual amount of the commodities shipped has been without tariff authority and therefore illegal; that these illegal charges must be refunded; that the rules, regulations, and practices attacked are, were, and for the future will be, unreasonable and unduly prejudicial, in that they fail to provide that, on days on which no open iced car service is provided, milk and cream may be shipped in baggage cars at the rates published for such transportation. Bryant & Chapman Co. v. Director General, 60 I. C. C. 237.

(f) A lateral branch line furthermore is under an obligation to furnish cars. Campbells Creek Coal Co. v. A. A. R. R. Co., 29 I. C. C. 682; Oden-Elliott Co. v. A. C. Ry., 51 I. C. C. 403; Bryant & Chapman Co. v. Director General, 60 I. C. C. 237.

(g) And under certain conditions a branch line may be able to compel a trunk line to maintain through routes and joint rates with it. Pittsburgh Term. R. R. & Coal Co. v. Director General, 63 I. C. C. 179.

(h) Shippers located on branch or lateral lines of a railroad are entitled to the same treatment in the distribution of cars as those on the main line. Chicago, R. I. & P. Ry. Co. v. Sims (Ark., 1923), 256 S. W. 33.

ALL OTHER CITATIONS

Timpson Brokerage Co. v. A. E. R. R. Co. Unrep. Op. 1863.

V. TARIFFS.

See Tariffs.

§8. In General.

IMPORTANT CASES SINCE 1908

(a) Points on new branch line not indexed in the applicable tariff from which rates applied, whereas the rates from stations included in the tariff had been in effect prior to opening of the new line. Contention that it was never intended to apply rates of original tariff to points on the new line not sustained, as defendant should have specifically excepted points on the new branch line, as was subsequently done. Wood Curtis Co. v. S. P., 56 I. C. C. 344, 345.

VI. THROUGH ROUTES AND JOINT RATES.

See Through Route and Joint Rates.

§9. In General.

ALL CITATIONS

BREAK-BULK RATES

IMPORTANT CASES SINCE 1908

(a) So-called "break-bulk" rates apply on certain rail and water rates across the Great Lakes, the principal route being from points north and west to Milwaukee and thence across Lake Michigan to Ludington, Michigan, and thence to trunk line territory east of Niagara Frontier. These rates are called break-bulk rates because at Milwaukee the shipments are unloaded and carried across the Lake and reloaded at Ludington. This method of handling usually results in a through rate 2 cents to a cent lower than the car ferry route or all rail route from Milwaukee via Chicago. The principal importance of these break bulk rates is in connection with grain. The Commission has held, generally, that the same differential in favor of the break-bulk rate should exist with respect to grain as other traffic. It is also of interest to note that it found that the cost to the railroad for handling grain from Milwaukee to Ludington via the break-bulk boats are equivalent to 2 cents per 100 pounds. In Re Advances in Break-bulk Rates, 27 I. C. C. 78.

(b) The Commission, however, has said that in view of the lower earnings by the break-bulk route the carriers should perhaps not be required to maintain lower rates via this route than via car ferry or all rail routes. Break-bulk Rates on Grain, 30 I. C. C. 357, 363. Note. Also see Milwaukee Produce and Fruit Exchange v. Crosby Transportation Co., 30 I. C. C. 653.

(c) However, subsequently it reversed its decision in this case and permitted the proposed increases to go into effect.

Break-bulk Rates on Grain, 30 I. C. 357. Also see Board of Trade of Chicago v. P. M. R. R. Co., 44 I. C. C. 345, 348.

ALL OTHER CITATIONS

Grain Rates from Milwaukee, 33 I. C. C. 417, 419.

BREAKING RATES

See Basing Points and Lines; Car Ferry; River Crossing.

IMPORTANT CASES SINCE 1908

(a) The breaking up of a rate for transportation into separate rates or charges for the individual services incident to the transportation is merely a different way of stating the former rate. National Poultry, Butter & Eggs Assn. v. B. & O. S. W. R. R. Co., 43 I. C. C. 392, 397.

(b) It is impracticable to arrange so that rates will make and break at various widely separated points and be the same in the aggregate. Toledo Produce Exchange v. N. Y. C. R. R., 50 I. C. C. 515, 521.

I. REASONABLENESS.

See River Crossings.

§1. In General.

CASES 1887-1908

(a) Complainant alleged a rate of $2 per car charged by defendant for hauling a carload of grain across the bridge from Council Bluffs to Omaha and South Omaha, Neb., was reasonable, but that charges of $6 per car from Council Bluffs to Omaha and $8 per car from Council Bluffs to South Omaha, were unreasonable. Defendant has in force a rate of 1 cent per 100 pounds, minimum charge $5 per car, for transferring grain in carloads from Council Bluffs to Omaha and South Omaha. Its rate for transferring grain from Omaha and South Omaha to Council Bluffs for delivery upon its own tracks is $2 per car, which was put in to induce construction and maintenance of a modern and capacious elevator on its line in Council Bluffs, and a higher rate is charged by it on grain transferred to Council Bluffs for delivery to elevators or industries on other lines. The delivery of grain by defendant in Omaha or South Omaha is for industries or elevators on other lines, for which, under car service rules, it must allow such other lines $2 per car per diem rental. The grain rates from the West to Omaha, South Omaha, and Council Bluffs are the same, while from the East the rates to Council Bluffs are less than to Omaha or South Omaha. HELD, rate attacked not unreasonable, complaint dismissed. Omaha Grain Exchange v. Union Pacific R. R., 12 I. C. C. 66.

IMPORTANT CASES SINCE 1908

(b) If a bridge toll is charged or absorbed at one crossing it should be charged at all crossings. Paducah Board of Trade v. C. B. & Q. R. R. Co., 37 I. C. C. 743, 751.

(c) The Commission has frequently recognized the cost of bridges across such rivers as the Ohio and the Mississippi in connection with the movement of both freight and passenger traffic. Cases cited where such costs were given consideration. Bituminous Coal to C. F. A. Territory, 46 I. C. C. 66, 129.

(d) Charges for a bridge service may be determined upon a basis somewhat different from that employed in the construction of charges at a crossing where the transfer is effected by barges or other floating equipment. Memphis-Southwestern Investigation, 55 I. C. C. 515, 552.

(e) Complainant attacked rates charged on carloads of wheat and corn shipped between July 12, 1918, and Dec. 15, 1919, from a number of points in Indiana on the Pan Handle and Pennsylvania to Louisville as unreasonable to extent they exceeded by more than 1c the rates to Jeffersonville, Ind., on the north bank of the Ohio River opposite Louisville and distant therefrom 3.9 miles. During the period covered by the complaint the rates from these Indiana points to Louisville were 1.5c and 2c higher than the rates to Jeffersonville. The complaint is based on the theory that the rates from these points were

constructed originally by adding to the rates to Jeffersonville a bridge toll of 1c per 100 pounds. The differentials have fluctuated during the last few years and changes were also made in the amounts which the carriers paid to the bridge company for the bridge service. The record affords no basis for a finding that the rates charged were unreasonable. HELD, complaint dismissed. Ballard & Ballard Co. v. Director General, 73 I. C. C. 738.

(f The bridge toll on a given commodity should be approximately the same as the toll on the class to which the rate on the commodity more nearly corresponds. Memphis-Southwestern Investigation, 77 I. C. C. 517.

III. CONTROL AND REGULATION.

See Control and Regulation.

§3. In General.

See Interstate Commerce Commission I; Jurisdiction of Commission.

CASES 1887-1908

(a) Power to regulate commerce between States extends to erection of piers, bridges and all other instrumentalities of commerce which, in the judgment of Congress, may be necessary or expedient. Stockton v. Baltimore etc. R. R. Co. (U. S. C. Ct. N. J.), 1 I. C. R. 411.

(b) The Act of Congress, approved June 16, 1886, entitled "An Act to Authorize the Construction of a Bridge across the Staten Island Sound, known as Arthur Kill," etc., is valid and constitutional under the power of Congress to regulate commerce among the States. Stockton v. Baltimore & N. Y. R. R. Co., 1 I. C. R. 411.

(c) The provision of the Fifth Amendment to the Federal Constitution: "Nor shall private property be taken for public use without just compensation;" does not apply to the use of the land of a State under navigable waters, for the support of a bridge erected under the authority of Congress in aid of interstate commerce. Stockton v. Balt. & N. Y. R. R. Co., 1 I. C. R. 411.

(d) The Act of Congress authorizing the construction of the bridge known as the Arthur Kill, is not permissory merely, but gives authority and power to build such bridge, without reference to any authority or consent from the State on whose land under navigable water the bridge is to rest, and without compensation to the State. Stockton v. Baltimore & N. Y. R. R. Co., 1 I. C. R. 411.

(e) HELD, that the Act of Congress of June 16, 1886, entitled "An Act to Authorize the Construction of a Bridge across the Staten Island Sound, known as Arthur Kill," etc., is within the power conferred upon Congress to regulate commerce among the States, and that if the corporation undertaking the erection of such bridge acquires the right of the owners of the land under the waters and on the shore, the Act gives such corporation lawful authority to build and maintain such bridge without the consent, and notwithstanding the inhibition, of the State of New Jersey. Decker v. Balti. & N. Y. R. R. Co., 1 I. C. R. 434.

(f) Congress can lawfully confer upon a private corporation the capacity to occupy navigable waters within a State, and appropriate the soil under them, for the purpose of interstate commerce, without the consent of the State. Decker v. Balti. & N. Y. R. R. Co., 1 I. C. R. 434.

(g) Bridge companies; construction of charters; common carriers. Where the charter of a bridge company confers upon it the franchises and powers of building, maintaining, and operating, its bridge and approaches, designated as its terminal facilities, such franchises and powers do not, in and of themselves, constitute the bridge company a common carrier of property; on the contrary they are appropriately confined to the erection, operation, and maintenance of a thoroughfare or public highway, open to the use of others, common carriers, and private parties, upon making compensation therefor, in the shape of "reasonable tolls." Kentucky & Indiana Bridge Co. v. Louisville & Nashville R. Co., 2 I. C. R. 351.

(h) Bridge companies; construction of charters; common carriers. Where the charter of a bridge company makes its bridge and approaches thereto, such as it had authority to construct, a public thoroughfare, or highway, for the use of which, by railroads, or street cars, wagons, vehicles, animals, and foot passengers, it was authorized to charge "reasonable tolls," for the collection of which, suitable toll gates could be established; the word "tolls," as used in such a charter, is strictly applicable to charges for the use of its highway, rather than to compensation for transportation services which the bridge company may perform, or be permitted to render. Kentucky & Indiana Bridge Co. v. Louisville & Nashville R. Co., 2 I. C. R. 351.

(i) Kentucky & Indiana Bridge Company; construction of charter; common carrier. The charter powers of said company neither expressly, nor by any clear implication, confer upon it authority "to equip its road, and to transport goods and passengers thereon, and charge compensation therefor;" nor do they, in any way, constitute said company a common carrier—the rule of construction applicable to such charters being, that "No power is conferred upon a corporation, which is not given expressly or by clear implication." Kentucky & Indiana Bridge Co. v. Louisville & Nashville R. Co., 2 I. C. C. 351.

(j) A bridge company owning no freight cars, which solicits freight for railway companies who will furnish the cars and over whose lines the freight is to go, and merely transfers such cars over its bridge to the railway companies furnishing them, charging for its service its regular bridge toll, but making no charge for transporting the freight contained or carried in the cars,—is not a common carrier of such interstate freight. Kentucky & I. Bridge Co. v. Louisville & Nashville R. Co. (C. C. D. Ky.), 2 I. C. R. 351.

(k) The franchises and powers of building, maintaining, and operating a bridge and approaches, designated as its terminal facilities, do not, in and of themselves, constitute the bridge company a common carrier of property; nor do they, by any clear implication, confer upon it authority "to equip its road, and to transport goods and passengers thereon, and charge compensation therefor." Kentucky & I. Bridge Co. v. Louisville & N. R. Co. (C. C. D. Ky.), 2 I. C. R. 351.

(l) Where a railroad company, by contract with a bridge company, acquires the right to use a bridge, with its approaches, for its engines, cars, and trains, it is regarded, under the Act to Regulate Commerce, §1, as the owner or operator of the bridge and approaches, for the time being, as to all freight transported by it over the bridge. And as to all such traffic, it, and not the bridge company, must be regarded as the common carrier. Kentucky & I. Bridge Co. v. Louisville & N. R. Co. (C. C. D. Ky.), 2 I. C. R. 351.

(m) The Green & Barren River Navigation Company, by the Kentucky Act of March 9, 1868, leasing to it the "Green & Barren River line of navigation and their tributaries, together with the grounds, houses, waterworks, rents, profits, tools, machinery, implements, and appurtenances, and all the franchises thereunto belonging or appertaining," acquires only the improvements belonging to the State in its corporate capacity, as distinguished from what was subject to public use under common right, and does not acquire any exclusive right of navigation. Therefore it has no right of action against a railroad company for the obstruction of navigation by repairing a bridge, where this was done under a license which was valid against the public, and the improvements included in the lease were not injured or interfered with. Green & B. R. Nav. Co. v. Chesapeake, O. & S. W. R. Co. (Ky.), 2. I. C. R. 515.

(no) A State Legislature may authorize the building of a bridge or other structure tending to obstruct the navigation of a navigable river which is altogether within its own boundary; and it is only when Congress, by virtue of the constitutional provision, acts as to such obstructions that its will must be obeyed so far as may be necessary to insure free navigation. Green & Barren River Nav. Co. v. Chesapeake, Ohio & S. W. R. Co., 2 I. C. R. 515.

(p) A state has no power to regulate tolls upon a bridge connecting such state with another state; Congress alone has such power. Covington & C. Bridge Co. v. Kentucky (U. S. Sup. Ct.), 4 I. C. R. 649.

(q) A bridge across waters between two states and connecting such states is an instrument of interstate commerce; and traffic across it is interstate commerce. Covington & C. Bridge Co. v. Kentucky (U. S. Sup. Ct.), 4 I. C. R. 649.

(rs) The Kentucky law of 1890 fixing the tolls and fare over the bridge connecting that state and Ohio and spanning the Ohio river at Cincinnati, is in conflict with the interstate commerce clause of the Constitution. Covington & Cincinnati Elevated Railroad & Transit & Bridge Company v. Commonwealth of Kentucky, 4 I. C. R. 658.

(t) A State tax on the intangible property of a company chartered by that State and maintaining a bridge over a river on the State boundary is not an unconstitutional burden on interstate commerce when the business carried on over the bridge is done by other persons and corporations which pay the bridge company tolls for the privilege of using the bridge. Henderson Bridge Co. v. Commonwealth of Kentucky, 7 I. C. C. App. C.

(u) The fact that a bridge over a navigable river between two States is made a post road by an act of Congress which also regulates the height of the bridge and the width of the spans does not interfere with the right of the State to impose taxes on the bridge company. The court says: Clearly the tax was not a tax on the interstate business carried on over or by means of the bridge because the bridge company does not trans-

act such business. That business was carried on by the persons and corporations which paid the bridge company tolls for the privilege of using the bridge. The fact that the tax in question was to some extent affected by the amount of the tolls received and therefore might be supposed to increase the rate of tolls is too remote and incidental to make it a tax on the business transacted. Henderson Bridge Co. v. Commonwealth of Kentucky 7 I. C. C. App. c.

(v) Congress may, directly or through a corporation created for that object, construct bridges for the accommodation of interstate commerce by land. Luxton v. North River Bridge Co., 7 I. C. C., App. XLV.

(w) Under a Missouri statute carriers are prohibited from making any charge for crossing a river other than the regular distance rate. Dimmitt-Caudle-Smith Live Stock Comm. Co. v. C. B. & Q. R. R., 47 I. C. C. 287, 317.

(x) A bridge across waters forming a boundary line between states is an instrumentality of commercial intercourse between such states, and traffic across it is "interstate commerce." Shrader v. Steubenville & B. V. T. E., (Va. 1919), 99 S. E. 207.

(y) No part of the business of an interstate bridge which is subject to the provisions of the Act to Regulate Commerce is under the control of the state. Shrader v. Steubenville, East Liverpool & B. V. T. Co., (Va. 1919), 99 S. E. 207.

(z) The federal Act to Regulate Commerce expressly includes within the scope of its provisions bridges used or operated in connection with any railroad, and an interurban electric railway, other than a street passenger railway, passing over an interstate bridge and participating in the interstate movement of persons and property, is a "railroad" within the meaning of the act, and the bridge over which it passes is therefore subject to the provisions of the act. Shrader v. Steubenville, East Liverpool & B. V. T. Co., (W. Va. 1919), 99 S. E. 207.

(aa) A railroad bridge entirely within a state, but constructed to carry trains engaged in interstate commerce, and extending over a navigable river, is an instrument of interstate commerce subject to the jurisdiction of Congress under Const. art. 1, §8, empowering Congress to regulate commerce among the several states. People v. H. R. Conn. R. Corp. (N. Y. 1920), 126 N. E. 801.

§4. Jurisdiction of Commission.

CASES 1887-1908

(a) A bridge company which is not, either in law or in fact, a common carrier of interstate traffic, cannot invoke the provisions of the Act to Regulate Commerce to compel railway companies to transact business with or through such bridge company. Kentucky & I. Bridge Co. v. Louisville & N. R. Co. (C. C. D. Ky.), 2 I. C. C. 351. Overruling decision of the Interstate Commerce Commission in the same case. 2 I. C. R. 102.

(b) The Louisville & Nashville Railroad Company united with other companies having lines terminating on the Ohio River at or opposite Louisville in a contract whereby it was agreed that all their business across the river at that point should be taken over the Louisville bridge. The Louisville Bridge Company was a party to the contract, and the tolls were dependent on the amount of business done, and were diminished as the debt of the bridge company was paid off from funds derived from tolls. A new bridge being constructed over the river at this point, one of the railroad companies which had contracted to take all its business over the old bridge transferred the business to the new bridge. The Louisville & Nashville Railroad Company thereupon refused to receive for transportation over its line any freights which had been brought over the new bridge in violation of the contract made with it. HELD, that this refusal was unlawful. Kentucky & Indiana Bridge Co. v. Louisville & Nashville R. Co., 2 I. C. R. 102.

ALL OTHER CITATIONS

Proprietors of Cornish Bridge v. Fitts (N. H. 1919), 107 Atl. 626; Shrader v. Steubenville & B. V. T. E., (Va. 1919) 99 S. E. 207; People v. H. R. Conn. R. Corp. (N. Y., 1920) 126 N. E. 801; Keokuk & Hamilton Bridge Co. v. Wabash Ry., 66 I. C. C. 545, 548.

IV. RIGHT TO USE.

§5. In General.

CASES 1887-1908

(a) The Kentucky & Indiana Bridge Company has the chartered powers of a common carrier and is such de facto. It is therefore, under the Act to Regulate Commerce, entitled to demand of railroad companies whose lines are intersected by its tracks the same reasonable proper, and equal facilities for the interchange of traffic and for the receiving, forwarding, and delivering of property that may lawfully be demanded by other carriers under that Act. Kentucky & Indiana Bridge Co. v. Louisville & Nashville R. Co. 2 I. C. R. 102.

(aa) Act to Regulate Commerce; reasonable, proper, and equal facilities; abandonment. Under the terms and operations of a contract, made by a bridge company and three railroad companies, the railroad companies secured and enjoyed all reasonable, proper, and equal facilities, for the interchange of cars and traffic, between them, which interchange was conducted for many years at the regular, established, yard or depot of one of them, and the expenses of such interchange was shared by them, in certain proportions fixed by contract. After the passage of the Act to Regulate Commerce, one of the railroad companies voluntarily abandoned those facilities, and changed its business to another bridge—not in the interest of the public, nor of the interstate commerce it handled, but for its own private benefit and advantage; and then sought to compel the company (at whose yard the interchange of traffic had been conducted), to allow such interchange at a new point of connection, and to afford at such point, facilities equal to those which the applicant had voluntarily abandoned. HELD, that the application ought not to be granted. Kentucky & Indiana Bridge Co. v. Louisville & Nashville R. Co., 2 I. C. R. 351.

(b) Common carriers; bridge companies; soliciting agents. When a bridge company, owning no freight cars of its own, solicits freight for railway companies, who will furnish the cars, and over whose lines the freight is to go, and merely transfers such cars over its bridge, delivering them to the railway companies furnishing the same, and charging for its service its regular bridge toll, but making no charge for transporting the freight contained, or carried, in the cars, such a bridge company is not a common carrier of such interstate freight. The object and purpose of the bridge company, in thus constituting itself the soliciting agent for the railway companies, who are willing to provide the cars for the freight it may secure, is manifestly to obtain tolls for the use of its bridge; and the Law does not require the railway companies to keep up such an arrangement with the bridge company, in order to protect its interest in securing tolls for its bridge. Kentucky & Indiana Bridge Co. v. Louisville & Nashville R. Co., 2 I. C. R. 351.

(c) Common carriers; bridge companies. Where a railroad company, by contract with a bridge company, acquires the right to use a bridge, with its approaches, for the engines, cars and trains of the railway company, the first section of the "Act to Regulate Commerce," regards the railway company as the owner, or operator of the bridge and approaches, for the time being, as to all freight transported by the railway company over the bridge. And as to all such traffic, the railway company, and not the bridge company, must be regarded as the common carrier. Such a bridge company is not, either in law or in fact, a common carrier of interstate traffic, within the scope and meaning of said section; and it cannot invoke the provisions of said Act, to compel railway companies to transact business with, or through such bridge company. Between such a bridge company, and the railway carriers of the country, the Act establishes no such reciprocal relations, duties, and obligations, as require the latter to form business connections with the former. Kentucky & Indiana Bridge Co. v. Louisville & Nashville R. Co., 2 I. C. R. 351.

V. TARIFFS AND PUBLICATION.

See Tariffs.

§6. In General.

CASES 1887-1908

(a) A bridge handling interstate through traffic, should publish tariffs. Enterprise Transp. Co. v. Pennsylvania R. Co., 12 I. C. C. 326.

(b) Tariffs are to be published by bridges, ferries, etc., when they form part of a through interstate route. Enterprise Transportation Co. v. Pa. R. R. Co., 12 I. C. C. 326.

IMPORTANT CASES SINCE 1908

(c) A bridge company which does not own or operate any motive power or cars and rents its bridge to an interstate carrier need not file tariffs with the Commission. Keokuk & Hamilton Bridge Co. v. Wabash Ry., 66 I. C. C. 545, 548.

BROKERS

IMPORTANT CASES SINCE 1908

(a) Brokers who occupy the position of shippers and patrons of carrier's transportation service are entitled to nondiscriminatory treatment from carrier both in respect of services which it is bound to perform for shippers and of any services which it may volunteer. Emery & Co. v. B. & M. R. R., 38 I. C. C. 636, 637.

(b) The duty imposed by the Act upon common carriers not to discriminate unjustly between persons undoubtedly is owed only to patrons of carriers as such, and carriers owe no duty not to discriminate between customs brokers merely as brokers. Emery & Co. v. B. & M. R. R., 38 I. C. C. 636, 637.

BUSINESS SECRETS

See Freight Bills.

IMPORTANT CASES SINCE 1908

(a) Section 15 of the Act prohibits common carriers from giving to shippers and prohibits shippers from receiving from common carriers information as to the shipments of competitors. Rates for Transportation of Anthracite Coal, 35 I. C. C. 220, 244.

(b) A movement of merchandise by rail ordinarily implies a business transaction between the consignor and the consignee with respect to which the privacy guaranteed by the Act may be of no small importance. Intervening under a contract of carriage in the business affairs of others, the carrier is prohibited by the statute from making disclosures to anyone "other than the shipper or consignee" without first securing the "consent of such shipper or consignee." The consignor and the consignee is a matter in which the carrier ordinarily has no concern. In that trade relation with one another the consignor and the consignee have a right of privacy and the obvious meaning and purpose of the provision in question is to restrain the carrier from violating this right by revealing information necessarily acquired by it in performing the transportation service but it is clear that the enumeration there of certain information must be interpreted merely as illustrative of what must not be disclosed by the carrier, and not as leaving the carrier free to reveal the name of the consignor to anyone and everyone seeking that information. The apparent purpose of the provision is to forbid the carrier from disclosing information that "may be used to the detriment or prejudice of such shipper or consignee." The carrier ought not on any ground disclose the information it acquires by virtue of its agency for others in a service of carriage; and the purpose of the provision in question was to put it under an affirmative restraint against disclosure, apparently to the extent necessary to protect the interest of "such shipper or consignee." It would be altogether illogical and entirely inconsistent with reason, and with what must be considered to be the plain purpose of that provision, to require the carrier to withhold the name of the consignee and at the same time permit it without restraint to disclose to strangers the name of the consignor. In the Matter of Freight Bills, 38 I. C. C. 91, 92.

(c) The consignee of a reconsigned shipment ordinarily is a stranger to the transaction between the original consignee and the original consignor. The reconsignment implies a commercial transaction between the original consignee and the ultimate consignee which

has no relation whatever to the transaction between the original consignor and the original consignee. As to this second transaction, the original consignee has a right of privacy which may not be lawfully violated by the carrier by revealing to the ultimate consignee the name of the original consignor without first securing the consent of the original consignee. In the Matter of Freight Bills, 38 I. C. C. 91, 92.

(d) Where the charges accruing up to the point of reconsignment on basis of the full local rate are paid by the original consignee, the ultimate consignee is concerned only with the rate from that point and there is no reason why the freight bill should disclose any information to him as to the origin or routing of the shipment, except from the reconsigning point to the ultimate destination. When, however, the ultimate consignee is called upon to pay the through charges from the original point of origin, or a portion of the through charges based upon the remainder of a joint through rate, he is entitled to know whether in making out the freight bill there has been a proper application of the published rates of the carriers, and of this the ultimate consignee can not be well advised unless the point from which the shipment first started, as well as the route of the movement, are shown upon the freight bill. In the Matter of Freight Bills, 38 I. C. C. 91, 93.

(e) And the prohibition contained in section 15 against disclosure of information is intended to secure to every shipper immunity from a disclosure of his business at the hands of a common carrier, and the mere absence of injury to complainants does not excuse defendants' failure to require their agent to conform to the requirements of the law against disclosure of information. Nashville Abattoir, Hide & Melting Asso. v. L. & N. R. R. Co., 40 I. C. C. 134, 137, 141.

(f) When new bills of lading are issued on reconsigned shipments they should not disclose to the ultimate consignee the name of the original consignor without the consent of the original consignee. This applies with equal force to freight bills as to bills of lading. Atwood & Co. v. C. B. & Q. R. R. Co., 42 I. C. C. 385, 387.

ALL OTHER CITATIONS

Colonial Salt Co. v. M. I. & I. Line, 23 I. C. C. 358, 366; Albree v. B. & M. R. R. Co., 22 I. C. C. 303, 321; Federal Sugar Refining Co. v. B. & O. R. R. Co., 20 I. C. C. 200, 211; In Wharfage Charges at Pensacola, 27 I. C. C. 252, 261; Concentration of Cotton, 26 I. C. C. 585, 593; In the Matter of Freight Bills, 29 I. C. C. 496, 498; Jung & Sons v. L. & N. R. R. Co., 31 I. C. C. 455, 457; Michigan Steel Boat Co. v. M. C. R. R. Co., 32 I. C. C. 576, 577; National Pole Co. v. M. & I. Ry. Co., 33 I. C. C. 372, 373; In the Matter of Freight Bills, 38 I. C. C. 91; Aetna Powder Co. v. Wabash R. R. Co., 39 I. C. C. 199; In Re Private Cars, 50 I. C. C. 652, 704.

CABLE RATES

See Telephone and Telegraph Companies.

IMPORTANT CASES SINCE 1908

(a) Jurisdiction over cable rates is clearly conferred upon Commission. White & Co. v. Western Union Telegraph Co., 33 I. C. C. 500, 502.

(b) Deferred cablegrams transmitted only after nonurgent private telegrams and press telegrams, except that deferred messages which have not reached their destination within 24 hours shall be transmitted in turn with non-deferred telegrams. Commercial Cable Co. v. W. U. T. Co., 45 I. C. C. 33, 35.

(c) The refusal of the Western Union Telegraph Co. to transmit for a complainant from New York to points in the United States deferred cable messages originating in South America, upon the same terms as such messages are transmitted for complainant's competitor, subject complainant to unjust discrimination. Commercial Cable Co. v. W. U. T. Co., 45 I. C. C. 33, 39.

(d) Cable messages transmitted over cables leased and operated by a cable company and transferred at New York to its land lines for further transmission to an inland point in the United States may be regarded as continuous messages; but the transmission of a through message is not necessarily a continuous service. Commercial Cable Co. v. W. U. T. Co., 45 I. C. C. 33, 37, 39.

(e) Rates on cable messages from points in foreign countries to points in the United States are apparently not "joint through rates" such as those published by a railroad which holds the con-

currence of its connections, but "combination" rates, one component part of which is the charge made by the land line for transmitting the message from New York to destination. Commercial Cable Co. v. W. U. T. Co., 45 I. C. C. 33, 38, 39.

ALL OTHER CITATIONS

Eastern Extension, Australasia & China Telegraph Company v. United States, 40 Sup. Ct. 168; Commercial Cable Co. v. Phil. Natl. Bk., 263 Fed. 218.

CANADA

See Adjacent Foreign Country.

CASES 1887-1908

(a) Under the act the Grand Trunk Ry, of Canada is required to print, post and file its schedules of rates and charges for the transportation of property from points in the United States to points in Canada, and cannot lawfully charge, demand, collect or receive from any person or persons a greater or less compensation therefor, or for any service in connection therewith, than is specified in such published schedule as may at the time be in force. Matter of Grand Trunk Railway Co., 2 I. C. C. 497, 504.

(b) While the regulating statute may be applied to the reasonableness of a rate from a point in Canada to a point in the United States, it is clear that no law of the United States can apply to a discrimination between places in a foreign country. Cist v. Michigan Central R. Co., 10 I. C. C. 217.

IMPORTANT CASES SINCE 1908

(c) A Canadian line while engaged in through transportation subjects itself to the jurisdiction of the Commission over the joint rates in which it participates, and must abide by the Commission's conclusion's as to the reasonableness of such rates and the divisions thereof. Although the Commission may not require the maintenance of joint rates in the future, it may determine and prescribe the divisions of rates heretofore in effect. P. H. & D. S. S. Co. v. P. R. R., 50 I. C. C. 157, 159.

(d) The Commission has jurisdiction of the rates on shipments from points in the United States to points in Canada only so far as the movement was within the United States. Van Dusen Harrington Co. v. Director General, as Agent, 64 I. C. C. 461.

(e) In attempting to justify the reasonableness of a joint rate from points in Canada to points in the United States, the American carriers contended that the division received by them for the haul within the United States was not unreasonable or excessive. HELD: Commission must consider the reasonableness of the joint rate as a whole. International Nickel Co. v. Director General, as Agent, 66 I. C. C. 627, 631.

(f) The Commission can not require the maintenance of joint rates for the future over routes partly within Canada. American Cyanamid Co. v. Director General, 69 I. C. C. 337, 343.

(g) The Commission can not say that the refusal of a Canadian carrier to accept prepayment in Canada violates the Interstate Commerce Act. Abrasive Co. v. Director General, 69 I. C. C. 630, 634.

(h) The jurisdiction of the Commission over joint through rate from points in Canada to points in United States applies from the boundary. American Splint Corp v. Director General, 74 I. C. C. 19, 20.

(i) If railroads constituting a through route for traffic from a point in Canada to a point in United States concurred in a through rate or a carload minimum that was unreasonably high, they are jointly and severally responsible for any damage that might result to any shipper on account of such unlawful rate or minimum. United Paperboard Co. v. C. N. Rys., 74 I. C. C. 733, 736.

(j) Contention that the fourth section of the act does not apply to joint through rates from points in Canada to points in the United States, not sustained. The provisions of the fourth section apply where the point of origin is in adjacent foreign country and the intermediate point and more distant point of destinations are in the United States. Conf. Ruling 447. United Paperboard Co. v. C. N. Rys., 74 I. C. C. 733, 736.

(k) The Commission has no authority to prescribe joint rates over routes partly within Canada, but can require the participating carriers operating within the United States to cancel their concurrences in rates found unreasonable or in violation of the act. United Paperboard Co. v. C. N. Rys., 74 I. C. C. 733, 737.

(l) American lines parties to a joint rate from or to a point in Canada, the charges under which are unreasonable, cause to be done or do a thing prohibited

and declared to be unlawful by the act, and are liable to the person or persons injured thereby for the full amount of the damages sustained. Greene Cananea Copper Co. v. Director General, 80 I. C. C. 121, 122.

(m) One of the shipments moved in part over the C. P., through Canada, to a destination in the United States. The rate attacked was a joint rate, and all carriers parties to such a rate are jointly and severally liable for any damage resulting from its application. The American lines over which these shipments moved are subject to the jurisdiction of the Commission. The director general was operating them and is thus liable for the full amount of any damage sustained. A. E. Staley Mfg. Co. v. C. P. Ry., 80 I. C. C. 512.

(n) The Commission is without jurisdiction to prescribe rates for the future from a point in the United States to a point in Canada. George E. Green Lumber Co. v. A. A. R. R., 80 I. C. C. 185, 190.

(o) Contention that the commission is without jurisdiction over joint rates to a point in Canada, not sustained following International Nickel Co., 66 I. C. C., 627. Hamilton Furnace Co. v. B. & O. R. R. Co., 77 I. C. C. 377, 378.

(p) Shipment from point in United States, destined to another point in United States, moved in part through Canada. Contention by director general that commission is without jurisdiction to award reparation in respect of such rate, not sustained. Rate assailed was a joint rate, and all carriers parties thereto are jointly and severally liable for any damage resulting from its application. American lines over which shipment moved are subject to jurisdiction of commission. Director General was operating them and is thus liable for full amount of any damage sustained. International Nickel Co., 66 I. C. C., 627, 628. Staley Mfg. Co. v. C. P. Ry. Co., 80 I. C. C. 512.

(q) Commission can not require establishment or maintenance of joint rates between United States and Canada. But where joint rates are in effect and there is no proposal to withdraw them save for purpose of substituting other and higher rates of same character, and commission finds in appropriate proceeding that increases in such joint rates proposed in schedules published and filed with it have not been justified, it is not only within its power but its duty to require their cancellation. Sand and Gravel from Canada, 83 I. C. C. 460, 463.

CANALS

IMPORTANT CASES SINCE 1908

(a) The Interstate Commerce Act, § 6, subd. 13, added by Panama Canal Act, § 11, as amended by Transportation Act, 1920, § 412, not only gives the Interstate Commerce Commission power to establish physical connection between lines of rail carriers and docks, but also to direct rail and water carriers singly or jointly to construct and connect with lines, and to determine and prescribe the terms and conditions of operating such connections, so that such matters are entirely removed from the state and its Public Service Commission has no authority to order such connection between relator's tracks and state's Barge Canal terminal, as regards interstate commerce. People v. Public Service Commission, 191 N. Y. S. 626.

(b) A state, constructing, equipping, and maintaining a Barge Canal for public use, is not a common carrier of commerce, intrastate, where it furnishes the canal to common carriers by water without charge. People v. Public Service Commission, 191 N. Y. S. 636.

CASES 1887-1908

(a) On special newspaper trains may not lawfully be granted the free transportation permissible, under the Act to Regulate Commerce, to the caretakers of certain other kinds of traffic specifically enumerated therein; nor may they lawfully be carried under newspaper commodity rate, or any rate other than specified in a regularly published schedule of passenger rates. Re Free Transportation of Newspaper Employees, 12 I. C. C. 15.

(b) Where the Congress has expressly enumerated special classes of persons or things that may be exempted and excepted from the operation of general provisions in a law, this Commission cannot enlarge the excepted classes by mere construction and include in them persons or things not thus expressly named in the statute itself. HELD, therefore, that the so-called caretakers of newspaper companies whose duty it is to assort newspapers on special newspaper trains and to make them up into packages for delivery as the train arrives at the several points along the line of the run, may not lawfully be granted the free transportation that is permissible under the act to regulate commerce to the caretakers of certain other kinds of traffic specific-

ally enumerated in the act. A commodity rate can not be applied to the transportation of passengers or a passenger rate to the transportation of a commodity. HELD, therefore, that newspaper employes can not lawfully be carried on special newspaper trains under a commodity rate established for the carriage of newspapers, or at any rate other than one specified in a regularly published schedule of passenger rates. Transportation of Newspaper Employes, 12 I. C. C. 16.

IMPORTANT CASES SINCE 1908

(c) Rules 510 and 511 of special rules and regulations governing shipper's protective service against cold, should be revised in such manner as to provide that sending of a caretaker to look after fires where shipper installs a portable stove or heater, will not be required. Perishable Freight Investigation, 56 I. C. C. 449, 595, 597, 598.

(d) Rule 110, clause C, providing that caretakers will be responsible for condition of contents of cars of bananas in their charge, and any neglect or failure by caretakers will be solely at owner's risk, carriers assuming no liability in such cases, should be eliminated. Perishable Freight Investigation, 56 I. C. C. 449, 565, 566.

(e) In the original report, 49 I. C. C. 96, the Commission found that the passenger fares collected by defendant for the return transportation via its line of caretakers who accompanied shipments of live poultry, in carloads, which moved between July 29 and August 14, 1915, from King City, Mo., to New York, N. Y., were unlawful and unreasonable and that the cancellation of the provision for the free return transportation of caretakers of live poultry as applicable to other shipments here under consideration moving on and after January 19, 1915, was unreasonable, and that complainant was entitled to reparation. The Commission found that where through fares were paid reparation should be based on the revenue accruing to defendant for the transportation west of the junctions with the eastern carriers. The proceeding was reopened for further hearing to determine that amount. The outbound shipments as to which refund of the return fares is claimed moved over defendants' line through St. Joseph, 33, to Zearing, Ill., and 2 to East St. Louis, Ill., at which points they were delivered to connecting eastern lines. The caretakers in charge of the shipments which moved through East St. Louis returned over defendants' line beyond that point, and those in charge of the shipments, which moved through Zearing, which is 96 miles west of Chicago, returned over defendants' line from Chicago through Zearing. Defendant admits that its practice has been to permit free return transportation from Chicago west where the shipment was delivered to its connection at Zearing. This practice was not authorized by tariff. Reparation must therefore be confined to that portion of the return transportation west of Zearing. The caretaker who accompanied the shipment of February 11, 1915, returned over defendant's line from Chicago through Zearing to Galesburg, Ill., but beyond the latter point the outbound route was not followed. Defendants' tariff rule contained no requirement that caretakers should return by the routes over which the shipments moved and reparation will be awarded. HELD: Reparation awarded with interest. A. C. Parsons v. C., B. & Q. Ry., 59 I. C. C. 130.

(f) In 53 I. C. C. 515, the Commission found that defendants had failed to justify subsequent to January 10, 1915, the increased rates resulting from the elimination of the rules providing for the free return of caretakers accompanying carlot shipments of live poultry from trans-Missouri territory to destinations in states which included Illinois. Reparation was awarded on some shipments, but denied on others on the ground that the caretaker did not return over the route by which the cars were forwarded as required by the tariff rule. It now appears that defendants' tariff rule does not require the caretaker to return by the route over which the cars were forwarded. HELD: Reparation awarded. Swift & Co. v. S. A. & P., 59 I. C. C. 440.

(g) Where a caretaker of stock alighted from a freight train at an intermediate station to examine the stock, and was killed in attempting to board the train, which had started without notice, it could not be held, as a matter of law, that because the operatives of the train did not have notice that deceased intended to leave the train, or had done so, they were not guilty of negligence in starting the train without notice. Fort Worth & D. C. Ry. Co. v. Hawley (Tex. 1921), 235 S. W. 659.

(h) It is general practice among

carriers to provide return transportation for caretakers who have accompanied shipments of two or more cars of livestock to market. Western Meat Co. v. Director General, as Agent, 83 I. C. C. 218.

(i) Cancellation, and absence from defendants' tariffs, of rule providing for refund of passenger fares paid by caretakers sent to shipping points to return with, and who did return with, two or more cars of livestock, found unreasonable and to have resulted in charges for transportation of such caretakers which were unreasonable. Reparation awarded in amount of difference between fares paid and amounts that would have been refunded by defendants if rule had been in effect. Western Meat Co. v. Director General, as Agent, 83 I. C. C. 218.

See Control and Regulation.

A. JURISDICTION OF COMMISSION.

See Interstate Commerce Commission I.

§½. In General.

See Jurisdiction of Commission §½.

CASES 1887-1908

(a) Complainant charged unjust discrimination in that defendant did not furnish cars to it but did to its rival, the defendant being within the state of Missouri, the movement being up to Cape Girardeau thence river beyond. HELD: Where it appears that a carrier to whom freight is delivered for transportation from one point to another in the same state has nothing to do with its transportation out of the state, the fact that the ultimate destination of the freight is another state, to the knowledge of such carrier, will not bring the transportation by such carrier within the jurisdiction of the Commission. Missouri & Illinois Railroad Tie & Lumber Co. v. C., G. & S. W. R., 1 I. C. C. 607.

(b) Complainant charged unjust discrimination in that defendant did not furnish cars to it, but did to its rival, the defendant being within the state of Missouri, the movement being up to Cape Girardeau, Mo., thence river beyond. The movement to Cape Girardeau is locally in Missouri, and the transportation across the river into Illinois is entirely independent of the transportation requested of the defendant, and will be by boats not in any respect under the control of the defendant, or forming a continuous line with it, or operated with it under any common arrangement. HELD: The Commission declined to entertain the complaint for the reason defendant was connected in no way with the movement beyond the state. Missouri & Illinois Railroad Tie & Lumber Co. v. C., G. & S. R. Co., 1 I. C. C. 607.

(c) It is a common-law and charter duty of every railway carrier subject to the Act to Regulate Commerce to furnish a proper and adequate car equipment for all the reasonable needs of the business it advertises and undertakes to do, and if the carrier fails to do this, to the wrongful injury of the shipper, it is liable in damages therefor, but the statute has not clothed the Interstate Commerce Commission with the jurisdiction to order the carrier to furnish any particular equipment of cars, or in fact any cars at all. It is the duty of such carrier to select and furnish its own equipment of cars, under all the responsibility which the law requires of it in so vital and important a matter, for the public has not undertaken to divide responsibility with the carrier in this respect. Scofield v. Lake Shore & Michigan Southern R. Co., 2 I. C. R. 67.

(ca) The Interstate Commerce Act has not given the Commission jurisdiction to order the carrier to furnish any particular equipment of cars, or in fact any cars at all. Scofield v. Lake Shore & M. S. R. Co. (Com.) 2 I. C. R. 67.

(cb) A railroad company may acquire cars by construction, by purchase, or by contract for its use, and no one has the power to compel a railroad company to select among these several modes or to contract with all comers. Worchester Excursion Car Co. v. Pennsylvania R. Co. (Com.) 2 I. C. R. 792.

(cc) The Interstate Commerce Commission possesses no authority to compel carriers to provide any particular kind of cars or other special equipments. Rice v. Cincinnati, W. & B. R. Co. (Com.) 3 I. C. R. 841.

(d) The Commission possesses no authority to compel carriers subject to its jurisdiction to provide any particular kind of cars or other special equipment, but, in the absence of adequate equipment freely afforded to all patrons alike, carriers should so adjust rates between those who can and those who cannot fur-

nish their own conveyance that in the relative charges to each there shall be no discrimination against the dependent shipper. Rice v. C., W. & B. R. Co., 3 I. C. C. 841, 849.

(e) The Commission has no power to grant redress for the failure of a carrier to comply with its common-law duty to furnish refrigerator cars. Re Transportation of Fruit, 10 I. C. C. 360.

(f) While the Act to Regulate Commerce contains no provision which, expressly or by proper implication, gives this Commission jurisdiction in cases merely showing delay or negligence in the receipt, forwarding, or delivery of property offered for transportation, including the furnishing of cars, the regulating statute does prohibit any unjust discrimination or wrongful prejudice in the provision of cars or other transportation facilities, as well as in the fixing and application of transportation charges. Richmond Elevator Co. v. Pere Marquette R. Co., 10 I. C. C. 629.

(g) The Commission has no jurisdiction to require a carrier to furnish cars for any purpose, but it has and has frequently exercised authority to prohibit carriers from wrongfully discriminating between shippers in furnishing cars for the transportation of interstate traffic. Red Rock Fuel Co. v. B. & O. R. Co., 11 I. C. C. 438, 451.

IMPORTANT CASES SINCE 1908

(h) If paragraph 12 of section 1 is at all doubtful in construction, the construction adopted by this administrative agency in its enforcement, followed for many years, without any attempt of Congress to change it, even when a bill for that purpose was long pending before it, and without any challenge of its correctness by any other department of the government, while not controlling, is not to be disregarded without the most cogent and persuasive reasons. Robertson v. Downing 127 U. S. 607; Assigned cars for bituminous coal mines, 80 I. C. C. 520, 529.

(i) It was clearly within the power of Congress to apply at their convenience the rule contained in paragraph 12 of section 1 of the act, which compelled a carrier in time of car shortage to count every car used by a coal mine, against the car supply to be furnished such mine, which was a limitation upon a practice of the carriers long existing, which the carriers had claimed the right to perpetuate, and as against the perpetuation of which there stood merely an administrative finding of fact based upon facts as disclosed in records made some 13 years before, binding upon but a few out of the hundreds of railroads subject to the act. Assigned Cars for Bituminous Coal Mines, 80 I. C. C. 520, 531.

(j) The Interstate Commerce Commission is empowered to act upon questions of unfair practices and discriminations in the distribution of coal cars to shippers. Pennsylvania R. Co. v. Weber, 42 Sup. Ct. 18.

(k) Prior to February 28, 1920, the Commission had no power to require a carrier to provide itself with reasonable facilities such as equipment, no question of discrimination being involved. United States v. Pennsylvania R. R. Co., 224 U. S. 208. Assigned Cars for Bituminous Coal Mines, 80 I. C. C. 520, 562.

(lm) By paragraph (11) of section 1 of the act it is made the duty of carriers to establish, observe, and enforce just and reasonable rules, regulations, and practices with respect to car service, and every unjust and unreasonable rule, regulation, and practice with respect to car service is prohibited and declared to be unlawful. Assigned Cars for Bituminous Coal Mines, 80 I. C. C. 556, 557.

(n) By paragraph (14) of section 1 of the act the Commission is given jurisdiction to establish reasonable rules, regulations, and practices with respect to car service, including compensation to be paid for use of any car not owned by carrier using it. Assigned Cars for Bituminous Coal Mines, 80 I. C. C. 557.

(op) Power of Commission to prosecute an inquiry of its own motion, under provisions of section 1 of Interstate Commerce Act, as to adequacy of facilities for performance as common carriers of car service by each of the railroads subject to its jurisdiction, with view to requiring carriers to provide themselves with such safe and adequate locomotives and cars as may be warranted by facts as shown, and as required by law, first came into the Interstate Commerce Act as one of the amendments made by the Transportation Act, 1920. Assigned Cars for Bituminous Coal Mines, 80 I. C. C. 562.

(q) Finding that practice of carriers, in distributing assigned cars to bituminous mines in excess of ratable proportion distributed to mines not receiving as-

signed cars, will be unjust, unreasonable, and unjustly and unreasonably preferential to such mines receiving assigned cars, is not to preclude commission, in exercise of emergency powers under paragraph (15) of section I of the Act, from requiring placement of cars for such loading at mines in excess of percentage allotment to mines generally upon lines of same carrier, or upon same division. Assigned Cars for Bituminous Coal Mines, 80 I. C. C. 520.

(r) Congress has provided that if a shipper furnishes an instrumentality used in transportation of property owned by him, charge and allowance therefor shall be no more than is just and reasonable, and has authorized the commission to fix maximum reasonable charge to be paid by carrier for use of instrumentality so furnished. (Paragraph 13 of section 15 of the Act; compare paragraph 14 of section 1). Assigned Cars for Bituminous Coal Mines, 80 I. C. C. 520, 556.

(s) Under Esch Car Service Act May 29, 1917, c 23, as amended by Transportation Act 1920, §1, par. 10 (Comp. St. Ann. Supp. 1923 §8563), defining "car service," over which the Interstate Commerce Commission has authority, as including "the use, control, supply, movement, distribution, exchange, interchange and return of locomotives, cars and other vehicles, used in the transportation of property, including special types of equipment and the supply of trains by any carrier by railroad, subject to this act," paragraph 15, authorizing the commission to suspend operation of railways with respect to car service (subparagraph a) to make "reasonable directions with respect to car service * * * as in its opinion will best promote the service in the interest of the public (subparagraph b) to require joint or common use of terminals (subparagraph c) and to give directions for preference or priority in transportation or embargoes (subparagraph d), and paragraph 16, granting emergency power to make "just and reasonable directions with respect to the handling, routing and movement of traffic," and section 15, par. 4 (Comp. St. Ann. Supp. 1923, §8583), conferring power to reroute traffic and "to establish temporarily such through routes" as the Commission deems necessary, the Commission is not given emergency powers, without according a railroad a hearing, to require the railroad to switch cars for another road, since "car service" connotes the use to which the vehicles of transportation are put, not the transportation service rendered by means of them. Peoria & P. U. Ry. Co. v. United States. 44 Sup. Ct. 194.

R. R. Commissioners of Florida v. Southern Express Co., 44 I. C. C. 645, 649; The Fifteen Per Cent Case, 45 I. C. C. 303, 323; In the Matter of Private Cars, 50 I. C. C. 652, 671, 677, 681; Baltimore & O. R. Co. v. Lambert Run Coal Co., 267 Fed. 776; Armour Grain Co. v. Director General, 57 I. C. C. 398, 409; Dickinson Co. v. C. & O. Ry. Co., 60 I. C. C. 315; Robertson v. Downing, 127 U. S. 607; U. S. v. Pa. R. R. Co., 242 U. S. 208.

§1. Over Car Distribution.

IMPORTANT CASES SINCE 1908

(a) The Car Service Act, approved May 29, 1917, gave the Commission very broad powers to issue summary directions with respect to the movement, distribution, exchange, interchange, and return of cars. Unification of Railroad Operation, 47 I. C. C. 757, 763.

(b) The Commission is without authority to require carriers to refrain from counting box cars as part of the distributive share of cars furnished mines unless it is first found that shortage of equipment, congestion of traffic, or other emergency requiring immediate action exists. Dickinson Fuel Co. v. C. & O. Ry. Co., 60 I. C. C. 315, 317.

(c) And under paragraph 13 of section 1 of the act, the Commission is authorized to require carriers to file their rules and regulations with respect to car service, and it may direct that such rules and regulations be incorporated in the schedules showing rates, fares, and charges for transportation and be subject to any or all of the provisions of the act relating thereto. Fairmont & Cleveland Coal Co. v. B. & O. R. R. Co., 62 I. C. C. 269, 276.

(d) But the Commission has not required that car service rules be filed as tariff schedules. Fairmont & Cleveland Coal Co. v. B. & O. R. R. Co., 62 I. C. C. 269, 276.

(e) The Commission has control over car distribution in the public interest and if there is otherwise sufficient reason for the establishment of joint rates from particular points such rates should not be withheld through fear that car-

rier's car supply may be depleted. Pittsburgh Term. R. R. & Coal Co. v. Director General, as Agent, 63 I. C. C. 179, 182.

(f) The question whether a rule or method of car distribution practiced by a railroad is unjustly discriminatory is one which the Commission had authority to pass upon. Pennsylvania R. Co. v. Clark Bros. Coal Min. Co., 35 Sup. Ct. 896, 900; 238 U. S. 456, 59 L. Ed. —.

(g) Unjust discrimination in the matter of coal-car distribution to a mine owner may be redressed by the Interstate Commerce Commission where the coal, although sold f. o. b. cars at the mine, was to be transported to other states. Pennsylvania R. Co. v. Clark Bros. Coal Min. Co., 35 Sup. Ct. 896, 899; 238 U. S. 456, 59 L. Ed. —.

(h) "Car service," as defined in paragraph (10) of section 1 of the Act, clearly includes supply and movement of private cars. Assigned Cars for Bituminous Coal Mines, 80 I. C. C. 520, 556.

ALL OTHER CITATIONS

I. C. C. v. Ill. Cent. R. R., 215 U. S. 452, 474, 475, 30 Sup. Ct. 115, 54 L. Ed. 280; Rail and River Coal Co. v. B. & O. R. R. Co., 14 I. C. C. 86, 91; Traer v. C., B. & Q. R. R. Co., 14 I. C. C. 165, 168, 169; C., R. I. & P. Ry. Co. v. Hardwich Farmers' Elevator Co., 33 Sup. Ct. 174, 175, 226 U. S. 426; Morrisdale Coal Co. v. Pennsylvania R. R. Co., 33 Sup. Ct. 938, 941, 230 U. S. 304; Coal Rates on the Stony Fork Branch, 26 I. C. C. 168, 176; In Re Irregularities in Mine Ratings, 25 I. C. C. 286, 296; Loomis v. L. V. R. R. Co. (N. Y. 1913), 101 N. E. 907, 914; W. & A. R. Co. v. White Provision Co. (Ga. 1914), 82 S. E. 644; Paraffine Works v. Penn. R. R., 34 I. C. C. 179, 185; Vulcan Coal & Mining Co. v. I. C. C. R. R. Co., 33 I. C. C. 52, 55; Penn. Paraffine Works v. P. R. R. Co. 34 I. C. C. 179, 188, 189; Pennsylvania R. Co. v. United States, 227 Fed. 911, 918, 921; Car Supply Investigation, 42 I. C. C. 657, 671, 673, 674; The Fifteen Per Cent Case, 45 I. C. C. 303, 323; State Public Utilities Comm. v. Baltimore & O. S. W. R. R. (Ill. 1917), 118 N. E. 81; In Re Private Car t, 50 I. C. C. 652, 677; Diamond Lumber Co. v. C., M. & St. P. Ry., 51 I. C. C. 78, 85; Tanner & Co. v. C., B. & Q. Ry., 53 I. C. C. 401, 408; Assignment of Freight Cars, 57 I. C. C. 760, 763, 765, 766; Northwest Virginia Coal Asso. v. P. & L. E. R. R., 68 I. C. C. 167, 171; Assigned Cars for Bituminous Coal Mines, 80 I. C. C. 520, 556, 557, 562.

§2. Car Regulations.

IMPORTANT CASES SINCE 1908

(a) Rules or regulations prescribing who shall load and unload cars of freight are rules or regulations affecting rates, and are therefore subject to the control of the Commission under the fifteenth section. Wholesale Fruit & Product Association v. A., T. & S. F. Ry. Co., 14 I. C. C. 410, 421.

(b) A basis of car distribution is a regulation affecting rates within the meaning of section 15. Hillsdale Coal & Coke Co. v. P. R. R. Co., 19 I. C. C. 356, 358.

(c) The Commission's jurisdiction over car-distribution rules is absolute. Hillsdale Coal & Coke Co. v. P. R. R. Co., 19 I. C. C. 356, 359.

(d) It is doubtful if the Commission would, in the first instance, prescribe a set of rules and regulations governing car distribution in a coal district. This is peculiarly a matter for action in the first instance on the part of the interested carriers and operators. Colorado Coal Traffic Assn. v. D. & R. G. R. R. Co., 23 I. C. C. 458, 464.

(e) Under paragraph 15, section 1, the Commission has authority when in its opinion a shortage of equipment, congestion of traffic, or other emergency requiring immediate action, exists in any section of the country, either upon complaint or upon its own initiative without complaint, to suspend the operation of any or all rules, regulations, or practices then established with respect to car service for such time as it may determine. Northern West Virginia Coal Assn. v. P. & L. E. R. R., 68 I. C. C. 167, 171.

§3. Fuel Cars.

IMPORTANT CASES SINCE 1908

(a) Fuel cars for the carrier's own use are embraced within the governmental power of regulations. Hillsdale Coal & Coke Co. v. P. R. R. Co., 19 I. C. C. 356, 358.

(b) The act delegates to the Commission authority to regulate the distribution of coal fuel cars in times of car shortage as a means of prohibiting unjust preferences or undue discrimination. I. C. C. v. I. C. R. R., 215 U. S. 452, 474, 30 Sup. Ct. 155, 54 L. Ed. 280.

(c) The Commission has jurisdiction to compel a railroad to count against the shipper the company's fuel cars, in the

daily distribution in times of car shortage, under section 3 of the act prohibiting preferences and discriminations. I. C. C. v. I. C. R. R., 215 U. S. 452, 475. 30 Sup. Ct. 155, 54 L. Ed. 280.

§4. Private Cars.

See Common Carrier §6; Infra §31, §32; Private Cars.

IMPORTANT CASES SINCE 1908

(a) Congress has provided that if a shipper furnishes an instrumentality used in the transportation of property owned by him, the charge and allowance therefor shall be no more than is just and reasonable, and has authorized the Commission to fix the maximum reasonable charge to be paid by the carrier for the use of the instrumentality so furnished. Assigned Cars for Bituminous Coal Mines, 80 I. C. C. 520, 556.

(b) The control of the Commission over private cars is to be effected by its control over the railroads that are subject to the act. Ellis v. I. C. C., 35 Sup. Ct. Rep. 646, 237 U. S. 434, 59 L. Ed. 1036.

(c) Where a refrigerator company, owned by a packing company, builds and leases refrigerator and tank cars and is a means whereby an owner of property transported indirectly renders transportation services, its charges are subject to the power of the Commission under section 15. Ellis v. I. C. C., 35 Sup. Ct. Rep. 646, 647; 237 U. S. 434; 59 L. Ed. 1036.

(d) Use of private cars by railroad carriers has been recognized by Congress, which has provided for control of use of such equipment by commission, under provisions of the act, by means of mandate addressed to carriers subject to commission's jurisdiction. The Commission does not deal with private-car owner as such. Assigned Cars for Bituminous Coal Mines, 80 I. C. C. 520, 556.

(e) "Car service," as defined in paragraph (10) of section 1 of the act, clearly includes supply and movement of private cars. Assigned Cars for Bituminous Coal Mines, 80 I. C. C. 520, 556.

ALL OTHER CITATIONS

Ruttle v. P. M. R. R. Co., 13 I. C. C. 179, 185; Chappelle v. L. & N. R. R. Co., 19 I. C. C. 56, 59; In Re Private Cars, 50 I. C. C. 652, 673.

§5. Intrastate Cars.

IMPORTANT CASES SINCE 1908

(a) Where a large part of the business of shippers is interstate, but is conducted in its entirety by shipper and carrier alike as a unit of operation, with little or no regard to the boundaries of the state in which the traffic originates, the Commission has power to prescribe rules for car distribution even though its order in terms affects cars used wholly in intrastate shipments. Pennsylvania R. R. Co. v. I. C. C., 193 Fed. 81, 83.

§6. To Award Damages.

CASES 1887-1908

(a) Complainants attacked defendants failure to furnish cars. HELD: Where no overt acts of misconduct on the part of a defendant railroad company, which could support any judgment of the Commission or any mandatory order, are made to appear, the Commission has no discretion but to dismiss the complaint. The Commission has no authority to call a railroad company to account for any wrong of which such company may have been guilty prior to April, 1887, when the Interstate Commerce Commission went into operation. If, at the hearing before the Commission of a complaint against a railroad company, the defendant avows a purpose to comply with the law, the Commission must not only assume that the company will do so, but must act upon that assumption until it has evidence that the purpose is not lived up to. Holbrook et al. v. St. Paul, Minneapolis & Manitoba R. R. Co., 1 I. C. C. 323, 326.

(b) While the act contains no provision which expressly or by proper implication gives this Commission jurisdiction in cases merely showing delay or negligence in the receipt, forwarding or delivery of property offered for transportation, including the furnishing of cars, the regulating statute does prohibit any unjust discrimination or wrongful prejudice in the provision of cars or other transportation facilities as well as in the fixing and application of transportation charges. Richmond Elevator Company v. Pere Marquette R. R., 10 I. C. C. 629, 636.

IMPORTANT CASES SINCE 1908

(c) Whether complainant had or had not a specific contract with the carrier for delivery of a definite number of cars at stipulated periods, for the breach of

which it would be entitled to damages, raises an issue not before the Commission nor within its jurisdiction to decide. Armour Grain Co. v. Director General, 57 I. C. C. 398, 409.

(d) Where a shipper seeks damages arising from an alleged improper and discriminatory system of car distribution applying to a certain mining region, and affecting the interests of many shippers, he cannot institute an original suit for the same in a United States court under section 9 of the act, but must first file complaint with the Interstate Commerce Commission, even though at the time of beginning the suit the system complained of may have been replaced by another. Morrisdale Coal Co. v. Pennsylvania R. Co., 176 Fed. 748, 761.

(e) Whether after the Interstate Commerce Commission has found a rule of car distribution to be discriminatory, it has jurisdiction to assess the damages sustained by the complaining party, or whether they are to be recovered by an action in some court, without any preliminary assessment by the Commission, quaere. Morrisdale Coal Co. v. Pennsylvania R. Co., 183 Fed. 929, 938.

(f) The Commission has jurisdiction under the act to award reparation against a carrier for damages sustained by the shipper from the unduly discriminatory practices of the carrier in distributing coal cars, the Commission's authority to award reparation not being limited merely to cases of rates, but being extended to cases of all unreasonable and discriminatory regulations and practices. Jacoby v. Pennsylvania R. R. Co., 200 Fed. 989, 996.

(g) Plaintiff began suit against the F. & P. Ry. Co. and the K. C. S. Ry. Co. to recover damages for their refusal to furnish cars for loading oak railway ties at points on their lines in Arkansas and Louisiana for shipment to Linwood, Kan., beyond their lines, such refusal being justified on the ground that their joint through lumber tariff did not include a rate on such ties, crossties being a separate and distinct freight commodity. HELD: That the matter was one coming primarily within the jurisdiction of the Commission, and hence one which a court could not pass upon in the absence of prior action by that body. T. & P. Ry. Co. v. American Tie & T. Co., 34 Sup. Ct. 885, 888; 234 U. S. —., 58 L. Ed. —.

(h) Acceptance by a carrier of interstate shipments of railway crossties destined to a point beyond its line under its joint through lumber rate, does not authorize suit by shipper for damages for failure to accept further shipments, in the absence of previous action by the Commission, where the carrier bases its refusal on the absence of any applicable filed and published rate, contending that ties are not covered by its tariff fixing joint through lumber rates. T. & P. Ry. Co. v. American Tie & T. Co., 34 Sup. Ct. 885, 889; 234 U. S. —., 58 L. Ed. —.

(i) The Commission had authority to make examination and report upon the amount of damages which a shipper had suffered from an unjust discrimination due to a certain method of car distribution. There is nothing in the act to suggest that the damages which may thus be ascertained are only those arising from unreasonable or unjustly discriminatory rates. Rules as to car distribution that are unjustly discriminatory are within the purview of §3, and damages thereby occasioned, as well as those due to the exaction of unreasonable rates, arise from the violation of the act, and their ascertainment is within the scope of the Commission's authority. Pennsylvania R. Co. v. Clark Bros. Min. Co., 35 Sup. Ct. 896, 901; 238 U. S. 456, 59 L. Ed. —.

§6½. Mine Rating.

IMPORTANT CASES SINCE 1908

(a) Practices of the Director General in the distribution of coal cars to mines on the Monongahela, and Morgantown & Wheeling Railways, found to subject operators of mines on those roads to undue prejudice and disadvantage to extent that the percentage of cars furnished was less than the average percentage of cars furnished mines in the same general coal region on the Pittsburgh & Lake Erie and Pennsylvania Railroads. Record held open on question of damages. Northern West Virginia Coal Asso. v. P. R. R. Co., 60 I. C. C. 569.

(b) A suit to enjoin a practice of a railroad company, in time of a shortage of coal cars, to deliver assigned cars, whether its own or those of other railroads or private owners, to mines with which the owners had contracts for coal, counting them against the quota of such mines under their respective ratings, under Interstate Commerce Act, §1, par. 12, as amended by Transportation Act

February 28, 1920, and distributing commercial cars only to fill such quotas. Held: To present an administrative question for determination by the Interstate Commerce Commission, and not within the jurisdiction of the District Court. Corona Coal Co. v. Southern Ry. Co., 266 Fed. 726.

ALL OTHER CITATIONS

In Re Mine Ratings, 25 I. C. C. 286, 296; Griffith v. Jennings, 60 I. C. C. 232; Dickinson Fuel Co. v. C. & O. Ry. Co., 60 I. C. C. 315, 317.

§6⅝. Master Car Builder Rules.

IMPORTANT CASES SINCE 1908

(a) No reason why proper modification of Master Car Builders' rules can not be made, if the present rules governing the reconsignments of shipments need modification in order to remove any injustice to terminal companies. Merchants' Exchange of St. Louis v. T. R. R. Asso. of St. L., 50 I. C. C. 474, 476.

(b) Master Car Builders' Association rules with respect to repairs on private and other cars should not be filed in tariffs of carriers. Suggestions made should be adopted. In Re Private Cars, 50 I. C. C. 652, 707, 710.

§6¾. Regulations in General.

IMPORTANT CASES SINCE 1908

(a) Railroads should establish such regulations as may be necessary to secure the maximum use of their equipment. Plymouth Coal Co. v. D., L. & W. R. R. Co., 36 I. C. C. 76, 77.

(b) Separation of cars in transit is a common incident of transportation, involving no presumption of negligence on the part of the carrier. In cases where delivery of less than an entire shipment is tendered, the consignee has the alternative of either releasing the equipment by unloading the portion offered for delivery or of paying charges prescribed for its detention. If it elects to defer unloading until the arrival of the entire consignment, it cannot be heard to complain of the resulting additional cost. A rule beneficial in its general application may work occasional hardship, but is not merely on that account to be condemned. Darling & Co. v. P., C., C. & St. L. Ry., 37 I. C. C. 401, 402.

(c) For purposes of issue immediately before Commission the powers conferred by the act are sufficient to enable the Commission to require observance of rules for car service found to be reasonable and which in large measure are the same as those adopted by respondents. Car Supply Investigation, 42 I. C. C. 657, 671.

(d) As a means of removing prejudice or unjust discrimination, the Commission has the right to require the carrier to provide specifically in its tariffs the terms under which all similarly situated shippers may demand and secure upon even terms the use of cars employed upon the carrier's line. In the Matter of Private Cars, 50 I. C. C. 652, 677.

(e) Master Car Builders' Association rules with respect to repairs on private and other cars should not be filed in tariffs of carriers. The suggestion made by the association that the former practice of attaching repair cards at the time repairs are made to private cars be returned to, is approved. Suggestions made should be adopted. In Re Private Cars, 50 I. C. C. 652, 707, 710.

(f) Contention that car-service rules were not incorporated in schedules on file with the Commission is without merit, as no direction that they should be so incorporated and filed has been made by the Commission under the car-service amendment to section 1 of the act, and their publication in such manner is not otherwise required. Armour Grain Co. v. Director General, 57 I. C. C. 398, 405.

ALL OTHER CITATIONS

Lee v. St. L., S. W. Ry. Co., 29 I. C. C. 10, 102; Tanner & Co. v. C., B. & Q. Ry., 53 I. C. C. 401, 406.

§6⅞. State Regulation.

See State Rates and Regulation.

CASES 1887-1908

(a) A statute compelling railroad companies to furnish double-decked cars for sheep, under a penalty for failure to do so, and limiting the price per carload, is void as an attempted regulation of commerce when applied to interstate shipments. Stanley v. Wabash, St. L. & Pac. R. Co., 3 I. C. C. 176.

(b) While there is much to be said in favor of laws compelling railroads to furnish adequate facilities for the transportation of both freight and passengers and to regulate the general subject of speed, length and frequency of stops, for the heating, lighting and ventilation of passenger cars, the furnishing of food

and water to cattle and other livestock, an absolute requirement that a railroad shall furnish a certain number of cars at a specified day, regardless of every other consideration except strikes and other public calamities, transcends the police power of a state, and amounts to a burden upon interstate commerce. It makes no exception in cases of a sudden congestion of traffic and actual inability to furnish cars by reason of their temporary and unavoidable detention in other states, or in other places within the same state. It makes no allowance for interference of traffic occasioned by wreck or other accident upon the same or other roads, involving a detention of traffic, the breaking of bridges, accidental fires, washouts, or other unavoidable consequences of heavy weather. Car Shortage, Insufficient Transportation facilities. 12 I. C. C. 561, 577.

IMPORTANT CASES SINCE 1908

(c) Code, § 2116, as amended by Acts 32d Gen. Assem. c. 107, declaring that every railway corporation shall, when within its power, and upon reasonable notice, furnish suitable cars to all persons who may apply therefor, for the transportation of freight, is merely declarative of the pre-existing common law, and though the state laws are subject to the Interstate Commerce Law, such section is not affected by Interstate Commerce Act, declaring that the term "transportation" shall include cars and other vehicles and all instrumentalities of shipment or carriage, and it shall be the duty of every carrier to provide such transportation upon reasonable request. Carr v. C., R. I. & P. Ry. Co. (Ia. 1916), 155 N. W. 840.

(d) Requiring interstate railway company to furnish cars to shippers within a reasonable time after demand, as is done by Hurd's Rev. Stat. (Ill.) 1913, chap. 114, § 84, does not so directly burden interstate commerce as to render the statute invalid, irrespective of congressional legislation covering the subject, where the state courts hold that the question what is a reasonable time in any case depends upon all existing circumstances and conditions, including the requirements of interstate commerce. Illinois C. R. Co. v. Mulberry Hill Coal Co., 35 Sup. Ct. 760; 238 U. S. 275; 59 L. Ed. —.

ALL OTHER CITATIONS

Illinois C. R. Co. v. Mulberry Hill Coal Co., 35 Sup. Ct. 760, 761, 762; 238 U. S. 275, 59 L. Ed. —.

II. DUTY TO FURNISH CARS.

See Branch Lines IV.

§7. In General.

See Bills of Lading §5; Demurrage §6; Evidence §22.

CASES 1887-1908

(a) Defendant published a tariff containing the following: For the purpose of facilitating quick dispatch of the coal cars of this company, a discount of 10 per cent will be made from the following rates to any person, firm or company which shall receive consignments of coal, in any one year, amounting to 30,000 tons or upwards, at any one station on the line of this road. Quick dispatch to be construed as immediate unloading of coal on its arrival at destination. Defendant claimed that this discount was offered to secure, and was conditioned upon, quick dispatch in unloading its coal cars, and that it was a reasonable regulation for the proper conduct of its business. HELD: By the wording of the offer, "quick dispatch" was not made a condition of the offer, and therefore it cannot be supported on that ground. That even if "quick dispatch" were made a condition of the discount such offer would have neither justice nor reason to support it, as its limitation to consignees receiving a specified number of tons would be an unjust discrimination. That the offer of discount cannot be supported on the consideration of quantity, on the analogy of the distinction usually made in ordinary business transactions, between wholesale and retail dealers. Defendant required to cease and desist the practice. Providence Coal Co. v. Providence & Worcester R. R. Co., 1 I. C. C. 363.

(b) Complainant attacked as unreasonable position of defendant in not furnishing all the cars ordered by complainant during the summer and early fall of 1887, owing to high freight rates on the vessels on the lakes, and the refusal of shippers to ship upon those rates, there was an immense accumulation of coal and coke and other freights along the line of the Pittsburgh & Lake Erie Railroad Company, a short local and interior railroad extending from New Haven, Pa., to Youngstown, O., from which last named point it has traffic arrangements with the Lake Shore & Michigan

Southern Railway, to Ashtabula, and with the New York, Pennsylvania & Ohio Railroad Company to Cleveland. About the middle of September there was a sudden and general rush on the part of these shippers for the coal and coke cars from the Pittsburgh & Lake Erie Railroad Company to ship their coal and coke over its line at once towards Youngstown for Ashtabula and Cleveland, the two nearest and most direct lake ports; and at the same time there was an unprecedented quantity of ore from the Lake Superior mines for shipment over this road from Youngstown, in the direction of Pittsburgh, Bessemer and other points along its line south; while the general freights were exceedingly large and brisk. The freight car equipment of the company, according to previous experience in the course of its business, was sufficient to promptly move all the freight as tendered to it for movement over its line; but it turned out to be insufficient to furnish enough cars to remove coal and coke as fast as demanded by shippers, and this, although the company kept this freight equipment well in hand on its own line and refused to send any part of it to other and distant points off its own line in the transportation of freight; and from the 28th of September, 1887, to the 12th of October following, the company was obliged to furnish cars to the coal and coke miners ratably in proportion to their needs and not to the full extent that they demanded. The company had no connection whatever with the vessels on the lakes, and no interest in or control over their rates. In this condition of affairs the complainants demanded of the Pittsburgh & Lake Erie Railroad Company cars for the shipment of coal to Buffalo, N. Y., a point not situated on the line of the Pittsburgh & Lake Erie Railroad. The company was not then permitting any of its coal cars to go to Buffalo because it was using all of these cars and needed even more to move its freight over its own line. On this state of facts, HELD: 1. The company was guilty of no violation of the law in refusing to furnish its cars to complainants to carry their coal to Buffalo; but, under the circumstances, it was the duty of the company to do as it did in using this freight equipment in moving its freight over its own line. 2. The inability of the company to furnish cars as fast as demanded by shippers in an extraordinary congestion like this, for which it was in no wise responsible or to blame, was no violation of the Act to Regulate Commerce. 3. That, being unable for a brief period from the causes stated, to furnish promptly all coal cars as demanded for the movement of freight over its own line, it was the duty of this company as it did, to furnish cars ratably and fairly to all the mines along its line in proportion to their freights until the emergency had passed, when it could move all their freights as fast as tendered. 4. The proof does not sustain the complaint that the Company violated the Act to Regulate Commerce by giving a preference in cars to the coke over the coal trade. 5. The proof does not sustain the charge in the complaint that the Company violated the Act to Regulate Commerce and gave a preference to shippers in not requiring them to load or unload its cars promptly. 6. The petition is dismissed. Riddle, Dean & Co. v. Pitts. & Lake Erie R. R. Co., 1 I. C. R., 688.

(c) Refusing to furnish cars for transportation, when all cars are needed for transportation of freight which has accumulated along the line is not violation of Act. Riddle v. Pittsburgh & L. E. R. Co., 1 I. C. R. 601, 688.

(de) It is properly the business of a carrier by railroad to supply the rolling stock for the freights he offers or proposes to carry; and if the diversities and peculiarities of traffic are such that this is not always practicable, and consignors are allowed to supply it for themselves, the carrier must not allow its deficiencies in this particular to be made the means of putting at unreasonable disadvantage those who make use in the same traffic of the facilities it supplies. Rice v. L. & N. R. R. Co., 1 I. C. C. 723, 740.

(f) Complainant charged unjust discrimination in the matter of furnishing coal cars. In view of the fact that by an agreement between the N. Y. L. E. & W. extending (over the leased line of the N. Y. P. & O.) to Dayton, O., and the C. C. C. & I. R., extending from Dayton to Cincinnati, the N. Y. L. E. & W., is considered an initial road at Cincinnati, with the right to make rates thereto and therefrom on its own responsibility HELD, that Cincinnati must be treated as a point on the line of the N. Y. L. E. & W., for the purposes of a proceeding against that company under the Act, for unjust discrimination in furnish-

ing coal cars. It is the duty of a common carrier to provide adequate equipment for the business of its line; if in time of special pressure some one must wait, the annoyance must be distributed with all possible equality, and in this respect regular customers are not entitled to preference over occasional customers. It is not necessary for a shipper to make a special contract with a common carrier, in order to entitle himself to transportation for his goods. Common carriers have no right, by issuing a prohibitory tariff or otherwise, to withdraw from the transportation of any articles not dangerous to handle and which are ordinarily the subject of transportation by them; less desirable traffic must be accepted upon reasonable terms, as well as that which is more desirable. When the equipment of a carrier usually applied to the transportation of a particular article (here, gondola cars for the transportation of coal) is not equal to the demand made upon it, it is its duty to appropriate other cars to such service or to obtain cars elsewhere. A carrier is not justified in refusing to furnish any cars for the transportation of coal to a certain point on its line, by the fact that it could at the time make more money by using its regular coal cars on another portion of its line, where return loads were obtainable and more frequent trips could be made, thus enabling it to serve a larger number of customers with a smaller number of cars. Riddle Dean & Co. v. N. Y. L. E. & W. R. R., 1 I. C. R. 787.

(g) A carrier is not justified in refusing to furnish any cars for the transportation of coal to a certain point on its line, by the fact that it could at the time make more money by using its regular coal cars on another portion of its line, where return loads were obtainable and more frequent trips could be made, this enabling it to serve a larger number of customers with a smaller number of cars. Riddle, Dean & Co. v. N. Y., L. E. & W. R. R. Co., 1 I. C. R. 787.

(h) It is the duty of a common carrier to provide adequate equipment for the business of its line; if in time of special pressure some one must wait, the annoyance must be distributed with all possible equality, and in this respect regular customers are not entitled to preference over occasional customers. Riddle, Dean & Co. v. N. Y., L. E. & W. R. R. Co., 1 I. C. R. 787.

(i) When the equipment of a carrier usually applied to the transportation of a particular article (here, gondola cars for the transporttion of coal) is not equal to the demand made upon it, it is its duty to appropriate other cars to such service or to obtain cars elsewhere. Riddle, Dean & Co. v. N. Y., L. E. & W. R. R. Co., 1 I. C. R. 787.

(j) Carrier, charged with unjust discrimination, may show that it made extra exertions in good faith to obtain cars for shipper from connecting line to whom shipper had to look for such cars. Riddle v. Baltimore & O. R. Co., 1 I. C. R. 701, 778.

(k) The N. Y., L. E. & W. R. Co., extending to Dayton, Ohio, by agreement being considered with C., C. C. & I. R. Co., extending from Dayton to Cincinnati, an initial road at Cincinnati, with the right to make rates to that place, Cincinnati must be treated as point upon line for the purpose of proceeding against the company for unjust discrimination in furnishing coal cars. Riddle v. New York, L. E. & W. R. Co., 1 I. C. R. 787.

(l) Carrier is not justified in refusing cars for transportation of coal at certain point by fact that it could make more money by using its regular coal cars on another point of its line. Riddle v. New York, L. E. & W. R. Co., 1 I. C. R. 787.

(mn) It is a common law and charter duty of every railway carrier subject to the act to furnish a proper and adequate car equipment for all the reasonable needs of the business it advertises and undertakes to do, and if the carrier fails to do this, to the wrongful injury of the shipper, it is liable in damages therefor, but the statute has not clothed the Commission with the jurisdiction to order the carrier to furnish any particular equipment of cars, or in fact any cars at all. It is the duty of such carrier to select and furnish its own equipment of cars, under all the responsibility which the law requires of it in so vital and important a matter, for the public has not undertaken to divide responsibility with the carriers in this respect. Scofield v. L. S. & M. S. R. R., 2 I. C. C. 67, 76.

(o) The law does not forbid a carrier from obtaining cars for the transportation of freight over its line from other carriers, or car furnishing companies, but in every such instance the rates on

freight must be exactly the same, and none other, as they would be if such cars were owned by the carrier so using them. Scofield v Lake Shore & Michigan Southern R. Co., 2 I. C. R. 67.

(p) On all the facts in this case, HELD: (1) That the tank car of complainant when loaded was not in a safe condition to be transported by the defendant in April, 1888, and that it was not the duty of defendant to transport it at that time, but it was the duty of complainant to have it repaired before insisting upon its being transported by defendant; (2) That neither the defendant nor any of its officers and agents have been engaged, as complained, in combinations with connecting lines, or other parties, to prevent complainant from obtaining reasonable rates and facilities for the transportation of its mineral waters;(3)That defendant's officials and agents have not acted in a malevolent spirit toward complainant in throwing obstructions in the way of its transporting mineral water over defendant's line and its connecting lines. Michigan Congress Water Co. v. Chicago & Grand Trunk R. Co., 2 I. C. R. 428.

(q) Complainant attacked rates on cotton from stations on the I. C., in Kentucky, Tennessee and Mississippi to New Orleans as compared with the rates from the stations to eastern markets, mills and Atlantic ports, compared according to distance. Also from Meridian, Miss., via C. N. O. & T. P., to New Orleans as unreasonable. The Commission will not order the rail carriers to transport cotton on flat cars instead of in box cars to New Orleans, the rate being the same on each, no injury being shown to have resulted to petitioners or to that city, or to any shipper or producer from the carriage in box cars. New Orleans Cotton Exchange v. I. C. R. R., 2 I. C. C. 777.

(r) A railroad company may acquire cars by construction, by purchase or by contract for their use, and no one has the power to compel a railroad company to select among these several modes or to contract with all comers. Worcester Excursion Car Co. v. Pennsylvania Railroad, 2 I. C. C. 792, 794.

(s) The interest of the public in a matter of this kind is vitally important and lies in the direction of holding every common carrier by rail to the strictest responsibility in furnishing safe, suitable and sufficient car equipment for the transportation of persons over its line; and the law-making power in enacting the Act to Regulate Commerce has not undertaken to divide this responsibility with the carrier in the selection of its cars. Worcester Excursion Car Co. v. Pennsylvania R. Co., 2 I. C. R. 792.

(t) It is a carrier's duty to equip its road with instrumentalities of carriage suitable for the traffic it undertakes to carry, and to furnish them alike to all who have occasion to their use; and its duty to furnish equipment cannot be transferred to or required of shippers. Rice v. Western N. Y. & P. R. Co. (Com.) 3 I. C. R. 162.

(u) There appears to be no law that prevents a carrier in the course of its business from arranging with the shipper to furnish cars for the shipment of his own goods at terms agreed upon between him and the carrier, but in every such transaction the carrier, at his peril, must see to it that neither directly nor relatively must a better rate be given to such shipper than to others engaged in the same business, and making shipments of the same kind of goods, who are dependent on the carrier for cars. Rice Robinson & Witherop v. W. N. Y. & P. R. Co., 3 I. C. C. 162, 171.

(v) It is the duty of the carrier to equip its road with the means of transportation, and, in the absence of exceptional conditions, those means must be open impartially to all shippers of like traffic. Independent Refiners' Asso. v. W. N. Y. & P. R. Co., 4 I. C. C. 162, 169.

(w) Ownership of a car rented to a carrier and for the use of which the carrier pays a full consideration does not of itself entitle the owner to the exclusive use of such car; and if the owner may, in the contract of hire to the carrier, stipulate for the exclusive use of the car, it must be upon such terms as shall not constitute an unjust discrimination against shippers of like traffic in cars owned by the carrier and who are excluded from the use of the car so hired. Independent Ref. Asso. v. Western N. Y. & P. R. Co. (Com.), 4 I. C. R. 162.

(x) It is the duty of the carrier to furnish an adequate and suitable car equipment for all the business it undertakes, and also whatever is essential to

the safety and preservation of the traffic in transit. Truck Farmers Asso. v. Northeastern R. R. Co., 6 I. C. C. 295, 316.

(y) Carriers are left by the law to procure equipment for their business by lease as well as otherwise, and they are not prohibited from leasing cars belonging to a shipper, nor are they compelled to contract in this respect with all shippers because they do with one. Consolidated Forwarding Co. v. Southern P. Co. et al., 9 I. C. C. 182.

(z) Defendant discriminated against complainant in favor of other shippers in furnishing cars at Collins, O., ordered during the months of January and February, 1901, and in not furnishing cars for his shipments from Kipton, O., which were ordered in August and September, 1900, until the following December and January, while cars ordered by other shippers at Norwalk were provided with comparative promptness. HELD: That this was unlawful discrimination against complainant and his traffic and against Kipton as a locality in favor of Norwalk. That complainant should have reparation for damages thereby sustained in the amount of $200. Hawkins v. Lake Shore & M. S. Ry. Co., 9 I. C. C. 207.

(aa) Complainant attacked as unjustly discriminatory defendant's action in not furnishing equipment for his shipments, whereas his competitors were furnished equipment. Complainant at Collins, O., ordered during the months of January and February, 1901, cars for the movement of his freight, and in August and September, 1900, at Kipton, O., cars were not furnished until the following December and January, while cars ordered by other shippers at Norwalk, O., were provided with comparative promptness. HELD: This was unlawful discrimination against complainant and his traffic and against Kipton as a locality in favor of Norwalk. Complainant awarded reparation for damages sustained in the amount of $200. Hawkins v. L. S. & M. S. Ry., 9 I. C. C. 207.

(bb) The defendant unlawfully discriminated against complainant and his locality, in delaying the furnishing of cars at Collins, O., ordered by him during the months of January and February, 1901, and cars ordered by him at Kipton, O., in August and September, until the following December and January, while cars ordered by other shippers at Norwalk were provided with comparative promptness. Complainant was awarded damages in the amount of $200. Hawkins v. Lake Shore & Michigan S. R. Co., 9 I. C. C. 207.

(cc) Complainant attacked distribution of cars by defendant as unlawfully discriminatory. Complainant, located at Hartland, Clarksfield and Brighton, O., non-competitive points, ordered cars for his shipments from defendant during the period from September 3, 1900, to March 6, 1901, which were not furnished, while during the same period defendant furnished cars at Norwalk, O., a competitive station. HELD: This was unlawful discrimination, against complainant, his traffic, and such non-competitive stations in favor of competitive stations, shippers therefrom and traffic there originating. Complainant entitled to reparation for damages thereby sustained in the amount of $100. Hawkins v. W. & L. E. Ry., 9 I. C. C. 212.

(dd) During the period between September 3, 1900, and March 6, 1901, the defendant distributed cars for the movement of traffic in such manner as to discriminate in marked degree against complainant who desired to ship freight from Hartland, Clarksville and Brighton, O., non-competitive stations, in favor of shippers at Norwalk, O., and other competitive stations. HELD: That this was unlawful discrimination against complainant, his traffic, and such non-competitive stations in favor of the competitive stations, shippers therefrom, and traffic there originating. That complainant is entitled to reparation for damages thereby sustained in the amount of $100. Hawkins v. Wheeling & L. E. R. R. Co., 9 I. C. C. 212.

(ee) A carrier, by distributing cars for movement of traffic in such manner as to discriminate against one who desired to ship from Hartland, Clarksfield and Brighton, Ohio, non-competitive stations, in favor of shippers at Norwalk, O., and other competitive stations, was guilty of unlawful discrimination against such shipper, his traffic, and such non-competitive stations in favor of the competitive cities, shippers therefrom, and traffic there originating and damages to the extent of $100 were awarded against him. Hawkins v. Wheeling & Lake Erie R. Co., 9 I. C. C. 212.

(ff) Complainant alleged unjust discrimination by defendant in failing to

furnish him with cars for the shipment of grain while supplying more than a fair proportion of cars to a competitor doing business in the same town, and that defendant subjected him to unreasonable disadvantage by providing his competitor in the coal business with a private switch and denying the like facility to him, thereby compelling him to unload coal at an inconvenient point near the outskirts of the town, and demanded reparation. It appeared that complainant desired to ship grain mainly to eastern points, concerning the transportation of which an embargo had been established by eastern lines, while his competitor in this business shipped largely by defendant's line to local points, for which complainant had no shipments, and that as to the coal business complainant really desired to use a passing siding of defendant for the purpose of unloading his coal. HELD: There was no such showing of undue preference or unjust discrimination as would warrant an order of relief or of reparation, complaint dismissed. Parks v. C. &. M. V. R. R. Co., 10 I. C. C. 47.

(gg) The complainant was not unjustly discriminated against by failure to furnish him with cars for the shipment of grain, while supplying a competitor doing business in the same town with cars, where it appeared that complainant desired to ship grain mainly to eastern points, concerning the transportation of which an embargo had been established by eastern lines, while his competitor in that business shipped largely by defendant's line to local points for which complainant had no shipments. Parks v. Cincinnati & M. Valley R. Co., 10 I. C. C. 47.

(hh) Defendant's refusal to furnish cars to complainants between February 25 and March 26 on the Deal sidetrack at Meyersdale and the sidetrack of the Savage Brick Company at Keystone Junction, while furnishing and offering to furnish cars to complainants' competitors at other points, under the circumstances disclosed by the evidence and described in the findings, was undue and unlawful discrimination against complainants, for which they are entitled to reparation. Glade Coal Co. v. Baltimore & O. R. R. Co., 10 I. C. C. 226.

(ii) Complainant attacked alleged discrimination against it in the matter of rates charged and facilities furnished for the transportation of coal, carloads, from Meyersdale and Keystone Junction, Pa., to market points in other states. Defendant's refusal to furnish cars to complainant on the Deal sidetrack at Meyersdale and the sidetrack of the Savage Fire Brick Company at Keystone Junction, while furnishing and offering to furnish cars to complainant's competitors at other points. HELD: Undue and unlawful discrimination against complainants, reparation awarded. Making certain charges for the transportation of coal shipped in carloads when the coal is loaded by tipple, and exacting a higher charge when it is loaded in some other way, is not justified by difference in cost to the carrier between different methods of loading, or by facts appearing in this case and renders the higher rates thus made unreasonable and unduly discriminatory, first, as against complainants, and, second, as against all other shippers of coal except those who load by tipple. Glade Coal Company v. B. & O. R. R., 10 I. C. C. 226.

(jj) Defendant's refusal to furnish cars to complainant's between February 25 and March 26 on the Deal sidetrack at Meyersdale and the sidetrack of the Savage Brick Company, at Keystone Junction, while furnishing and offering to furnish cars to complainant's competitors at other points, under the circumstances disclosed by the evidence and described in the findings, was undue and unlawful discrimination against complainants, for which they are entitled to reparation. Glade Coal Co. v. Baltimore & O. R. Co., 10 I. C. C. 226.

(kk) Between December 16, 1902, and April 6, 1903, defendant unjustly discriminated against complainant in furnishing cars for the shipment of cross ties by refusing to provide any cars for such shipments by complainant, while it did furnish cars to other persons for the interstate shipment of lumber, stone and many other freight articles, and also supplied cars for the shipment of cross ties destined almost entirely for its own use. Reparation in the sum of $630 awarded to complainant. Paxton Tie Co. v. Detroit S. R. Co., 10 I. C. C. 422

(ll) Complainant attacked as unduly discriminatory action of defendant in refusing to furnish him cars, although cars were furnished to other persons for the interstate shipment of lumber, stone and

other freight articles. Complainant was located at Bainbridge, O., and prior to December 16, 1902, was able to secure all the cars he wanted. On and after that date defendant placed restrictions on loading coal cars with ties, although at the same time defendant furnished cars to be loaded with ties for its own use. HELD: Defendant unduly discriminated against complainant, reparation awarded. Paxton Tie Co. v. Detroit Southern R. R., 10 I. C. C. 422.

(mm) Complainant was unjustly discriminated against by defendant's refusal to provide cars for the shipment of cross ties, while it did furnish cars to other persons for the interstate shipment of lumber, stone, and many other freight articles, and also supplied cars for the shipment of cross ties destined almost entirely for its own use. Paxton Tie Co. v. Detroit S. R. Co., 10 I. C. C. 422.

(nn) The right of complainant to ship coal was not barred by the fact that he was a druggist by occupation, or that he loaded coal cars from wagons, for a large part of the commerce of the country is handled in that way; and when he tendered freight for transportation he was entitled to the same facilities furnished to other shippers in like conditions. Thompson v. Pennsylvania R. Co., 10 I. C. C. 640.

(oo) Defendant's refusal to furnish to complainants cars for interstate shipments of corn from Leipsic, Ohio, while it contemporaneously furnished to complainant's competitors cars for like shipments, was unlawful discrimination. Gallogly v. Cincinnati, H. & D. R. Co., 11 I. C. C. 1.

(pp) During performance of transportation the car is, to every practical intent, the car of the railroad company using it, and its measure of responsibility as to the sufficiency of the car is the same, whether it obtains the car by purchase or by lease. Re Charges for Transportation and Refrigeration of Fruit Shipped From Points on the Pere Marquette and Michigan Central Railroads, 11 I. C. C. 129.

(qq) It is not the business of the shipper to furnish the vehicle of transportation. That is the duty of the carrier. Under its franchise the carrier must do more than construct his roadway. He must equip it with the means of transportation, and these means, of whatever style or pattern, must be open impartially to all shippers of like traffic. If the carrier hires or arranges in any manner for the use of vehicles he does not own, he has one of two things to do: He must furnish like vehicles to all competitors in the traffic, or must be careful to make no unjust discrimination and give no undue preference in his rates. Railroad Commission of Ohio v. H. V. Ry., 12 I. C. C. 398, 410.

(rr) Complaint in this case involved the question whether defendant carrier could establish a through route and fix a joint rate, and then decline to furnish equipment in which to move such freight. As it appeared that there was a specific agreement between defendant carrier and another carrier that the latter should furnish the cars, the complainant agreed that under the circumstances it would be in the interest of all parties that the present proceeding be dismissed. Oklahoma & Arkansas Coal Traffic Bureau v. Midland Valley R. R. Co., 12 I. C. C. 516.

IMPORTANT CASES SINCE 1908

(ss) Provision of section 1 of the act whereby carriers are required to furnish cars upon reasonable request therefor was inserted by the amendment of 1906. Vulcan Coal & Mining Co. v. I. C. R. R. Co., 33 I. C. C. 52, 59.

(tt) Carrier must assume the burden of explaining or excusing its failure to furnish cars. Vulcan Coal & Mining Co. v. I. C. R. R. Co., 33 I. C. C. 52, 71.

(uu) Although a full car supply can not be expected all the time, carriers must do more than to provide themselves with sufficient equipment for the slack period of coal production. Vulcan Coal & Mining Co. v. I. C. R. R. Co., 33 I. C. C. 52, 71.

(vv) The disability created when initial carrier owns no cars is offset by retention in hand of moneys which would otherwise be expended for purchase and maintenance. Boise Lumber Co., Ltd., v. P. & I. N. Ry. Co., 33 I. C. C. 109, 112.

(ww) The average time in which car can be furnished in lieu of one refused is about 40 hours. Farmers' Cooperative Assn. v. C., B. & Q. R. R. Co., 34 I. C. C. 60, 63.

(xx) The obligation of the carrier is to promptly furnish a suitable car. Farmers' Cooperative Assn. v. C., B. & Q. R. R. Co., 34 I. C. C. 60, 64.

(yy) A delay of over five months in filling an order for cars shows that a carrier's equipment did not meet reasonable demands. Pennsylvania Paraffine Works v. P. R. R. Co., 34 I. C. C. 179, 183.

(zz) Whether or not a particular request for cars is reasonable is a matter for the Commission to decide in each particular case. Pennsylvania Paraffine Works v. P. R. R. Co., 34 I. C. C. 179, 187.

(3a) Obligation to furnish cars is joint upon carriers, parties to through routes and joint rates. Pennsylvania Paraffine Works v. P. R. R. Co., 34 I. C. C. 179, 194.

(3b) In warm weather a perishable commodity like ice requires good cars for its transportation. It is the duty of carriers to furnish such cars upon reasonable request. Eagle Ice Co. v. C., M. & St. P. Ry., 37 I. C. C. 250, 258.

(3c) When extraordinary equipment is used for the transportation of long freight, that is, large cars which were primarily constructed to accommodate certain classes of freight, such as vehicles, furniture and automobiles, the same rate-making principle should also apply. Minimum Charges on Bulky Articles, 38 I. C. C. 257, 262.

(3d) Section 1 of the Act provides in part that it shall be the duty of every carrier to furnish cars upon reasonable request therefor. This duty, however, does not carry with it a right to charge for the movement of the car from the point where it may be at the time to the point where it is wanted. Such a charge unjustly discriminates against shippers at stations to which the empty cars must usually be hauled for varying distances and unduly prefers shippers at points where empty cars are always available. City Ice Delivery Co. v. P. M. R. R. Co., 39 I. C. C. 589, 591.

(3e) The duty does not rest upon the carrier to furnish special equipment if it does provide some method by which the commodity can be protected from the cold during the winter months. Northern Potato Traffic Asso. v. C. & A. R. R., 44 I. C. C. 426, 433.

(3f) The mere toleration by the carriers through a period of years of the use of their cars and equipment as a salesroom affords no basis for a ruling that the practice has now grown into a shipper's right and a carrier's duty and is a transportation service. The Car Peddling Case, 45 I. C. C. 494, 500.

(3g) The Commission is unable to accept the view that the 48 hours of free time for unloading or the further detention of the car under demurrage for that purpose, embraces a right in the shipper to utilize the time by using the carrier's yard and station property as a place of business to which he may invite the general public to come and make purchases directly from the car. This is not a service of transportation, nor does such a practice affect the service of transportion offered by a carrier to the public. On the contrary, it stands wholly apart from any duty the carrier owes to a shipper, and in forbidding the practice for the future the carrier is simply asserting that control over its property, as private property, which the courts have held it enjoys, as fully as the private individual, with respect to "those of the general public who have no occasion to use it for purposes of transportation." Car Peddling Case, 45 I. C. C. 494, 502.

(3h) And shippers should reject cars that are unfit for loading and the carriers should refuse to accept any shipment tendered in an unfit car or where the shipper has failed properly to install the grain doors or otherwise to prepare the car for the safe transportation of grain. Claims for Loss and Damage of Grain, 48 I. C. C. 530, 571.

(3i) The practice of shipping live fish in carloads was found practicable about five years ago. The cars used for this traffic are made with the best steel underframes and are equipped by the shipper at an expense of about $2,000 per car with permanent tanks and mechanism for aerating the water. Express Charges on Empty Fish Cars, 50 I. C. C. 24, 25.

(3j) A car of a peculiar type when first used might be considered special equipment because of its construction and design. If later that type of car should come into general use throughout the country, and move a steady and heavy volume of traffic, it would lose its special character. It is contemplated by carriers that every car which is differently and more expensively constructed than a flat or box car should be considered a special car. A coal car is everywhere considered an ordinary car, but there are several types, differing in cost, and re-

quiring distinct loading and unloading facilities. In the Matter of Private Cars, 50 I. C. C. 652, 678.

(3k) Any attempt to state separate charges for furnishing cars of special types would be a prolific source of litigation, and, in many instances, would impose unjust and unreasonable charges on shippers or receivers of freight. In Re Private Cars, 50 I. C. C. 652, 680.

(3l) It was suggested that carriers might specify in their tariffs the cars they hold themselves out to furnish, and that all other kinds of cars would be considered special by that carrier. Under the system of through rates in this country, such special charges would result in nothing but confusion in tariff publications and lead to uncertainty in amount of freight charges to be paid by shippers or receivers. In the Matter of Private Cars, 50 I. C. C. 652, 680.

(3m) It is doubtful if carriers could be required to furnish live poultry and palace stock cars which are specialized to a high degree. In Re Private Cars, 50 I. C. C. 652, 690.

(3n) A carrier is entitled to a reasonable time in which to furnish special equipment desired by a shipper and unless it is given reasonable notice of the shipper's requirements it is not liable for damages resulting from failure to furnish such equipment. Northwestern Trading Co. v. Adams Express Co., 51 I. C. C. 211, 213.

(3o) The publication of graduated carload minima implies an obligation upon carriers to furnish, upon reasonable notice, cars of corresponding capacity. Feltus Lumber Co. v. G. N. Ry., 51 I. C. C. 571, 575.

(3p) A charge in addition to freight rates should not be made for furnishing to shippers refrigerator, tank, or other special type of car, or for transporting their shipments therein, unless the freight rates are predicated on the transportation in another type of car less expensive and not so difficult to operate. In Re Private Cars, 50 I. C. C. 652, 680, 709.

(3q) Rules by which carriers refuse to accept orders for cars for the carriage of lumber of cubical capacity of less than 2,400 cubic feet, or of more than certain specific cubic capacity, while tariffs named graduated minima for cars of less or greater capacity when tendered for carrier's convenience. HELD: Unreasonable and unduly prejudicial. Feltus Lumber Co. v. G. N. Ry., 51 I. C. C. 571, 576.

(3r) It is well settled that a common carrier is bound to provide whatever equipment is reasonably necessary for the safe transportation of all goods which it holds itself out to carry. Perishable Freight Investigation, 56 I. C. C. 449, 486.

(3s) Siding agreement between Mountain Smokeless Coal Co. and defendant provided that its use by any other party should be by permission of defendant only. Defendant contended that, as complainant did not first obtain its permission to be furnished cars on that siding, the request therefor was not reasonable. HELD: Request met requirements of the act, as agreements in respect of other sidings equipped with two tipples were the same as that of the Mountain Smokeless Coal Co. and defendant permitted cars to be furnished at such other sidings. Meyersdale Smokeless Coal Co. v. B. & O. R. R. Co., 62 I. C. C. 429, 432.

(3sa) Where carrier owns no cars to contribute for traffic off its line, to assess shippers charges for securing empty equipment would result in transferring to them an obligation resting upon common carriers. Cord and Pulp Wood to Canton, 78 I. C. C. 593, 596.

(3sb) Order of Texas R. R. Commission requiring carriers, at request of shippers, to slat stock cars when furnished for tranportation of watermelons between points in Texas, and providing that no transportation charge shall be based on weight of material so used, while making a charge for slatting stock cars when furnished for transportation between points in Texas and points in other states, found unjustly discriminatory against interstate commerce. Discrimination ordered removed by cancellation of interstate charge. Slatting Cars for Watermelons, 78 I. C. C. 732.

(3sc) Without passing on question whether duty of participants in a through movement to supply appropriate shares of equipment necessary for transportation of coal rests upon carriers jointly (compare Huerfano Coal Co., 28 I. C. C., 502) or severally, in aggregate the duty of providing adequate supply of equipment rests upon railroad carriers. Assigned Cars for Bituminous Coal Mines, 80 I. C. C. 520, 546.

(3t) Without passing on the question whether the duty rests upon the carriers jointly or severally, in the aggregate the duty of providing an adequate supply of equipment rests upon the railroad carriers. Assigned Cars for Bituminous Coal Mines, 80 I. C. C. 520, 546.

(3u) The obligation of furnishing an adequate supply of equipment by statute rests upon the carrier, and does not rest upon the shipper. Assigned Cars for Bituminous Coal Mines, 80 I. C. C. 520, 556.

(3v) That a common carrier carries coal at a loss does not relieve it from furnishing proper equipment and performing other duties incident to transportation, such duties being dependent on its status as a common carrier and not on its financial condition, which is consequently no defense to shipper's claim for reimbursement for furnishing car door boards. Boettcher v. Public Utilities Commission of Colorado (Colo. 1923), 213 Pac. 114.

(3w) The six-day period complained of as being too long a period to require furniture shippers at Grand Rapids, Mich., to wait for car of particular size ordered, not found unreasonable. Berkey & Gay Furniture Co. v. M. C. R. R. Co., Unrep Op. 1911.

(3x) The definition of transportation in section 1 of the act is a preliminary to a requirement that the carriers shall furnish the instrumentalities specified upon reasonable request and not that the owners and builders thereof shall be regarded as carriers. Ellis v. I. C. C., 35 Sup. Ct. 646; 237 U. S. 434; 59 L. Ed. 1036.

(3y) The parallel between preferences and prejudices in respect of rates is manifestly close with preferences and prejudices in respect of service; indeed, with a low-grade commodity such as coal, it often happens that an inequality with respect to car distribution, controlling, as it does, quantity of production possible, is much more important to shipper than amount of transportation charge he pays. Assigned Cars for Bituminous Coal Mines. 80 I. C. C. 520, 556.

(3z) Complainant alleged defendant failed and neglected to maintain and furnish sufficient and suitable transportation, including an adequate supply of cars, for economical and safe loading, transportation and unloading of logs for shipments from points on defendant's Superior division to various points in Michigan and Wisconsin. Timber owned by the different complainants is located in the vicinity of Ontonagon, generally reached by spur tracks owned by complainants which connect at various points with the Superior division. Complainants all own and maintain their spur tracks and also provide their own engines, which are used to take the empty cars from the junctions with defendant's line to the logging operations, and to return the loaded cars. Most of the logs are cut in the winter. It was the practice of complainants to order about twice as many cars as were required; obviously a request for twice as many cars as are required can not be considered a reasonable one, and under such practice it would be difficult to determine to what extent, if any, the defendant failed to maintain sufficient cars to meet reasonable demands. The record does not afford a sufficient basis for the promulgation of a set of rules to govern the distribution of cars for the traffic in question. HELD: Defendant's method of distributing cars not unreasonable, complaint dismissed. Norton Lumber Co. v. C., M. & St. P. R. Co., 81 I. C. C. 749.

(4a) The law requirements as to the duty of the carrier to the shipper to furnish equipment and maintain its through route carries with it necessarily the power on the part of the Commission to enforce rules which will permit the free interchange of traffic as between carriers. Krauss Bros. Lumber Co. v. G. M. & N. R. Co., 87 I. C. C. 412, 413.

§7⅛. Bad Order Cars.

IMPORTANT CASES SINCE 1908

(a) The practice of terminal carriers of requiring complainants, at their own expense to transfer to other equipment, shipments of hay delivered to team tracks in St. Louis or East St. Louis in bad-order cars, as a precedent to permitting rebilling to points beyond, found an unjust practice. Reparation awarded. Mer-

chants' Exchange of St. Louis v. T. R. R. Asso. of St. Louis, 50 I. C. C. 474.

(b) When cars in bad order are accepted by the terminal company, they are subject to all the rights of the shippers, and one of these, recognized by years of practice by carriers throughout the entire country is that of rebilling in the same cars. Merchants' Exchange of St. Louis v. T. R. R. Asso. of St. Louis, 50 I. C. C. 474, 475.

(c) The contentiton that when original contract of transportation is completed the carriers can not be compelled to enter into a new contract if freight is in defective equipment, not sustained, inasmuch as it would make a substantial right of a shipper depend upon a condition over which it has no control, but which has been created by the carriers themselves, and would permit substantial discriminations between shippers. Merchants' Exchange of St. L. v. T. R. R. Asso. of St. L., 50 I. C. C. 474, 475.

§7¼. Car Congestion.

See Car Congestion; Demurrage §7¼; §14½; Embargoes.

IMPORTANT CASES SINCE 1908

(a) In response to complaints from all parts of the country, the Commission entered upon a general investigation concerning the supply, exchange, interchange, and return of freight cars, and all rules, regulations, and practices relating thereto. The existing conditions of car distribution had no parallel in the history of the country. In some territories the railroads had furnished but a small part of the cars necessary for the transportation of the staple articles of commerce. In consequence mills had shut down, prices had advanced, perishable articles of great value had been destroyed, and hundreds of carloads of food products had been delayed in reaching their markets. In other territories there were so many cars on the lines and at terminals that there had been unprecedented confusion and long delays in transit. For some time there had been a general misuse of freight cars by substantially all carriers, through failure to observe the then effective car service rules 1, 2, 3, and 4, providing for the return of cars to the owning roads, adopted by the American Railway Association. Failure to observe these rules became a common practice as the volume of traffic increased; cars received from other lines for a line haul or for switching movements were used for continuous local service; and the owning lines were deprived of cars which they had provided for the transportation of coal, grain and perishable commodities. As a result, embargoes were placed by some lines against the movement of their own coal cars beyond their rails. To remedy the evil a car efficiency committee was created by the association. This committee directed the return of open top cars and fruit refrigerator and heater cars to the owning lines, and directed that the lines in groups 1 to 8 should return to their western and southern connections from 10 to 30 per cent of the box cars, in excess of those received from such connections, regardless of the number of box cars on line. On January 1, 1917, the percentage of all freight cars on line to total owned were as follows: Group 1, B. & A. R. R., 114.06, and B. & M. R. R., 141.87; Group 2, B. & O. 99.50, L. V. 111.30, and N. Y. C. 108.88; Group 3, A. A. 114.56, P. M. 150.43, and Wabash 133.41; Group 4, A. C. L. 91.92, S. A. L. 114.43, and Southern 89.64; Group 5, C. of G. 84.44, I. C. 75.06, and L. & N. 67.82; Group 6, C., B. & Q. 90.80, C. G. W. 90.27, and C., M. & St. P. 108.34; Group 8, D. & R. G. 106.34, M. P. 102.41, and St. L. & S. F. 122.86; Group 9, F. W. & D. C. 69.02, and T. & P. 105.94; Group 10, A., T. & S. F. 95.44, S. P. 92.86, and W. P. 130.22; Group 11, C. P. 90.78, G. T. 126.71, and G. T. P. 31.57. The percentage of box cars on line to total owned was: Group 1, B. & A. 96.82, B. & M. 150.18; Group 2, B. & O. 138.62, L. V. 126.60, and N. Y. C. 121.46; Group 3, A. A. 115.38, P. M. 130.52, Wabash 154.02; Group 4, A. C. L. 93.81, S. A. L. 121.53, and Southern 95.70; Group 5, C. of G. 81.90, I. C. 65.14, and L. & N. 72.39; Group 6, C., B. & Q. 79.86, C. G. W. 74.42, and C., M. & St. P. 85.51; Group 8, D. & R. G. 87.64, M. P. 86.12, and St. L. & S. F. 105.86; Group 9, F. W. & D. C. 75.19, T. & P. 93.20; Group 10, A., T. & S. F. 87.77, S. P. 84.26, and W. P. 139.60; Group 11, C. P. 85.68, G. T. 116.94, and G. T. P. 27.02. On January 1, 1917, the percentage of gondola, coal and coke cars on line to total owned was: Group 1, B. & A. 161.94, B. & M. 133.84; Group 2, B. & O. 78.37, L. V. 97.40, and N. Y. C. 102.78; Group 3, A. A. 142.96, P. M. 194.58 and Wabash 119.99; Group 4 A. C. L. 225.35, S. A. L. 103.71, and Southern 77.28; Group 5, C. of G. 93.04, I. C. 80.97,

and L. & N. 63.72; Group 6, C. B. & Q. 99.81 C. G. W. 159.70, and C., M. & St. P. 186.33; Group 7, St. J. & G. I. 158.43, U. P. 151.40; Group 8, D. & R. G. 103.23, M. P. 118.41; Group 9, F. W. & D. C. 102.02, T. & P. 168.40; Group 10, A., T. & S. F. 125.06 S. P. 173.70, and W. P. 182.40; Group 11, C. P. 170.39, G. T. 175.03, and G. T. P. 55.02. In spite of the efforts made to stop diversion and misuse of foreign refrigerator cars and coal cars, the practice continued. The car efficiency committee not being able to secure obedience to its directions, its work was delegated to the car service committee, which in its circular No. 3 of December 15, 1916, directed that roads in group 4 not covered by A. R. A. circular No. 1762 in possession of their ownership of box cars, they should help western and southern connections having deficiencies by delivering to them a 20 per cent excess of box cars above the number received. Car shortage conditions were serious, the supply of coal in many communities inadequate and railroads were in many cases obliged to confiscate commercial coal for motive power. The misuse of foreign refrigerator cars continued. The flow of traffic northbound and eastbound had carried box cars from the originating lines into official classification territory, where large accumulations resulted in slow movement and disorganized service. While the carriers had promised to put a stop to the diversion and misuse of foreign open-top and refrigerator cars, the evil practice continued unabated. As a consequence, numerous shippers and carriers had petitioned a formal order to remedy the situation, and an order was issued requiring the carriers to show cause why an order should not be entered requiring them to return to the owners, without misuse or diversion, all foreign open-top cars, and all railroad owned or controlled refrigerator, heater ventilated and insulated cars. The car service committee asked that no car service rule be prescribed by order prior to March 1, 1917, contending that the increased per diem progressive demurrage charges, and diversion penalty contained in the existing car-service rules as amended by Circular No. 1751, were ample to meet the situation. It appeared that the car service committee had not been adequately empowered to deal with the situation, and that it had not been able to secure the cooperation of a substantial number of carriers.

HELD: (1) That the existing increased per diem, progressive demurrage charges, and diversion penalty were unlikely to afford immediate relief, and in any event were not inconsistent with an order for the observance of reasonable car service rules; (2) that the Commission had jurisdiction to require the observance of reasonable car service rules; (3) the existing code of car service rules was approved, insofar as they related to open top coal and coke cars, and railroad owned and controlled refrigerator, heater, ventilated and insulated cars, with the following exceptions: (a) all such cars received under load might be forwarded to destination; when lading was removed or when received empty, they must be returned to their owners, loaded or empty (1) direct, if belonging to direct connections; (2) through the proper home route, if belonging to other than direct connections; (b) the proper home route for cars belonging to other than direct connections, to include the following deliveries only: (1) loaded, consigned to a destination on the home road; (2) loaded, consigned to a destination on a direct connection of the home road; (3) loaded, consigned to destination on road from which originally received, if such movement is in direction of home; or (4) empty, to road and at junction point from which originally received; (c) (1) loaded cars might be delivered to switching roads to be unloaded within switching district;; (2) an empty foreign car might be delivered to a connecting road to be loaded within designated switching limits and returned; (d) the foregoing rules not to apply to cars reconsigned with original lading under duly filed and published tariffs until the original lading had been removed therefrom; (e) any delivery of a foreign open-top coal or coke or foreign railroad owned or controlled refrigerator, heater ventilated, or insulated car, except as provided above, held to be a diversion;; (4) that the practice of carriers in failing to observe the existing car service rules with regard to the return of such cars, to the extent that such rules were not modified by the rules prescribed above, held in violation of section 1 of the act. Car Supply Investigation, 42 I C. C. 657.

(b) A shipper has no inherent right to retain a car beyond the free time and thus prevent it from being used for transportation by other shippers. Car shortages have resulted in incalculable

loss in the past both to the carriers and the shipping public as a whole, and when it appears that shippers detain cars for purposes other than those necessary for proper transportation, the carriers are justified in taking steps to prevent such abuses. American Wholesale Lumber Asso. v. Director General, as Agent, 66 I. C. C. 393, 407.

Export Freight Free Time, 47 I. C. C. 162, 179; Trade Asso. v. Director General, 58 I. C. C. 15, 22; Reconsignments and Diversion Rules 58 I. C. C. 568, 580; Transportation Facilities in Northwest Pacific States, 87 I. C. C. 472.

§7⅜. Deposit on Cars.

IMPORTANT CASES SINCE 1908

(a) And proposed schedules which would require shippers to deposit $10 for each live-poultry car ordered, such deposit to be refunded only if loading of the car be commenced within 48 hours following its placement, found not justified in part and ordered cancelled without prejudice to the filing of new schedules modified in accordance with suggestions in the report. Deposit for Live-Poultry Car Ordered, 66 I. C. C. 653.

(b) Approximately 8 per cent of live-poultry cars were not loaded at point at which originally placed. Contention that only those at fault should be penalized and those not responsible for the abuse should not be inconvenienced by a proposed rule which would require a deposit for each car ordered, refund to be made only if loading be commenced within 48 hours after placement. HELD: Percentage sufficiently high to justify some action on the part of respondents to correct the evil. Deposit for Live-Poultry Car Ordered, 66 I. C. C. 653, 654, 655.
654 655.

§7½. Inspection.

See Inspection.

ALL CITATIONS

Southwestern Missouri Millers' Club v. St. L. & S. F. R. R. Co., 26 I. C. C. 245, 250.

§7½a. Restriction of Equipment.

IMPORTANT CASES SINCE 1908

(a) Carriers can not by operating instructions restrict their equipment to their own rails when it results in additional expense to shippers when they publish rates to points on the rails of other carriers and do not publish the equipment restriction in a tariff. Hixon Lumber Co. v. C., B. & Q. R. R., 80 I. C. C. 295, 297.

(b) By operating directions carrier prohibited diversion of cars to points off its line. Carrier at reconsignment point transferred lading to car of foreign line, assessing switching, demurrage, penalty, and transfer charges for this service. HELD: Carriers can not by operating instructions restrict equipment to their own rails when it results in additional expense to shippers when they publish rates to points on rails of other carriers and do not publish equipment restriction in tariff. Charges assessed at reconsignment point found unreasonable and unlawful and reparation awarded. Hixon Lumber Co. v. C., B. & Q. R. R. Co., 80 I. C. C. 295.

§7⅝. Rates on Empty Cars.

See Empty Cars.

IMPORTANT CASES SINCE 1908

(a) Complainant attacked the charges collected by the defendants on various empty tank cars moving on their own wheels, shipped from Milton, Pa., and North St. Louis Mo., to Chanute, Kan., and Cushing, Okla., between August 9, 1912, and February 8, 1915, as unreasonable and discriminating and asked reparation and the establishment of reasonable rates and regulations. The cars in question were new cars purchased by complainant from manufacturers at Milton and Sharon Pa. Those constructed at Milton were purchased f. o. b. that point; those constructed at Sharon f. o. b. North St. Louis. The cars from Milton, 121 in number, were shipped to Chanute and moved over either the Pa. Lines or Pa. & R. Ry. in connection with other defendants to East Galesburg, Ill., and beyond over either the A., T. & S. F. Ry., or in connection with certain other defendants. The cars purchased f. o. b. North St. Louis moved from that point to Chanute and Cushing via the M., K. & T. Ry., Sec. 1 of Rule 29, of the Official Classification, which governed, provided that in providing rating for articles in tank cars the carriers do not assume any obligation to furnish tank cars, and "when tank cars are furnished by shippers or owners, mileage at the rate of ¾ of 1 cent per mile will be allowed for the use of such tank cars, loaded or empty, provided the cars are properly equipped. No mileage will be allowed on cars switched at terminals nor for move-

ment of cars under empty freight car tariffs." Sec. 2 provided: "Private tank cars will be moved empty, without charge, at the time movement is made between stations or junction points on the line of carriers whose tariffs are governed by this classification (either individually or jointly) including delivery to connecting lines subject to the following conditions: (a) should the aggregate empty mileage of any owner's cars on June 30 of each year, at the close of any such yearly period as may be mutually agreed upon, exceed the aggregate loaded mileage on the lines of such carriers individually (or jointly when mileage accounts are computed jointly) such excess must be paid for by the owner, either by an equivalent loaded mileage during the succeeding six months, or at tariff rates, without minimum, plus the mileage that has been paid by the carriers to the owners on such excess empty mileage. Any excess of loaded mileage over empty mileage of any owner's cars at the end of the accounting period will be continued as a credit against the empty movements of such cars for the ensuing twelve months (b) New cars or newly acquired cars, moved empty to home or loading point by order of the owner, must be billed at regular tariff rates." Practically the same provisions were carried in the western classification. At the time of movement the official classification provided a charge of 4 cents per car per mile, min. 100 miles, on new or newly acquired cars moving empty on own wheels to home or loading point. This charge was subsequently increased to 4.2 cents per car mile following The Five Per Cent Case, 32 I. C. C. 325. The western classification provided a charge of 10 cents per car mile, min. $5 per car applicable on such cars. Charges were assessed on all of the cars from Milton to Chanute except on 15 which moved in July, 1913, in the sum of $63.62 per car, based on the following combination rates: 4 cents per car per mile to East Galesburg; a commodity rate of $17.50 per car from East Galesburg to Kansas City, Mo., and 10 cents per car per mile beyond. On the 15 excepted cars the charges were $64.16 per car, a discrepancy not explained. Charges were assessed on each of the cars from North St. Louis to Cushing and Chanute in the sums of $45.50 and $30.20 respectively, based on a commodity rate of $17.50 from East St. Louis to Kansas City and 10 cents per car mile beyond. Complainant contended that paragraph (b) of rule 29 was unreasonable and discriminatory, insisting that new empty tank cars or newly acquired tank cars should be transported without any charge and the distance they traveled before being put into actual service charged to the owner's empty mileage account the same as cars in service; complainant also contended that the charges collected on the cars in question were unreasonable to the extent that the components west of the Mississippi River exceeded 4 cents per car per mile. The short line distance between the Mississippi and Missouri Rivers by way of the Wabash R. R. from Hannibal, Mo., to Kansas City, is 198 miles. The $17.50 rate for that distance yielded a per car mile revenue of $8.83 cents. The distance over the A., T. & S. F. from East Galesburg to Kansas City is 280 miles, for which distance the $17.50 rate yielded 6.2 cents per car mile. The distance from St. Louis to Kansas City by way of the M., K. & T. Ry. is 374 miles The 10-cent rate charged beyond Kansas City applied generally throughout western classification territory except where competitive conditions had forced a lower rate. HELD: (1) that movements of new or newly acquired empty tank cars before they are put into actual service have always been treated like any other freight, the theory of paying allowance for empty movement presupposing a loaded movement, and the meager facts of record did not warrant a condemnation of a rule of such universal application, and accordingly that the rule was not shown to have been unreasonable or discriminatory; (2) that the charges in question were not shown to have been unreasonable or discriminatory, though the rules and rates governing transportation of cars on their own wheels in the three classification territories were in need of revision. Complainant dismissed. Chanute Refining Co. v. A., T. & S. F. Ry., 52 I. C. C. 593.

(b) Complainant attacked as unreasonable rates charged on empty flat cars on their own wheels from East St. Louis, Ill., to Elaine, Ark. Cars were delivered to the Southern Ry. at East St. Louis, and were switched by that line and the T. R. A. of St. L. to the M. P. at Dupo, Ill., taken by that line through Thebes to destination. Rate charged 10c per car per mile for distance of 370 miles. There was in effect a commodity rate of $12 per

car from East St. Louis to Memphis applicable over these lines, which, plus 10c per car mile rate beyond is complainant's contention should apply. Southwestern lines tariff East St. Louis to Elaine was subject to western classification which named the rate of 10c per car mile, but referred to no publication from which to ascertain the distance from which the through charge was to be computed. Charge collected was unreasonable to extent it exceeded the combination on Memphis under Rule 5-B of Tariff Circular 18-A. HELD: Rate attacked unreasonable to extent it exceeded Memphis combination. Reparation with interest awarded. Zelnicker Supply Co. v. S. R., 53 I. C. C. 308.

§7¾. Safety Appliance Equipment.

See Safety Appliance Act.

IMPORTANT CASES SINCE 1908

(a) Certain carriers applied for a further extension of time over that granted by paragraphs (b), (c), (e), and (f) of the order of the Commission of March 13, 1911, within which to make their freight cars conform to the standards of equipment prescribed by the Commission, pursuant to section 3 of the act to supplement the safety appliance acts of April 14, 1910. It appeared that about 82 per cent of the cars in service July 1, 1911, on roads having a total mileage of about 232,000 miles would be either equipped or removed from service by July 1, 1916. Financial difficulties incident to the European war would render further compliance difficult. HELD: That a further extension of 12 months from July 1, 1916, would be adequate, to be uniform to all carriers subject to the act of April 14, 1910. Extension of Time to Comply with Safety Appliance Acts, 36 I. C. C. 370.

ALL OTHER CITATIONS

Extension of Time to Comply With Safety Appliance Acts, 36 I. C. C. 374.

§8. Size and Kind Ordered by Shipper.

See Classification §21; Follow Lot Shipments; Minimums §3, §4, §8.

CASES 1887-1908

(a) It is not reasonable that carriers unable to supply shippers with sufficient cars of large or average capacity should make such minimum loading requirements as can not be practically complied with as to the smaller cars in order that they may obtain as much earnings therein as from those in the larger and superior cars. Wiemer & Rich v. C. N. W. Ry., 12 I. C. C. 462.

(b) Small car offered, surplus should be carried at same rate. Pacific Purchasing Co. v. C. & N. W. Ry. Co., 12 I. C. C. 549.

(ba) Where carrier unable to furnish car of tariff minimum capacity and furnishes two cars instead, the published minimum must be protected. Pacific Purchasing Co. v. C. & N. W. Ry. Co., 12 I. C. C. 549.

IMPORTANT CASES SINCE 1908

(c) In warm weather a perishable commodity like ice requires good cars for its transportation, and it is the carriers' duty to furnish such cars upon reasonable request. Eagle Ice Co. v. C., M. & St. P. Ry. Co., 37 I. C. C. 250, 258.

(d) A carrier may not impose additional transportation charges on a shipper who orders a car of a capacity, length, or dimension specified in the carrier's tariff simply because the carrier is not provided with cars of the dimensions ordered. Lippard-Stewart Motor Car Co. v. M. C. R. R., 38 I. C. C. 112, 113.

(e) The refusal of carriers to provide cars specially equipped with hooks and racks for the transportation of chilled and frozen meats not found unreasonable or unduly prejudicial. Frankfeld & Co. v. N. Y. C. R. R. Co., 40 I. C. C. 555.

(f) Complainant attacked the carrier's refusal to furnish open-top cars to "wagon mines" for loading with coal on its public team tracks, while continuing to furnish that class of equipment to both tipple mines and wagon mines where the loading was done on private or industrial tracks, as discriminatory. In compelling the use of box cars for team-tracks loading the result sought was to make available a larger supply of open-top cars for loading at the tipple mines, thus aiding in the production and movement of coal. The cost of loading box cars averaged $10 a car in excess of that of loading open-top cars; but the government had permitted wagon-mine operators to increase by 75c per ton, or $26.25 per car of 35 tons, the mine prices formally fixed. By express terms this increase in price had been restricted to wagon-mine operators, who shipped in "box cars." HELD: That although in its nature a discrimination between shippers

as a class, the practice attacked nevertheless operated in the interest of the public as a whole, and hence was not an unjust discrimination nor unduly prejudicial within the meaning of Section 3. Complaint dismissed. Swaney v. B. & O. R. R., 49 I. C. C. 345.

(g) Where tariffs are maintained for the use of double-deck cars for the transportation of hogs, calves, sheep, lambs, and goats from primary markets, tariffs should provide that when a double-deck car is ordered, and, for the convenience of carriers, two single-deck cars are furnished, the charges therefor should be at the rate and minimum weight for the double-deck car ordered, provided two days, exclusive of day of notice, are allowed the carriers within which to furnish the car ordered. Cleveland Provision Co. v. A. A. R. R., 50 I. C. C. 293.

(h) The establishment of a two-for-one rule where carriers have provided double-deck rates and minima different from single-deck rates and minima, has become almost universal in cases where carriers' tariffs provide varying minima according to the size of the car. Cleveland Provision Co. v. A. A. R. R., 50 I. C. C. 293, 296.

(i) In several cases the Commission has required the establishment of a two for one rule where carriers have provided double-deck rates and minima different from single-deck rates and minima, and in a number of cases have required the establishment of a two for one rule with respect to ordinary equipment. Such a rule has become almost universal in cases where carriers' tariffs provide varying minima according to the size of the car. The Commission's decisions in those cases were upon the ground that the carriers having provided rates dependent upon certain equipment used, held themselves out to furnish such equipment, thus conferring upon the shipper a legal right to demand that equipment and to have the charges assessed accordingly. A carrier is entitled to a reasonable time to furnish equipment, but if before such time expires or thereafter it furnishes equipment different from that requested, then such equipment is furnished for its own convenience and the shipper should be saved harmless. Cleveland Provision Co. v. A. A. R. R., 50 I. C. C. 293, 296.

(j) A carrier is entitled to a reasonable time to furnish equipment, but if before such time expires or thereafter it furnishes equipment different from that requested, then such equipment is furnished for its own convenience, and the shipper should be saved harmless. Cleveland Provision Co. v. A. A. R. R., 50 I. C. C. 293, 296, 297.

(k) Under a contract specifying termination by either party on 60 days' notice, express companies supplied baggage cars which complainants equipped for transporting live fish. The express companies requested the return of the cars, whereupon the agreement terminated. Prayer that defendants brought suit requesting that the express companies cease and desist from taking the cars and be required to continue to furnish them. The Commission held the issue was not within its jurisdiction. Lay v. American Exp. Co., 51 I. C. C. 373.

(l) Upon request for double deck cars at country stations cars must ordinarily be brought from the points where they are stored, usually division points at which primary markets are located and it is true that by direct train service cars could be moved from such sources in a comparatively short time, but additional time is consumed in locating empty cars which can be used, and at times cars are brought from comparatively distant points. F. H. Coulter v. Hines, 55 I. C. C. 165, 168.

(m) Rule 66 of Tariff Circular 18—A states that carriers tariffs should contain a two for one rule, and provides that in case of controversy between shippers and carriers caused by the absence of such a rule from tariffs which provide graduated minima for cars of different sizes, the Commission will regard such tariffs as prima facie unreasonable. F. S. Harmon & Co. v. P. C. C. & St. L. R. R., 69 I. C. C. 348, 349.

(n) The practice of securing revenue through a minimum higher than the capacity of cars furnished should be condemned, but where abnormally low per car charges resulted from emergency rates established as a temporary relief measure, a shipper has no well-founded claim because he could not load to the prescribed minimum. Devereux Co. v. Director General, as Agent, 73 I. C. C. 289, 290, 291.

(o) There is a distinction between the obligation of the carriers to furnish a suitable car and of the shipper to furnish special protection. The carrier is obli-

gated to furnish proper standard equipment for the safe transportation of goods which it holds itself out to carry, and when necessary cars must be provided which will protect the goods from the elements. It is the corresponding duty of the shipper properly to prepare his goods for shipment, and if special protection be needed, this also he must furnish. When a suitable car is furnished, it is proper that the shipper secure his shipment within it, by staking or otherwise, and so protect it from damage to itself. But when for their own convenience the carriers furnish stock cars for the transportation of watermelons, they should be so equipped by the carrier as to be suitable for that service. Slatting cars for watermelons, 78 I. C. C. 732, 735.

(p) A tariff which does not contain a rule where two small cars are furnished in lieu of one large car ordered, the minimum of the large car will apply for the entire shipment, is prima facie unreasonable. Welsbach Co. v. A. C. R. R. Co. Unrep. Op. 2098.

(q) Two cars are furnished by the carrier, for its convenience, in lieu of larger car ordered, and charges were assessed on the second car at the minimum for that car. Tariff rule provided that where two cars are furnished by carrier for its convenience, the remainder of the shipment loaded into the second car should be charged at actual or estimated weight and carload rate. HELD, charges assessed upon car containing remainder of shipment found illegal to extent they exceeded charges based upon actual weight of contents at c. l. rate. Reparation awarded. Stone-Fisher Co. v. Director General, as Agent, 77 I. C. C. 369.

(r) Two cars were furnished by carrier for its convenience in lieu of larger car ordered. Shipment moved under bill of lading for each car, second bill bearing notation in reference to first: "Part car lot UP 121567—weight and charges ahead." Contention that since "two-for-one" rule in tariff required as condition precedent that but one bill of lading be issued, it was not applicable to this shipment, HELD, since second bill of lading referred to first for weight and charges, this was a substantial compliance with requirement. Stone-Fisher Co. v. Director General, as Agent, 77 I. C. C. 370, 371.

(s) Carrier for its own convenience furnished one larger car in lieu of two smaller ones ordered by shipper, and charges assessed were on the basis of combined full minima of cars ordered. HELD, charges assessed found unreasonable to extent they exceeded those that would have accrued on basis of minima of ordered cars loaded to full visible capacity. Reparation awarded. Noll Lumber Co. v. U. P. R. R. Co., 80 I. C. C. 105.

§8½. Fish Cars.

IMPORTANT CASES SINCE 1908

(a) Under contract specifying termination by either party on 60 days' notice, express companies supplied baggage cars which complainants equipped for transporting live fish. Express companies requested to return cars whereupon agreement terminated. Prayer that defendants cease and desist from taking cars and to continue to furnish. HELD, issue not within Commission's jurisdiction. Lay v. Amer. Exp. Co., 51 I. C. C. 373.

§9. Form and Time of Order.

See Infra §36; Evidence §36.

CASES 1887-1908

(a) In absence of custom, carrier need not notify shipper that it can not obtain cars for his freight; it is the duty of the shipper to obtain this information for himself. Riddle v. Baltimore & O. R. Co., 1 I. C. R. 701, 778.

(b) A statement of the evidence, from which it appears that it was the duty of the Yough Slope Mine, its owners and agents, to have inquired of the station agent of the railroad company near by the mine on the 30th day of August, 1887, and on the next day, by which they

would have learned that the mine could have obtained cars for the shipment of coal to Arthur & Boylan at Cleveland, Ohio, and they having failed to do this, in consequence of which the Youghiogheny and Ashtabula Mines received nearly all these cars for this purpose, without any partiality or preference on the part of the railroad company. HELD, upon these facts that a complaint of unjust discrimination against the Yough Slope Mine, and in favor of the Youghiogheny and Ashtabula Mines can not be sustained. Riddle, Dean & Co. v. Baltimore & Ohio R. R. Co., 1 I. C. R. 778.

(c) In the absence of some custom and rule of business placing such duty upon the carrier to notify the shipper, without inquiry on the part of the latter, of the fact that he can there obtain cars for the movement of his freight, it is the duty of the shipper, by reasonable inquiry made to the proper agent of the railroad company, to obtain this information for himself; but in a case like the present, if the carrier took upon itself the duty of actually notifying the Youghiogheny and Ashtabula Mines on the 30th of August, 1887, without waiting for any inquiry on their part, that they could get cars, then, in like manner, it was its duty to have notified the Yough Slope Mine at the same time that it could get cars. HELD, that, tested by these rules, no case of preference or unjust discrimination is made out by the evidence in favor of the Youghiogheny and Ashtabula Mines, and against the Yough Slope Mine. Riddle, Dean & Co. v. Baltimore & Ohio R. R. Co., 1 I. C. R. 778.

(d) A shipper is not bound by his order for a specified number of cars on a specified day, in the absence of an acceptance of the order so as to bind both parties. Missouri P. R. Co. v. Texas & P. R. Co. (C. C. E. D. La.), 4 I. C. R. 434.

IMPORTANT CASES SINCE 1908

(e) The effect of rules 35 and 80 in the proposed perishable freight tariff, requiring shippers to give advance notice of the type of equipment wanted for loading, is to require the shipper not only to give the carrier reasonable advance notice in writing that a car is wanted but also to specify at the same time the type of car and the kind of protective service, if any, that are desired. The Commission has frequently ruled that a carrier is entitled to such notice of a demand for a car. It is also reasonable that the carrier should know the kind of service that will be required. Perishable Freight Investigation, 56 I. C. C. 449, 554.

(f) At the time of the adoption of Circular CS-31, governing method for ordering cars for mines, no consideration was given to the length of time the rules were to be made operative, although the fact that the roads were being operated as a unit under federal control was a prime reason for the adoption. Fairmont & Cleveland Coal Co. v. B. & O. R. R. Co., 62 I. C. C. 269, 274.

ALL OTHER CITATIONS

Pope Manufacturing Co. v. B. &. O. R. R. Co., 17 I. C. C. 400, 403; Kaye & Carter Lumber Co. v. M. St. P. & S. Ste. M. Ry. Co., Unrep. Op. 159; Lamson Bros & Co. v. L. S. & M. S. Ry. Co., Unrep. Op. A-882; Ft. Worth & D. C. Ry. Co. v. Strickland, (Tex. 1918), 208 S. W. 410; N. W. Trading Co. v. Adams Exp. Co., 51 I. C. C. 211, 213; Perishable Freight Investigation, 56 I. C. C. 449, 557; Armour Grain Co. v. Director General, 57 I. C. C. 398, 403; Missouri Pac. R. Co. v. Henderson (Ark. 1923), 247 S. W. 1070.

§9¼. Gondola Cars.

IMPORTANT CASES SINCE 1908

(a) Complainant attacked the rate of $1.40 per ton on coal from Manitowoc, Wis., to St. Paul, Minn., assessed on two cars of coal, originating in West Va. The shipments were loaded in gondola cars. the sides of which exceeded 52 inches in height. The rate applied under the tariff on soft coal when loaded in cars exceeding 52 inches in height. It was alleged this rate was excessive to the extent it exceeded the rate of $1.15 applying on coal loaded in cars not exceeding 52 inches in height. (Since the filing of the complaint the two rates were increased to $1.25 and $1.50 respectively.) Gondola cars exceedingly 52 inches in height are hopper bottom cars of the battleship type. These cars are undesirable to defendant, since they are not adapted to the loading of commodities other than coal and it is impossible to find return loading for them. Defendant must pay per diem charges on them and bear the expense of returning them to connections. Gondola cars of other types may be used for other loading. The rate of $1.15 was established to meet com-

petition via Duluth, from which there is a rate of 90c to St. Paul, applicable to across lake traffic; that the $1.15 rate was restricted because it was so low as to be unprofitable if extended to shipments loaded in cars that could not be returned loaded. It was further stated that the difference of 25c in the rate was intended to be an embargo. HELD, that defendant's practice affecting the receipt and charge for the transportation of coal when loaded in gondola cars exceeding 52 inches in height constitute an unlawful and unreasonable regulation and restriction upon such traffic and the shippers thereof. Reparation awarded. C. G. Blake Co. v. M. St. P. S. S. M. Ry. Co., 32 I. C. C. 270.

ALL OTHER CITATIONS

Silica Sand Producers Asso. v. Director General, as Agent, 58 I. C. C. 549, 552.

§9½. Heater Cars.

See Heater Cars; Protective Service.

IMPORTANT CASES SINCE 1908

(a) Protection of potatoes and produce from frost can only be secured by use of heater cars or lined cars, and prompt unloading is necessary if demand is to be supplied. Providence Fruit & Produce Exchange v. M. C. R. R. Co., 36 I. C. C. 307, 310.

(b) But to obtain heater car service, the shipper should have tonnage sufficient to justify it. Longo Fruit Co. v. I. T. System, 38 I. C. C. 487, 489.

(c) Charges for heated car service, of 4c per 100 pounds, minimum of $12.00 per car, on interstate shipments, and 5c per 100 pounds, minimum of $15.00 per car, on interstate shipments with an additional charge of 1 cent per 100 pounds, or minimum of $3.00 per car for each additional state traveled, in connection with shipments of cheese from points in Wisconsin to various destinations not found unreasonable. Cheese Dealers Asso. Co. v. A. T. & S. F. Ry. Co., 40 I. C. C. 1.

(d) It does not appear that cheese is transported during the winter season under circumstances unlike those surrounding transportation of potatoes to warrant a charge for heated car service in one case and not in the other, when such service is requested by shipper. Charges not found unreasonable. Cheese Dealers Asso. v. A. T. & S. F. Ry. Co., 40 I. C. C. 1, 2, 3.

(e) A rental charge of $5 per car per trip for use of refrigerator or insulated car, when ordered by shippers, in transportation of fresh deciduous fruits from the northwest during months when heated car service is necessary held not unlawful or unjustly discriminatory. North Pacific Fruit Distributors v. N. P. Ry. Co., 40 I. C. C. 191.

(f) Competition, train loading, accessibility to large markets and other factors which are determinative of the reasonableness of rates for transportation of an article are not very pertinent in respect of whether heater car charges are reasonable, as to which the cost of the service plus a reasonable profit is the most important factor. Northern Potato Traffic Asso. v. C. & A. R. R., 44 I. C. C. 426, 435.

(g) While retaining for the carrier the present extra charge for heating service, on traffic moving from domestic points to interior Canadian points, tariff amendment proposes to relieve the carriers from all liability for loss or damage, although the extra charge is intended to compensate it for the element of risk involved. HELD, such a rule regarded as hostile to the Cummins amendment. Heated Car Service Regulations, 50 I. C. C. 620, 624.

(h) Portable heaters may be installed in any insulated car, and this is the usual practice in furnishing protection against cold; but in New England and to some extent in the northwest specially designed heater cars are employed. In refrigerator cars the heaters are usually placed in empty ice bunkers. Perishable Freight Investigation, 56 I. C. C. 449, 454.

(i) So little is involved on the part of the carrier in the provision of Shipper's Protective Service that it should be furnished wherever it may be desired. Perishable Freight Investigation, 56 I. C. C. 449, 474.

(j) Cost of fuel per trip, in heated-car service, not sufficient to affect the total cost of the service in an appreciable degree. Perishable Freight Investigation, 56 I. C. C. 449, 535.

(k) Interest on heater investment is an element of cost which ought to be included in the cost of, and estimate herein given found approximately accurate. Per-

ishable Freight Investigation, 56 I. C. C. 449, 538.

(l) Inherent qualities of the commodities should be taken into consideration in determining the charges for heater car service. Perishable Freight Investigation, 56 I. C. C. 449, 540.

(m) Rule 75, providing for substitution of artificial heat for refrigeration, or vice versa, on shipments while in transit, should be revised to permit a change from service under reasonable restrictions. Charge in connection with such changes should not exceed $7.50 per car. Perishable Freight Investigation, 56 I. C. C. 449, 562, 563.

(n) In a typical case a carrier proposed to establish for heater car service charges on less than carload traffic on its line and that of its line and that of the Mineral Range R. R. Prior to 1915 no additional charge was made by respondent for these protective services on less than carload traffic. Early in that year tariffs were published naming charges, ranging from 4 to 10 cents per 100 pounds, for less than carload refrigeration service. These charges remained in effect until Feb. 28, 1920, when they were canceled, but were re-established April 21, 1920. Protestants sole objection is to the proposed extension to the heater car service of the charge made for refrigeration service. The main factors of cost are heater or stove costs and depreciation, cost of fuel, labor hazard. The total actual average cost of the heater car service was estimated by respondent at about $2.03 per car. The cost of refrigeration was shown to be much more, the ice alone costing in excess of $18 per car, the total estimated cost per car being about $23.10. If the proposed charges for this service are approved, jobbers at Duluth will be at a disadvantage to the extent of the charge made for the heater service in competing with jobbers located at nearby distributing points on the lines of other carriers which publish no heater charges on this traffic. The present record affords no proper basis for a determination as to what the charges should be, even assuming that the line haul rates are not high enough to include the service. HELD the proposed charges have not been justified, and an order will be entered requiring the cancellation of the suspended tariff. Less carload refrigeration car protective service, 58 I. C. C. 731.

Ry., 34 I. C. C. 154, 157; Boston Potato Receivers' Assn. v. B. & A. R. R., 42 I. C. C. 454; New York & New Jersey Produce Co. v. N. Y. N. H. & H. R. R., 51 I. C. C. 399, 400; Perishable Freight Investigation, 56 I. C. C. 449, 454, 458, 536, 562; Carnation Milk products Co. v. A. T. & S. F. Ry. Co., 63 I. C. C. 60; American Fruit & Vegetable Asso. v. B. & A. R. R. Co., 68 I. C. C. 446.

§9⅝. Insulated or Refrigerator Cars.

See Infra §9⅞ (3); Insulated Cars; Refrigeration.

CASES 1887-1908

(a) A railroad company may provide refrigerator cars by purchase or by lease; and if the latter plan is adopted, it may make contracts with one company which exclude the use of cars owned by other companies. Re Transportation of Fruit, 10 I. C. C. 360.

(b) The respondent railroad companies may provide refrigerator cars by purchase or by lease, and if the latter plan is adopted they may make contracts with one company which exclude the use of cars owned by other companies. In the matter of charges for the transportation and refrigeration of fruit shipped from points on the P. M., and M. C., 10 I. C. C. 360, 373.

(c) It is the duty of the respondent railroad companies engaged as common carriers in transporting fruits from Michigan to furnish refrigeration cars for such service, but such duty arises out of their common law liability, not under the Act, and redress for failure to fulfill it must be sought in the courts. In the matter of charges for the transportation and refrigeration of fruit shipped from points on the P. M., and M. C., 10 I. C. C. 360, 373.

(d) Respondent railroad companies entered into contracts with the respondent, Armour Car Lines, to furnish them with refrigerator cars for use in the transportation of fruit from points in Michigan and to refrigerate the cars when used for such transportation. Under the contracts the use of other cars in that business is prohibited and the

service of refrigeration is performed exclusively by the Car Lines Company. The railroad companies formerly furnished refrigeration without any charge in addition to the freight rate, and they subsequently made a charge for refrigeration substantially equal to the cost of the icing. Acting under the contracts the Car Lines Company exacts charges for the refrigeration service which greatly exceeds those formerly made to cover the cost of icing by the railroad companies and range from 50 to 130 per cent above those made prior to the contracts by the Car Lines Company itself. The total cost of transportation to the shipper has been thereby largely increased. HELD, that the railroad companies, by making these exclusive contracts, in effect impose upon shippers exorbitant charges for the transportation of Michigan fruits to markets in other states in violation of section 1. Further action withheld to allow readjustment of charges by the respondent companies. In the matter of charges for the transportation and refrigeration of fruit shipped from points on the P. M. and M. C., 10 I. C. C. 360.

(e) During the performance of the transportation of a refrigerator car, it is to every practical intent the car of the railroad company using it, and its measure of responsibility as to the sufficiency of the car is the same, whether it obtains the car by purchase or lease. Matter of charges for transportation of fruit, 11 I. C. C. 129, 137.

(f) Railroad companies are required at common law to furnish suitable facilities for the conduct of the business in which they engage, and it follows that respondents, holding themselves out as carriers of perishable fruit, must provide the necessary refrigerator cars for the transportation of that traffic. Matter of charges for transportation of fruit, 11 I. C. C. 129, 136.

IMPORTANT CASES SINCE 1908

(g) When insulated cars are necessary for the carriage of perishable freight, compensation may be secured in one or two ways—either through the line haul rate, or by levying a separate charge. In the opinion of the Commission, the first method is desirable, for simplicity and convenience and because it accords with present practice, where special equipment is ordinarily required for safe transportation throughout the year or a greater portion of the year; but, a separate charge is preferable when the reverse is the case, both to avoid unlawful discrimination and also to discourage the use of the more costly cars when they are not reasonably necessary. Perishable Freight Investigation, 56 I. C. C. 449, 487.

(h) Insulated cars, where required for safe transportation, compensation should be secured through the line-haul rates. Where this is not the case, a special charge is preferable but should be fairly proportioned to the extent and cost of the service furnished. Perishable Freight Investigation, 56 I. C. C. 449, 486, 487, 614.

(i) Where insulated cars are ordinarily required for same transportation throughout the year, or the greater part of the year, compensation should be secured through the line haul rates. Where this is not the case a separate charge is preferable, but such a charge should be fairly apportioned to the extent and cost of the service. Perishable Freight Investigation, 56 I. C. C. 449, 614.

(j) On an amended record, and upon a finding that a refrigerator or other insulated car is the only proper and suitable car in which to transport potatoes during the entire year, it is HELD that the use of such equipment must be included in the line haul charge and a separate charge therefor is not authorized. J. C. Famechon Co. Hines, 187 N. W. 974.

ALL OTHER CITATIONS

Hale Halsell Grocery Co. v. M. K. & T. Ry., 42 I. C. C. 491; Graustein v. M. R. R., 45 I. C. C. 393, 403; The Car Peddling Case, 45 I. C. C. 494, 500; Perishable Freight Investigation, 56 I. C. C. 449, 488, 532, 540, 557; J. C. Famechon Co. v. Hines, 187 N. W. 974.

§9¾. Peddler Cars.

See Peddler Cars.

CASES 1887-1908

(a) Upon 17 carloads of bananas defendant allowed complainants to ship between May 1, 1902, and April 25, 1903, from Charleston to Lynchburg and unload half of the carloads at Danville, paying the Lynchburg rate plus the local rate on the half carloads carried from Lynchburg to Danville. This was in disregard of defendant's regulations and resulted in charges below those applicable

under defendant's published tariff. Complainants seek reparation upon the basis of the Lynchburg rate and defendant upon the basis of its tariff rate, but neither is entitled to recover. Gardner & Clark v. Southern R. Co., 10 I. C. C. 342.

(b) To permit one person to use the cars of a railroad company for a storehouse and to deny that privilege to another creates a discrimination between shippers which is often serious. Kehoe & Co. v. C. & W. C. R. Co., 11 I. C. C. 166, 170.

IMPORTANT CASES SINCE 1908

(c) The rule providing for the free return of accessories used for meats and perishable freight in peddler cars should be in consonance with the Cummins amendment. Western Trunk Line Rules, 34 I. C. C. 554, 568.

(d) No weight can be given to the comparisons of peddler cars with carload freight, where no evidence is introduced showing that the circumstances and conditions surrounding the two classes of traffic are substantially the same. Rates and Rules on Shipments of Packing-House Products, 36 I. C. C. 62, 67.

(e) The circumstances and conditions surrounding the shipment of packing-house products and fresh meats in peddler cars, and of other freight in ordinary merchandise cars, are so radically different, and the rules, regulations and requirements applicable thereto so dissimilar, that no decisive weight can be given to a contention that maintenance of a mileage scale is an unjust discrimination against shippers who use the latter service. Rates and Rules on Shipments of Packing-House Products, 36 I. C. C. 62, 69.

(f) Peddler cars are cleaned, precooled, and loaded by the shipper, move on stated days, and contain large quantities assembled in one car for delivery along the same route, the load decreasing as the haul progresses. Peddler Car Minimum, 43 I. C. C. 139, 140.

(g) The Commission considered the action of certain carriers in the middle west discontinuing the practice of permitting shippers or consignees to peddle or retail fruits, vegetables, or other commodities from cars in railroad yards. The practice had been indulged in by (1) Granges and similar associations of farmers, conducting their business without profit; (2) local merchants, jobbers, and wholesalers; and (3) itinerant merchants. Complainants contended that a shipper, after loading a freight car and shipping it to a desired destination, had a right to retail the contents to the public from the car while in the railroad yards or on a carrier's sidetrack; on the theory, that, as the carrier is paid under the rate for the first 48 hours and by demurrage for the further detention of the car, the shipper may use it as a place for conducting business transactions with the public for his own profit. Detention of cars for this purpose varied from 5 to 7 days, except that the former organizations were generally able to unload within the free time. The carriers objected that the vending of perishable commodities from cars delayed equipment, constituted "attractive nuisances" for children, drew to the carriers' premises persons who came on no business connected with transportation, congested terminals, increased the hazard of railroad operation, and monopolized side tracks to the exclusion of consignors and consignees. HELD (1) that no grounds had been shown for requiring the carriers to continue to permit the continuance of the practice involved; (2) that the carriers' tariffs were not a proper place for rules prohibiting the practice in future; (3) that the privilege, if accorded, was lawful only when affirmatively provided for in tariffs; (4) that continuance or discontinuance of the practice was a matter resting within the control of the carriers themselves, and not within the control of the Commission except to the extent that it might be accorded to some shippers and denied to others under conditions involving discrimination; and (5) that the according of the privilege to farmers associations while denying it in other cases mentioned did not, under the circumstances, appear to be unlawful or discriminatory. Complaint dismissed. The Car Peddling Case, 45 I. C. C. 494.

(h) The suggestion that the acquiescence in the practice of selling from the car throughout a substantial period of years, by the carriers in this limited section of the country, gives it the status of a transportation practice and confers upon the Commission the power, under section 15, to require its continuance on the theory that the withdrawal now of the privilege would be unreasonable, has no basis in reason or in authority. The Car Peddling Case, 45 I. C. C. 494, 500.

(i) The view that the use by shipper of a car on the carrier's tracks at destination as a place for peddling or vending to the public the carload shipment arriving therein, is a service of transportation has no sanction at common law or in the Act to regulate commerce; and the mere toleration by certain carriers through a period of years of such a use of their property affords no basis for a ruling that the practice has grown into a shipper's right and a carrier's duty. The Car Peddling Case, 45 I. C. C. 494, 500.

(j) Tariffs are not the proper place for rules prohibiting the practice of car peddling; on the other hand the privilege, if accorded to shippers, seems to be lawful only when provided for in the tariffs. The Car Peddling Case, 45 I. C. 494, 502.

(k) Benefits derived from car peddling are more or less incidental and local and can have but little weight when compared with the important economic necessity of keeping the car equipment of the carriers as active and free as possible. The Car Peddling Case, 45 I. C. C. 494, 503.

(l) The use of peddler cars in the distribution of fresh meats and packing-house products in less than carloads has become a well-settled practice in various sections of the United States. Swift & Co. v. P. C. C. & St. L. Ry., 48 I. C. C. 525, 526.

(m) Charges on l. c. l. shipments of packing-house products, fresh meats, and other commodities, in peddler cars, from Chicago, Ill., to points in Illinois and Indiana, found unreasonable to extent they exceeded a subsequently established minimum revenue for each peddler car, equivalent to the charges on 20,000 lbs. at the carload dressed beef rate from point of origin to the farthermost destination. Reparation awarded. Swift & Co. v. C. C. C. & St. L. Ry., 50 I. C. C. 211.

(n) There can be no question but that peddler cars with a light loading tends to inefficiency in the transportation system. Cleveland Provision Co. v. B. & O. R. R., 50 I. C. C. 612, 618.

(o) The peddler car, as a rule, is accorded somewhat greater expedition than the ordinary merchandise car. Expedition increases the cost of a given service and is also a thing of value to the shipper. However, these considerations are offset, at least to some extent, by the fact that the initial terminal services on a peddler car, with the exception of switching, whether it be that of the line-haul carrier or its connection, are performed by the shipper. Cleveland Prov. Co. v. B. & O. R. R., 50 I. C. C. 612, 618.

(p) The peddler car is a refrigerator car loaded by the packer at his packing house with l. c. l. consignments, placed in the car in station order, i. e., in the order in which the towns for which the consignments are intended will be reached, so that consignments may be unloaded by the crews as the various stations are reached progressively, with a minimum of trouble and delay. National Wholesale Grocers' Asso. v. Director General, 62 I. C. C. 375, 379, 380.

ALL OTHER CITATIONS

Rates on Packing-house Products, 28 I. C. C. 599, 600; Richmond Chamber of Commerce v. S. A. L. Ry. Co., 30 I. C. C. 552, 554; Rules Governing Shipments of Freight in Peddler Cars, 32 I. C. C. 428, 433; Sinclair & Co. v. C. M. & St. P. Ry., 48 I. C. C. 295; Swift & Co. v. P. C. C. & St. L. Ry., 48 I. C. C. 525, 527, 528; Wilson & Co., Inc., v. C. C. C. & St. L. Ry., 51 I. C. C. 153; Swift & Co. v. C. C. C. & St. L. Ry., 50 I. C. C. 211; Swift & Co. v. United States, 255 Fed. 291; National Wholesale Grocers' Asso. v. Director General, 62 I. C. C. 375, 402, 403, 475.

§9⅞. Miscellaneous Cars.

IMPORTANT CASES SINCE 1908

(a) Section 1 requires carriers to furnish refrigerator cars upon reasonable request therefor. Where a shipper's tonnage does not appear to be sufficient to warrant refrigerator or heated car service, the carriers may, with respect to such tonnage, lawfully exempt themselves from liability for freezing. Longo Fruit Co. v. I. T. System, 38 I. C. C. 487, 489.

(b) If carriers have suitable refrigerator cars to carry refrigerator freight, or will secure such cars, and furnish them on demand, they have the legal right to furnish them, and may refuse to transport shipments in privately owned cars. They are privileged at any time to fulfill their common carrier obligations in this regard. Simple tariff provisions with respect to the matter will enable carriers

to furnish their own cars to all shippers to transport perishable commodities. Armour & Co. v. E. P. & S. W. R. R., 52 I. C. C. 240, 246.

(c) The allowance paid by carriers for use of refrigerator cars are clearly subject to the Commission's jurisdiction. Section 15 of the Act to regulate commerce provides that if the owner of property furnishes an instrumentality of transportation the charge and allowance therefor shall be no more than just and reasonable, the Commission is empowered to determine what is a reasonable charge as a maximum to be paid by the carrier for the use of the instrumentality furnished. Furthermore, under the amendment to section 1 of the Act approved March 29, 1917, the Commission is given power to prescribe the compensation to be paid for the use of cars not owned by common carriers. Armour & Co. v. El Paso & S. W. R. R., 52 I. C. C. 240, 247.

§97/8. (1) Station-order Cars.

IMPORTANT CASES SINCE 1908

(a) A station-order car is one loaded with miscellaneous less-than-carload freight for two or more destinations on the same local freight train division. It differs from a trap car in that the purpose of the station-order car is to permit its being put into trains without rehandling at the railway's freight warehouse. Richmond Chamber of Commerce v. S. A. L. Ry. Co., 30 I. C. C. 552, 554.

§97/8. (2) Trap Cars.

See Trap Cars.

IMPORTANT CASES SINCE 1908

(a) A trap-car loaded with one or more less-than-carload shipments at points on private or assigned sidings, for distribution at the railway freight warehouses into regular package or other cars for forwarding. Richmond Chamber of Commerce v. S. A. L. Ry. Co., 30 I. C. C. 552, 554.

§97/8. (3) Stock Cars.

See Refrigeration; Supra §97/8.

CASES 1887-1908

(a) The Burton Stock Car Company, which furnishes special improved live stock cars owned by it, to shippers over railroads, does not exchange with or use cars belonging to others, and is in no sense a "connecting line," entitled to equal facilities for interchange of traffic, under paragraph 2 of section 3 of the Act to Regulate Commerce. Burton Stock Car Co. v. Chic., B. & Q. R. R. Co., 1 I. C. R., 329.

(b) The Burton Stock Car Company is not entitled to claim that it is unjustly discriminated against by a refusal on the part of railroad companies to pay it the same rate of mileage which carriers adopt as the basis in adjusting their car service accounts with each other. Burton Stock Car Co. v. Chic., B. & Q. R. R. Co., 1 I. C. R. 329.

(c) The expense of hauling the Burton cars in one direction empty (for the reason that by their construction they are not suited to carrying general freight) as compared with the greater ability to load back the ordinary railroad cattle cars, and the fact that a large percentage of the ordinary cattle cars are so back-loaded upon the long hauls of western roads, are considerations which justify a difference in charge against shippers who prefer to hire the improved stock cars. Burton Stock Car Co. v. Chic., B. & Q. R. R. Co., 1 I. C. R. 329.

(d) A shipper is not entitled to have his cattle carried in cars of a special construction of his selection, belonging to a third party and superior to ordinary cattle cars, by reason of the fact that the carrier transports some cattle in other cars, available to all shippers equally, which have some of the improvements of the former, but are furnished by another party under a special contract, and which, unlike the cars desired by the shipper by reason of their peculiar construction, can be used in the chief business of the road,—that of carrying coal,—when not in use for cattle. The refusal to use the cars desired by the shipper does not constitute unjust discrimination. Re Morris v. D. L. & W. R. Co., 2 I. C. R. 617.

(da) Railroad companies are required at common law to furnish suitable facilities for the conduct of the business in which they engage, and it follows that the respondent railroad companies, holding themselves out as carriers of perishable fruit, must provide the necessary refrigerator cars for the transportation of that traffic. Re Changes for the Transportation and Refrigeration of Fruit Shipped from Points on the Pere Marquette and Michigan Central Railroads, 11 I. C. C. 129.

IMPORTANT CASES SINCE 1908

(e) Respondents proposed to establish a $10 rental charge on refrigerator cars owned by the A. R. T. Co., S. F. R. D., Armour Car Lines, Swift & Co., P. F. E., I. C. R. R., and U. R .T. when such cars are used in so-called local service from Pittsburgh, Pa., to destinations in c. f. a. territory. Prior to July 17 1922, the exceptions to the official classification provided for the application at Pittsburgh and one or two other points not here in issue of a charge of $10 per car for the use of certain privately owned refrigerator cars when received loaded at such points, portion of load removed, other perishable freight loaded in the car, and the same reforwarded to destinations in central territory. Effective on that date, the charge was eliminated on shipments from Pittsburgh, and to correct an alleged error the schedules suspended herein were published. Because of the unjust discriminations which would result from the application as proposed from one point only they have not been justified. HELD, suspended schedules should be canceled. Car rental charges on private line refrigerator cars, 74 I. C. C. 107.

(f) The Commission is without authority to require carriers to acquire refrigerator cars for use in express service. Although the law has been changed since 44 I. C. C. 645, 649, the provision under the act under which the Commission may require carriers to equip themselves with adequate facilities for performing their car service applies only to common carriers by railroad. The express company is not a carrier by railroad. C. C. Oyler & Son v. American Railway Express Co., 83 I. C. C. 160, 162.

ALL OTHER CITATIONS

Longo Fruit Co. v. I. T. System, 38 I. C. C. 487, 489; Gamble Robinson Commission Co. v. A. & B. R. Ry., 50 I. C. C. 324; Armour & Co. v. E. P. & S. W. R. R., 52 I. C. C. 240, 246, 247; Commercial Club of Greeley v. C. & S. Ry. Co., 53 I. C. C. 66, 71; Northern Potato Traffic Asso. v. C. & N. W. Ry. Co., 53 I. C. C. 100, 101.

§10. Tank Cars.

See Infra §17; Tank Cars.

CASES 1887-1908

(a) Neither the fact that the shipper in the one case supplies the rolling stock, nor the alleged fact—which is not found sustained—that for the tanks there is a greater probability of return loads, nor the further alleged fact that with barrel shipments there are greater risks to the carrier's property and that which it carries, can justify imposing upon the barrel shipments the greater burden. Rice v. Louisville & Nash R. R. Co., 1 I. C. R. 722.

(b) When oil is transported in tanks permanently affixed to car bodies, the tank is to be considered as part of the car; and for oil transported therein the charge for transportation should be the same by the hundred pounds that the carrier charges for transportation between the same points, of barrels filled with like oil and taken in car load lots. The carrier is guilty of unjust discrimination if the shipper in barrels is charged a higher rate. Rice v. Louisville & Nash. R. R. Co., 1 I. C. R. 722.

(c) When for a special traffic—e. g. the transportation of petroleum oils—a carrier provides rolling stock for one method, but does not provide it for another for which it publishes rates, but the shippers are expected to provide the same, the terms on which such rolling stock is to be provided should be uniform and be published with the rate sheets, and cannot lawfully be left to be the subject of bargain and of different terms in the case of different shippers. Rice v. Louisville & Nashville R. R. Co., 1 I. C. R. 722.

(d) Allowance can be made to owners of tank cars for their use. Rice v. Louisville & Nashville R. Co., 1 I. C. R. 722.

(e) A carrier that employs different methods for the transportation of petroleum oil and its products, in carloads,—for example, tank cars in which the oil is carried in bulk, and box cars in which the oil is carried in barrels,—is not relieved from its duty in respect to equality of rates by the difference it makes between its patrons in the mode of carriage, but its charges for like quantities carried between like points of shipment and destination must be equal upon the commodity itself, irrespective of the mode of carriage of the tank or barrel package in which it is contained. Differences in circumstances and conditions of transportation that are of a carrier's own creation or connivance, or that by reason-

able effort on the part of a carrier might be avoided, cannot justify exceptional rates. Rice, Robinson & Witherop v. W. N. Y. & P. R. Co., 3 I. C. R. 162.

(f) The allowance by a carrier to a shipper of oil in tanks, of 42 gallons, or any number of gallons, from the actual quantity put in a tank, for alleged leakage or waste in transportation, is, in the absence of a corresponding allowance to shippers in barrels, unjust discrimination and unlawful. Rice, Robinson & Witherop v. W. N. Y. & P. R. Co., 3 I. C. R. 162.

(g) The fact that a carrier does not own tank cars, but accepts and uses such cars supplied by some of its patrons for their own traffic, is unimportant so far as rates are concerned. It is a carrier's duty to equip its road with instrumentalities of carriage suitable for the traffic it undertakes to carry, and to furnish them alike to all who have occasion for their use, and its duty to furnish equipment cannot be transferred to nor required of shippers. When a carrier accepts and uses cars for transportation owned by shippers or others, in legal contemplation it adopts them as its own for purposes of rates and carriage, and neither the manner of acquiring cars, nor inability to furnish its general patrons the use of cars similar to those furnished by some shippers for their own traffic, can excuse or justify a carrier for discrimination in rates that may give one shipper advantages over another; nor can any device, such as payment of unreasonable rent for use of cars furnished by shippers, be practiced to evade the duty of equal charges for equal service. Rice, Robinson & Witherop v. W. N. Y & P. R. Co., 3 I. C. R. 162.

(h) An allegation of unjust discrimination resulting from shipments of oil in tank cars owned by the shipper, and low return rates on cotton-seed oil and turpentine in the same tanks, in connection with mileage paid for use of tank cars, cannot be sustained without evidence showing mutuality of interest between the two classes of shippers or the payment of excessive car mileage. Rice v. Cincinnati, W. & B. R. Co. (Com.), 3 I. C. R. 841.

(i) Where oil is transported by the carrier both in barrels and tank cars and the use of the tank cars is not open to shippers impartially but is practically limited to one class of shippers, the charge for the barrel package in barrel shipments in the absence of a corresponding charge on tank shipments, resulting in a greater cost of transportation to the shipper in barrels on like quantities of oil between like points of shipment and destination than to the tank shipper, is a discrimination against the former in favor of the latter, for which no legal justification has been shown in these cases. Independent Refiners' Asso v. Western New York & P. R. Co., 4 I. C. R. 162.

(j) Initial carriers who fail to furnish impartially to shippers tank cars for oil, in consequence of which the latter are required to ship oil in barrels, are severally liable for the damages resulting therefrom, under the Act to Regulate Commerce, § 8, providing that "any common carrier" subject to the provisions of such act shall be liable for the "full amount" of damages caused by its violation of the provisions of such act. Independent Ref. Asso. v. Western N. Y. & P. R. Co., 6 I. C. C. 162.

(k) A common carrier which charges for carrying barrel packages of oil when the use of tank cars for such shipment has not been open to shippers impartially, in consequence of which they have been deprived of the use of such cars, will be required to refund the amount received for the transportation of the barrels. Independent Ref. Asso. v. Western N. Y. & P. R. Co., 6 I. C. C. 378.

(l) It appearing that defendants are and have been able to furnish a large number of tank cars for the shipment of petroleum oil, and that defendants' liability to make reparation to claimants in this case under the order of the Commission of November 14, 1892, depends upon whether the use of tank cars for shipments of oil over the defendant roads, or by the "Green Line," has been open to the claimants, or, if so, whether the delivering carrier made this privilege useless to claimants through discriminating exactions imposed at the terminal point; and, it also appearing that the claims in this case require separate investigation, and that the present record does not enable the Commission to determine whether any of such claims are supported by facts as would bring them within the terms of the order of November 14, 1892. HELD, that claimants' further remedy is by proceeding in the courts under section 16 of the Act

to Regulate Commerce. Independent Refiners Asso. v. Pennsylvania R. Co., 6 I. C. C. 449.

IMPORTANT CASES SINCE 1908

(m) Whatever the facts may have been which have led up to the present private ownership of tank cars, the fact remains that it is the duty of the carriers to furnish such cars, and sound public policy demands that this duty should be performed in order that all shippers may be served equally well. In the Matter of Demurrage Charges on Privately Owned Tank Cars, 13 I. C. C. 378, 381.

(n) Tank cars are an absolute necessity for transportation of refined products, and their use effects an economic gain. Pennsylvania Paraffine Works v. P. R. R. Co., 34 I. C. C. 179, 181.

(o) It can not be contended that transportation by rail of oil in bulk could be attempted safely in any other equipment than tank cars. Pennsylvania Paraffine Works v. P. R. R. Co., 34 I. C. C. 179, 187.

(p) The shipper who is assured of the exclusive use of a tank car and consequently of the condition of the tank for the receipt of his lading, enjoys an advantage not afforded by a system in which, if the cars were furnished by railroads, he would not have such exclusive use of the car, and for this advantage the shipper ought to bear some proportion of the cost of ownership and maintenance. In Re Private Cars, 50 I. C. C. 652, 681.

(q) The Interstate Commerce Commission was given no power to order a carrier to provide and furnish to shippers tank cars for interstate shipments of petroleum products by the amendment of the Act defining the term "transportation" as including "cars and other vehicles and all instrumentalities and facilities of shipment or carriage, irrespective of ownership or of any contract, express or implied, for the use thereof and all services in connection with the receipt, delivery, elevation, and transfer in transit, ventilation, refrigeration or icing, storage, and handling of property transported," and making it the duty of every carrier subject to the provisions of the Act "to provide and furnish such transportation upon reasonable request therefor," although by §12 as amended by the Act of March 2, 1889, the Commission was authorized and required to execute and enforce the provisions of the Act, and by §13 as amended by the Act of June 18, 1910, was given power to enter orders not only regarding rates, but regarding classifications, regulations, or practices, whether affecting rates or not. If any duty to furnish such cars exists, it is enforceable in the courts, not by the Commission. United States v. Pennsylvania R. R., 37 Sup. Ct. 95, 242 U. S. 208, 61 L. Ed. 251.

(r) Carriers do not undertake to furnish tank cars for shippers; when such equipment is required, it is obtained upon an order or at the special request of the shipper. American Milling Co. v. C. M. & St. P. Ry. Co., Unrep. Op. 384.

(Ill. 1920), 129 N. E. 516; Standard Oil Co. v. A. E. R. R. Co., 78 I. C. C. 705; National Petroleum Asso. v. Director General, as Agent, 78 I. C. C. 711.

§10½. Private Cars.

See Infra §13; §31; Supra §4; Common Carrier §6; Private Cars.

CASES 1887-1908

(a) It is properly the business of a carrier by railroad to supply the rolling stock for the freights he offers or proposes to carry; and if the diversities and peculiarities of traffic are such that this is not always practicable, and consignors are allowed to supply it for themselves, the carrier must not allow its own deficiencies in this particular to be made the means of putting at unreasonable disadvantage those who make use in the same traffic of the facilities it supplies, Rice v. Louisville & Nashville R. R. Co., 1 I. C. R. 722.

(b) The law does not forbid a carrier from obtaining cars from a shipper for the transportation of such shipper's freight over its line, but in every such instance, after deducting a reasonable rent published in the tariff as part of the rate and paid by the carrier to the shippers for the use of such cars, the rates must be exactly the same, and none other, as upon freight transported in the same service in the carrier's own cars; and in every such transaction the carrier at its peril, must see to it that a shipper furnishing his own cars, receives no other or different rates than other shippers who use the cars of the carrier for a similar service. Scofield v. Lake Shore & Michigan Southern R. Co., 2 I. C. R. 67.

(c) Ownership of a car rented to a carrier and for the use of which the carrier pays a full consideration, does not of itself entitle the owner to the exclusive use of such car, and, if the owner may in the contract of hire to the carrier stipulate for the exclusive use of the car, it must be under such terms as shall not constitute an unjust discrimination against shippers of like traffic in cars owned by the carrier and who are excluded from the use of the car so hired. Independent Refiners' Asso. v. W. N. Y. & P. R. Co., 4 I. C. C. 162, 170.

IMPORTANT CASES SINCE 1908

(d) An important part of interstate commerce is transported in privately owned cars. It is to the interest of the owners, carriers, and public that their operation should be continued, under such rules and regulations as will insure their efficient handling without discrimination against any shipper or particular description of traffic. In Re Private Cars, 50 I. C. C. 652.

(e) In Sections 1 and 15 Congress has recognized the use of privately owned cars in transporting the commerce of the country, and has provided for their control by the Commission through rules and regulations of carriers hauling them. In the Matter of Private Cars, 50 I. C. C. 652, 672.

(f) The private-car owner has no right to demand that his cars be transported over lines of a carrier which has not consented thereto. Obligation of furnishing an adequate supply of equipment by statute rests upon carrier, and does not rest upon shipper. The duty can not be transferred to nor required of shipper. Assigned Cars for Bituminous Coal Mines, 80 I. C. C. 555.

(g) Carrier, in permitting use of a private car over its lines, must at its peril see that use of the vehicle does not permit, excuse, or justify discrimination, preference, or advantage in favor of owner of the private car, regardless of present ability of carrier to furnish on demand an adequate supply of equipment needed for transportation. Assigned Cars for Bituminous Coal Mines, 80 I. C. C. 557.

ALL OTHER CITATIONS

The Five Per Cent Case, 31 I. C. C. 351, 410; Pennsylvania Paraffine Works v. P. R. R. Co., 34 I. C. C. 179, 193, 194; In the Matter of Private Cars, 50 I. C. C. 652, 673, 675, 677, 680, 686, 709; Armour & Co. v. E. P. & S. W. R. R., 52 I. C. C. 240, 245; Pacific Engineering & Construction Co. v. C. R. I. & P. Ry., 56 I. C. C. 247, 249; Perishable Freight Investigation, 56 I. C. C. 449, 455; Assigned Cars for Bituminous Coal Mines, 80 I. C. C. 546, 557.

§10¾. Pool Cars.

See Pool Cars.

IMPORTANT CASES SINCE 1908

(a) Many so-called pool cars are consigned to transfer companies, warehouses, and distributing agencies on Pacific coast. Furniture Mfrs. Asso. of Grand Rapids v. A. A. R. R. Co., 34 I. C. C. 262, 265.

(b) From southern Illinois to Chicago there is considerable movement of fruits and vegetables in "pool" cars, loaded with l. c. l. shipments from various shippers, consolidated into carload lots and forwarded on basis of carload rates. Business Men's League of St. Louis v. A. T. & S. F. Ry., 44 I. C. C. 308, 315.

§11. At Transit Point.

IMPORTANT CASES SINCE 1908

(a) The refusal to furnish cars for the outbound movement of grain milled in transit amounts to a failure to furnish transportation in violation of section 1. Brook-Rauch Mill & Elevator Co. v. St. L. I. M. & S. Ry. Co., 21 I. C. C. 651, 654.

(b) Complainant shipped a carload of corn from Omaha, Neb., to Little Rock, Ark., over the St. L. I. M. & S. R. R., to be there milled and reshipped to Fordyce, Ark., over the Cotton Belt R. R. The shipment moved under a tariff naming a through rate from Omaha to Fordyce via Argenta, Ark., to which the inbound and outbound carriers were parties. In connection with a later tariff granting transit privileges at Little Rock, a point not on the Cotton Belt's line, its junction with the St. L. I. M. & S. R. R. being at Argenta. To this later tariff the Cotton Belt was not a party. Both carriers refused to furnish transportation equipment for the outbound movement from Little Rock, each claiming it was the duty of the other to do so. HELD, that the Cotton Belt's obligation under the tariff to which it was a party does not accrue until delivery to its own rails, and the duty to furnish equipment for outbound movements from complainant's mill rests upon the inbound carrier, the St. L. I. M. & S. R. R. Brook-Rauch Mill & Elevator Co. v. St. L. I. M. & S. Ry. Co., 21 I. C. C. 651, 656.

ALL OTHER CITATIONS

Peck v. A. T. & S. F. Ry. Co., Unrep. Op. A-923.

§11½. Leased Cars.

See Leased Cars.

CASES 1887-1908

(a) The law does not forbid a carrier from obtaining cars for the transportation of freight over its line from other carriers, or car furnishing companies, but in every such instance the rates of freight must be exactly the same, and none other, as they would be if such cars were owned by the carrier so using them. Scofield v. L. S. & M. S. R. R., 2 I. C. C. 67, 76.

(b) A railroad company may acquire cars by construction, by purchase or by contract for their use, and no one has the power to compel a railroad company to select among these several modes or to contract with all comers. Worcester Excursion Car Co. v. Pennsylvania R. Co., 2 I. C. R. 792.

(c) Carriers are left by law to procure equipment for their business by lease or otherwise. They are not prohibited from leasing cars belonging to a shipper, nor are they compelled to contract in this respect with all shippers because they do with one. Consolidated Forwarding Co. v. Southern P. Co., 9 I. C. C. 182.

(d) During performance of transportation the car is, to every practical intent, the car of the railroad company using it, and its measure of responsibility as to the sufficiency of the car is the same, whether it obtains the car by purchase or by lease. Re Charges for Transportation and Refrigeration of Fruit Shipped from Points on the Pere Marquette and Michigan Central Railroads, 11 I. C. C. 129.

IMPORTANT CASES SINCE 1908

(e) Carriers should lease cars only upon such terms as permit them to furnish cars without discrimination. Pennsylvania Paraffine Works v. P. R. R. Co., 34 I. C. C. 179, 194.

(f) The leased-car system is inconsistent with the per car system. The two can not with justice to all shippers be maintained contemporaneously by carriers in New England. Inasmuch as the two systems can not be operated at the same time with just and reasonable rates and regulations applicable to each, the one which confers special privileges on particular shippers must give way in the interests of the general shipping public. New England Milk Case, 40 I. C. C. 699, 731.

(g) Stock cars which are leased to railroad companies under contract are really railroad cars when used by carriers and are treated as such by connections. In Re Private Cars, 50 I. C. C. 652, 663.

(h) Under the law as construed by the courts, car lines and others engaged in leasing cars to shippers are not common carriers and thus do not come under direct control by the Commission. In Re Private Cars, 50 I. C. C. 652, 677.

(i) The computation of mileage as a basis of payment for private cars should be upon the distance of the haul, with reference to distance tables established by carriers. In Re Private Cars, 50 I. C. C. 652, 686.

(j) Under circumstances shown, shippers should be permitted to lease cars to transport shipments in interstate commerce from sources independent of carriers by railroad. In Re Private Cars, 50 I. C. C. 652, 675, 709.

ALL OTHER CITATIONS

Southwestern Missouri Millers' Club v. St. L. & S. F. R. R. Co., 26 I. C. C. 245, 251; New England Milk Case, 40 I. C. C. 699, 723, 733; Car Supply Investigation, 42 I. C. C. 657, 676.

§11¾. Rental Charges.

See Cars and Cars Supply §11⅞.

CASES 1887-1908

(a) The mileage rate of ¾ of a cent per mile run, which is customary among railroads, for freight cars of other railroad companies used upon the paying company's line, and which payment is, by the interchange of cars, practically equalized among the different roads, is not to be taken as the measure of payment for the use of cars belonging to other persons than railroad companies. Burton Stock Car Co. v. Chic., B. & Q. R. R. Co., I. C. R. 329.

(b) Burton Stock Car Company, which furnishes stock cars to shippers over railroad, does not exchange with or use cars belonging to others, and is not a connecting line entitled to equal facilities for interchange of traffic under section 3, par. 2 of Act. Burton Stock Car Co. v. Chicago etc. R. R. Co., 1 I. C. R. 329.

(c) The Burton Stock Car Company is not unjustly discriminated against by refusal of railroad companies to pay same rate of mileage for its cars as for ordinary freight cars. Burton Stock Car Co. v. Chicago etc. R. R. Co., I. C. R. 329.

(d) Customary mileage rate for freight cars of other railway companies used upon paying company's line, and which payment is, by interchange of cars, practically equalized among different roads, is not the measure of payment for the use of cars belonging to other persons than railroad companies. Burton Stock Car Co. v. Chicago etc. R. R. Co., 1 I. C. R. 329.

(e) Complainant attacked the tariff of the defendant which provides an additional charge to the shipper when his stock is loaded for transportation in private cars owned by complainant, and also attacked the refusal of defendant to allow mileage of three-quarters of one cent per mile per car when cars of complainant are on the rails of defendant. HELD, the mileage rate of ¾ of a cent per mile run, which is customary among railroads, for freight cars of other railroad companies used upon the paying companies line, and which payment is, by the interchange of cars, practically equalized among the different roads, is not to be taken as the measure of payment for the use of cars belonging to other persons than railroad companies. The complainant, which furnishes special improved livestock cars owned by it, to shippers over railroads, does not exchange with or use cars belonging to others, and is in no sense a connecting line, entitled to equal facilities for interchange of traffic, under paragraph 2 of section 3 of the act. The complainant is not entitled to claim that it is unjustly discriminated against by a refusal on the part of railroad companies to pay it the same rate of mileage which carriers adopt as the basis in adjusting their car service accounts with each other. The expense of hauling complainants cars in one direction empty (for the reason that by their construction they are not suited to carrying general freight) as compared with the greater ability to load back the ordinary cattle cars and the fact that a large percentage of the ordinary cars are so backloaded upon the long hauls of western roads, are considerations which justify a difference in charge against shippers who prefer to hire the improved stock cars. Doubted (but not decided) whether the extra charges made to shippers of livestock in special cars over thirty feet in length are not unreasonable. Burton Stock Car Co. v. C. B. & Q. R. R., 1 I. C. C. 329, 353.

(f) A firm of cattle dealers in New York, who procured their cattle on a large scale from Chicago and other western points for domestic consumption as well as for export, made an arrangement with two interstate rail carriers constituting a through line from Chicago to New York that the said firm will, under the name of an express company of their own creation, furnish not less than 200 or more than 400 improved livestock cars for the transportation of these cattle. For the rental of these improved stock cars the carriers pay this express company ¾ of a cent per mile,

whether loaded or empty. Extraordinary facilities and rights of way are given these cars to enable them to make a heavy mileage, and they make more than twice the mileage of ordinary stock cars. Besides this, the carriers pay 50 cents for the loading of each of said cars with cattle at the Union Stock Yards in Chicago, for which no charge is made against the express company or the firm represented by it. In addition to this, the carriers pay this firm yardage at the rate of 3½ cents per hundred pounds on all their cattle, and upon all other cattle hauled for other firms in the care of this firm, owning the express company, to its yards at pier 45, East River. This yardage charge is thus paid to the said firm by the said carriers for keeping their cattle in the firm's own yards after delivery of them to the firm, and then this yardage charge deducted from the tariff rate charged by the carrier. The amount of these rebates to this firm in rates on these cattle by these carriers more than pays the entire cost of the improved stock cars within two years after operations are commenced with them, including the expenses of operation, leaving said firm owning the cars and still operating them with all these advantages and rates and facilities. HELD, this is an unlawful preference to the firm owning these improved stock cars and a violation of the act; it is an unlawful and unjust prejudice to other cattle firms and dealers in New Yrok who are competitors in the business of said firm owning said improved stock cars. Shamberg v. D. L. & W. R. Co., 3 I. C. C. 502.

(g) A railroad which accepts freight in the cars of a connecting road, and transports it therein, when it has cars of its own not in use, is not liable for mileage upon such cars, in the absence of an arrangement to that effect; but the existing custom that when a railroad takes the freight in the foreign cars because it has none of its own out of use, or because the freight would be injured by the transfer, it shall pay certain mileage on the cars used, is reasonable and will be enforced. Oregon Short Line & U. N. R. Co. v. N. P. R. R. Co. (C. C. D. Ore.), 4 I. C. R. 249.

(h) Where a carrier pays mileage for a car which it employs in the service of shippers, it is the carrier, and not the party or company from whom the car is rented, who furnishes the car to the shipper, and in such case there is no privity of contract between the car owner and the shipper. Truck Farmers' Asso. v. Northeastern R. R. Co. et al., 6 I. C. C. 295.

IMPORTANT CASES SINCE 1908

(i) An attempt to fix a stated basis of allowances for use of privately owned cars would by no means result in justice to all owners or to all carriers. In Re Private Cars, 50 I. C. C. 652, 683.

(j) The allowance that should be paid for the use of private cars under all circumstances and conditions must be considered on the average. In Re Private Cars, 50 I. C. C. 652, 683.

(k) Carriers should at least pay for repairs and such depreciation as occurs while the car is in railroad service. In Re Private Cars, 50 I. C. C. 652, 683.

(l) Payments by carriers for the use of private cars should be upon the basis of the loaded and empty mileage, and the mileage should be computed on the basis of distance tables without the elimination of mileage through switching districts. In Re Private Cars, 50 I. C. C. 652, 686, 709.

(m) Proposed $10 car-rental charge to be applied on certain privately owned refrigerator cars when used in so-called local service from Pittsburgh, Pa., to destinations in c. f. a. territory, found not justified. Unjust discrimination would result, as the charge would apply only on the lines of the Pennsylvania to points in c. f. a. territory, and not via other lines which also serve the same destination territory from Pittsburg. Furthermore, the charge is not made or proposed to points on the Pennsylvania lines east of Pittsburgh to which shipments of the same character may be forwarded from Pittsburgh in cars of identical ownership. Car Rental Charges on Private Line Cars, 74 I. C. C. 107.

(n) By paragraph (14) of section 1 of the Act the Commission is given jurisdiction to establish reasonable rules, regulations, and practices with respect to car service, including compensation to be paid for use of any car not owned by carrier using it. Assigned Cars for Bituminous Coal Mines, 80 I. C. C. 557.

ALL OTHER CITATIONS

North Pacific Fruit Distributors v. N. P. Ry., 40 I. C. C. 191; Business Men's League of St. Louis v. A., T. & S. F.

Ry., 44 I. C. C. 308, 318, 324; Northern Potato Traffic Asso. v. C. & A. R. R., 44 I. C. C. 426, 433; Hale-Halsell Grocery Co. v. M., K. & T. Ry., 45 I. C. C. 523, 526; Express Charges on Empty Fish Cars, 50 I. C. C. 24; Northern Potato Traffic Asso. v. G. N. Ry. Co., 58 I. C. C. 360, 362.

§11⅞. Per Diem Charges.

See Cars and Car Supply §11¾; Per Diem.

CASES 1887-1908

(a) A private company owning live stock cars is not unjustly discriminated against by refusal of railroad companies to pay same rate of mileage for its cars as for ordinary freight cars. Burton Stock Car Co. v. Chicago etc. R. R. Co., 1 I. C. R. 329.

(aa) A carrier is at liberty, and will be expected, to make to the owner of tank cars a reasonable allowance for their use. Rice v. Louisville & Nash. R. R. Co., 1 I. C. R. 722.

(ab) Where a carrier pays mileage for a car which it employs in the service of shippers, it is the carrier, and not the party or company from whom the car is rented, who furnishes the car to the shipper, and in such case there is no privity of contract between the car owner and the shipper. Truck Farmers' Asso. v. Northwestern R. R. Co., 6 I. C. C. 295, 316.

IMPORTANT CASES SINCE 1908

(b) The theory of paying allowance for empty movement presupposes a loaded movement. While the equalization rule has been gradually broadened so that the loaded mileage accruing during a designated period on the entire line of the carrier individually, or jointly, when mileage accounts are computed jointly, it never contemplated paying mileage on new or newly acquired empty tank cars before they are put into actual service and such movements have always been treated like any other freight. Chanute Refining Co. v. A., T. & S. F. Ry., 52 I. C. C. 593, 595.

(c) The reclaim arrangement is in substance merely a matter of accounting between the carriers and it does not relieve the shipper of the obligation to pay what the service is reasonably worth. However, all per diem arrangements between carriers under federal control have now been discontinued under G. O. 31. Mercantile Lumber Co. v. I. C., 53 I. C. C. 663, 667.

(d) One of the primary purposes of the per diem arrangement is to increase the use of freight equipment through expediting its movement and avoiding detention. Although the charge is intended to cover the cost of ownership, including maintenance, depreciation, taxes, interest, and other allocations incident to ownership, per diem savors of a penalty. New England Divisions, 62 I. C. C. 513, 538.

(e) Payment of per diem reclaims to industrial railroads may result in preferences and advantages to the proprietary industries, and is not a proper basis for settlement by an industrial railway for the use or detention upon its line of foreign cars. B. & W. C. Ry. v. P., C., C. & St. L. R. R. R. Co., 62 I. C. C. 357, 361; Tionesta Valley Ry., 473, 478; Genesee & Wyoming R. R. Co., 62 I. C. C. 680, 683.

(f) Payment of an industrial railway of per diem, with or without reclaims, is not the proper basis for settlement for the use or detention of foreign cars Mount Hope Mineral R. R. Co. v. C. R. R. Co. of N. J., 74 I. C. C. 195, 200.

(g) By paragraph (14) of section 1 of the Act the Commission is given jurisdiction to establish reasonable rules, regulations, and practices with respect to car service, including compensation to be paid for use of any car not owned by carrier using it. Assigned Cars for Bituminous Coal Mines, 80 I. C. C. 557.

(h) Fact that industrial carriers have received low net earnings or operated at deficit is not convincing as bearing upon question of per diem arrangement, for deficiency in earnings may indicate, among other things, poor location, insufficient traffic, uneconomic management, high operating expenses, maladjusted divisions or absorptions, or necessity for track-storage charge such as may be in force upon other lines in district. L. E. & Ft. W. R. R. Co., 78 I. C. C., 475, 490.

III. ASSIGNMENT AND DISTRIBUTION.

(A) Counting of Cars.

§12. In General.

CASES 1887-1908

(a) It is the duty of carrier to furnish cars ratably to shippers along its line until the emergency is passed. Riddle v. Pittsburgh & L. E. R. Co., 1 I. C. R., 601, 688.

(b) The legal duty of a carrier is to operate its cars so as to keep them as much as possible on its line, and confined to the business on its line. If in a crisis the carrier could not furnish sufficient cars to all shippers along its line for the amount of their freight, then it was its duty to furnish its cars to shippers of coal in proportion to their shipments over its line, upon a basis that was relatively and substantially just. Riddle, Dean & Co. v. P. & L. R. E. E., 1 I. C. C., 688, 693.

(c) No exact rule can be laid down to govern the general distribution of cars between different localities and different species of traffic. Shippers must be reasonable in their demands and carriers diligent and honest in meeting those demands. In times of temporary car famine a railroad can only be required to do its best and to treat its patrons without undue preference. Hawkins v. Wheeling & L. E. R. Co., 9 I. C. C., 212, 214.

(d) During perfomance of the transportation the car is to every practical intent the car of the railroad company using it, and its measure of responsibility as to the sufficiency of the car is the same, whether it obtains the car by purchase or lease. Matter of Charges for Transportation of Fruit, 11 I. C. C., 129.

(e) Complainants attack the reasonableness of a regulation of the Southern Pacific Company to the effect that, in time of car shortage, cars will be furnished to the various shippers in proportion to the amount of fruit picked and actually in the packing houses at the time of the demand for cars. Prior to April, 1907, cars were distributed in proportion to the season's business done by the various shippers. This so-called "crop-holding rule" is still in force over the A., T. & S. F. Ry., but, in case of the Southern Pacific Company, has been displaced by the "house rule," to which objection is taken. HELD, that the situation can not be adequately covered by any fixed, inelastic regulation. Although the "crop-holding rule" appears to work more perfectly to the satifaction of shippers and carriers, nevertheless the "house rule" does not appear to be unduly discriminatory. Complaint dismissed. Cal. Fruit Growers' Exchange et al v. So. Pac. Co., 15 I. C. C., 553.

IMPORTANT CASES SINCE 1908

(f) Grouping mines and alloting to one of the mines of a company the entire percentage of cars due all of them on that day, would result in unjust discrimination. McCaa Coal Co. v. C. & C. Ry. Co., 33 I. C. C., 128, 131.

(g) All cars whether owned or leased, must be distributed without discrimination. Pennsylvania Paraffine Works v. P. R. R. Co., 34 I. C. C., 179, 193.

(h) Some definite period at the end of which average detention of coal cars must be obtained and a balance struck must be prescribed. A calendar month is a natural division, and such division conforms to commercial usage and to the time statements of debits and credits are made in car accounting. Red Ash Coal Co. v. C. R. R. Co., of N. J., 37 I. C. C., 460, 462.

(i) The equitable distribution of coal cars is a difficult problem and rules adopted by carriers to effect it must be impartially applied and enforced. Greenfield & Co. v. P. R. R., 47 I. C. C., 403, 407.

(j) In the allotment of cars among shippers, their previous traffic as individuals should have no consideration further than may be useful or necessary in determining the amount offered and ready for shipment at the time. While there is usually a relationship between past performance and present ability, such relationship is not universal or necessary and must yield to better evidence when it is available. Tanner & Co. v. C., B. & Q. Ry., 53 I. C. C., 401, 406.

(k) A rule which provides for the distribution of cars in time of shortage in the relative proportions in which ship-

pers tender grain on hand and conveniently located for prompt loading, taking into consideration the rights of the small shipper, is just and reasonable and should be followed during the entire period of car shortage. Tanner & Co. v. C., B. & Q. Ry. 53 I. C. C., 401, 408

(l) It is not possible always for carriers to furnish particular mines their exact quota of cars during periods of car shortage and if shortages or overages are adjusted with reasonable promptness a carrier may be said to have fulfilled its duty Northern West Virginia Coal Asso. v. P. R. R. Co., 60 I. C. C., 569, 573.

(m) In the matter of car supply and other transportation services, joint mines are treated by carriers the same as junction-point mines, and consequently are able to draw cars from two or more roads, while a local mine is dependent exclusively for car supply on the one line serving it. The advantages accruing to the joint mines are a better car supply in time of car shortage due to their ability to draw cars from more than one line, additional territory in which to market their product, and additional routes in reaching points available by one road. Benton Coal Mining Co. v. C., B. & Q. R. R. Co., 63 I. C. C., 396, 397.

(n) The practice of a carrier in distributing cars on the basis of actual amount of grain on hand in elevator and ready for shipment, and refusing to take into consideration grain in the country adjacent to complainant's elevator, found not to result in unjust discrimination. Farmers Grain Co. v. C., R. I. & P. Ry. C., 64 I. C. C., 730.

(o) Practice of carriers distributing empty cars among lumber shippers in refusing to apportion available cars upon basis of ability of shippers to promptly load, as determined by production and accumulated stock on hand, and apportioning such cars upon basis of past performance during periods of normal car supply, found not to have resulted in undue prejudice or discrimination. Wausau Southern Lumber Co. v. G. & S. I. R. R. Co., 64 I. C. C., 732.

(p) It is just as necessary to maintain a proper relationship for car distribution between shipping points, district, and railroad divisions as it is to maintain a proper relationship between individual shippers. Wausau Southern Lumber Co. v. G. & S. I. R. R., 64 I. C. C., 732, 734.

(q) The Commission established a rule to be followed during periods of car shortage in distributing cars to grain shippers located upon its line in the relative proportion in which different shippers tender grain for shipment, such grain being actually on hand and conveniently located for prompt loading. Wausau Southern Lumber Co. v. G. & S. R. R., 64 I. C. C., 732, 735.

(r) It is the duty of a carrier to furnish transportation upon reasonable request therefor, and not to unjustly discriminate as between shippers in the distribution of cars. This duty, however, only applies when the commodity tendered for shipment is actually on hand and conveniently located for prompt loading. Wausau Southern Lumber Co. v. G. & S. I. R. R. Co., 64 I. C. C., 732, 736.

(s) During any period when the supply of cars available does not equal the requirements of such mines it shall be the duty of such carrier to maintain and apply just and reasonable ratings of such mines, and to count each and every car furnished to or used by any mines for transportation of coal against the mine. Northern West Virginia Asso. v. P. & L. E. R. R., 68 I. C. C., 167, 171.

(t) Paragraph 12, Section 1 of the act makes it the duty of every carrier by railroad to make just and reasonable distribution of cars for transportation of coal among the coal mines served by it whether located upon its line or lines or customarily dependent upon it for car supply. Northern West Virginia Asso. v. P. & L. E. R. R., 68 I. C. C., 167, 171.

(u) Complainant alleged defendants failed to distribute empty cars for the shipment of hay fairly and equitably between complainants at Forestburg, S. D., and its competitors at Forestburg and Woonsocket, S. D., thereby causing undue prejudice to complainants; that the cars furnished were so small that it was impossible to load the carload minimum applicable and that rates and regulations as to minimum weights on certain shipments were unreasonable. Forestburg is on the C. M. & St. P., about 9 miles east of Woonsocket. Another line of the Milwaukee runs north and south through Woonsocket but does

not reach Forestburg. The evidence submitted by complainants in support of their allegation of undue prejudice, the burden of proof being upon them, does not justify a finding in their favor. No specific evidence was offered that any other shipper at Forestburg or Woonsocket received any preferential treatment to the undue prejudice of complainants. As no records were kept of the number of cars ordered either at Forestburg or Woonsocket, the proportion which the cars furnished bore to the number ordered cannot be stated. The further contention of complainants that the applicable carload minimum of 25,000 pounds was too high is not established. The record does not contain positive evidence that the baling was done properly or that the cars were loaded to full capacity. The tariff was subsequently amended to make actual weight apply when cars are loaded to full visible capacity. HELD, undue prejudice not sustained, and carload minimum attacked not unreasonable, complaint dismissed. Gaynor Brothers. v. Director General, 68 I. C. C., 541.

(v) The term "local mine" designates a mine situated on and served by only one railroad. Bell & Zoller Co. v. B. & O. S. W. R. Co., 74 I. C. C., 435.

(w) Whatever tends to inflate nominal mine ratings beyond the amount which can normally be produced and shipped is distinctly counter to the public interest. Bell & Zoller Coal Co. v. B. & O. S. W. R. R. Co., 74 I. C. C., 443.

(x) Defendants can not evade liability for damages directly traceable to their unduly prejudicial distribution of such cars as were available under the existing car supply by computing what might or could have happened if a full car supply had been available for all shipping mines. Avella Coal Co. v. P. & W. V. Ry. Co., 77 I. C. C., 731, 736.

(y) Special Service Order No. 25 of the Interstate Commerce Commission effective September 20, 1922, does not affect the assigned car practice, and leaves the question of proper distribution of coal cars to be governed by Interstate Commerce Act, sec. 1, (12), as amended by Transportation Act of 1920. Cleveland and Western Coal Co. v. Baltimore & D. R. R. Co., 283 Fed. 995.

(z) The provision of Interstate Commerce Act, Sec. 1 (12), as amended by Transportation Act of 1920, that every carrier shall count each and every car furnished to or used by any coal mine against such mine, does not determine the question of distribution, but must be read in connection with other language of the paragraph directing just and reasonable distribution of cars to coal mines, and also to maintain and apply just and reasonable ratings of such mines, and whether the method of distribution practiced by carrier conforms to the statute is a question primarily for the Interstate Commerce Commission. Cleveland & Western Coal Co. v. Baltimore & D. R. R. Co., 283 Fed. 995.

(aa) An application was made for an injunction to compel a carrier to furnish an equitable distribution of coal cars. It appeared that the cars were being furnished in accordance with an order of the Interstate Commerce Commission. The court said, page 996: "Defendant, since September 20, 1922, has distributed its coal cars in accordance with Special Service Order, Interstate Commerce Commission, dated April 15, 1920. This order follows and embodies the car service rules approved by the Interstate Commerce Commission as the same existed and were applied prior to Federal control and as outlined and defined in Railroad Commission of Ohio v. Hocking Valley Ry. Co., 12 Interst. Com. Comn. R. 398; Traer v. Chicago & Alton R. Co., 13 Interst. Com. Com. R. 451; I. C. C. v. I. C. R. Co., 215 U. S. 452, 30 Sup. Ct. 155, 54 L. Ed. 280. In addition thereto, defendant limits the definition of assigned cars so that it applies only to cars used for its own fuel supply when furnished to mines with which it has a contract to take the entire output for a period of not less than six consecutive months. This service order was later superseded by Special Service Order No. 16, dated September 28, 1920, and this last service order was later, on March 22, 1921, vacated and set aside. In consequence of this action, plaintiff asserts that no service orders are in existence except Orders Nos. 23 and 25. If Special Service Order dated April 15, 1920, or one like it, prescribing a practice of coal car distribution, were now in effect, then this court would be without jurisdiction to hear and determine this application, but it would be necessary to constitute and assemble a special court consisting of three judges, of whom at least one should be a circuit judge. See Lambert

Run Coal Co. v. B. & O. R. Co., 257 U. S. —, 42 Sup. Ct. 349, 66 L. Ed. —, decided by U. S. Supreme Court April 10, 1922, reversing (C. C. A.) 267 Fed. 776. If, however, there is no special order of the Interstate Commerce Commission on the subject, but merely a car service rule or practice of the defendant, then this court, as now constituted, has jurisdiction to a limited extent. If the statute prescribes a method of distribution, or if there is an order of the Interstate Commerce Commission prescribing a method of distribution, or if there is an established and published car service rule, a suit may be maintained to enjoin a violation thereof. If, on the other hand, the question is merely as to whether or not a rule or practice is in itself unfair or discriminatory, a question then arises calling for the exercise of judgment and discretion which has been vested by Congress in the Interstate Commerce Commission, and the courts will not, until after that Commission has acted and made its finding, take jurisdiction, and then only in the special manner prescribed by statute. See Penna. R. Co. v. Puritan Coal Min. Co., 237 U. S. 121, 35 Sup. Ct. 484, 59 L. Ed. 867; Texas & Pacific R. Co. v. Abilene Cotton Oil Co., 204 U. S. 426, 27 Sup. Ct. 350, 51 L. Ed. 553, 9 Ann. Cas. 1075." The court then continued, page 997; "Paragraph 12, § 1, does not, in my opinion, have the effect asserted on behalf of plaintiff. The direction therein contained, to count each and every car furnished to or used by any coal mine, must be read in connection with other language in the paragraph directing every carrier to make just and reasonable distribution of cars for transportation of coal among the coal mines served by it and also to maintain and apply just and reasonable ratings to such mines. The direction to count cars against the mine, if given the effect for which plaintiff contends, would render superfluous the other language. The direction to count cars against the mine cannot, therefore, be taken as determining the question of distributing cars among the mines. If such were the intention of Congress, then the carrier has no independent duty or power in making distribution of coal cars to coal mines; if it were, the Interstate Commerce Commission likewise would no longer have any power or duty in the matter of determining whether a method of car distribution is just or reasonable. Congress, in my opinion, did not by this paragraph intend to establish a method of distributing coal cars different from that which had previously existed and had been approved by repeated decisions of the Interstate Commerce Commission and the United States Supreme Court. The legislative history of paragraph 7 clearly indicates that Congress was intending merely to put in statutory form the pre-existing practice, and not to declare a new and definite method of distribution which would supersede the duty to make just and reasonable distribution. The expression "to count each and every car against the mine' is borrowed from previous decisions and regulations of the Interstate Commerce Commission and of common carriers in applying the so-called assigned car rule. Upon the proper construction of this paragraph, the reasoning of Judge Clayton in Corona Coal Co. v. Southern R. Co. (D. C.), 26 Fed. 726, seems to me to be sounder and more persuasive than the views expressed by Judge Woods in B. & O. R. R. Co. v. Lambert Run Coal Co. (C. C. A.) 276 Fed. 776. Judge Clayton's view also accords with the present view of the Interstate Commerce Commission, which now has pending before it the question of whether the assigned car rule as applied by defendant is a just and reasonable distribution of cars among coal mines. If I am right in this conclusion, then, whether defendant's method of car distribution is unfair or discriminatory, becomes a question in the first instance for the Interstate Commerce Commission has heard and determined the question. Certainly plaintiff's contention to the contrary is not so clear that it should be adopted as a basis upon which to issue a preliminary injunction which ought not to be issued, and thereby overturn an existing status, unless the plaintiff's right is reasonably clear and free from doubt." Cleveland & Western Coal Co. v. Baltimore & O. R. R. Co., 283 Fed. 995.

(bb) Finding that practice of carriers in distributing assigned cars to bituminous mines in excess of ratable proportion distributed to mines not receiving assigned cars, will be unjust, unreasonable and unjustly and unreasonably preferential to such mines receiving assigned cars, is not to preclude commission, in exercise of emergency powers under paragraph (15) of section 1 of the act, from requiring placement of cars for

such loading at mines in excess of percentage allotment to mines generally upon lines of same carrier, or upon same division. Assigned Cars for Bituminous Coal Mines, 80 I. C. C. 520.

§12½. Priority.

IMPORTANT CASES SINCE 1908

(a) If priorities were to be prescribed in transportation of bituminous coal it would obviously be necessary to give first priority to railway fuel, as was done when priorities were issued by the President's priority agent during the war. Assignment of Freight Cars, 57 I. C. C. 760, 766.

§13. Private Cars.

See Supra §4; §10½; Infra §31; Demurrage §10; Private Cars.

CASES 1887-1908

(a) Complainant attacked method of defendants in the distribution of cars as unduly discriminatory. Defendants are engaged principally in transportation of coal from mines located upon their lines. Certain other railways purchase their fuel supply from coal operators owning mines upon the lines of defendants and send their own cars upon the lines of defendants, consigned to the coal companies, with which railways so sending their cars have contracts for fuel supply. Certain other coal operators have upon the lines of one of the defendants leased, or so called "private" cars, devoted exclusively to the use of such lessees. During a part of the year defendants are unable to furnish all of the cars desired by coal operators along their lines, and at such times the available cars not specially consigned or restricted as to use are divided among the several coal companies according to the capacities of their several mines. But in such distribution the foreign railway fuel cars and the leased or "private" cars are excluded from consideration and are given to the coal companies to which they are consigned or assigned in addition to the full share of cars allotted to such mines in the proportionate distribution. Complainant alleges unjust discrimination against other coal operators along the

lines of defendants, in that such distribution of cars and such failure to count the foreign railway fuel cars and the leased or "private" cars gives the coal operators to whom such cars are consigned and assigned unwarranted advantages over other operators in the mining and marketing of coal. HELD: That a carrier should give to owner or lessee of private cars the use of such cars, and should also give to a coal company the foreign railway fuel cars consigned to it; but that such "private" and foreign railway fuel cars should, in the distribution of cars, be counted against the company to which delivered and such company should not be given, in addition to such delivery, a share of the system cars except when the number of "private" and foreign railway fuel cars so delivered to it is less than its distributive share of the available cars, including system cars, foreign railway fuel cars, and so-called private cars, in which event it should be given only so many of the system cars as are necessary, when added to the number of private and foreign railway fuel cars assigned to it, to make up its distributive share of the total available cars, including system cars, foreign railway fuel cars, and so-called private cars. R. R. Com. of Ohio et al. v. H. V. Ry. Co., 12 I. C. C. 398.

IMPORTANT CASES SINCE 1908

(b) Private cars and cars placed for railroad fuel loading in accordance with 12 I. C. C. 398, and 13 I. C. C. 451, will be designated as assigned cars. All other cars will be designated as unassigned cars. Northern West Virginia Asso. v. P. & L. E. R. R., 68 I. C. C. 167, 172.

(c) The Commission instituted an investigation with respect to the reasonableness and propriety of the present car distribution rules of carriers in so far as they apply to privately owned coal cars and cars furnished for railroad fuel coal, with a view of prescribing such just and reasonable rule or regulation as may appear to be necessary. Three classes of cars are involved: System cars, or cars of railroad ownership, set for loading upon the line of the owning carrier, or such as may be on its line of railroad and not owned by some specific shippers or restricted as to used cars for railway foreign fuel, which are delivered to another carrier consigned to particular mine operators for loading with fuel for the use of the delivering carrier and return to it; and private cars, which include cars owned or leased or subject to the exclusive control of particular persons, not carriers by railroad, who deliver them to the railroad for placement at designated mines for loading and subsequent transportation as desired by the private car owners. The coal to be transported in the private cars may or may not be intended eventually to be used for railroad fuel. The term "commercial mines" will be understood as referring to a mine which does not receive assigned cars. By the term "assigned cars" is meant cars to be used for railroad fuel only. It is recognized that the importance of the railroads in the distribution of coal and other commodities, and their general dependence upon bituminous coal in producing transportation, require that in some lawful way they may be assured of a steady supply of suitable coal. It is likewise generally admitted that, whatever means are adopted to secure such supply, emergencies will occur when the supply will fail unless the railroad is enabled by some means within the law to take sufficient coal ahead of less necessitous uses to keep the flow of traffic going as the public interest requires. There is no dissent from the proposition that confiscation of fuel coal by railroads is a practice to be avoided. It seems to be generally accepted that the public interest requires that the carriers shall not be subjected to unreasonable prices. Obviously a carrier should not be permitted to take advantage of a means provided by the public to insure an uninterrupted movement of traffic, as a means to coerce an unreasonably low price for fuel. HELD: In the distribution of cars for transportation of coal among the bituminous coal mines served by the respective respondents, whether located upon the line of a respondent or customarily dependent upon it for car supply, any rule, regulation or practice of the respondents whereby private cars or cars for the loading of bituminous coal for railway fuel purposes are placed at any such mine in excess of the pro rata allotment and distribution of cars for coal loading currently made to any other of such mines which do not receive private cars or cars for railway fuel and which are on the same division or district established by such respondent for the distribution of cars, is un-

just and unreasonably and unduly prejudicial. All cars should be distributed by such respondent to all mines on such district or division on a pro rata basis; and that if cars are assigned or consigned to any of such mines, and if they are placed at the mines to which they are assigned or consigned, they should be so placed that every mine on the same division or district should receive the same pro rata share of the total number of available cars, whether assigned, consigned, or unassigned, which are distributed to all mines on such division or district, and that all such assigned or consigned cars should be counted and charged against the mines at which they are placed in the same manner and to the same extent that unassigned cars are counted and charged. It is not intended that this finding shall preclude the Commission hereafter in the exercise of the emergency powers conferred upon it by paragraph 15 of section 1 of the act, from requiring the placement of cars for bituminous coal loading at any mine or mines in excess of the current percentage allotment made to mines generally upon the lines of the same carrier, or upon the same division, when the order or direction for placement shall so provide. Assigned Cars for Bituminous Mines, 80 I. C. C. 520.

(d) It is erroneous to assign coal cars to a mine on such a basis that no mine which had received private or fuel cars would have a right to receive any unassigned cars unless its share of the unassigned cars exceeded the number of private or fuel cars delivered to it. Clark Bros. Coal Mining Co. v. Pennsylvania R. Co., 238 Fed. 642.

(e) Following Assignment of Freight Cars, 57 I. C. C. 760, paragraph (12) of section 1 of the act HELD not in terms to prohibit practice of assigning cars for railway fuel and private cars to coal mines under limitations fixed in Hocking Valley Case, 12 I. C. C. 398, and Traer Case, 13 I. C. C. 451. Assigned Cars for Bituminous Coal Mines, 80 I. C. C. 520.

(f) Practice of respondents in assigning private cars, and system or foreign-line cars for railway fuel, to bituminous coal mines upon their lines not receiving assigned cars, found for future unjust and unreasonable, and unduly and unreasonably preferential of mines furnished such cars in excess of ratable proportion and discriminatory against and unduly prejudicial to such other mines not receiving assigned cars. Finding not to preclude Commission, in exercise of emergency powers under paragraph (15) of section 1 of the act, from requiring placement of cars for such loading at mines in excess of percentage allotment to mines generally upon lines of same carrier, or upon same division. Assigned Cars for Bituminous Coal Mines, 80 I. C. C. 520.

(g) The private-car owner has no right to demand that his cars be transported over lines of a carrier which has not consented thereto. Obligation of furnishing an adequate supply of equipment by statute rests upon carrier, and does not rest upon shipper. The duty can not be transferred to nor required of shipper. Assigned Cars for Bituminous Coal Mines, 80 I.C.C. 556.

(h) Though railroad carriers have charter duties as to transportation of privately owned cars, such obligations can not defeat power of Congress to compel equality of treatment of shippers in interstate commerce. Assigned Cars for Bituminous Coal Mines, 80 I. C. C. 556.

(i) The use of private cars by railroad carriers has been recognized by Congress, which has provided for control and use of such equipment by the Commission, under provisions of the act, by means of mandate addressed to carriers subject to the Commission's jurisdiction. The Commission does not deal with private-car owner as such. Assigned Cars for Bituminous Coal Mines, 80 I. C. C. 556.

(j) When carrier permits use of a private car upon its rails, it is responsible for manner in which service is conducted in that car, and car becomes in all respects as if it were one of general stock of those owned by carrier, and subject to same liabilities and responsibilities as to use in interstate transportation. Assigned Cars for Bituminous Coal Mines, 80 I. C. C. 557.

(k) Carrier, in permitting use of private car over its lines, must, at its peril, see that use of the vehicle does not permit, excuse, or justify discrimination, preference, or advantage in favor of owner of the private car, regardless of present ability of carrier to furnish on demand an adequate supply of equipment needed for transportation. Assigned Cars for Bituminous Coal Mines, 80 I. C. C. 557.

Ruttle v. P. M. R. R. Co., 13 I. C. C. 179, 185; Rail and River Coal Co. v. B. & O. R. R. Co., 14 I. C. C. 86, 91, 92; Hillsdale Coal & Coke Co. v. P. R. R. Co. 19 I. C. C. 356, 365; Jacoby & Co. v. P. R. R. Co., 19 I. C. C. 392; Majestic Coal & Coke Co. v. I. C. R. R. Co., 162 Fed. 810, 811; U. S. v. B. & O. R. R. Co., 165 Fed. 113, 126; In Re Irregularities in Mine Ratings, 25 I. C. C. 286, 297; Deposit of $10 for Each Live Poultry Car Ordered, 66 I. C. C. 653, 656.

§14. Foreign Cars.

CASES 1887-1908

(a) Foreign cars must be counted in quota furnished mines. Railroad Commission of Ohio v. Hocking Valley R. Co., 12 I. C. C. 393.

IMPORTANT CASES SINCE 1908

(b) All cars tendered by the Union Pacific R. R. for the movement of grain must be counted as cars of the Union Pacific Company. Nebraska-Iowa Grain Co. v. U. P. R. R. Co., 15 I. C. C. 90, 96.

(c) Where defendant carrier furnished a shipper his full quota of available cars, the latter cannot complain of unjust discrimination by reason of the fact that the cars furnished were secured from other carriers, while those supplied to competitors belonged to the defendant itself. Peale, Peacock & Kerr v. C. R. R. Co. of N. J., 18 I. C. C. 25, 34.

(d) Upon investigation instituted on Commission's own motion, HELD: Practice of respondents in assigning private cars, and system of foreign-line cars for railway fuel, to bituminous coal mines in excess of ratable share distributed to mines upon their lines not receiving assigned cars, found unjust, unreasonable and unduly and unreasonably preferential of mines furnished such cars in excess of ratable proportion, and discriminatory against and unduly prejudicial to such other mines not receiving assigned cars. Assigned Cars for Bituminous Coal Mines, 80 I. C. C. 520.

(e) Practice of assigning private cars, and system of foreign-line cars for railway fuel, to bituminous coal mines in excess of ratable share distributed to bituminous mines upon their lines not receiving assigned cars, found unjust and unreasonable, and unduly and unreasonably preferential of mines furnished such cars in excess of ratable proportion and discriminatory against and unduly prejudicial to such other mines not receiving assigned cars. Finding not to preclude Commission, in exercise of emergency powers under paragraph (15), section 1 of the act, from requiring placement of cars for such loading at mines in excess of percentage allotment to mines generally upon lines of same carrier, or upon same division. Assigned Cars for Bituminous Coal Mines, 80 I. C. C. 520.

§14½. Joint or Junction Point Mines.

IMPORTANT CASES SINCE 1908

(a) Mines which are given a joint status by reason of their being served under trackage agreements are in the same category as junction-point mines, and any preference and advantage which such mines enjoy is not undue, as actual or constructive location upon two or more lines substantially differentiates their situation from that of local mines, situated on and served only by one railroad. Ridge Coal Mining Co. v. M. P. R. R. Co., 62 I. C. C. 259; Dering Mines Co. v. Director General, 62 I. C. C. 265.

(b) While a joint mine has an advantage over local mines because of the additional markets which it can reach by reason of its location on two railroads, such mine can not always avail itself of its advantage because of the practice in the coal business to make contracts for yearly periods. Neither is it possible at all times to order all cars from the carrier having the greater supply, as its contracts may also require that shipments be made by the line having the lesser supply. It frequently happens that the joint mine receives a less car supply than the local mine situated on the road having the greater supply. Fairmont & Cleveland Coal Co. v. B. & O. R. R. Co., 62 I. C. C. 269, 275.

(c) A mine which is accorded a joint status by means of a trackage agreement is in the same category as a junction-point mine, and a carrier is not chargeable with undue prejudice because it extends its service to certain mines, either by extension of its rails or undue trackage agreements, thereby giving them the advantage of a joint or junction point status, while declining to make other extensions or trackage agreements. Benton Coal Mining Co. v. C., B. & Q. R. R. Co., 63 I. C. C. 396, 399.

(d) The service of a mine by a carrier under a trackage agreement is, in practical and legal effect, the substantial

equivalent of an extension of its rails to the mine. Benton Coal Mining Co. v. C., B. & Q. R. R. Co., 63 I. C. C. 396, 399.

(e) Trackage agreements can not be used as a cloak to cover unjust discrimination and where such arrangements are made they are to be condemned. Benton Coal Mining Co. v. C., B. & Q. R. R. Co., 63 I. C. C. 396, 399.

(f) In the matter of car supply and other transportation services, joint mines are treated by carriers the same as junction-point mines, and consequently are able to draw cars from two or more roads, while a local mine is dependent exclusively for car supply on the one line serving it. The advantages accruing to the joint mines are a better car supply in times of car shortage due to their ability to draw cars from more than one line, additional territory in which to market their products, and additional routes in reaching points available by one road. Iowa Railroad Commissioners v. Director General, 63 I. C. C. 405.

(g) Complainants attacked defendant's rules, regulations and practices governing the distribution of coal cars to complainant's mines served jointly by two or more roads during car shortage periods since October, 1918, as resulting in a smaller share of empty coal cars to complainant's mines than was distributed to its competitors; and have been unreasonable, unduly preferential and unduly prejudicial. In 62 I. C. C. 269, the Commission considered rule 4, Car Service Circular C. S. 31 Revised, and found that rule to be unreasonable and unduly prejudicial to joint mines to the extent it limited the aggregate orders for cars of the joint mine to 100 per cent of its gross daily rating and ordered the rule as laid down in 25 I. C. C. 286 to be followed, namely, that on days when the joint mine orders cars from only one carrier it shall be furnished cars based on its full rating from that carrier, and on days on which it orders cars from both carriers its rating on each of such carriers for the purpose of ordering cars should be 75 per cent of its full rating, subject to the limitation that on no day shall it be furnished with cars in excess of its maximum rating. The term local mine will be used to designate a mine situated on and served by only one railroad. The term joint mine will denote a mine served by two or more railroads with their own rails or a mine situated on one railroad, but actually served by one or more additional carriers under trackage agreements or switching absorption arrangements. The complaints herein are directed against the last sentence of rule 4, which limits the joint mine orders for cars from all the carriers to the gross daily rating of the mine. The rating of a local mine is determined by taking the total tonnage shipped by the mine during the preceding month over the carrier serving the mine, dividing it by the number of hours worked in producing it, and multiplying the quotient by the number of hours in the recognized work day. A rating so determined is called the daily rating, as distinguished from the gross daily rating which applies to a joint mine, and which is determined in a similar manner, but by taking the total tonnage shipped over the lines of all the carriers serving the mine. It is admitted by all that the joint mine enjoys advantages not possessed by the local mine, and has the right to so place its orders as to avoid, if it can, embargoes and congestion of traffic on particular roads. It has available a more extensive and more varied market for its coal. It may at times be able to dispose of its product upon the second line of railroad, while the mine local to the first road is unable to market its output. In case of car shortage the joint mine is able to select the outlet which affords the best and most liberal means of transportation. These are important advantages to which the joint mine is entitled and in the reasonable enjoyment of which it should be protected. HELD: The present facts considered, the Commission does not conclude the rule attacked is in principle unreasonable or unduly prejudicial, without prejudice to such determination of the questions before the Commission in the general proceeding, complaint dismissed. Bell & Zoller Co. v. B. & O. S. W. R. R., 74 I. C. C. 433.

(h) The mine-rating principles laid down in In Re Irregularities in Mine Ratings, 25 I. C. C. 286, were intended as a limitation upon the practice of the carrier in that proceeding, and not as a rule to be applied in places where they would not suitably and properly meet local conditions. The effect of the general application of that decision has been to encourage the greater development of joint mines over local mines, with a resulting duplication of trackage, a waste of car-

days, and dissatisfaction among mine labor through inequalities in opportunities for working time and wages thus produced. The rule should not be extended. Bell & Zoller Co. v. B. & O. S. W. R. Co., 74 I. C. C. 433.

(i) The term "joint mine" denotes a mine served by two or more railroads with their own rails or a mine situated on one railroad, but actually served by one or more additional carriers under trackage agreements or switching-absorptions agreements. Bell & Zoller Coal Co. v. B. & O. S. W. R. R., 74 I. C. C. 433, 435.

(j) A joint mine enjoys advantages not possessed by a local mine, and has the right to so place its orders as to avoid embargoes and congestion of traffic on particular roads. It has available a more extensive and more varied market and may dispose of its product upon the second line of railroad, while the mine local to the first road is unable to market its output. In case of car shortage, the joint mine is able to select the outlet which affords the best and most liberal means of transportation. These are important advantages to which the joint mine is entitled and in the reasonable enjoyment of which it should be protected. Bell & Zoller Co. v. B. & O. S. W. R. Co., 74 I. C. C. 438.

(k) An order of the Interstate Commerce Commission, establishing a rule under which in times of shortage of coal cars a "joint" mine, situated on the lines of two railroads, could order cars from both only on the basis of 100 per cent. of its rated capacity, while a "local" mine, situated on one only of such lines and having a like capacity, could order an equal number of cars, HELD discriminatory, in that it deprived the first mine of an advantage to which it had a legal right. New River Co. v. Chesapeake & O. Ry. Co., 293 Fed. 460.

ALL OTHER CITATIONS

In Re Irregularities in Mine Ratings, 25 I. C. C. 286, 289, 293; Empire Steel & Iron Co. v. Director General, 62 I. C. C. 157; Hillsboro Coal Co. v. C., C., C. & St. L. Ry. Co., 63 I. C. C. 401; Hillsboro Coal Co. v. C., C., & St. L. Ry. Co. 81 I. C. C. 216.

§15. Railway Fuel Cars.

CASES 1887-1908

(a) A carrier should give to owner or lessee of private cars the use of such cars, and should also give to a coal company the foreign railway fuel cars consigned to it, but that such "private" and foreign railway fuel cars should, in the distribution of cars, be counted against the company, which should not be given, in addition to such delivery, a share of the system cars except when the number of "private" and foreign railway fuel cars so delivered is less than its distributive share of the available cars, including system cars, foreign railway fuel cars, and so-called private cars. Railroad Commission of Ohio v. Hocking Valley Ry., 12 I. C. C. 398.

IMPORTANT CASES SINCE 1908

(b) An arbitrary allowance of system cars to an operator for another reason than encouraging development is unlawful discrimination unless justified by special conditions. Rail & River Coal Co. v. B. & O. R. R. Co., 14 I. C. C. 86, 93.

(c) On January 1, 1906, the defendant divided all coal cars into two classes, which it designated as "assigned" and "unassigned" cars. In the former class were its own fuel cars, foreign railway fuel cars, and individual or private cars, loaded by their owners or assigned by their owners to particular mines. The rule then made effective and still in force provides that the capacity in tons of any "assigned" cars shall be deducted from the rated capacity in tons of the particular mine receiving such cars, and that the remainder is to be regarded as a rated capacity of the mine in the distribution of all "unassigned" or system cars. HELD: That a mine owning individual cars would be able to ship out more coal than its competitor, while under the rule approved by the Commission (which treats all cars, whether individual cars or owned by the carrier or assigned by other carriers for fuel, as available car equipment as a whole, distributable pro rata to shippers desiring their use), no shipper is discriminated against, and, therefore, that the rule of the defendant is unlawful and discriminatory. Hillsdale Coal & Coke Co. v. P. R. R. Co., 19 I. C. C. 356, 364.

(d) Complainant alleged that in time of car shortage defendant furnished particular mines on certain days cars for loading with coal purchased by defendant for railway fuel; that the cars so furnished are not counted against the rates capacities of the mines receiving them,

and that this practice is unreasonable, and unduly prefers such mines to the undue prejudice and disadvantage of mines which do not sell coal for railway fuel. Each mine is given a rating, based upon its average requirements, and the available supply is distributed in accordance with the ratings so established. The chief cause for complaint has been the practice of the carriers not to count against a particular mine privately owned cars assigned to it cars assigned to be loaded with fuel for the use of other railways, and cars to be loaded with fuel for the carrier's own use. These cars are called, respectively, private cars, foreign railway fuel cars, and system fuel cars, and are known collectively as "assigned cars." At the hearing complainant admitted that the practice complained of had been discontinued and that defendant's practices at that time satisfactory. During the period of Federal control the conditions surrounding the matter of car service were so different from those theretofore existing that any action based on this record was then deemed inexpedient. Uniform mine rating and car distribution rules were promulgated by the Railroad Administration, which seem to have been generally satifactory. On April 15, 1920, the Commission issued a notice to carriers and shippers that the rules issued by the Railroad Administration be continued in effect The specific cause of complaint in this issue had ceased to exist at time of hearing and its future recurrence is expressly precluded by Section 402 of the Transportation Act. HELD, Complaint dismissed. Southern Appalachian Coal Operators' Asso. v. L. & N., 58 I. C. C. 348.

(e) When a railroad company becomes a purchaser of coal upon the lines of a connection, and ships it to itself as consignee, it is entitled to the same consideration as any commercial shipper or consignee and no more, and this is true when the shipment moves partly over the rails of the carrier that is in fact the shipper or consignee. Assigned Cars for Bituminous Coal Mines, 80 I. C. C. 520, 546.

(f) A carrier in times of coal car shortage in making car distribution must charge against the percentage of a particular shipper its fuel cars, and the foreign fuel cars assigned to such shipper, and a failure to do so constitutes undue discrimination under the act as amended June 29, 1906. (McDowell, J., dissenting.) U. S. v. B. & O. R. R. Co., 165 Fed. 113, 126.

(g) Private coal cars, belonging to shippers and used by carriers in the transportation of commodities, and the fuel cars of foreign railroads must be treated as a part of the total equipment of the carriers in determining the percentage of cars due each shipper in the matter of car distribution. Fuel cars of the carriers, used only by themselves in transporting coal for their own use, are not, however, to be treated as a part of their available car supply for purposes of distribution to shippers. Such fuel cars are, however, to be taken into account in determining the producing capacity of a particular coal mine and the coal sold to a carrier by a mine and shipped to it in the carriers' fuel cars is not to be counted in arriving at the mine's producing capacity, for the purpose of determining the percentage of cars to which it is entitled. The order of the Interstate Commerce Commission, in 13 I. C. C. 451, is modified in so far as it counted the fuel cars of carriers in arriving at the total available car supply. C. & A. R. R. Co. v. I. C. C., 173 Fed. 930, 933, reversed, I. C. C. v. Ill. Cent. R. R. Co., 215 U. S. 452, 30 Sup. Ct. 155, 54 L. Ed. 280.

(h) Following Assignment of Freight Cars, 57 I. C. C. 760, paragraph (12), section 1 of the act, HELD not in terms to prohibit practice of assigning cars for railway fuel and private cars to coal mines under limitations fixed in Hocking Valley Case, 12 I. C. C. 398, and Traer Case, 13 I. C. C. 451. Assigned Cars for Bituminous Coal Mines, 80 I. C. C. 520.

ALL OTHER CITATIONS

Traer v. C. & A. R. R. Co., 13 I. C. C. 451, 456, 459; Sustained in I. C. C. v. Ill. Cent. R. R. Co., 215 U. S. 452, 477, 30 Sup. Ct. 155, 54 L. Ed. 280, reversing 173 Fed. 930, enjoining the Commission's order; Coal and Oil Investigation, 31 I. C. C. 193, 218; National Coal Co. v. B. & O. R. R., Unrep. Op. A-617; Southern Appalachian Coal Operators' Asso. v. L. & N., 58 I. C. C. 348.

§16. Pooling by Shipper.

IMPORTANT CASES SINCE 1908

(a) Where a coal company owns and operates several openings, and is entitled in the daily distribution to a certain number of cars for each mine, it will not be prohibited from grouping or pooling

all these cars, or any portion of them, at one mine, instead of using them at each mine in accordance with their respective percentages, in the absence of definite evidence to show that such practice results in fact in undue and unlawful discriminatiton. Rail and River Coal Co. v. B. & O. R. R. Co., 14 I. C. C. 86, 97.

(b) Organization and operation of the Tidewater Coal Exchange, created by the U. S. Fuel Administrator for the handling of bituminous coal through the tidewater piers by establishment of pools. Wholesale Coal Trade Asso. v. Director General, as Agent, 58 I. C. C. 15, 18, 19.

(c) Under the pooling arrangement the rights of car ownership practically ceased and all the carriers were free to use cars for traffic to almost any point, although the obligation of each carrier to balance interchange continued; that is, it was agreed that a connection must return a load for every empty it received. Avella Coal Co. v. P. & W. V., 58 I. C. C. 313, 320.

(d) Contention that Pittsburg & W. Virginia Ry. Co. and West Side Belt R. R. Co. should be regarded as separate and distinct for the purpose of car distribution not sustained. Although incorporated under individual charters and endeavor made to allocate expenses and revenues, record clearly establishes that they were operated as one road and were so clearly regarded by their officials and connections, and by the car pool formed to control the distribution of cars during the war emergency. Avella Coal Co. v. P. & W. Va. Ry. Co., 59 I. C. C. 313, 317.

ALL OTHER CITATIONS

McCaa Coal Co. v. C. & C. Ry. Co., 33 I. C. C. 128, 131.

§17. Tank Cars.

See Supra §10; Tank Cars.

IMPORTANT CASES SINCE 1908

(a) Circumstances existed which prevented the economical use by plaintiffs of tank cars for the hauling of oil and they, therefore, made no demand of defendant carriers for the use of such cars. Their competitors used the tank cars. The defendants did not refuse to furnish them to plaintiffs. Plaintiffs shipped oil in barrels and defendants made a charge, which was not unreasonable, for the weight of the barrel package. They made no such charge for the weight of the tank cars. HELD: Since plaintiffs made no demand for the tank cars, there was no unjust discrimination against them in favor of their competitors. (Moody and Harlan, JJ., dissenting.) Penn Refining Co. v. W. N. Y. & P. R. R. Co., 208 U. S. 208, 221, 28 Sup. Ct. 268, 52 L. Ed. 456.

(b) Where a connecting carrier receives carloads of oil consisting of tank cars and carloads made up of barrel packages from the initial carrier, and merely joins with the initial carrier in a joint rate in itself reasonable, it is not liable for the alleged discriminatory acts of the initial carrier in charging for the weight of the barrel package used in shipments made by one class of shippers while at the same time making no charge for the weight of the tank cars against a competing class of shippers using such method of shipment. Penn. Refining Co. v. W. N. Y. & P. R. R. Co., 208 U. S. 208, 222, 28, Sup. Ct. 268, 52 L. Ed. 456.

§17a. Character of Shipment.

CASES 1887-1908

(a) If from peculiarity of traffic, carrier cannot supply such stock, and consignors supply it for themselves, carriers must not allow its deficiences in this particular to be made means of putting at disadvantage those who make use in same traffic of facilities it supplies. Rice v. Louisville & Nashville R. Co., 1 I. C. R. 722.

(b) When two methods for the transportation of an article of merchandise are nominally offered by the carrier, for only one of which it offers rolling stock, and for the other of which the shipper must supply his own rolling stock at considerable expense, it cannot be said that the resort to the latter by the shipper is so far a matter of choice that he has no concern with the charges for transportation in the other mode. The man of small means being compelled to make this choice, by reason of the carrier's failure to supply rolling stock for the other mode, has a right to insist that the charges for transportation in the two modes shall be relatively just and equal. Rice v. Louisville & Nashville R. R. Co., 1 I. C. R. 722.

(c) Making certain charges for the transportation of coal shipped in carloads when the coal is loaded by tipple, and exacting a higher charge when the coal is loaded in some other way, is unrea-

sonable and constitutes an unjust discrimination. Glade Coal v. Baltimore & O. R. Co., 10 I. C. C. 226.

(d) Complainant attacked as discriminatory rule of defendants to furnish no cars to be loaded with coal from wagons, though furnishing cars to competitors at the same time who load coal at tipples. During the anthracite coal strike of 1902, which caused an extremely large demand for bituminous coal and great increase in the price of that coal, complainant arranged for the purchase and sale of the surplus product of certain bituminous mines, called surface or country mines, and for hauling the coal by wagons to stations or sidings and loadings upon defendant's cars. Under normal conditions this could not be done at a profit. Complainant demanded and received several cars during the month of November, 1902. In that month defendant issued a rule limiting its coal cars to mines having track connection with its road, and this rule was kept in force during the strike period. The demand for coal throughout the strike resulted in the greatest tax upon the railroad equipment and in the congestion of lines, yards and terminals. The mines loading by tipple and by track connection received far less than their usual car supply. Under those and other attendant conditions, defendant's temporary rule, confining its comparatively few available cars to mines generally in operation, where quick loading could be accomplished, and declining to permit its sidings or switches to be further congested by loading coal from wagons, not only by complainant, but many others temporarily engaged in the same pursuit, was calculated to hasten rather than retard the movement of coal for public use, and was not unreasonable or unjust. HELD: Refusal of defendant to furnish cars for the loading of coal from wagons not unjust or unreasonable, complaint dismissed. Thompson v. Pennsylvania R. R., 10 I. C. C. 640.

(e) Complainant alleged refusal of defendant to furnish cars to complainant for interstate shipment of corn from Leipsic, O., while it contemporaneously furnished cars to its competitors as unduly discriminatory. Complaint owned no elevators and were track loaders, that is, they loaded from wagons into the cars. Its competitors at Leipsic owned elevators and were furnished cars for their shipment. HELD: Discrimination was practiced against complainant, but evidence as to damages sustained was meager and complainant allowed additional time to furnish proof. Gallogly & Firestine v. C., H. & D. Ry., 11 I. C. C. 1.

(f) Complainant attacked failure of defendant to furnish cars on demand for shipment of hay and other produce, while furnishing cars to complainants' competitors. Complainant is located at Grover Hill, O. He was a track buyer; that is, he buys of neighboring farmers for delivery from wagons to cars, with a little storage room in sheds on his farm. His competitors were elevator operators at the same point. HELD: Complainant was unjustly discriminated against, reparation awarded. Eaton v. C., H. & D. Ry., 11 I. C. C., 619.

§18. Detention of Cars.

IMPORTANT CASES SINCE 1908

(a) Under a complaint charging shortage of cars, it appearing that during the period complained of there were at the mine of the complainant from day to day from one to twenty-five unbilled cars; that complainant handled lump coal and small coal; that it found a ready market for the lump coal, but not for the small coal, and was obliged to keep the latter on hand for a longer time; and that unbilled cars were used for the storage of small coal. HELD: Complainant failed to make out a case of shortage of cars, since it had no right to require defendant to furnish cars for the storage of its small coal, and but for that purpose defendant was supplying an abundance of cars. Traer v. C., B. & Q. R. R. Co., 14 I. C. C. 165, 168.

(b) Cars which are partially loaded and remain over until next day should be charged against the mine loading the same as if such cars were empty. McCaa Coal Co. v. C. & C. Ry. Co., 33 I. C. C. 128, 132.

§19. When Counted for Loading.

IMPORTANT CASES SINCE 1908

(a) A rule that a car placed too late for loading will not be counted as available for loading until the following day is not unlawful. Hillsdale Coal & Coke Co. v. P. R. R. Co., 19 I. C. C. 356, 367.

(b) Cars which are partially loaded and remain over until the next day should be charged against the mine loading the same as if such cars were empty. McCaa Coal Co. v. C. & C. Ry. Co., 33 I. C. C. 128, 132.

§20. Car Famine.

CASES 1887-1908

(a) At times of special pressure, regular customers are not entitled to preference over occasional ones in obtaining cars. Riddle v. New York, L. E. & W. R. Co., 1 I. C. R. 787.

(b) When equipment of carrier usually applied to transportation of particular article is not equal to demand, carrier must appropriate other cars to such service. Riddle v. New York, L. E. & W. R. Co., 1 I. C. R. 787.

(c) It is the duty of a common carrier to provide adequate equipment for the business of its line; if in time of special pressure some one must wait, the annoyance must be distributed with all possible equality, and in this respect regular customers are not entitled to preference over occasional customers. Riddle, Dean & Co. v. N. Y., L. E. & W. R. R., 1 I. C. C. 787, 791.

(d) No unjust discrimination agair st complainant shippers in favor of other shippers is shown by evidence that, during the anthracite coal strike, defendant railroad companies gave a preference to bituminous coal, and also to live stock and perishable freights, which caused delay in the transportation of complainant's hay, where only two cars "slipped through" to destination, after the receipt and before the delivery of complainant's car, showing that the embargo was practically maintained and enforced. S. S. Daish & Sons v. Cleveland, A. & C. R. Co., 9 I. C. C. 513.

(e) Under the conditions that attended the anthracite coal strike of 1902, and which resulted in a great demand for bituminous coal, subjecting railroad equipments to a great tax and causing congestion of lines, yards, and terminals, the defendant's temporary rule limiting its coal cars to mines having track connection with its road, thereby confining its comparatively few available cars to mines generally in operation, where quick loading could be accomplished, and declining to permit its sidings or switches to be further congested by loading coal from wagons, was calculated to hasten, rather than retard, the movement of coal for public use, and was not unreasonable or unjust. Thompson v. Pennsylvania R. Co., 10 I. C. C. 640.

(f) A regulation of the Southern Pacific Company to the effect that, in the time of car shortage, cars will be furnished to the various shippers in proportion to the amount of fruit picked and actually in the packing houses at the time of the demand for cars, although not so satisfactory as the so-called "crop holding rule" under which cars were distributed in proportion to the season's business done by the various shippers, is not unduly discriminatory. California Fruit Growers Exchange v. Southern P. Co., 12 I. C. C. 553.

(g) Complainants attacked as unreasonable a regulation of the S. P., to the effect that, in times of car shortage, cars will be furnished to the various shippers in proportion to the amount of fruit picked and actually in the packing houses at the time of the demand for cars. Prior to April 1907, cars were distributed in proportion to the season's business done by the various shippers. This so-called "crop-holding" rule is still in force over the Santa Fe, but in the case of the S. P., has been displaced by the "house rule." HELD, the situation can not be adequately covered by any fixed inelastic regulation. Although the crop holding rule appears to work more perfectly to the satisfaction of shippers and carriers, nevertheless the house rule does not appear to be unduly discriminatory. Complaint dismissed. California Fruit Growers Exchange v. S. P.. Co., 12 I. C. C. 553.

(h) Commission instituted an investigation as to car shortage and other insufficient transportation facilities in the Northwest, on the Pacific coast, and in the southwest. COAL SHORTAGE IN NORTH DAKOTA. It is fair inference from all the testimony that the real cause of the coal scarcity in North Dakota was such an abundance of westbound traffic at the head of the Lakes that cars were not available in the congested state of that terminal for the carrying of coal to North Dakota—a comparatively short haul for a low class commodity. The Commission has gained indisputable proof of an agreement between coal dealers to maintain prices and to boycott all who do not so agree; but there is no evidence at all justifying the contention that this combination is chargeable with the coal shortage prevailing nor that the railroads were party in any way to such a conspiracy. GRAIN SITUATION IN THE NORTHWEST. The G. N., and N. P., roads did not suffer by reason of diversion of their cars

to other roads; the balance between these and other railroads was in favor of the G. N., to extent of 2,000 cars and of the N. P., to extent of 6,000 cars; both roads had more equipment than they had last year, when cars were furnished more promptly, better time was made, and less complaint was made by shippers. There was less evidence of inability to supply cars for loading at competitive points than at noncompetitive points; preference was shown to classes of freight calling for a long haul; the elevators at terminals made no delays in freeing equipment; from the standpoint of public service the best possible use of equipment is not secured by a policy of operation which subordinates time of transportation to tonnage transported; improvements under way and contemplated will greatly enlarge the capacity of the roads to handle their growing volume of freight, but such improvements will not relieve the needs of the Northwest unless the roads pursue a policy of operation aimed specifically to meet the needs of the grain raiser. PROPOSED REMEDIES. There is no division among railroad men as to the necessity for greatly increasing terminal facilities and for adopting new methods of handling freight at the larger terminals. This congestion has its effect upon all lines of railroad reaching such terminals, for once a terminal contains more traffic than it can promptly handle and deliver, it acts as a dam which floods a constantly increased area behind it. One of the causes of congestion at terminals is the reconsignment privilege granted on many of the principal articles of freight. Another cause is warehousing in cars. If it be true that any considerable part of the shortage of car service from which the country is suffering is due to the excessive and unnecessary time allowed by railroads, it is manifestly within the power of the railroads themselves to correct such abuse. The most conservative critic must hold that proper co-ordination of departments within individual roads and intelligent co-operation between independent roads, within entirely lawful lines, would leave far less foundation for criticism of car service than may at present be justly made. Car Shortage-Insufficient Transportation Facilities, 12 I. C. C. 561.

IMPORTANT CASES SINCE 1908

(i) It may well happen that if a carrier can supply during the major part of the year all the cars required by the coal mines located on its line, the most satisfactory basis for distribution during short and infrequent periods of car shortage would be furnished by the actual results of operation during the time of full supply. Traer v. C. B. & Q. R. R. Co., 14 I. C. C. 165, 169.

(j) During the period of car shortage complainant unable to obtain sufficient number of cars at congested grain elevators for outbound movement. Rules governing assessment of demurrage on grain shipped into transit points on local billing and there held for unloading into elevators, not shown unreasonable or unduly prejudicial. Armour Grain Co. v. Director General, 57 I. C. C. 398.

(k) In times of car shortage failure to furnish cars for outbound movement constitutes no reason for refraining from assessing demurrage charges on inbound shipments. Armour Grain Co., v. Director General, 57 I. C. C. 398, 408.

(l) Acute car shortage has taxed carriers to their utmost capacity and it may be questioned that the selfish interests, either of the roads serving the steel manufacturing sections of the east and middle west or of the transcontinental carriers, would lead them to offer competition or discourage the forwarding via rail-and-ocean routes, through eastern ports, of steel products hitherto moving all-rail to the Pacific coast. Application of United States Steel Products Co., 57 I. C. C. 513, 516.

(m) Owing to the long continued shortage of equipment, due to war conditions, the railroad companies have not recently leased any cars for live fish shipments and have attempted to withdraw all cars from that service. Lyons Co. v. Adams Exp. Co., 53 I. C. C. 633, 634.

(n) That periods of congestion and car shortage may occur at times and thus render temporarily unavailable the customary through routes provided by carriers is anticipated in the act, under which the Commission is authorized to establish temporary through routes, either upon application of shippers or upon its own initiative, without complaint and without the delays incident to formal hearing. Boston Wool Trade Asso. v. A. T. & S. F. Ry. Co., 62 I. C. C. 228, 230.

§21. Reward from Prompt Release.

IMPORTANT CASES SINCE 1908

(a) Defendant carrier, to encourage a prompt discharge and return of coal cars, put in force a rule, by which all coal shippers who during the month averaged not more than five days' detention of the cars assigned to them were granted a premium of 50 per cent additional to their car supply for the next month. HELD, such rule constituted an unjust discrimination in the matter of car distribution under the Act as amended June 29, 1906, the proper method being to assess demurrage charges for delay in unloading. (McDowell, J., dissenting.) U. S. v. B. & O. R. R. Co., 165 Fed. 113, 128.

§21½. Shippers on Branch Lines.

See Advance Rates §12; Branch Lines; Evidence §37.

CASES 1887-1908

(a) Complainant attacked discrimination in furnishing cars for transportation of coal and demanding pecuniary damages. A railroad chartered by the state of Tennessee owns a short road wholly within that state, but never owned any rolling stock nor operated its road. The road was used and operated as a means of conducting interstate traiffc in coal by companies owning connecting interstate roads. HELD, that the short road is one of the facilities and instrumentalities of interstate commerce, and as such is subject to the act. In respect to such traffic the duties of such a road to the public are the same, without respect to ownership, corporate control the authority or means of its construction. As one of the instrumentalities of shipment or carriage it must be accessible to all interstate shippers on equal and reasonable terms. The public can not be deprived of this right by separate or joint action of defendants. The traffic in question is interstate traffic. The companies conducting it use this short road as a facility to such traffic. They can not be permitted to use it for purposes of discrimination between mine owners on its line. The claim for pecuniary damages presents a case at common law, in which defendants are entitled to a jury trial. Heck v. East Tennessee Virginia & Georgia R. Co., 1 I. C. C. 775, 777.

IMPORTANT CASES SINCE 1908

(b) Complainant alleged that five of its mines are situated with reference to the C. B. & Q., the same as mines at Logan, Ill., on the I. C., and at Bush and Royalton, Ill., on the M. P., and that it was subjected to undue preference and disadvantage because the Burlington serves the mines at Logan, Bush and Royalton but refuses to serve complainants mines; it asks that the Marion & Eastern be permitted to construct and maintain at its own expense a connection between the rails of the Burlington and I. C., at a point west of Marion where their lines cross; to require the I. C., to permit the Eastern the use of the I. C. tracks between Marion and the proposed connection; to require the Burlington to allot empty coal cars to complainants mines, and to require the establishment of the same group rates from complainants mines to destinations on the Burlington as are accorded other mines served by that line. The real purpose of this proceeding is to secure for the city of Marion a connection with the Burlington and for the complaining coal companies car service

from that carrier. The line of the Eastern extends for a distance of about 10 miles from Pittsburgh, Ill., to a point 1.1 miles east of Marion, where it connects with the I. C. From that point it operates, under a trackage agreement over the I. C., to Marion. The Burlington does not reach Marion, but crosses the I. C., overhead approximately two miles west of that point. About 95 per cent of its traffic is coal. It serves directly all of the mines of the complainants. Due to arrangements previously secured complainants mines have been treated by the I. C., M. P., and C. & E. I., in the matter of rates and car service as though located on their own rails. In placing empty cars to, and receiving loaded cars from, the Eastern and I. C., uses a portion of the track of the latter over which it has trackage rights. The evidence indicates that the Burlington furnishes better car service than the M. P., C. & E. I., or I. C., but it has not been able at all times to satisfy the requirements of the mines which it serves. The Burlington, by trackage right, is enabled to reach the mines at Logan and Royalton, on the I. C., and M. P., and the I. C. and M. P. reach certain mines on the Burlington in the same manner. HELD, public convenience and necessity do not require the extension of the rails of the Eastern as proposed. HELD, the Eastern tracks are situated more than two miles east of the Burlington and it is not a lateral branch line, within the meaning of paragraph 9 of section 1 of the act, complaint dismissed. Cameron Coal Co. v. Marion & Eastern R. R. Co., 63 I. C. C. 434.

(c) Under section 1 of the Act, coal shippers located on branch or lateral lines are entitled to the same kind of treatment as is accorded to those whose mines are located on the main line of the carrier, and in the matter of car distribution the allotment should be made to such branch or lateral lines on the same basis as to shippers on the main lines. (McDowell, J., dissenting.) U. S. v. B. & O. R. R. Co., 165 Fed. 113, 131.

ALL OTHER CITATIONS

Wright v. C. & N. W. Ry. Co., Unrep. Op. A451; Gallatin Coal & Coke Co. v. L. & N. Ry., 55 I. C. C. 491.

B. Rating of Mines.

§21¾. In General.

IMPORTANT CASES SINCE 1908

(a) Mine ratings should be based upon the ability to produce coal, and the commercial capacity to dispose of it, and if these elements fluctuate from time to time the ratings should, periodically, be changed. Northern Coal Co. v. M. & O. R. R., 55 I. C. C. 502, 510.

(b) Paragraph (12) of section 1 of the Interstate Commerce Act does not change the rule of law as laid down in the Hocking Valley Case, 12 I. C. C. 389 and the Traer Case, 13 I. C. C. 451, governing distribution of cars in accordance with the relative rating of the mines, but states in statutory form what had heretofore been the law pursuant to the decisions of the Commission and the Supreme Court. Assignment of Freight Cars, 57 I. C. C. 760, 766.

(c) Complainant attacked rules, regulations and practices of defendants in the distribution of cars for the transportation of coal from its mines to interstate destinations as unjust, unreasonable and unduly prejudicial. The defendants treated the joint mines the same as local mines in the distribution of cars. They had no information of the number of cars ordered from the other carrier. So far as they were concerned the joint mine operator could order and secure 100 per cent car supply from each road. Effective Oct. 10, 1918, Car Service Circular CS-31 became effective and under rule 2 prescribed a method for ordering cars for joint mines. On March 2, 1920, the Commission issued a notice to carriers and shippers recommending that this Circular be continued in effect. For purposes of economy the C. & O. arranged to serve certain of the mines located on its rails as agent for the Virginian, and the Virginian in turn agreed to place C. & O. cars at mines located on its rails. Each road retained the right to perform the service for itself in case complaint was made of the service performed by the other. Each of the mines is shown as being located on each of these roads and the rates are published as applicable by each. While it is true that the joint mine has an advantage by reason of its location on two railroads because of additional markets which it can reach, it is likewise true that the joint mine is not always in position to avail itself of its alleged advantage because of the practice in the coal business to make contracts for yearly periods beginning with April 1st. Neither is it possible at all times for the joint mines to order all their cars from the carrier having the

greater car supply. HELD, rule R Circular also require shipments to be made by the line having the lesser car supply in order to meet current obligations. It frequently happens that the joint mine receives a less car supply than the local mine situated on the road having the greater car supply. Held rule R. Circular CS-31 Revised, unreasonable and unduly prejudicial to joint mines to extent it limits the aggregate orders of the joint mine to 100 per cent of its rating from both roads; that for the future during periods of car shortage defendants should distribute cars to the joint mines on their lines here considered on the basis outlined in 25 I. C. C. 286. Defendants will promptly amend their car service rules so as to conform with the findings. Fairmont & Cleveland Coal Co. v. B. & O., 62 I. C. C. 269.

(d) Whatever tends to inflate the nominal mine ratings beyond the amount which can normally be produced and shipped is distinctly counter to the public interest. Bell & Zoller Coal Co. v. B. & O. S. W. R. R., 74 I. C. C. 433, 442.

(e) Modified mine run defined as coal as it comes from mine without preparation other than being passed through a round perforated screen having apertures not greater than 8 inches in diameter. Western Coal Rates, 80 I. C. C. 383, 450.

ALL OTHER CITATIONS

McCaa Coal Co. v. C. & C. Ry., 33 I. C. C. 128; Gallatin Coal & Coke Co. v. L. & N. Ry., 55 I. C. C. 491, 492.

§22. Coke-oven Basis.

IMPORTANT CASES SINCE 1908

(a) Complainant, coal operator in the Pocahontas Flat Top coal district in West Virginia, attacked the "coke oven basis" method of car distribution applied by defendant and asked for the institution of the "capacity basis." In the early days in this district the land owners were desirous of having the coal screened and the slack manufactured into coke, under the belief that they would thereby increase the products of the district and enhance the value of their holdings. It was, therefore, arranged with defendant that the operators should construct a certain minimum number of coke ovens on their holdings, and that the available supply of cars should be distributed according to the proportion which the number of ovens erected by each operator bore to the entire number of ovens in the field. In the course of time the number of ovens erected far exceeded the number actually needed, and new ovens were built at an expense of some $500 each for the sole purpose of increasing the proportion of cars to the operator building same. After the field developed, certain portions thereof had no practical use for coke ovens, and were assigned cars on the basis of imaginary use for coke ovens, with the idea of giving said portions a supply of cars according to the capacity of their mines. Under the system attacked some of the operators were getting more cars than they needed, to move their coal, and others were getting less. During a certain period, when the defendant was able to supply all the cars needed by anyone, operators, who under the basis attacked were entitled to a smaller number of cars, actually made larger shipments of coal than operators entitled to a larger number. HELD, the coke oven basis should be discontinued and defendant should arrange for car distribution on a basis which would not result in unlawful discrimination between the various operators in the field. Powhatan Coal & Coke Co. v. N. & W. Ry. Co., 13 I. C. C. 69, 83, 86.

§23. Commercial Plus Physical Capacity.

IMPORTANT CASES SINCE 1908

(a) Defendant established a percentage basis of car distribution resting on the physical and commercial capacity of the mine. The physical capacity was determined by the thickness of the coal seam, the number of rooms or working places, the capacity of the underground tram-tracks, and the facilities for getting the coal out of the mine into the tipple, and from the tipple into cars. A fixed per diem value was assigned to a man's labor, taking into consideration the character of the seam; and the number of places in which a man could work was taken into account, regardless of the number of men actually employed. The actual requirements of the mine for cars were tested by shipments made by the mine, which factor was arrived at by taking the volume of shipments made by the mine during a period of free car supply, usually from April 1 to August 1, in each of two preceding years. In figuring the actual shipments, all shipments were included except shipments of fuel coal to defendant carrier. The physical capacity, the commercial capacity for the first year, and the commercial capacity for the second year were added together

and divided by three. The result obtained was the capacity basis for determining the percentage a particular mine was entitled to. HELD, this system was not shown to be unreasonable. Rail & River Coal Co. v. B. & O. R. R. Co., 14 I. C. C. 86, 95.

(b) In apportioning its coal car equipment the defendant adopts the following plan: to the physical capacity of the mine it adds its commercial capacity for one year only and divides the sum by two. The commercial capacity, however, is not based upon shipments made from a mine during a substantial period of free car supply, but upon the entire volume of shipments made from the mines throughout the preceding twelve months. The ratings are revised quarterly on Feb. ruary 1, May 1, August 1 and November 1. The rating of any particular operator will also be revised by the defendant upon request, regardless of the quarterly tests; thus the commercial capacity of each mine is brought up to date at each quarterly rating period by taking into consideration its new tonnage for three months and adding to it the tonnage of the preceding nine months previously used in the preceding rating. In this manner the defendant endeavors to follow up as closely as possible the fluctuations in the market, labor conditions and car supplies. By combining the commercial capacity of a mine thus ascertained and constantly brought up to date with its physical capacity the rating of the mine and the distribution of coal car equipment is determined. HELD, if this system of rating is equitably applied to all mines served by the defendant, the Commission is unable so far as its investigations to the present time have informed it on the question clearly to see upon what grounds it may be said to result in an unequal, unfair or discriminatory distribution of equipment. Hillsdale Coal & Coke Co. v. P. R. R. Co., 19 I. C. C. 356, 360.

(c) A mine rating system of car distribution which combines commercial with physical capacity is not unlawful. Hillsdale Coal & Coke Co. v. P. R. R. Co., 19 I. C. C. 356, 360; Jacoby & Co. v. P. R. R. Co., 19 I. C. C. 392, 294.

(d) At this time and upon the present state of the Commission's information and experience it cannot accept the contention that physical capacity alone is the fair and sound basis for rating mines for car distribution. Speaking in precise terms, it is of no real concern to a carrier how large a particular mine may be, and what are its possibilities in the way of daily output, except that those factors may afford some measure of what its actual shipments will be. The utmost obligation that the law lays upon the carrier is to equip itself with sufficient cars, not to meet the hopes and expectations of the owner of a mine as expressed in its physical development, but to meet his actual shipment. A mine rating that is adjusted to the expectation of the operator, and altogether ignores his actual requirements, might easily result in a period of car shortage in giving him cars for every ton of coal that he can actually dispose of, while an adjoining mine with a small development, but a larger demand for its output, would get but a fraction of the equipment that it needs to meet its actual contracts. Hillsdale Coal & Coke Co. v. P. R. R. Co., 19 I. C. C. 356, 361.

(e) Mine ratings should be based upon the ability to produce coal, and the commercial capacity to dispose of it. If these elements fluctuate from time to time the ratings should periodically be changed. Northern Coal Co. v. M. & O. R. R., 55 I. C. C. 502, 510.

ALL OTHER CITATIONS

National Coal Co. v. B. & O. R. R., Co., 28 I. C. C. 442, 444; McCaa Coal Co. v. C. & C. Ry. Co., 30 I. C. C. 531.

§24. Idle-hour System.

IMPORTANT CASES SINCE 1908

(a) In what is known as the "idle-hour" system of rating coal mines, the number of days and hours a mine has been in actual operation is used in estimating its commercial capacity, instead of using the number of calendar days. Colorado Coal Traffic Ass'n. v. D. & R. G. R. R. Co., 23 I. C. C. 458, 462.

(b) Complainant alleged that defendant's method of distributing cars for the transportation of coal from mines in Huerfano and Las Animas Counties, Colorado, to interstate points was unlawful, and asked for the establishment of the idle-hour system. The testimony showed that no definite plan which might have served as guide and authority alike for shippers and operators had been in existence in this coal district. It appeared that when the operator was particularly

anxious for cars he would employ what is known as a "car rustler." The "car rustler" is a ubiquitous individual who, by means of good fellowship, free cigars and lunch money, prevails upon the carriers' employes to promptly move equipment for the rustler's employer. In the case of congestion the rustler helps the engine crew distribute the cars. It appeared that the chief dispatcher and conductor of each particular train is supposed to know the necessities of each mine and pro rate the cars accordingly. The record fairly established that some unjust discrimination had been practiced in the past. HELD, that a "plan" which rests in the minds of two men, dispatcher and conductor, cannot be a plan which can possibly satisfy many operators in rivalry with one another, no matter how conscientious and faithful those two men may be. It is the duty of the carrier to hire sufficient men to facilitate the distribution of cars, and not the operator. It is imperative that rules and regulations be formulated and published by the carriers at the earliest practicable date after proper conference with the operators, and sixty days is deemed a reasonable time in which to do this. If after such rules and regulations have been published and given a fair trial, they do not meet the situation and the carriers are willing to meet the views of the operators, the matter may be brought to the attention of the Commission. Colorado Coal Traffic Ass'n v. D. & R. G. R. R. Co., 23 I. C. C. 458, 463, 464.

(c) Complainant located on the P. & W. V. in Pennsylvania and West Virginia, Avella District, seek reparation for damages alleged to have been sustained through defendants unduly prejudicial practices in the distribution of empty coal cars, during the period from Oct. 1, 1917, to March 22, 1918. During that time the P. & W. V. was under federal control. The mines alleged to be favored are those of the Pittsburgh Terminal Railroad and Coal Co., located in the Pittsburgh district on the line of the West Side Belt R. R. Co. For all practical purposes, this case is one in which a carrier is alleged to have unlawfully preferred its own mines to the detriment of other producers. Complainants mines are located between 30 and 35 miles west of Pittsburgh. The Belt extends from West End, Pittsburgh in a southerly direction for a distance of about 21 miles to Clairton, Pa. and the Belt mines are located about 10 or 12 miles south of Pittsburgh. The idle hour basis of car distribution was in force on both roads. Under this plan the object is to give each mine a portion of the available car supply in order to keep all the mines in operation the same number of hours per day, and if due to car shortage any mine is idle a greater or lesser number of hours than the average of all mines in a common group or unit car distribution is equalized every few weeks by giving that mine a sufficiently increased or reduced supply of cars. During the period covered by the complaints complainants mines received a relatively smaller supply of cars than did the Belt mines, and of course were not able to work as many hours per day. The railroad properties of the West Virginia and the Belt were operated under a common management. It was defendants practice to handle the car supply as though the two companies were one, whenever practical considerations were deemed such as to make it advisable. It was their policy at all times so to distribute equipment as to keep all of the mines on both roads in operation an equal number of hours per day, so far as that was reasonably practicable under the circumstances, although the existence of a legal duty to do so is denied. Under the facts of record defendants contention that the two roads should be regarded as having been separate and distinct for the purposes of car distribution can not be sustained. While these two roads were incorporated under individual charters and while, as a matter of accounting, an endeavor was made to allocate their expenses and revenues, the record clearly establishes that during the period in question they were operated as one road in the matter of car distribution and were so regarded and treated not only by their own officials but by their connections and by the car pool which was formed to control the distribution of cars during the war emergency. Complainants mines and those on the Belt are, generally speaking, operated under substantially the same conditions. The record shows that during practically every day of the period complainants mines could be and were reached by locomotives and cars moving over the line of the West Virginia. The situation could have been relieved or equalized by moving to complainants mines foreign empties delivered to the Belt by the Belt's

connections. The record clearly shows that there was a great general shortage of fuel during the period in question, and that complainants could have disposed of their output in almost any direction and that if placed for loading they could have used cars which the Belt received from its connections and have forwarded them via those connections. No good reason appears why some of the empties which came to the Belt from the Belt's connections, other than in these trains, could not have been sent to complainants mines in order to balance the situation. HELD, the conditions were not such as to excuse or justify the defendants to serve all shippers equally, and that the prejudice in car distribution to which complainants were subjected during the period in question was undue and unlawful. Reparation with interest awarded. Avella Coal Co. v. P. & W. V., 58 I. C. C. 313.

Huerfano Coal Co. v. C. & S. E. R. R. Co., 28 I. C. C. 502.

§25. Mine Capacity Plus Shipments.

IMPORTANT CASES SINCE 1908

(a) A carrier may make arbitrary allotment of cars for the purpose of enabling the owner of a mine reasonably to develop it, so as to put it in a condition to operate and make shipment. Rail & River Coal Co. v. B. & O. R. R. Co., 14 I. C. C. 86, 93.

(b) In determining the number of cars to which various competing coal companies upon its line were entitled, defendant based the percentage on the capacity of the mine and on previous shipments, the capacity being allowed to count as 1, and the shipments as 2, in ascertaining the percentages. HELD, such system was improper and unfair to the shipper opening up new mines and that percentages should be based solely on physical capacity of the mine. (McDowell, J., dissenting.) U. S. v. B. & O. R. R. Co., 165 Fed. 113, 130.

ALL OTHER CITATIONS

Northern Coal Co. v. M. & O. Ry., 55 I. C. C. 502.

§26. Physical Capacity Less Railway Fuel.

IMPORTANT CASES SINCE 1908

(a) Complainant attacked defendant's method of car distribution in the Coal Creek district of Tennessee on shipments into the Carolinas and Georgia. Under the method in force the tonnage of the cars for defendant's railway fuel supplied to the fuel contract mines was deducted from the rated capacity of such mines, and the remainder was considered the rating of these mines on which they shared with purely commercial mines in the pro rata distribution of cars available for commercial shipments. As a result complainant's competitors, being fuel contract mines, obtained more than their percentage of cars on the basis of mine capacity as compared with complainant and other purely commercial operators. Defendant was thereby enabled to secure lower prices for coal used by it in consideration of furnishing a larger supply of cars to fuel mines. HELD, this method resulted in unjust discrimination, and that where there was an inadequate supply of coal cars the only regulation or practice in respect to the transportation of coal from the mines that was just, fair and reasonable, was to allot to each mine its fair and just proportion of the coal cars estimated upon its justly ascertained capacity and without regard to whether the mine furnished partly fuel coal and partly commercial coal, or commercial coal only. Railroads are entitled and required by law to take all proper and just measures to assure the regularity and certainty of their fuel supply; but in securing such supply they are not justified in beating down the price of coal by means of plans of car distribution or in penalizing mines that refuse to sell fuel coal by lowered mine ratings or lessened car supply. Royal Coal & Coke Co. v. Southern Ry. Co., 13 I. C. C. 440, 444, 448.

(b) A carrier must be free to contract for the total output of a mine if it so desires; or it may contract for any part of a mine's output less than the whole, and it is entitled to get its fuel coal first, for without fuel it cannot haul even commercial coal to its destination, to say nothing of complying with its obligations to the public at large; but in all its acts it must deal even-handed justice in the matter of car distribution. If a mine contracts to furnish only a part of its output to the railroad for fuel, and if the filling of its contract with the railroad calls for its full pro rata of cars, or more, then it should not receive other cars for commercial shipments. If such a mine, in filling its contract to supply fuel coal to the railroad, does not ex-

haust its equitable pro rata of cars, then cars should be given it for commercial shipments sufficient to complete its full pro rata share of all available cars. Wyatt Coal & Coke Co. v. Southern Ry. Co., 13 I. C. C. 440, 448.

(c) Complainant assailed defendants' system of distributing coal cars during car shortage periods by adding to the estimated physical capacity the commercial capacity taken for the 12-month prior period, dividing the result by two, provided that if the resultant was greater than the tipple or haulage capacity, the lesser of these was to be taken as the basis of the mine rate, as discriminatory. In estimating the physical capacity a mine was supposed to have two miners working, with a capacity per miner as reported, in each working place reported, even though tracks may not have been laid into them or they had been exhausted and the matters of whether machines were used in the mine, the thickness of seam were not considered. The rules requiring that the entire daily allotment of cars must be ordered if any were wanted, was so enforced against complainants that their entire monthly allotments were exhausted in a few days, while not enforced as to other coal companies controlled by defendant, which were thus enabled to run continuously. Miners would not stay at mines that did not run regularly. Cars were often delivered to complainants late in the afternoon. HELD, (1) that distribution of cars based on physical capacity worked injustice; (2) that the best basis for distribution was the proportionate necessities of the mines, as indicated by past performances, extending over periods of car shortage as well as periods of free distribution; (3) that defendant should thereafter base distribution on average shipment per days worked by mines located on its line taken for a 2-year period prior to Jan. 1, 1913; (4) that cars must be supplied all operators as of 7 a. m. of the day charged. Reparation denied. McCaa Coal Co. v. C. & C. Ry. Co., 30 I. C. C. 531.

(d) A system of car distribution based on physical capacity, which takes into account only the reported number of working places available in the mine, the number of miners that could be worked to advantage, and the average capacity of each miner, ignoring the data as to whether or not machines are used in the mine and thickness of seam, will permit of arbitrary inflations, enabling the carrier to unjustly discriminate. McCaa Coal Co. v. C. & C. Ry. Co., 30 I. C. C. 531, 534.

(e) The best that can be said for calculations as to physical capacity is that they are arbitrary inflations, which furnish nothing real or tangible. McCaa Coal Co. v. C. & C. Ry. Co., 30 I. C. C. 531, 535.

(f) Car distribution based upon the element of physical capacity is wholly unsatisfactory and works injustice. McCaa Coal Co. v. C. & C. Ry. Co., 30 I. C. C. 531, 536.

(g) Distribution of coal cars based on the element of physical capacity is wholly unsatisfastory and works injustice. In some cases the best basis for distribution is the proportionate necessities of the mines, as indicated by past performances, extending over periods of car shortage as well as periods of free distribution. No basis of distribution can be absolutely precise. But it is not necessary to imagine anything or deal in speculations or possibilities. McCaa Coal Co. v. C. & C. Ry. Co., 30 I. C. C. 531, 536.

C. Removal of Discrimination.

§27. Effect.

IMPORTANT CASES SINCE 1908

(a) Under the complaint of a mine owner at Virden, Ill., it appeared that defendant supplied sufficient cars and that any apparent shortage was due to the practice by complainant of storing small coal in unbilled cars. Defendant served mines producing varying qualities of coal in five different states. It never established any rating for distribution of the different mines upon any part of its system. The evidence showed that, with the exception of the inquiry in question, no complaint had ever been filed by any of its coal operators on the ground of discrimination and but few complaints on the ground of insufficient supply of cars. HELD, in view of the fact that to establish mine ratings and a system of car distribution for all the different collieries served by it would be a complex and difficult task, defendant was not required to do so in the absence of a probable future discrimination. Traer v. C. B. & Q. R. R. Co., 14 I. C. C. 165, 168.

(b) Refusal of defendants to furnish, upon reasonable request therefor, cars,

to complainant for the transportation of bituminous coal, while contemporaneously furnishing cars to other mine owners and operators, competitors of complainant and similarly located on private sidings on which two tipples were maintained, found to subject complainant to undue prejudice and disadvantage in favor of such competitors. Meyersdale Smokeless Coal Co. v. B. & O. R. R. Co., 62 I. C. C. 429.

IV. CONTRACTS FOR CAR SUPPLY.

§28. In General.

CASES 1887-1908

(a) Defendant railway company published a tariff containing the following: "For the purpose of facilitating quick dispatch of the coal cars of this company, a discount of 10 per cent will be made from the following rates, to any person, firm or company, who shall receive consignments of coal, in any one year, amounting to 30,000 tons or upwards, at any one station on the line of this road. Quick dispatch to be construed as immediate unloading of coal on its arrival at destination." Defendant claimed that this discount was offered to secure, and was conditioned upon, quick dispatch in unloading its coal cars, and that it was a reasonable regulation for the proper conduct of its business. HELD: (a) That by the wording of the offer, "quick dispatch" was not made a condition of the offer, and, therefore, it cannot be supported on that ground. (b) That even if "quick dispatch" were made a condition of the discount, such offer would have neither justice nor reason to support it, as its limitation to consignees receiving a specified number of tons would be an unjust discrmiination. (c) That the offer of discount cannot be supported on the consideration of quantity, on the analogy of the distinction usually made in ordinary business transactions, between wholesale and retail dealers. Providence Coal Co. v. Providence & W. R. Co., 1 I. C. R. 363.

(b) A carrier is not forbidden from obtaining cars from a shipper for the transportation of freight over its line, but in such case, after deducting reasonable rent published in the tariff as part of the rate and paid by the carrier to the shipper for the use of the cars, the rates must be actually the same as upon freight transported in the same service in the carrier's own cars. Scofield v. Lake Shore & M. S. R. Co. (Com.), 2 I. C. R. 67.

(c) A carrier is not forbidden by the law from obtaining cars from other carriers, but the rates of freight must be exactly the same. Scofield v. Lake Shore & M. S. R. Co., (Com.), 2 I. C. R. 67.

(d) A firm of cattle dealers in the City of New York, who procured their cattle on a large scale from Chicago and other western points for domestic consumption as well as for export, make an arrangement with two interstate rail carriers constituting a through line from Chicago to New York that the said firm will, under the name of an express company of their own creation, furnish not less than 200 or more than 400 improved live-stock cars for the transportation of these cattle. For the rental of these improved stock cars the carriers pay this express company ¾ of a cent per mile, whether loaded or empty. Extraordinary facilities and rights of way are given these cars to enable them to make a large mileage, and they make more than twice the mileage of ordinary stock cars. Besides this, the carriers pay 50 cents for the loading of each of said cars with cattle at the Union Stock Yards in Chicago, for which no charge is made against the express company or the firm represented by it. In addition to this, the carriers pay this firm yardage at the rate of 3½ cents per hundred pounds on all their cattle, and upon all other cattle hauled for other firms in the care of this firm, owning the express company, to its yards at pier 45, East River. This yardage charge is thus paid to the said firm by the said carriers for keeping their cattle in the firm's own yards after delivery of them to the firm, and then this yardage charge is deducted from the tariff rate charged by the carrier. The amount of these rebates to this firm in rates on these cattle by these carriers more than pays the entire cost of the improved stock cars within two years after operations are commenced with them, including the expense of operation, leaving said firm owning the cars and still operating them with all these advantages and rates and facilities. HELD: (1) This is an unlawful preference to the firm owning these improved stock cars and a violation of the Act to Regulate Commerce. (2) It is an unlawful and unjust prejudice to other cattle firms and dealers in New York who are competitors in the business of said firm

owning said improved stock cars. Shamberg v. Delaware, Lackawanna & W. R. Co., 3 I. C. R. 502.

(e) Arrangements by which shippers are allowed to furnish improved stock cars, receive extraordinary mileage upon them amounting to large rebates on their rates, and determine whether other competitive shippers shall forward freight in them or not,—are unlawful. Shamberg v. Delaware, L. & W. R. Co., (Com.), 3 I. C. R. 502.

IMPORTANT CASES SINCE 1908

(f) Defendant applied its system of car distribution and ratings thereunder to three mines not located on its lines. but which it reached through switching connections with other railroads, and with which it had no fuel contracts, and at a time when it was unable to supply the full demand for cars upon its own lines. HELD, such practice was unlawful. The carrier owes a special duty to shippers who are entirely dependent upon it for transportation facilities. It may send its equipment from its line for the things that are necessary and essential for its own operation, such right arising from considerations of public policy, which recognizes the duty of a carrier to operate its line, and being predicated on necessity and not on the carrier's right of private contract. Traer v. C. & A. R. R. Co., 13 I. C. C. 451, 456.

(g) If a carrier and a mine owner make a contract for the fuel supply of the carrier which does violence to the Act to Regulate Commerce or to the decisions of the courts, or is opposed to public policy, they are in no better position than the parties to any other contract which violates the legal principles relating thereto. Traer v. C. & A. R. R. Co., 13 I. C. C. 451, 457.

(h) The Commission recognizes the right of a railroad company to contract with a particular operator for its fuel supply; it recognizes the rights of a connecting line also to do this; and each may send its cars to those mines to the exclusion of other mines. It also insists that the owner of private cars is entitled to their exclusive use. But in each case it holds that all such cars must be counted against the distributive share of the mine receiving them. Hillsdale Coal & Coke Co. v. P. R. R. Co., 19 I. C. C. 356, 364.

(i) A carrier may make a contract for transportation, but it can not thereby absolve itself from the obligation to furnish suitable cars operated under reasonable schedules to serve the needs of its shippers. In Re Private Cars, 50 I. C. C. 652, 708.

(j) Carriers can not be compelled against their will to employ cars of other ownership. The use of such cars as instrumentalities or facilities of commerce in interchange service, in short, is a matter of contract, and whether they were accepted by defendants for such use in the present case or received as articles of freight for transportation to destination is a question of fact to be determined by the evidence. McCloud River Ry. Co. v. S. P. Ry., 56 I. C. C. 287, 290.

(k) It is within the discretion of carriers whether they shall receive and use cars of other ownerships as facilities of carriage in interchange service, and it follows that consent to do in one case and refusal in another is not necessarily unlawful discrimination under the Act to regulate commerce. McCloud River Ry. Co. v. S. P. Ry., 56 I. C. C. 287, 291.

(l) Whether complainant had or had not a specific contract with the carriers for delivery of a definite number of cars at stipulated periods, for the breach of which it would be entitled to damages, raises an issue not before the Commission nor within its jurisdiction to decide. Armour Grain Co. v. Director General, 57 I. C. C. 389, 409.

(m) While matters of car supply must be considered, they do not constitute ground for depriving a shipper of nonprejudicial rates. Gillespie Coal Co. v. I. T. S., 62 I. C. C. 335, 337.

(n) A contract with the shipper by which a carrier binds itself to furnish a specific number of cars, at specific times and places, is not contrary to public policy so long as its provisions do not require the supply of cars to the shipper in such a way as to discriminate against other shippers. Oregon R. R. & Navigation Co. v. Dumas, 181 Fed. 781, 785.

ALL OTHER CITATIONS

Huerfano Coal Co. v. C. & S. E. R. R. Co., 28 I. C. C. 502, 505, 506; Rental Charges for Insulated Cars, 31 I. C. C. 255, 256; New Orleans Live Stock Exchange v. L. & N. R. R. Co., 31 I. C. C. 609, 611, 678; National Casket Co. v. S. Ry. Co., 31 I. C. C. 678, 690, 693; Green-

field & Co. v. Penn. R. R. 47 I. C. C. 403; In the Matter of Private Cars, 50 I. C. C. 652, 680; Pittsburgh, C., C. & St. L. Ry. v. Freedom Oil Works, 247 Fed. 573, 574.

V. DUTY TO TRANSPORT CARS.

§29. In General.

See Transportation II.

CASES 1887-1908

(a) The refusal by a railroad company to transport freight on foreign cars originating east of a certain meridian, when its own cars are not in use but are free to be employed in the transportation desired, or where a transfer of freight will not be injurious to it, is not an unreasonable discrimination against another railroad company, or a denial to it of reasonable and proper facilities under the Interstate Commerce Act, although it accepts in such cars freight originating west of such meridian. Oregon Short Line & U. N. R. Co. v. Northern Pacific R. Co., 4 I. C. R. 718.

IMPORTANT CASES SINCE 1908

(b) A common carrier is bound to accept a car for transportation whenever such a car is offered at places where it can reasonably receive it. To determine whether or not it will transport the car, the carrier cannot lawfully inquire into the ownership and origin of the contents, nor into the route over which it has been moved in order to reach its rails. It can only ask that it be given reasonable compensation for the service it performs. St. Louis, Springfield & Peoria R. R. v. P. & P. U. Ry. Co., 26 I. C. C. 226, 237.

(c) A carrier has no right to transfer a one-car shipment into two cars. If a transfer at all is necessary, it should be into a car large enough to accommodate the entire shipment. Follmer & Co. v. C. P. Ry. Co., 26 I. C. C. 512, 513.

(d) Carrier may secure the economical use of its equipment. Minimum Weight on Fresh Meats and Other Commodities, 30 I. C. C. 349, 350.

(e) Effect of general business depression upon volume of traffic indicated by a comparative statement giving number of idle cars or car surplus. Five Per Cent Case, 31 I. C. C., 351, 424.

(f) A charge for the movement of a car from the point where it may be at the time, to point where it is wanted unjustly discriminates against shippers at stations to which empty cars must usually be hauled for varying distances and unduly prefers shippers at points where empty cars are always available. City Ice Delivery Co. v. P. M. R. R. Co., 39 I. C. C. 589, 591.

(g) It is all important that freight cars be kept moving and terminal congestion obviated. Any reasonable action upon the part of carriers in that direction is manifestly in the public interest, and should not only be approved but encouraged by the Commission. Export Freight Free Time, 47 I. C. C. 162, 179.

(h) It is the primary duty of a carrier to afford carriage or transportation. As a part of such transportation it is its duty to afford the consignee, after the actual movement has ceased, a reasonable time to remove the lading from the car. It is no part of the carrier's duty to furnish the consignee cars to be used for warehouse or storage purposes. Export Freight Free Time, 47 I. C. C. 162, 196.

(i) Requirement by G. N. Ry. that grain from South Dakota points to Omaha, shall be held indefinitely at Sioux City to await the ability of G. N. Ry. to secure suitable foreign cars, is an unreasonable interference with the through movement of freight. Omaha Grain Exchange v. G. N. Ry., 47 I. C. C. 532, 536.

(j) The failure to return cars to the smaller packers is due to the neglect of a lawful duty by carriers. The obligation to treat each shipper fairly, no matter how small his shipments may be in comparison with those of another shipper, is one carriers can not escape. The duty imposed on the carrier by law is to give equal treatment to all shippers who are in position to demand it. Where the same carrier or carriers serve two shippers, who by their location, the character of their output, and distance from markets where their products must be disposed of, are in substantially similar circumstances and conditions, the serving carrier or carriers can not lawfully prefer one to the other in any manner whatsoever. In the Matter of Private Cars, 50 I. C. C. 652, 692.

(k) Carriers should refuse to accept any shipment tendered in an unfit car as to which the shipper had failed to properly install the grain doors or oth-

erwise prepare the car for the safe transportation of grain. Claims for loss and damage of grain, 56 I. C. C. 347, 349.

(l) Cars, as well as other property, may be the matter of carriage by a common carrier. U. S. v. Union S. & T. Co., 192 Fed., 330, 337.

ALL OTHER CITATIONS

Standard Lime & Stone Co. v. C. V. R. R. Co., 15 I. C. C. 620, 626.

§29½. Confiscation of Fuel.

See Confiscation of Fuel.

IMPORTANT CASES SINCE 1908

(a) The rule of law as to the distribution of cars in accordance with the relative ratings of the mines as set forth in the Traer Case 13 I. C. C., 451, and sustained by the Supreme Court in 215 U. S., 452 and 479, remained the controlling rule during the war and under the rules of the Fuel Administration, when the use of assigned cars was abandoned, followed by the imperative necessity of railroads confiscating coal in transit in order to keep their roads in operation. Assignment of Freight Cars, 57 I. C. C. 760, 763.

§30. Interchange of Cars.

See Interchange of Traffic; Through Routes and Joint Rates.

CASES 1887-1908

(a) An order of the Interstate Commerce Commission to one railroad company to desist from refusing to furnish another equal facilities to those furnished a third company for interchange of through traffic may be enforced by compelling a desistance from discrimination by changed arrangements, as well as by those in force at the time of the order. New York & N. R. Co. v. New York N. E. R. Co., C. C. S. D. N. Y. 4 I. C. R. 116.

Important Cases Since 1908

(b) The duty of the initial carrier to furnish equipment for a shipment which moves on to other lines is universally recognized, and in cases where that is impracticable or deemed unwise, the carrier is assumed to bear the burden of the transfer from the equipment of one line to that of another. Missouri & Illinois Coal Co. v. I. C. R. R. Co., 22 I. C. C. 39, 46.

(c) Carriers are required to make reasonable rules and regulations with respect to the exchange, interchange, and return of cars used upon through routes and for the operation of such through routes, and where they have failed in this respect the Commission is empowered to determine the individual or joint regulation or practice that is just, fair, and reasonable. Missouri & Illinois Coal Co. v. I. C. R. R. Co., 22 I. C. C. 39, 49.

(d) Carriers may properly make rules to secure return of empty cars from or to foreign lines, but may not, under the guise of enforcing transportation rules, impose undue burdens upon shippers. Pine Belt Lumber Co. v. G. & S. I. R. R. Co., 33 I. C. C. 117, 118.

(e) Railroads are under obligation to serve through routes without respect to the fact that in rendering such service their equipment may be carried beyond their own lines. Doran & Co. v. N., C. & St. L. Ry., 33 I. C. C. 523, 530.

(f) The Commission does not think that the law imposes upon a railroad the duty in all cases to give to mines on a connecting independent railroad the same rates to market that it gives to mines on its own branch lines in the same region. Brush Creek Mining & Mfg. Co. v. L. & N. R. R. Co., 39 I. C. C. 449, 452.

(g) The power of the Commission to require a carrier to permit its cars to move from its line to the rails of a foreign line is clearly defined, and it is a necessary corollary that the observance of a reasonable rule for the return of such cars to the owning line may also be required. Car Supply Investigation, 42 I. C. C. 657, 672.

(h) It would be an anomaly if certain carriers could with impunity violate section 1 by failure to observe reasonable rules for the "exchange, interchange and return of cars," and by so doing prevent other carriers from furnishing transportation upon reasonable request which is required by the same section. Car Supply Investigation, 42 I. C. C. 657, 674.

(i) No operating rule is reasonable or lawful which requires holding of traffic in cars for an indefinite period at junction points. Omaha Grain Exchange v. G. N. Ry. Co., 47 I. C. C. 532, 538.

(j) Common carriers may decline to accept cars of other ownership employed solely as instruments of carriage in lieu of their own, although bound to accept them when offered merely as articles to be transported. Pacific Engineering &

Construction Co. v. C., R. I. & P. Ry., 56 I. C. C. 247, 249.

(k) Carriers can not be compelled against their will to employ cars of other ownership. The use of such cars as instrumentalities or facilities of commerce in interchange service, in short, is a matter of contract, and whether they were accepted by defendants for such use in the present case or received as articles of freight for transportation to destination is a question of fact to be determined by the evidence. McCloud River Ry. Co. v. S. P. Ry., 56 I. C. C. 287, 290.

(l) Carriers must observe reasonable rules and practices with respect to car service as defined in the act; however, car interchange is primarily a matter of agreement. The common-carrier status of a road gives no inherent right to per diem or reclaim. Birmingham Southern R. R. Co. v. Director General, 61 I. C. C. 551, 556.

(m) Fact that interchange facilities are inadequate for convenient operation is not of itself a defense if through routes are shown to be necessary or desirable in the public interest. If inadequate, they may be made adequate to perform the service which the law requires. York Mfrs. Asso. v. P. R. R. Co., 73 I. C. C. 40, 50.

(n) Fact that connecting rail lines furnish cars to a switching line while the Mississippi-Warrior River barge line does not furnish cars is not a justification for rail carriers assessing higher switching charges on the barge line's traffic. U. S. War Dept. v. A. & S. Ry., 77 I. C. C. 317, 360, 361.

(o) By operating directions carrier prohibited diversion of cars to points off its line. Carriers at reconsignment point transferred lading to car of foreign line, assessing switching, demurrage, penalty, and transfer charges for this service. HELD: Carriers can not by operating instructions restrict equipment to their own rails when it results in additional expense to shippers when they publish rates to points on rails of other carriers and do not publish equipment restriction in tariff. Charges assessed at reconsignment point found unreasonable and unlawful and reparation awarded. Hixon Lumber Co. v. C., B. & Q. R. R. Co., 80 I. C. C. 295.

(p) Without passing on question whether duty of participants in a through movement to supply appropriate shares of equipment necessary for transportation of coal rests upon carriers jointly (compare Huerfano Coal Co., 28 I. C. C. 502), or severally, in the aggregate the duty of providing adequate supply of equipment rests upon railroad carriers. Assigned Cars for Bituminous Coal Mines, 80 I. C. C. 520, 546.

(q) Paragraph (3) of section 3 of the act, among other things, requires carriers to "afford all reasonable, proper and equal facilities for interchange of traffic between their respective lines." Miller Paper Co. v. P. R. R. Co., 80 I. C. C. 316.

(r) Under the Transportation Act 1920, the Interstate Commerce Commission finding that an emergency existed, ordered without notice or hearing that the Peoria and the Pekin Railroad Co. should continue to interchange freight traffic between the Minneapolis & St. Louis Railroad Company and connecting carriers at the regularly established interchange points at and near the vicinity of Peoria, Ill. The Peoria Company insisted that the commission was without authority under its emergency power to require one carrier to switch cars for another. The order of the commission required the terminal company to switch by its own engine and over its own tracks, freight cars tendered to it by the Minneapolis & St. Louis, and which it had refused to switch because the payment demanded, therefor had not been made. HELD that under a proper construction of the statute the commission did not have the power it exercised and that an injunction should be granted restraining enforcement of its order. Peoria & P. U. Ry. Co. v. United States. 44 Sup. Ct. 194.

ALL OTHER CITATIONS

Co., 24 I. C. C. 618; Wichita Board of Trade v. A., T. & S. F. Ry. Co., 25 I. C. C. 625, 631; National Lumber Exporters' Asso. v. K. C. S. Ry. Co., 25 I. C. C. 78, 84; Spiegle v. S. Ry. Co., 25 I. C. C. 71, 75; St. Louis Springfield & Peoria R. R. v. P. & P. U. Ry. Co., 26 I. C. C. 226, 234; Refuge Cotton Oil Co. v. St. L., I. M. & S. Ry. Co., 27 I. C. C. 117, 120; Downie Pole Co. v. N. P. Ry. Co. v. W. P. T. Ry. Co., 31 I. C. C. 660, 662; City of Nashville v. L. & N. R. R. Co., 33 I. C. C. 76, 86, 89, 90;

Mixed Car Dealers' Asso. v. D., L. & W. R. R. Co., 33 I. C. C. 133, 142; Chattanooga Packet Co. v. I. C. R. R. Co., 33 I. C. C. 384, 391; Grain Rates from Milwaukee, 33 I. C. C. 417, 420; Pennsylvania Paraffine Works v. P. R. R. Co., 34 I. C. C. 179, 193; Lourie Manufacturing Co. v. C. N. R. R. Co., 42 I. C. C. 448, 453; Omaha Grain Exchange v. G. N. Ry. Co., 47 I. C. C. 532, 536, 539; McCloud River Ry. Co. v. S. P. Ry., 56 I. C. C. 287, 291; William Schuette & Co. v. Director General, 57 I. C. C. 709, 711; Chicago, Lake Shore & South Bend Ry. Co. v. Director General, 58 I. C. C. 135, 140; 647, 652; U. S. War Dept. v. A. & S. Ry., 77 I. C. C. 317, 360, 261; Miller Paper Co. v. P. R. R. Co., 80 I. C. C. 314.

§31. Private Cars.

See Supra §4; §10½, §13; Infra §32; Common Carrier §6; Private Cars.

CASES 1887-1908

(a) Complainant charged unjust discrimination in exacting an extra rate for transporting cattle in a Burton stock car; the answer denied the fact of unjust discrimination and no proof was given on either side. HELD: It is impossible for the Commission to say that if all the facts were before it, the greater charge could not be justified, and hence as it is not suggested further proceedings are desired, the case is dismissed. Where the pleadings present issues of fact which can not be disposed of by a decision which shall reach the merits without some evidence, and no evidence is presented, the case must be dismissed. Leonard v. U. P. R. R., 1 I. C. C. 627.

(aa) Ownership of a car rented to a carrier and for the use of which the carrier pays a full consideration does not of itself entitle the owner to the exclusive use of such car; and if the owner may, in the contract of hire to the carrier, stipulate for the exclusive use of the car, it must be upon such terms as shall not constitute an unjust discrimination against hired shippers of like traffic in cars owned by the carrier and who are excluded from the use of the car so hired. Independent Ref. Asso. v. Pennsylvania R. R. Co., 6 I. C. C. 52.

(b) The regulating statute is opposed to every species of favoritism and seeks to secure like treatment for all persons in like relations to the carrier. A carrier may lawfully decline to haul private cars at all, or it may haul private cars of one class and refuse to haul others of a wholly different class; but if it transports private cars of any class, it must in like manner and upon like terms transport all private cars occupied for the same or similar purposes. Carr v. N. P. Ry., 9 I. C. C. 1, 12.

IMPORTANT CASES SINCE 1908

(c) A carrier may no doubt lawfully refuse to carry certain classes of private equipment, but it may not distinguish between private cars that are owned by negroes and private cars that are owned by whites, nor may it discriminate between private cars that are owned by Armour & Co. and private cars of the same class that are owned by any other concern. Rehearing denied. Chappelle v. L. & N. R. R. Co., 19 I. C. C. 456, 457.

(d) When a shipper furnishes his own car for transportation of articles in common use and which move in large volume, he relieves the carrier of so much of its obligations as a common carrier. In the Matter of Private Cars, 50 I. C. C. 652, 680.

(e) The private car owner has no right to demand that his cars be transported over the lines of a carrier which has not consented thereto. Assigned Cars for Bituminous Coal Mines, 80 I. C. C. 520, 556.

(f) The Commission has held to the central idea that the carrier, in permitting the use of the private car, must at its peril see that the use of the vehicle does not permit, excuse, or justify a discrimination, preference, or advantage in favor of the owner of the private car, regardless of the present ability of the carrier to furnish on demand an adequate supply of equipment needed for transportation. The Commission has recognized that when the carrier permits the use of the private car upon its rails, it is responsible for the manner in which the service is conducted in that car, and that the car becomes in all respects as if it were one of the general stock of those owned by the carrier, and subject to the same liabilities and responsibilities as to its use in interstate transportation. Assigned Cars for Bituminous Coal Mines, 80 I. C. C. 520, 557.

(g) A car owner can claim no advantage as a shipper that would not accrue to him if the car was owned by a different person having no interest in the freight. Assigned Cars for Bituminous Coal Mines, 80 I. C. C. 520, 558.

(h) Carrier, in permitting use of a private car over its lines, must at its peril see that use of the vehicle does not permit, or justify, discrimination, preference, or advantage in favor of owner of the private car, regardless of present ability of carrier to furnish on demand an adequate supply of equipment needed for transportation. Assigned Cars for Bituminous Coal Mines, 80 I. C. C. 520, 557.

(i) The private-car owner has no right to demand that his cars be transported over lines of a carrier which has not consented thereto. Obligation of furnishing an adequate supply of equipment by statute rests upon carrier, and does not rest upon shipper. The duty can not be transferred to nor required of shipper. Assigned Cars for Bituminous Coal Mines, 80 I. C. C. 556.

Oklahoma Producing & Refining Corp. v. Director General, as Agent, 58 I. C. C. 193; Weissbaum & Co. v. Director General, as Agent, 59 I. C. C. 711.

§32. Rates on Private Cars.

See Cars and Car Supply §31; Classification §7½, §12⅞.

IMPORTANT CASES SINCE 1908

(a) Carriers should publish in their tariffs a rule that privately owned or leased cars when unloaded at destination unless otherwise ordered by the owner or lessee, must be promptly transported, loaded, or empty, in the direction of the plant of the owner or lessee. In Re Private Cars, 50 I. C. C. 652, 692, 709.

(b) New cars were delivered to the carriers as articles, rather than as instruments of commerce for transportation to particular destinations. Despite the authorized lading, the cars were received by the carriers under a duty and subject to a restriction unlike those governing the use of privately owned or foreign equipment voluntarily employed in the usual interchange service. From the beginning to the end of the transportation the cars, independently of their lading, were under consignment, and their status as articles of commerce was not changed by reason of the fact that at the same time they earned revenue by the carriage of other freight. The defendants were not lessees, but common carriers of the cars, and throughout the several transactions the relations of the parties were those of shipper and carrier, with their correlative duties and liabilities. As to the cars, as well as to their contents, defendants had a common carrier service to perform, and the compensation derived from the lading had no tariff relation to the transportation of the cars. Pacific Engrg. & Constrn. Co. v. Director General, 56 I. C. C. 247, 249.

(c) Carriers are within their rights in declining, as provided by their tariffs, to treat new cars moving on own wheels under load as instruments of commerce and at the same time assume common-carrier duties and liabilities with respect to them. Pacific Engineering & Construction Co. v. C., R. I. & P. Ry., 56 I. C. C. 247, 249.

(d) Common carriers may decline to accept cars of other ownership employed solely as instruments of carriage in lieu of their own, although bound to accept them when offered merely as articles to be transported. Pacific Engineering & Construction Co. v. C., R. I. & P. Ry., 56 I. C. C. 247, 249.

(e) Complainant attacked rates charged on 155 new empty tank cars moving on their own wheels from Milton, Pa., to North Carolina and South Carolina during federal control as illegal to extent they exceeded the combinations on Lynchburg and Petersburg, Va. Original report found in 64 I. C. C. 637. HELD: Rates charged illegal. Reparation awarded. Proctor & Gamble Co. v. Director General, 78 I. C. C. 47.

(f) Reparation awarded for switching charges on bituminous slack coal during federal control, between points at Ellsworth, Cokeburg, and Bentleyville, Pa., to basis of $5.50 per car where cars were furnished by shipper, and $6.50 per car where cars were furnished by carrier. Lackawanna Steel Co. v. Director General, as Agent, 77 I. C. C. 465.

Director General, 58 I. C. C. 193; San Diego & Arizona Ry. Co. v. A., T. & S. F. Ry. Co., 62 I. C. C. 675; Proctor & Gamble v. Director General, 64 I. C. C. 637.

§32⅛. Repair of Private Cars.

See Private Car.

CASES 1887-1908

(a) The rule requiring a shipper to clean and repair cars furnished on a side track is unreasonable. Hezel Milling Co. v. St. Louis, A. & T. H. R. Co. (Com.), 3 I. C. R. 701.

IMPORTANT CASES SINCE 1908

(b) It is not unreasonable to expect shipper to make minor and inexpensive repairs. Farmers' Cooperative Asso. v. C., B. & Q. R. R. Co., 34 I. C. C. 60, 64; Construction and Repair of Ry. Equipment, C. & N. W. Ry. Co., 69 I. C. C. 143.

§32¼. Quarantine Regulations.

IMPORTANT CASES SINCE 1908

(a) Complainants attacked defendant's tariff provisions establishing a charge of $2.50 per car for cleaning and disinfecting cars, as required by government regulations, as unreasonable and unduly discriminatory against New Orleans, La. Similar rules as to stock cars coming from quarantined districts were maintained by all carriers operating in the Southern Classification territory. Florida, Georgia, Alabama, Mississippi and Louisiana were within the federal Texas fever quarantine area; and the federal regulations required the cleansing and disinfecting of cars used for transportation of cattle within the transportation area before such cars were permitted to move to points outside the disinfected area. The shipments of cattle to New Orleans were principally from the other states named. No charge was imposed by carriers at many northern destinations, but it appeared that the competition of carriers was much keener at those points. HELD: That the charge of $2.50 was reasonable where proper, but that it could not properly be applied to cars which had moved between points and via lines wholly within the quarantined area. New Orleans Live Stock Exchange v. L. & N. R. R. Co., 31 I. C. C. 609.

(b) Such cars as move interstate wholly within a federal quarantine area are not subject to a cleaning and disinfecting charge imposed by carriers under the regulations promulgated by the U. S. Department of Agriculture. New Orleans Live Stock Exchange v. L. & N. R. R. Co., 31 I. C. C. 609, 610.

(c) The Commission has no jurisdiction of a proceeding involving the justice of a charge for cleansing and disinfecting cattle cars which have moved wholly within the limits of one state, even though that state be included in a federal quarantine area. New Orleans Live Stock Exchange v. L. & N. R. R. Co., 31 I. C. C. 609, 612.

ALL OTHER CITATIONS

Boyd v. King (Mich. 1918), 167 N. W. 901; State v. Chicago, M. & St. P. R. R. (Mo. 1918), 206 S. W. 419.

VI. REMEDIES AND DAMAGES.

See Actions at Law; Reparation.

§32½. In General.

CASES 1887-1908

(a) In view of the fact that by an agreement between the N. Y., L. E. & W. R. R. Co., extending (over the leased line of the N. Y., P. & O. R. R. Co.) to Dayton, Ohio, and the C., C., C. & I. R. Co., extending from Dayton to Cincinnati, the N. Y., L. E. & W. Co. is considered an initial road to Cincinnati, with the right to make rates thereto and therefrom on its own responsibility. HELD: That Cincinnati must be treated as a point upon the line by the N. Y., L. E. & W. Co. for the purpose of a proceeding against that Company under the Act to Regulate Commerce, for unjust discrimination in furnishing coal cars. Riddle, Dean & Co. v. N. Y., L. E. & W. R. R. Co., 1 I. C. R. 787.

(b) Complainant charged discrimination in furnishing of coal cars. A statement of the evidence, from which it appears that it was the duty of the Yough Slope Mine, its owners and agents, to have inquired of the station agent of the railroad nearby the mine on August 30, 1887, and on the next day, by which they would have learned that the mine could

have obtained cars for the shipment of coal to Cleveland, O., and they having failed to do this, in consequence of which the Youghiogheny and Ashtabula mines received nearly all the cars for this purpose, without any partiality or preference on the part of the railroad company. HELD: Upon these facts, that a complaint of unjust discrimination against the Yough Slope Mine can not be sustained. Where a complaint is made by a shipper that an unjust discrimination was perpetrated by a railroad company against him at a particular time named, to rebut the inference arising from the circumstances, calling for explanation, among other evidence, the carrier may show that during a long course of business neither it nor any of its agents have ever shown any unfriendly spirit whatever toward the shipper, and that, on the contrary, its agents, immediately before the matter complained of, made extra exertions in good faith to serve the shipper in obtaining cars for him from the connecting line to whom the shipper had to look for such cars. In the absence of some rule and custom of business placing such duty on the carrier to notify the shipper, without any inquiry on the part of the latter of the fact that he can there obtain cars for the movement of his freight, it is the duty of the shipper, by reasonable inquiry made to the proper agent of the railroad company, to obtain this information for himself. HELD: No case of preference or unjust discrimination is made out by the evidence. Complaint dismissed. Riddle, Dean Co. v. B. & O. R. R., 1 I. C. C. 778.

(c) Defendant's refusal to furnish cars to complainants between February 25 and March 26 on the Deal sidetrack at Meyersdale and the sidetrack of the Savage Fire Brick Company at Keystone Junction, while furnishing and offering to furnish cars to complainants' competitors at other points, under the circumstances disclosed by the evidence and described in the findings, was undue and unlawful discrimination against complainants, for which they are entitled to reparation. Glade Coal Co. v. Baltimore & O. R. R. Co., 10 I. C. C. 226.

(d) Reparation awarded to complainant for defendant's refusal to furnish cars for the shipment of cross ties while it did furnish cars to other persons for the interstate shipment of lumber, stone and many other freight articles, and also supplied cars for the shipment of cross ties destined almost entirely for its own use. Paxton Tie Co. v. Detroit S. R. Co., 10 I. C. C. 422.

(e) In the furnishing of cars, defendant unjustly discriminated against the complainant, which desired to ship hay from various points in Michigan, but the proof fails to indicate with any degree of certainty the damage caused by the wrongful discrimination, and the amount which the complainant was entitled to recover by way of reparation. Richmond Elevator Co. v. Pere Marquette R. Co., 10 I. C. C. 629.

(f) Every shipper is legally entitled to fair opportunity and treatment in the use of the carrier's utilities, and any discrimination which in a substantial degree deprives shippers of such use must be considered unjust, unless forced by justifying conditions. In such a case the burden of proof is upon the complainant for the purpose of showing discrimination, and then upon the carrier to show that the discrimination was justified. Richmond Elevator Co. v. Pere Marquette R. Co., 10 I. C. C. 629.

(g) It appears generally from the facts in this case that in furnishing cars defendant unjustly discriminated against the complainant, which desired to ship hay from various points in Michigan, but the proof fails to indicate with any degree of certainty the damage caused by the wrongful discrimination and the amount which the complainant is entitled to recover by way of reparation. Complainant granted leave to apply within a limited time for further hearing. Richmond Elevator Co. v. Pere Marquette R. Co., 10 I. C. C. 629.

(h) Complainant attacked as discriminatory refusal of defendants to furnish it cars for the movement of hay and grain from Valley Center, Doyle, Avoca, Croswell and Memphis, Mich., to the east and south. The reason given by defendants as to refusal to furnish equipment was the scarcity of equipment at time the commodities were tendered. The record is meager as to the damage sustained, if any, because of inability to secure equipment. HELD: Complainant unduly discriminated against, but no proof of damages was shown, and case held open for further proof. Richmond Elevator Company v. Pere Marquette R. R., 10 I. C. C. 629.

(i) A case before the Commission in-

volving alleged discrimination in furnishing cars, and demanding reparation, is not barred, under section 9 of the act, by the previous institution in the state court of a suit for damages between the same parties based on such discrimination. Gallogly v. Cincinnati, H. & D. R. Co., 11 I. C. C. 1.

(j) A case before the Commission involving violation of the Act to Regulate Commerce through alleged discrimination in furnishing cars, and for which reparation is demanded, is not barred under section 9 of the act by the previous institution in a state court of a suit for damages between the same parties, based upon such discrimination. Gallogly & Firestone v. Cincinnati, H. & D. R. Co., 11 I. C. C. 1, 9.

(k) Defendant's refusal to furnish to complainants cars for interstate shipments of corn from Leipsic, Ohio, while it contemporaneously furnished to complainants' competitors cars for like shipments, was unlawful discrimination. Gallogly & Firestone v. Cincinnati, H & D. R. Co., 11 I. C. C. 1.

(l) In September, October and November, 1905, defendant unjustly discriminated in furnishing cars for hay and grain shipments against the complainant and in favor of other shippers including the operation of an elevator. Complainant awarded reparation in the sum of $200. Eaton v. Cincinnati, H. & D. R. Co., 11 I. C. C. 619.

(m) Reparation awarded in the sum of $200 for unjustly discriminating against complainant in furnishing cars for hay and grain shipments. Eaton v. Cincinnati, H. & D. R. Co., 11 I. C. C. 619.

IMPORTANT CASES SINCE 1908

(n) Complainant coal company sought reparation for alleged discrimination in car distribution for the period from September 1, 1912, to November 9, 1912. Prior to March, 1912, its rating for car supply was 38 cars per day. From September 1, 1912, until September 19, 1912, this rating was fixed at 19 cars per day. On the latter date it was raised to 21 cars per day. On November 9, 1912, it was still further increased to 50 cars per day. The Method employed in making the distribution was one that had been agreed upon by complainant and other shippers and by it the railroad company each year established the rating of each mine upon the basis of the month, then a period of full car supply, showing the highest average of daily shipments. In the case of defendant carrier the period of full car supply included the months of April, May, June and July. In 1912 during these months, complainant's mine was either closed or its operation restricted through labor troubles, and in anticipation of these troubles complainant's customers had purchased heavily in March, 1912, thereby reducing the possible market during the summer. As a consequence, the rating given on the mine based on the month of largest shipments in the period of full car supply was less than that given for the previous years and resulted in the decreased car supply complained of. It appeared that the defandants had acted in good faith in the matter. HELD: That reparation should be denied, since where carriers have in good faith attempted to distribute cars on some fair basis, they cannot be held guilty of unjust discrimination against the shippers whose commercial misfortunes operate to reduce their ratings. National Coal Company v. B. & O. R. R. Co., 28 I. C. C. 442.

(o) Complainant attacked defendant's practices in the distribution of coal cars to its mines during the period, October 1, 1917, to March 22, 1918, as unduly prejudicial to complainants, first report found in 58 I. C. C. 313. The damage claims rest upon the theory that by reason of defendant's unlawful practices complainants have suffered loss in two respects, viz: (1) Loss of profits on coal that could have been produced and sold, but for the unlawful practices, and (2) increased cost of producing the coal produced. Evidence in support of the first element of damage is directed mainly to showing working time of which complainant's mines were deprived by defendant's unlawful practices; additional tonnage that could have been produced in such additional time; supply and demand for coal during the period under consideration, and contracts of sale which complainants were unable to complete, as indicating that the additional tonnage could have been disposed of; proportion of additional tonnage that would have moved in interstate commerce; selling prices; and cost of production. For the purpose of showing loss sustained on coal produced complainants separated their expenses of operation into what are termed "variable charges" and

"fixed charges." Variable charges represent expenses which vary substantially in direct proportion to the quantity output, such as wages paid to miners who work on a ton basis. Fixed charges comprise expenses of operation which do not differ substantially with varying production, such as taxes, depreciation and annual salaries. HELD: By reason of the undue prejudice found to have existed and complainant's show of damage incurred, reparation awarded variable amounts according to time lost. Avella Coal Co. v. P. & W. V. Ry. Co., 77 I. C. C. 731.

(p) The ascertainment of the damages occasioned by a carrier's rules as to car distribution, which are unduly discriminatory, is as much within the scope of the Interstate Commerce Commission's authority, under the Act, §§ 8, 9, 13, 16, as though the damages were due to the exaction of unreasonable rates. Pennsylvania R. Co. v. Clark Bros. Coal Min. Co., 35 Sup. Ct. 896, 901; 238 U. S. 456, 59 L. Ed. 1406.

(q) Where an appropriate ruling from the Commission as to discrimination in furnishing cars which had been practised was made, the claimant was then entitled to proceed for the recovery of damages in accordance with the act, and not otherwise. The fact that the Commission had not made its award of damages at the time the action was brought is immaterial, since the claimant's right and remedy were fixed by the Federal act. Pennsylvania R. Co. v. Clark Bros. Coal Min. Co., 35 Sup. Ct. 896, 902; 238 U. S. 456, 59 L. Ed. 1406.

(r) No recovery may be had in a suit brought in a state court by a shipper to recover damages arising in interstate commerce out of the carrier's failure to furnish a shipper with the cars to which it claimed to be entitled under the carrier's own rule for car distribution, where, before the trial, though after the period covered by the suit, the Interstate Commerce Commission, upon complaint of other shippers and after a full hearing, had found that such rule was unjustly discriminatory and had directed the carrier to give no further effect to it, and, recognizing that shippers who had been injured through its operation in the past were entitled to reparation, had proceeded to award reparation to such shippers as appeared and adequately proved their injury and the amount of damages sustained, the Commission's report making it plain that the finding was not based upon any temporary condition, but upon what inhered in the rule, and therefore was true from the time of its adoption. Pa. R. Co. v. Stineman Coal Min. Co., 37 Sup. Ct. 118, 242 U. S. 298, 61 L. Ed. 316.

(s) Where damage is shown to be directly traceable to unduly prejudicial distribution of coal cars available under existing car supply, carriers can not evade liability therefor by computing what might or could have happened if a full car supply had been available for all shipping mines. Avella Coal Co. v. P. & W. V. Ry. Co., 77 I. C. C. 736.

(t) Every item of cost which does not diminish with decreased production, i. e., which is properly a fixed charge, will increase the total amount of damage resulting from enforced curtailment of production through prejudicial distribution of cars; whereas, every item of cost which does diminish with decreased production, i. e., which is properly a variable charge, will reduce the total amount of damage. Avella Coal Co. v. P. & W. V. Ry. Co., 77 I. C. C. 736.

(u) The initial carrier held liable for additional charges as may be imposed on the shipper by reason of its failure to furnish a car of the capacity ordered. Peninsular Portland Cement Co. v. Director General, 83 I. C. C. 10, 12.

Ct. Rep. 531; Baltimore & O. Co. v. Lambert Run Coal Co., 267 Fed. 776; Hobart Mill & Elevator Co. v. Director General, 69 I. C. C. 412.

§33. Actions at Law.

See Action at Law.

IMPORTANT CASES SINCE 1908

(a) It appeared that at an expense of $5,000 complainant had constructed a tipple at its mine No. 2 and also a siding connecting it with what is known as the "Fuller Run tracks," a road about 1 mile long extending from the defendant's line to mines from which shipments had been made for a number of years, but which at the time seemed to have been closed. From its mine No. 2 the complainant was ready to make shipments in April,

1903, but the siding, as it asserts, was spiked down by the defendant and kept in that condition for about 19 months. Requests were made by the complainant from June 28 to July 31, 1903, for cars enough to ship 100 tons of coal per day from that mine, but no cars were furnished by the defendants until January 17, 1905, and then only after mandamus proceedings had been instituted in the court. The defendant's failure to supply cars for that mine while supplying cars for other mines in the district was one of the discriminations alleged in the complaint. What reason it had for refusing or failing to set cars there was not satisfactorily explained of record, but for some reason also not explained, the complainant allowed the matter to rest in that condition for many months without taking any steps against the defendant and without even renewing its demand for cars so far as the record discloses. HELD: It is not clear that the alleged closing of that siding by the defendant can fairly be regarded as a basis for a charge of discrimination; it has more the character of a tort or a wrongful violation of the defendant's general duty to the complainant as a common carrier, for which an appropriate action in the courts would doubtless lie to recover any damages thus sustained. Hillsdale Coal & Coke Co. v. P. R. R. Co., 19 I. C. C. 356, 367.

(b) It was obvious that the absolute refusal of a carrier to furnish a shipper cars would be a violation requiring no administrative determination and of which the courts could take primary jurisdiction. Vulcan Coal & Mining Co. v. I. C. R. R. Co., 33 I. C. C. 52.

(c) It is obvious that if a carrier should absolutely refuse to furnish a shipper cars under any circumstances, the court could take primary jurisdiction. Vulcan Coal & Mining Co. v. I. C. C. R. R. Co., 33 I. C. C. 52, 65.

(d) It is the carrier's duty to maintain a reasonably adequate car supply, and the question of what is a reasonably adequate car supply is just as much an administrative one as the question of what is a reasonable rate. Vulcan Coal & Mining Co. v. I. C. R. R. Co., 33 I. C. C. 52, 64.

(e) Insofar as the car service rules of carriers are reasonable, but are not observed, the Commission is authorized to require their observance by writ of mandamus under sections 12 and 20 of the act. Car Supply Investigation, 42 I. C. C. 657, 673.

(f) Congress having given the Commission power of supervision and enforcement under Section 1 of the act, a federal district court is without power, in advance of action by the Commission, to entertain a bill in equity to compel carriers to return coal cars to owning lines in compliance with car service rules. Car Supply Investigation, 42 I. C. C. 657, 674.

(g) The liability of carriers for general damages growing out of their failure to furnish cars is determinable by the court. The law does not require them to define their liability by tariff publication and the Commission has no jurisdiction to require carriers to establish reciprocal demurrage regulations. Deposit for Live-Poultry Car Ordered, 66 I. C. C. 653, 656.

(h) An award by the Interstate Commerce Commission in favor of a shipper on account of discrimination in furnishing cars is only prima facie evidence of the amount of the damages, and in an action thereon that question can be litigated. P. R. Co. v. Minds, 244 Fed. 53.

(i) Where the method of coal car distribution followed by a carrier and its assigned car rule is not clearly in violation of the statute or orders of the Interstate Commerce Commission, a court is not warranted in granting a preliminary injunction. Cleveland & Western Coal Co. v. Baltimore & D. R. R. Co., 283 Fed. 995.

(ia) An order of the Interstate Commerce Commission, reversing a former decision relating to distribution of cars to coal mines, and reinstating a former rule of distribution, HELD in effect an affirmative order, and subject to review by a District Court. New River Co. v. Chesapeake & O. Ry. Co., 293 Fed. 460.

(j) A carrier is liable in an action at law for refusing to furnish cars for the shipment of cross-ties while at the same time furnishing cars to others for the interstate shipment of other freight. American Tie & Timber Co. v. K. C. S. Ry. Co., 175 Fed. 28, 31.

(k) A party claiming to be injured by a discriminatory rule for the distribution of coal cars cannot maintain in a court of law an action for the recovery of damages before the Interstate Com-

merce Commission has investigated the case and determined by its report that the rule is or was discriminatory, and this is true, even though the action at law is not begun until after the rule has been canceled by the carrier. Morrisdale Coal Co. v. Pennsylvania R. R. Co., 183 Fed. 929, 934, 938.

(lm) Where verdict, in an action by shipper for damages for railroad company's discrimination in the furnishing of cars, was much less than the amount of the award by the Interstate Commerce Commission, and there was evidence as to the damage other than the award of the commission, the verdict will be presumed to have been based on the evidence instead of the award, and is not subject to attack on the ground that the commission in making its award adopted the wrong theory as to distribution of cars. P. R. Co. v. Minds, 244 Fed. 53.

(n) Shippers being, under the Inter-State Commerce Act, entitled to full compensation for damages from discrimination by carrier in car distribution, neither allowance of interest as part of award by Interstate Commerce Commission nor instruction, in action on the award, that the jury might do so, is error, though recovery was less than amount of claim before Commission, the carrier never having offered any payment. Penn R. R. Co. v. Minds, 39 Sup. Ct. Rep. 531.

(o) For a carrier's refusal to accept proper shipments, or to supply reasonably adequate facilities of carriage, the shipper has a remedy by action. Louisville & Nashville Railroad Co. v. F. W. Cook Brewing Co., 223 U. S. 70, 32 Sup. 189, 223 U. S. 70, 56 L. Ed. 355; Danciger et al. v. Wells Fargo & Co. (C. C.) 154 Fed. 379; Pennsylvania Railroad Co. v. Puritan Coal Mining Co., 327 U. S. 121, Sup. Ct. 484, 59 L. Ed. 867; Illinois Central Railroad Co. v. Mulberry Hill Coal Co., 238 U. S. 275, 35 Sup. Ct. 760, 59 L. Ed. 1306; Missouri Pacific Railway Co. v. Larabee Flour Mills Co., 211 U. S. 612, 29 Sup. Ct. 214, 53 L. Ed. 352; Chicago, Burlington & Quincy Railway Co. v. Burlington, C. R. & N. Railway Co., et al. (C. C.), 34 Fed. 481; Butchers' & Drovers' Stock Yards Co. v. Louisville & N. R. Co., 67 Fed. 35, 14 C. C. A. 290; Moore on Carriers, C., R. I. & P. Ry. Co. v. Lawton Refining Co., 253 Fed. 705, 706.

(p) Where the method of coal car distribution followed by a carrier and its assigned car rule is not clearly in violation of the statute or orders of the Interstate Commerce Commission, a court is not warranted in granting a preliminary injunction. Cleveland & Western Coal Co. v. Baltimore & D. R. R. Co., 283 Fed. 995.

(q) A state court has jurisdiction of an action for a penalty under a state statute for failure to furnish cars without prior reference to the Interstate Commerce Commission. Illinois C. R. Co. v. Mulberry Hill Coal Co., 35 Sup. Ct. 760; 238 U. S. 275, 59 L. Ed. —.

(r) Under sections 8 and 9 of the act and of the proviso in § 22, which declares that "nothing in this act contained shall in any way abridge or alter the remedies now existing at common law or by statute, but the provisions of this act are in addition to such remedies," it is HELD that while the act gave shippers new rights, it at the same time preserved existing causes of action; that it did not supersede the jurisdiction of state courts in any case, new or old, where the decision did not involve the determination of matters calling for the exercise of the administrative power and discretion of the Commission, or relate to a subject as to which the jurisdiction of the federal courts had otherwise been made exclusive; that in actions against railroad companies for unjust discrimination in interstate commerce where a rule of car distribution itself is attacked as unfair or discriminatory, a question is raised which calls for the exercise of the authority of the Interstate Commerce Commission, but if the action is based upon a violation or discriminatory enforcement of the carrier's own rule for car distribution no administrative question is involved, and such an action, although brought against an interstate carrier for damages arising in interstate commerce, may be prosecuted either in the state or the federal courts. And because in that case the action was not based upon the ground that the carrier's rule of car distribution was unreasonable or discriminatory, but the plaintiff was damaged by reason of the carrier's failure to furnish it with cars to which it was entitled even upon the basis of the carrier's own rule of distribution, it was held that the state court had jurisdiction without previous application to the Interstate Commerce Commission. Illinois C. R. Co. v. Mulberry Hill Co., 35 Sup. Ct. 760, 763; 238 U. S. 275, 59 L. Ed. —.

(s) A shipper who has demanded and obtained a ruling from the Interstate Commerce Commission that a carrier's practice in the matter of the distribution to mine owners of cars intended for the interstate transportation of coal was unjustly discriminatory cannot maintain an action in a state court to recover damages under a state statute with respect to the same transaction, although the Commission may not yet have made its award of damages, since the express requirement, in the Interstate Commerce Act, § 9, of an election between a proceeding before the Commission and a suit in the federal courts, leaves no room for the conclusion that there is an option to resort to a state court in the first instance, and the suit on reparation orders, authorized by § 16, either in the state or federal court, may be brought only after the Commission's award has been made. Pennsylvania R. Co. v. Clark Bros. Coal Min. Co., 35 Sup. Ct. 896, 901, 238 U. S. 456, 59 L. Ed. 1.

(t) The question whether a rule or method of car distribution practiced by a railroad company is unjustly discriminatory is one which the Commission has authority to pass upon. Interstate Commerce Commission v. Illinois C. R. Co., 215 U. S. 452, 54 L. Ed. 280, 30 Sup. Ct. Rep. 155; Interstate Commerce Commission v. Chicago & A. R. Co., 215 U. S. 479, 54 L. Ed. 291, 30 Sup. Ct. Rep. 163; Morrisdale Coal Co. v. Pennsylvania R. Co., 230 U. S. 304, 313, 57 L. Ed. 1494, 1497, 33 Sup. Ct. Rep. 938; Pennsylvania R. Co. v. Puritan Coal Min. Co., 237 U. S. 121, 131, 35 Sup. Ct. Rep. 484. Further, by reason of the nature of the question involved in an attack upon the rule or method of the company in distributing cars, no action is maintainable in any court to recover damages alleged to have been inflicted thereby until the Commission has made its findings as to the reasonableness of the rule. Texas & P. R. Co. v. Abilene Cotton Oil Co., 204 U. S. 426, 441, 448, 51 L. Ed. 553, 559, 562, 27 Sup. Ct. Rep. 350, 9 Ann. Cas. 1075; Baltimore & O. R. Co. v. United States, 215 U. S. 481, 493, 54 L. Ed. 292, 297, 30 Sup. Ct. Rep. 164; Robinson v. Baltimore & O. R. Co., 222 U. S. 506, 511, 56 L. Ed. 288, 290, 32 Sup. Ct. Rep. 114; United States v. Pacific & A. R. & Nav. Co., 228 U. S. 87, 107, 57 L. Ed. 742, 749, 33 Sup. Ct. Rep. 443; Morrisdale Coal Co. v. Pennsylvania R. Co., 230 U. S. 304, 313, 57 L. Ed. 1494, 1497, 33 Sup. Ct. Rep. 938; Pennsylvania R. Co. v. Puritan Coal Min. Co., 237 U. S. 121, 131, 35 Sup. Ct. Rep. 484. The Commission also has authority to make examination and report upon the amount of damages which a shipper has suffered from the unjust discrimination alleged in its complaint. The provisions of the act are clear upon this point. There is nothing in the act to suggest that the damages which may thus be ascertained are only those arising from unreasonable or unjustly discriminatory rates. Rules as to car distribution that are unjustly discriminatory are within the purview of § 3, and damages thereby occasioned, as well as those due to the exaction of unreasonable rates, arise from the violation of the act, and their ascertainment is within the scope of the Commission's authority. Interstate Commerce Commission v. Illinois C. R. Co., 215 U. S. 452, 54 L. Ed. 280, 30 Sup. Ct. Rep. 155; Mitchell Coal & Coke Co. v. Pennsylvania R. Co., 230 U. S. 247, 257, 57 L. Ed. 1472, 1476, 33 Sup. Ct. 916; Morrisdale Coal Co. v. Pennsylvania R. Co., 230 U. S. 304, 313, 57 L. Ed. 1494, 1497, 33 Sup. Ct. Rep. 938; Pennsylvania R. Co. v. Puritan Coal Min. Co., 237 U. S. 121, 131, ante, 484, 33 Sup. Ct. Rep. 484; Pennsylvania R. Co. v. Clark Bros. Coal Min. Co., 35 Sup. Ct., 896, 901; 238 U. S. 456, 59 L. Ed. —.

(u) A shipper complaining of discrimination in the furnishing of coal cars has the option of either proceeding under the Interstate Commerce Act or under a state statute which is applicable. If he elects to go before the Interstate Commerce Commission he cannot afterwards in addition to an award granted by that Commission also recover treble damages under a state statute. Pennsylvania R. Co. v. Clark Bros. Coal Min. Co., 35 Sup. Ct. 896. 902, 238 U. S. 456, 59 L. Ed.—.

(v) Where it appears that the act has been violated through a discriminatory method of car distribution, and the requisite ruling as to the unreasonableness of the practice assailed has been made by the Commission, the provisions of § 9 are applicable. This section provides: "Sec. 9. That any person or persons claiming to be damaged by any common carrier subject to the provisions of this act may either make complaint to the Commission as hereinafter provided for, or may bring suit in his or their own behalf for the recovery of the damages for which such common carrier may be liable under the provisions of this act, in any

district or circuit court of the United States of competent jurisdiction; but such person or persons shall not have the right to pursue both of said remedies, and must, in each case elect which one of the two methods of procedure herein provided for he or they will adopt. * * * (24 Stat. at L. 382, chap. 104, Comp. St. 1913, § 8573.) This provision defines the remedies to which a person in the situation of the plaintiff is entitled, and the terms of the provision clearly indicate that these remedies are exclusive. The express requirement of an election between the proceeding before the Commission and suit in the Federal court leaves no room for the conclusion that there is an option in such case to resort to the state court. Where the proceeding has been had before the Commission and reparation awarded, suit under §16 (as amended in 1910 (36 Stat. at L. 554, chap. 309, § 13, Comp. Stat. 1913, § 8584) may be brought in either a state or a federal court, but this is after the Commission's award has been made. Pennsylvania R. Co. v. Clark Bros. Coal Min. Co., 35 Sup. Ct. 896, 901; 238 U. S. 456, 59 L. Ed. —.

(w) Under the Commerce Act, "transportation" includes the entire body of services rendered in connection with the receipt, handling and delivery of property transported, and includes the furnishing of cars. The term "transportation" shall include cars and other vehicles and all instrumentalities and facilities of shipment or carriage * * * and all services in connection with the receipt, delivery * * * and handling of property transported, and it shall be the duty of every carrier subject to the provisions of this act to provide and furnish such transportation upon reasonable request therefor. Interstate Commerce Act, § 1, provides that, in case any carrier shall omit to do any act required to be done, it shall be liable for the full amount of damages sustained. Section 20 (section 8604a, 8604aa) provides that any carrier shall be liable to the holder of a bill of lading for any loss, damage, or injury to the property which it causes. Section 22 (section 8595) preserves other rights and remedies not inconsistent with the act, and the form of the action for failure to furnish cars is not material. Penn. R. R. v. Puritan Oil Co., 237 U. S. 121; 35 Sup. Ct. 484, 59 L. Ed. 867.

(x) The carrier's defense at the trial of a suit brought by a shipper to recover the damages arising in interstate commerce out of the carrier's failure to furnish such shipper with the cars to which it claimed to be entitled under the carrier's own rule for car distribution, that the rule invoked by the shipper was discriminatory and therefore not an appropriate test of the shipper's right or the carrier's duty, did not oust the state court of jurisdiction, where the administrative question thus presented was not then an open one, such rule having theretofore been found by the Interstate Commerce Commission, upon complaint of other shippers, to be unjustly discriminatory. Penn. Ry. v. Stineman Coal Min. Co., 37 Sup. Ct. 118.

(y) A state court has jurisdiction over a suit by a shipper against a carrier for damages arising from unjust discrimination by the carrier in departing from its established method of distributing cars so as to favor plaintiff's competitor and unduly prejudice plaintiff, and nothing in the Interstate Commerce Act with respect to the authority granted to the Commission in such matters deprives a state court of jurisdiction where the Interstate Commerce Commission has issued no order respecting the discrimination involved. Puritan Coal Mining Company v. Pennsylvania R. R. Co. (Pa. 1812), 85 A. 426, 434.

(z) In a suit for damages in a state court against a carrier for unjust discrimination in the distribution of cars, the period of discrimination complained of antedated the ruling of the Interstate Commerce Commission holding it to be the duty of the interstate carrier in making distribution of its cars in times of shortage to include in the computation private cars in addition to its own. Under its adopted practice, acquiesced in by all the shippers in the district, the carrier was accustomed to compute distribution on the basis of its own cars exclusive of those owned by private parties. It appeared that the carrier disregarded its accustomed basis of distribution, not because it was inequitable for the reason that the private cars had not been included in the computation, but solely with a view of giving a particular shipper an unlawful preference. HELD: A judgment in favor of the plaintiff should be sustained in spite of the fact that the court did not take into account the private or individual cars in determining the extent of the discrimination against the plaintiff. Puritan Coal Mining Co. v.

Pennsylvania R. R. Co. (Pa. 1912), 85 A. 426, 438.

(aa) Nothing in the Interstate Commerce Act deprives a state court of jurisdiction to entertain a suit for damages arising from discrimination in the supply of cars to be used in interstate commerce, such suit being founded on the common law or on the state statute, since in the absence of specific legislation by Congress of such offense the jurisdiction of the state courts remains undisturbed. Walnut Coal Co. v. Pennsylvania R. R. Co. (Pa. 1912), 85 A. 440, 442

(bb) The fact that a shipper has not only filed his complaint with the Commission and secured a ruling or order declaring a carrier's practice relative to assignment of coal cars to be discriminatory, but has also been awarded reparation, will not bar action by the shipper under state law for damages for discrimination, where the discrimination relates to coal sold f. o. b. cars at the mines, and therefore not subject to interstate commerce regulation. Clark Bros. Coal Mining Co. v. Pennsylvania Ry. (Pa. 1913), 88 Atl. 754, 760.

(cc) In an action against a carrier for failing to furnish cars, founded upon the carrier's common law duty, the suit is not one to enforce the Interstate Commerce Act, and although the damages arise by the act of a carrier engaged in interstate commerce with respect to shipments intended to be interstate, a state court has jurisdiction. Pittsburgh, C., C. & St. L. Ry. Co. v. Wood (Ind. 1908), 84 N. E. 1009, 1012.

(dd) An action for damages resulting from failure of the carrier to furnish cars for the shipment of freight within a reasonable time after the date agreed upon between the shipper and the station agent of the carrier, is not prohibited by the Interstate Commerce Act, as amended June 29, 1906. C., R. I. & P. Ry. Co. v. Beatty (Okla. 1914), 141 Pac. 442.

(ee) Under a contract to supply cars for shipment of live stock, which the carrier broke by delay in supplying cars, knowing that the stock was intended for sale on the market in a distant city, the measure of damages is not the amount of depreciation at the point of shipment, but the depreciation in market value at the destination, that being within the reasonable contemplation of the parties. Levy v. Nevada - California - Oregon Ry. (Ore. 1916), 160 Pac. 808.

(ff) In a suit for treble damages for discrimination in preferring shippers who ordered and were furnished cars after claimant ordered cars for shipping lumber, wherein the carrier endeavored to show cars furnished others on subsequent orders were for shipping mine material, prefered by an Interstate Commerce Commission order, and the evidence showed some cars so furnished were for such material, and some of the preferred shippers shipped lumber and mine material, an instruction for the claimant, based on a preference of other shippers, requiring the jury to find that after claimant's cars were ordered other shippers at the station in question "engaged in the business of shipping lumber," ordered cars, and were preferred, was erroneous in not requiring the jury to find that such cars were not loaded with mine material. Stroud v. Missouri Pac. R. Co. (Mo. 1922), 236 S. W. 891.

(gg) Congress has defined "transportation" to include all cars, instrumentalities, and facilities of shipment, etc. All interstate shipment does not confine transportation to the actual voyage or trip. See above, §8563, Railway Co. v. Dettlebach, 239 U. S. 588, 36 Sup. Ct. 177, 60 L. Ed. 453; Railway Co. v. Smyth, 189 S. W. 70; Railway Co. v. White, 188 S. W. 714. Congress evidently recognized that the duty to the public included a variety of services that, according to the theory of the common law, were separable from the service of carriers as carriers, so that by the Act of Congress the entire body of the services to be performed falls under the general head of transportation, among which is furnishing cars. So it is made the duty of the carrier to "furnish suitable" cars as part of the transportation. Appellant cites cases in which recovery for a penalty is sought under the state statutes. R. C. S. arts, 6683 et seq. Some of the cases allege as grounds therefore a contract to furnish cars at a specified time, with no allegation that they were not furnished within a reasonable time after the order. In such cases the courts held that the pleadings did not justify a recovery for withholding the cars an unreasonable length of time. Railway Co. v. Cannington, 110 S. W. 965; Railway Co. v. Arnett, 40 Tex. Civ. App. 76, 88 S. W. 488, and other authorities. In that class of cases it is usually held a party suing for a penalty is required to bring himself strictly within the terms of the statute,

both by the pleadings and the evidence, and that he is charged with the burden of showing he is within the letter of the statutes authorizing a recovery of the penalty. Ft. Worth & D. C. Ry. v. Strickland (Tex. 1918), 248 S. W. 410.

ALL OTHER CITATIONS

Atchison, T. & S. F. Ry. Co. v. Smyth, (Tex. 1916), 189 S. W. 70; Ft. Worth & D. C. Ry. Co. v. Strickland (Tex. 1918) 208 S. W. 410; Weber v. Penn. R. Co. (Pa. W. 246; Cecil v. Southern Express Co. (Ky. 1921), 229 S. W. 1041; Cornwell v. Davis, (Mont. 1923), 213 Pac. 218; J. C. Francesconi & Co. v. Baltimore & O. R. Co., 274 Fed. 687.

§34. Defenses.

See Courts §2.

IMPORTANT CASES SINCE 1908

(a) A carrier cannot give a shipper a preference in car distribution in order that it may profit thereby; neither can it give the shipper a preference in order that the shipper may profit thereby, and, when called upon by an individual shipper for full car service, the only defense which the carrier can interpose is that the supply which it has furnished is sufficient for normal demands, and that in times of stress it has fairly and impartially prorated all of its car equipment. (McDowell, J., dissenting.) U. S. v. B. & O. R. Co., 165 Fed. 113, 126.

(b) In a suit for damages by a shipper for the refusal of defendant carriers to furnish cars and transport cross-ties, defendants set up that they had on file with the Interstate Commerce Commission no published rates on cross-ties. Defandants' tariffs so on file did, however, contain interstate rates on "lumber, all kinds," of 24c. No specific rate on cross-ties was included in these tariffs. HELD: The published rates on lumber were applicable to cross-ties and the defense set up was not valid. American Tie & Timber Co. v. K. C. S. Ry. Co., 175 Fed. 28, 32.

ALL OTHER CITATIONS

Ft. Worth & D. C. Ry. Co. v. Strickland (Tex. 1918), 208 S. W. 410; Ft. Worth & D. C. Ry. Co. v. Strickland (Tex. 1918), 258 S. W. 410.

§35. Res. Adjudicata.

See Evidence V.

CASES 1887-1908

(a) A case before the Commission involving alleged discrimination in furnishing cars, and demanding reparation, is not barred, under section 9 of the Act, by the previous institution in the State court of a suit for damages between the same parties based on such discrimination. Gallogly v. Cincinnati, H. & D. R. Co., 11 I. C. C. 1.

IMPORTANT CASES SINCE 1908

(b) A suit to determine a question of car distribution brought between one shipper and a carrier does not render the question res adjudicata with respect to other shippers who were not parties to the proceedings, and had no opportunity to be heard therein, and such shippers may raise the same questions in a mandamus suit against the same carrier. (McDowell, J., dissenting.) U. S. v. B. & O. R. Co., 165 Fed. 113, 124.

ALL OTHER CITATIONS

Merchants' Coal Co. v. Fairmont Coal Co., 160 Fed. 769, 778.

§36. Evidence.

See Supra §9; Evidence §39.

CASES 1887-1908

(a) Merely putting in evidence defendants rule of apportionment is unsufficient to show discrimination against the complainant; the actual effect of the car distribution rule, during the time covered by the complaint is necessary to a determination of the question of unfairness in the distribution of cars. Richmond Elevator Company v. Pere Marquette R. R. Co., 10 I. C. C. 629, 637.

IMPORTANT CASES SINCE 1908

(b) Handling of empty cars causes nearly as much damage to the car for which repairs are necessary as the loaded movement, and there is little difference in the depreciation during the period of each movement. In Re Private Cars, 50 I. C. C. 652, 685.

(c) The corporate builder and owner of such instrumentalities of commerce as refrigerator, tank, and box cars, which it leases to railway companies and shippers, has the general immunities of an ordinary witness, unless and until it is shown to be merely the tool of the users of the cars, against an inquiry into its private business affairs in an investigation ordered by the Interstate Commerce Commission for the purpose of determining whether the allowances, practices, or minimum carload weights obtaining where private cars are used to violate the provisions of the Act, §1-3, 15, as being unjust, unreasonable, or unduly

discriminatory. Ellis v. Interstate Com. Com., 35 Sup. Ct., 645, 646, 647; 237 U. S. 434, 59 L. Ed. 1056.

(d) Evidence of the number of the carrier's coal cars on other railway lines is immaterial in an action to recover damages arising out of the carrier's failure, upon reasonable demand, to supply to a shipper in interstate commerce a sufficient number of cars to transport the output of the latter's coal mine, where there is no claim of a car shortage, or that conditions in the coal trade were other than normal. Pennsylvania R. Co. v. Sonman Shaft Coal Co., 37 Sup. Ct., 46; 242 U. S. 120, 61 L. Ed. 188.

ALL OTHER CITATIONS

Royal Coal & Coke Co. v. Southern Ry. Co., 13 I. C. C. 440, 448; Ft. Worth & D. C. Ry. Co. v. Strickland, (Tex. 1918), 208 S. W. 410.

VII. LIMITATION OF LIABILITY.

§37. In General.

See Tariffs.

IMPORTANT CASES SINCE 1908

(a) Tariffs are not the proper place for rules prohibiting the practice of car peddling; on the other hand the privilege if accorded to shippers, seems to be lawful only when provided for in the carriers tariffs. The Car Peddling Case, 45 I. C. C. 494, 502.

§38. Open Cars.

CASES 1887-1908

(a) Upon the facts found in these cases, the Commission will not order the rail carriers to transport cotton on flat cars instead of in box cars to New Orleans, the rate being the same on each, no injury being shown to have resulted to petitioners or to that city, or to any shipper or producer from the carriage in box cars. New Orleans Cotton Exchange v. Illinois Central R. Co., 2 I. C. R., 777.

IMPORTANT CASES SINCE 1908

(b) Certain kinds of goods may, and of necessity must, be transported in open cars. Carriers commonly hold themselves out to transport such goods, and they must therefore receive and transport them when offered for shipment. In the absence of statutory prohibition, it seems, the carrier may stipulate for a limitation of its liability in receipt of goods so transported except, of course, that it can make no stipulation for exemption on account of loss or damage caused by its own negligence, 2 Hutch. Carr. (3rd Ed.), §506, and under the law, when a consignor of goods agrees that they may be loaded and transported in open cars, the carrier, in the absence of negligence on its part, is not liable for any damage caused to the goods by their being so loaded and transported. Western & A. R. Co. v. Exposition Cotton Mills, 81 Ga. 522. But the carrier must exercise ordinary care and diligence even when the shipper agrees to or requests the transportation in open cars. C. St. L. & N. O. R. Co. v. Moss, 60 Miss. 1003; Michie, Carriers, §1020. Bills of Lading, 52 I. C. C. 671, 707.

VIII. TARIFFS AND PUBLICATION.

§39. Car Service Rules.

CASES 1887-1908

(a) It is the legal duty of defendant to publish and file its rates and regulations for the movement of private cars, certain kinds of which are more or less frequently handled over its line. Carr v. N. P. Ry., 9 I. C. C. 1, 15.

IMPORTANT CASES SINCE 1908

(b) The complainant's further contention that the car service rules not incorporated in schedules on file with the Commission is without merit. No direction that they should be so incorporated and filed had been made by the Commission under the car service amendment to section 1 of the act, and their publication in such manner is not otherwise required by the act. Armour Grain Co. v. Director General, 57 I. C. C. 398, 405.

(c) Under paragraph 13 of section 1 of the Act of the Commission is authorized by general or special orders to require all the carriers by railroad subject to the act to file with it from time to time their rules and regulations with respect to car service, and the Commission may, in its discretion, direct that such rules and regulations be incorporated in the schedules showing rates, fares and charges for transportation and thereby subject to any or all of the provisions of the act relating thereto. Fairmount & Cleveland Coal Co. v. B. & O., 62 I. C. C. 269, 276.

(d) The Commission has not required that car service rules be filed as tariff schedules. Fairmont & Cleveland Coal Co. v. B. & O. R. R. Co., 62 I. C. 269, 276.

(e) While the Commission did not direct that certain car service rules be filed, as it may have required carriers

to do under the provisions of section 1 of the act, it was expected that carriers promptly amend such rules to conform to the findings and evidence same by filing copies with the Commission. Fairmont & Cleveland Coal Co. v. B. & O. R. R. Co., 62 I. C. C. 269, 276.

(f) Car Distribution: Practice of respondent in assigning private cars, and system of foreign-line cars for railway fuel, to bituminous coal mines in excess of ratable share distributed to bituminous coal mines upon their lines not receiving assigned cars, found unjust and unreasonable, and unduly and unreasonably preferential of mines furnished such cars in excess of ratable proportion and discriminatory against and unduly prejudicial to such other mines not receiving assigned cars. Finding not to preclude commission, in exercise of emergency powers under paragraph (15) of section 1 of the act, from requiring placement of cars for such loading at mines in excess of percentage allotment to mines generally upon lines of same carrier, or upon same division. Assigned Cars for Bituminous Coal Mines, 80 I. C. C. 520.

(g) By paragraph (11) of section 1 of the act it is made the duty of carriers to establish, observe, and enforce just and reasonable rules, regulations, and practices with respect to car service; and every unjust and unreasonable rule, regulation, and practice with respect to car service is prohibited and declared to be unlawful. Assigned Cars for Bituminous Coal Mines, 80 I. C. C. 520, 556, 557.

(h) By paragraph (14) of section 1 of the act the commission is given jurisdiction to establish reasonable rules, regulations, and practices with respect to car service, including compensation to be paid for use of any car not owned by carrier using it. Assigned Cars for Bituminous Coal Mines, 80 I. C. C. 557.

ALL OTHER CITATIONS

Assignment of Freight Cars, 57 I. C. C. 760, 763, 765, 766, 707, 771; American Wholesale Lumber Asso. v. Director General, 66 I. C. C., 393, 397, 405; Republic of France v. Director General, as Agent, 68 I. C. C. 419.

IX. RULES AND REGULATIONS.

§40. In General.

IMPORTANT CASES SINCE 1908

(a) If a shipper habitually delays cars for unloading at destination the carriers may place an embargo against freight consigned to him and thus prevent further detention of equipment; if the shipper habitually delays loading cars the carrier may refuse further supply and thus prevent detention and accumulation of cars at the loading point. American Wholesale Lumber Asso. v. Director General, as Agent, 66 I. C. C. 393, 405.

(b) A charge in the nature of a penalty is not unlawful if its purpose is to secure for the public a more efficient use of equipment, and while it should not be so high as to work an undue hardship, it should be sufficient in amount to accomplish the purpose for which it is intended. American Wholesale Lumber Asso. v. Director General, 66 I. C. C. 393, 397.

ALL OTHER CITATIONS

Assignment of Freight Cars, 57 I. C. C. 760, 763, 765, 766, 767, 771; Armour Grain Co. v. Director General, 57 I. C. C. 398, 405; Assigned Cars for Bitumionus Coal Mines, 80 I. C. C. 520, 556, 557.

CARTAGE AND DRAYAGE

See Drayage.

CASES 1887-1908

(a) Where a common carrier subject to the Act to Regulate Commerce has established and published its schedule of rates and charges for a station on its line, free cartage furnished by the carrier for the collection and delivery of freight carried on its road to or from such station operates as a reduction or rebate from the schedule charge, and is unlawful. If free cartage at a station has the effect to reduce a rate below the charge at another station nearer the point of shipment it is unlawful as a less charge for a longer distance over the same line and in the same direction, the less being included within the greater. Stone & Carter v. Detroit, Grand Haven & Milwauke R. Co., 3 I. C. R. 60.

(b) It is not material to the question of the lawfulness of free cartage furnished at one town and not at another that the business was done in that way for many years before the Act to Regulate Commerce was enacted. If what was done and is now done works unjust discrimination or is in any particular obnoxious to the Law, it is an abuse, and one that it must be assumed was intended to be corrected by the Act. Stone & Carter v. Detroit, Grand Haven & Milwaukee R. Co., 3 I. C. R. 60.

(c) The respondent company had a tariff schedule in effect grouping the rates from eastern points to Ionia and Grand Rapids in Michigan, Ionia being the shorter distance, and furnished free cartage at Grand Rapids and not at Iona. Upon complaint by a firm of dealers at Ionia. HELD, that the free cartage at Grand Rapids was in effect a rebate and unlawful. Stone & Carter v. Detroit, Grand Haven & Milwaukee R. Co., 3 I. C. R., 60.

(d) It is not material to the question of the lawfulness of free cartage furnished at one town and not at another, that the business was done in that way for many years before the Act to Regulate Commerce was enacted. A shipper from whose mill flour is taken in cars cannot complain that the carrier bears a portion of the cartage expenses of other millers. Hezel Milling Co. v. St. Louis, A. & T. H. R. Co. (Com.) 3 I. C. R. 701.

(e) The furnishing of free cartage at one place, and not at another at a less distance from the point of shipment, is a violation by a railway company of the long and short haul clause of the Interstate Commerce Act, where the transportation is under substantially similar circumstances and conditions. Interstate Commerce Commission v. Detroit, G. H. & M. R. Co. (C. C. W. D. Mich.), 4 I. C. R. 722.

(f) The furnishing of free cartage by a railroad company at one place and not at another cannot be justified as analogous to the providing of a switch track for the benefit of customers whose storehouses are convenient to the railway track, since the latter is usual railway business, while cartage is something not usually undertaken by railways. Interstate Commerce Commission v. Detroit G. H. & M. R. Co. (C. C. W. D. Mich.), 4 I. C. R. 722.

(g) That the competitors of a railway company have their stations in a certain place in the business center, while its own is at a distance, does not create a dissimilar condition which will allow such company to furnish free cartage of goods while at another station it does not do so, if it would justify it in furnishing cartage at a price equal to that for which cartage can be obtained from the stations of such competitors. Interstate Commerce Commission v. Detroit, G. H. & M. R. Co. (C. C. W. D. Mich.), 4 I. C. R. 722.

(h) The fact that the station of a railroad company is at a greater distance from the business center of one town than in another does not justify it in furnishing free cartage in the former on the ground that the circumstances and conditions are dissimilar, since in any case the consignees would have to pay cartage though the price might be less. Interstate Commerce Commission v. Detroit, G. H. & M. R. Co. (C. C. W. D. Mich.), 4 I. C. R. 722.

(i) The fact that one city is a larger place than another does not create different circumstances and conditions which will justify a railroad company in furnishing free cartage for goods transported by it in the former and not in the latter, though it may reduce the cartage cost to the shipper at the former place in so far as the greater amount of business enables it to do carting at a cheaper rate than at the latter place. Interstate Commerce Commission v. Detroit, G. H. & M. R. Co. (C. C. W. D. Mich.), 4 I. C. R. 722.

(j) A carrier's furnishing free cartage between its station and the warehouse of shippers and consignees at one point which is refused at a point nearer the place of shipment but which has been lawfully grouped with the former for a common charge from the place of shipment, is an undue discrimination against the latter, violative of the Interstate Commerce Act, and is not justified by the facts that the business at the former point is much greater than at the latter, and at the former the stations of rival carriers are much nearer than its station to the business portion of the town, since the advantage of free cartage is more than enough to equalize conditions. Interstate Commerce Commission v. Detroit, G. H. & M. R. Co., 4 I. C. R. 722.

(k) Furnishing free cartage or delivery of goods at one town but not at another to which the same rates are charged for a shorter haul is not equivalent to charging a greater compensation for the shorter distance in violation of §4 of the Act to Regulate Commerce, since that section relates only to the transportation by rail and the charges therefor. The failure of a railroad company to publish in its schedules of rates the fact of free cartage at a certain place where it has been openly and notoriously granted to shippers and consignees for a quarter of a century, is not a violation of §6 of the act, at least when the Interstate Commerce Commission has

not made any general order requiring free cartage to be included in such schedules. Interstate Commerce Commission v. Detroit, Grand Haven & Milwaukee Ry. Co., 7 I. C. C. app. LVII.

(l) Although carting to and from stations when it becomes an element of interstate commerce is within the control of Congress and falls within the regulation of the Interstate Commerce Act in determining how far the provisions of such act apply, the fact that it is a separate and independent business not usually carried on by the railroad companies, nor within the scope of the act, nor under the power of Congress, should be kept in mind, and it is only by combining the rail carriage and cartage into one continuous cartage that carting service can be brought within the act pertaining to the equality of rates. Detroit, Grand Haven & Milwaukee Ry. Co. v. Interstate Commerce Commission, 7 I. C. C. app. LXXIV.

(m) A dissimilarity of circumstances which will justify the inclusion without extra charge at one place of cartage to and from the station of a railroad company while the same rate is charged without such cartage at a place involving a shorter haul, but not in mercantile rivalry with the former, is created by the fact that the custom has been established at the former place to give such cartage for many years prior to the adoption of the Interstate Commerce Act, and that the station of the company is located much farther from the business portion of the town than at the latter place,—especially where to abandon such custom and obtain access to the business portion of the city would entail an enormous cost for right of way and necessaries of construction and reconstruction, and there is great competition of rival carriers for the same traffic at the former place while there is not at the latter. Detroit, Grand Haven & Milwaukee Ry. Co. v. Interstate Commerce Commission, 7 I. C. C. app. LXXIV.

(n) The provision of the Interstate Commerce Act denouncing a greater compensation in the aggregate for transportation for a shorter than for a longer distance means only that, taking all the rates of fare and charges incidental to the transportation together, these shall not be more for the shorter haul, and is not necessarily violated where they are precisely the same, although the charge at one station includes cartage while it does not at the other, where such cartage is reasonable under the circumstances and conditions made by the carrier in the due course of its business at the place. Detroit, Grand Haven & Milwaukee Ry. Co. v. Interstate Commerce Commission, 7 I. C. C. app. LXXIV.

(o) An order of the Interstate Commerce Commission that a carrier discontinue cartage without extra charge at a certain place is not a lawful order or requirement which the courts can be invoked to enforce while it operates to deprive the carrier of its business at that place, whatever power the Commission may have to prevent inequality of rates between such place and another. Detroit, Grand Haven & Milwaukee Ry. Co. v. Interstate Commerce Commission, 7 I. C. C. app. LXXIV.

(p) An arbitrary and preemptory order of the Interstate Commerce Commission to abandon accessorial cartage at one place, as a discrimination against another place, without regard to rates or option as to readjustment of them, is an interference with the rights of property and its use beyond the power of the Commission. Detroit, Grand Haven & Milwaukee Ry. Co. v. Interstate Commerce Commission, 7 I. C. C. app. LXXIV.

(q) An allowance for cartage made by a railroad company to a shipper who had no siding connection with that line, although he had such connection with another competing line, is in violation of the section of the Interstate Commerce Act prohibiting rebates, drawbacks, and special rates, when a similar allowance was not made to another person who shipped goods over the same line, under the same circumstances except that he had no siding connection with either road. The phrase "under substantially similar circumstances and conditions" in §2 of the Interstate Commerce Act refers to the matter of carriage, and does not include competition. The court says: The wrong prohibited by the section is a discrimination between shippers. It was designed to compel every carrier to give equal rights to all shippers over its own road and to forbid it by any device to enforce higher charges against one than another. Wight v. U. S., 7 I. C. C. app. XCV.

IMPORTANT CASES SINCE 1908

(r) Cartage may, of course, be furnished as an accessorial service by the delivering carrier, and it may charge therefor as a distinct and separate terminal

service, but such cartage presupposes delivery upon the team tracks of the carrier and is supplementary thereto. Associated Jobbers of Los Angeles v. A. T. & S. F. Ry. Co., 18 I. C. C. 310, 316.

ALL OTHER CITATIONS

Mitchell Coal & Coke Co. v. Penn. R. R. Co., 33 Sup. Ct. 916, 922, 230 U. S. 304.

CIRCUS TRAINS

See Long and Short Haul §4, §4¾; Routing and Misrouting §4; Through Routes and Joint Rates §6.

IMPORTANT CASES SINCE 1908

(a) Following Snook Case, 17 I. C. C., 375, without determining whether the commission has jurisdiction over charges subsequent to termination of Federal control for transportation of circus and carnival trains, in private equipment, under special contract as provided in rule 63 of Tariff Circular 18-A. HELD, Charges can not be regarded as in violation of the interstate commerce act or the transportation act, 1920. The level of such charges does not appear unreasonable as compared with rates on various commodities, the traffic is of a peculiar nature and requires special handling, and no discrimination to its prejudice is apparent. Coma v. St. L.-S. F. Ry. Co., 74 I. C. C. 400.

(b) Complainant attacked rates actually charged and sought to be charged by defendants for the movement of carnivals as illegal, unreasonable, and unjustly discriminatory. Carnival shows vary in size from 1 to 30 cars, but complainant is attacking only the charges on circuses and shows of not less than 6 or more than 30 cars. Ordinarily, circuses exhibit in different places each week day, and move during the night, while carnival or fair shows continue an engagement for a week and move on Sundays. All circus and carnival outfits of five cars or more are handled by the carrier's freight departments and are moved in special trains on special schedules arranged to suit the convenience of the show management. The owners provide the equipment which consists of flat, stock, box and passenger cars, owned or leased by them, while the carrier furnishes the engine, caboose and crew, the crew for each train consisting of an engineer, fireman, conductor and two or at times three brakemen. Transportation has been performed under special contracts executed by the show owners and the carrier's general officers, new contracts being made for each movement or series of connected movements. The contracts stipulate that they are not made by the carrier in its capacity as a common carrier. The contracts are filed with the Commission on one days' notice, in compliance with rule 63 of the tariff circular 18-A. It does not appear that defendants have discriminated in their charges or practices as between the different show owners, or unduly discriminated against this traffic in any respect. It, moreover, does not appear that the level of these charges are unreasonable or that complainant is entitled to the relief asked even if the Commission were authorized to exercise jurisdiction, and no opinion need be or is here expressed with respect to the jurisdictional question. HELD, charges complained of can not be regarded as in violation of the act even if those acts should be construed as giving the Commission power to enter such orders as are here prayed. Complaint dismissed. Coma v. St. L. S. F. Ry., 74 I. C. C. 400.

(c) The uniform scale of charges for transportation of circus and carnival trains promulgated by the railroad administration during Federal control, was merely an administrative authority and not a rate or charge, and as such not governed by section 208 (a) of the transportation act, 1920. Coma v. L.-S. F. Ry. Co., 74 I. C. C. 400, 402.

(d) The courts, both state and federal, have with practical unamity held that a railroad company is not required as a common carrier to transport circus trains. Coma v. St. L.-S. F. Ry. 74 I. C. C., 400, 407.

(e) The holding of State and Federal courts that a railroad is not required as a common carrier to transport circus trains is not determinative of whether the commission has jurisdiction over charges for such transportation under special contracts as provided in rule 63 of Tariff Circular 18-A. These cases were based on negligence, and the question of the commission's jurisdiction was not in issue. Moreover, the major portions were decided prior to the 1906 amendment to the act, while rule 63 was adopted subsequent thereto. Coma v. St. L.-S. F. Ry. Co., 74 I. C. C. 400, 407, 408.

(f) In the performance of a contract entered into by a railway company with

a circus for hauling its train from place to place, the railway company was not acting as a common carrier. Dierick v. Davis, (Ind. 1922), 137 N. E. 685.

I. WHEN STATUTE OF LIMITATION RUNS.

See Actions at Law; Crimes §28; Loss and Damage §11¼, §13½; Overcharges §7; Reparation; Statute of Limitations.

§1. In general.

CASES 1887-1908

(a) The Statute of Limitations does not begin to run against the claim of a shipper to recover back excessive payments of freight charges so long as he has no knowledge of his rights, owing to the fraudulent concealment of the cause of action by the carrier. Cook & Wheeler v. Chicago R. I. & P. R. Co., 3 I. C. R. 383.

(b) The Statute of Limitations does not commence to run while plaintiff has no knowledge of his rights owing to a fraudulent concealment of the cause of action by defendant. Cook v. Chicago, R. I. & P. R. Co. (Iowa), 3 I. C. R. 383.

(c) The concealment from a shipper of the fact that the rates charged him were excessive and that rebates were secretly given to others and false representations as to these facts, do not take a cause of action for the recovery of the excess paid by him out of the statute of limitations, as the case is not based on fraud. Murray v. Chicago & N. W. R. Co., 4 I. C. R. 806.

(d) Where the statute establishes a method of procedure for the enforcement of a right of action which finally results in bringing that matter by the prescribed course before a court for determination, the principle established by leading cases is that the first step which must be taken in the proceeding to enforce the claim should be treated as the beginning of the suit which finally results. Therefore when a party elects to proceed before this Commission for the recovery of damages his petition filed with this Commission should be considered the beginning of his action in all its subsequent stages. In this case the suit of members of the Cattle Raisers' Association of Texas for the recovery of damages should be treated as having been begun by the filing on their behalf of the original petition of that Association herein, and there is, consequently, no room for application of a statute of limitations. Cattle Raisers' Asso. v. C. B. & Q. R. Co., 10 I. C. C. 83.

IMPORTANT CASES SINCE 1908

(e) Where there is no privity of interest between the consignor and consignee, the filing of a claim for reparation by the consignee does not constitute a filing by or on behalf of the consignor. Traffic Bureau, Sioux City Com. Club v. A. & S. R. R. R. 37 I. C. C. 353.

(f) The commission cannot therefore consider claims which accrued more than two years before they were filed. Salem Iron Works v. S. P. Co., 38 I. C. C. 600.

(g) The right to recover damages on account of a rate alleged to be excessive and therefore unlawful is subject to a provision in section 16 of the Act to regulate commerce, as follows: "All complaints for the recovery of damages shall be filed with the Commission within two years from the time the cause of action accrues, and not after." The bar of this provision commences to run, not from the time when the shipper pays the rate, but

from the time when the law imposes upon him the obligation to pay it, namely upon the delivery of the shipment to him at destination. Navassa Guano Co. v. C. M. & St. P. Ry. 39 I. C. C. 171, 172.

(h) The filing of an intervening petition tolls the statute of limitations irrespective of the date of the Commission's order permitting the intervention. Cotton Manufacturers' Asso. of S. C. v. C., C. & O. Ry., 57 I. C. C. 584, 588.

(i) Contention that section 206 (f) of the Transportation Act, 1920, in so far as it undertakes to revive claims which had become barred when that act was approved is unconstitutional, in that it operates to deprive carriers of property without due process of law. HELD, Following Kalbfleisch Corp., 68 I. C. C., 333, such shipments as come within the terms of the statute are not barred. Calivada Fertilizer Co. v. S. P. Co., 73 I. C. C. 496, 498.

(j) Objection of carriers to consideration of shipments on the ground that they were all barred by the statute of limitations at the time of the passage of the Transportation Act, 1920. HELD, Not sustained following Pittsburg Grain & Hay Exchange, 62 I. C. C., 506. Nicholas Oil Co. v. A., T. & S. F. Ry. Co., 73 I. C. C. 725, 727.

(k) Following Thomas Iron Co., 57 I. C. C., 657, contention that section 206 (f) of the Transportation Act, 1920, which provides that the period of Federal control shall be disregarded in computing the period of limitation in claims for reparation to the commission for causes of action arising prior thereto, is inapplicable to claims that accrued more than two years prior to the passage of the Transportation Act, not sustained. Lakewood Engineering Co. v. N. Y. C. R. R. Co., 74 I. C. C. 465, 466.

(l) Complainant at the hearing asked leave to amend its complaint to include a prayer for reparation on additional shipments. HELD, Claim, at time amendment presented, found barred by the statute of limitations and can not be considered. Lackawanna Steel Co. v. Director General, as Agent, 77 I. C. C. 465, 468.

(m) Amendment of February 24, 1922, to limitations provision of interstate commerce act made no change in the provision that complaints for causes arising out of Federal control might be filed with commission within one year after termination thereof. Lay Fish Co. v. Director General, as Agent, 80 I. C. C. 4, 5.

(n) The period of limitation is computed from the date of delivery or tender of delivery of the shipments. Lindeteves Stokvis v. Director General, 89 I. C. C. 3.

C. 516.

§1½. Under Transportation Act.

See Transportation Act.

IMPORTANT CASES SINCE 1908

(a) Under section 206 (f) of the transportation act, 1920, the period of federal control is not to be computed as part of the period of limitation in claims for reparation for causes of actions arising prior thereto, and claims named in a complaint filed during federal control based on causes of action which arose within two years prior thereto are not barred by the statute. Lazarus v. N. Y. C. R. R. Co., 271 Fed. 93; Pittsburgh Grain & Hay Exchange v. Director General, as agent, 62 I. C. C. 506, 508.

(b) Section 206 of the transportation act, 1920, provides that the period of federal control shall not be computed as a part of the periods of limitation in claims for reparation for causes of action arising prior to federal control. Claims based on causes of action which, excluding the period of federal control, arose within two years prior to May 25, 1921, the date of filing complaint are, therefore, not barred. Ball, Seligman & Co. v. N. Y. P. & N. R. R. 73 I. C. C. 223.

(c) Section 206f of the transportation act, 1920, provides that the period of federal control shall not be computed as a part of the period of limitation in claims for reparation for causes of action arising prior to federal control. Crown Willamette Paper Co. v. Director General 78 I. C. C. 273, 277.

(d) Motion to dismiss complaint on the ground that the statute of limitations had run against the shipments. HELD, Excluding the period of Federal control as provided under section 206 (f) of the transportation act, 1920, claim not barred. American Shipbuilding Co. v. Director General, as Agent, 77 I. C. C. 439, 440.

(da) Following Bloedel-Donovan Lumber Co., 68 I. C. C., 95, contention that section 206(f) of transportation act, 1920, which provides that period of Federal control shall be disregarded in computing statutory period of limitation in claims for reparation for causes of action arising prior to Federal control, is inapplicable to claims that accrued more than two years prior to passage of transportation act, not sustained. Pacific Coast Shippers' Asso. v. Director General, as Agent, 78 I. C. C. 10, 11.

(e) Amendment of February 24, 1922, to limitations provision of interstate commerce act made no change in provision that complaints for causes arising out of Federal control might be filed with commission within one year after termination thereof. Lay Fish Co. v. Director General, as Agent, 80 I. C. C. 4, 5.

(f) Complainant attacked refusal of defendant to accept for transportation in carload lots 12 shipments of toys and other commodities which were received by steamer from the Orient and were tendered to defendant at the dock and team tracks of the C. M. & St. P., at Tacoma, Wash., and that by reason of such refusal complainant was put to the expense of draying the shipments to another carrier for transportation. Complainant did not submit the case within one year after the termination of federal control. HELD, Complaint dismissed. Frank P. Dow Co. v. Director General, 81 I. C. C. 351.

§2. Claims Accruing before Aug. 28, 1906.

IMPORTANT CASES SINCE 1908

(a) Where a complaint is filed within one year from the passage of the Act of 1906, recovery of damages is not limited to causes of action that accrued within two years prior to filing of complaint; but if complaint is filed more than one year subsequent to the passage of that law, it is subject to the two-year limitation. Meeker & Co. v. L. V. R. R. Co., 23 I. C. C. 480, 482.

(b) Any claim accruing before or after August 28, 1906, may be presented within two years from the time it accrued, and claims accruing before Aug. 28, 1906, may be presented within one year from that date, even though accruing more than two years previous to the date named. L. & N. R. R. Co. v. Dickerson, 191 Fed. 705, 711.

ALL OTHER CITATIONS

Nicola, Stone & Myers Co. v. L. & N. R. R. Co., 14 I. C. C. 199, 206; Nollenberger v. M. P. Ry. Co., 15 I. C. C. 595, 598; Woodward & Dickerson v. L. & N. R. R. Co., 17 I. C. C. 9, 10; Sondheimer Co. v. I. C. R. R. Co., 20 I. C. C. 606, 610; L. V. R. R. Co. v. Meeker, 211 Fed. 785, 802.

§2½ Reliance on Carrier.

IMPORTANT CASES SINCE 1908

(a) Claims filed by complainant for purpose of tolling the statute of limitations and like action by defendant who never filed special docket application. Complainant was advised that application would be filed and have prompt consideration. HELD, as complainant lulled into belief that its rights were protected finding in 49 I. C. C. 586, in which claims held abandoned, reversed herein. Rockford Paper Box Board Co. v. C. M. & St. P. Ry., 55 I. C. C. 262.

§3. Date of delivery of shipment.

IMPORTANT CASES SINCE 1908

(a) The statute of limitations runs against a claim for reparation on discriminatory freight charges, on shipments delivered to complainant more than two years prior to the filing of the formal complaint for reparation. St. Louis Blast Furnace Co. v. V. Ry. Co., 21 I. C. C. 215, 216.

(b) Claims on shipments delivered more than two years prior to filing of complaint are barred by the statute of limitations. Melrose Milling Co. v. G. N. Ry., 43 I. C. C. 741.

(c) The limitation period prescribed in section 16 of the Act begins to run at the time of the delivery of the shipment, since the shipper's cause of action arises from the existence of the unreasonable rate, not from the payment of the excessive charge. (Carland and Hunt, JJ., dissenting.) Arkansas Fertilizer Co. v. U .S., 193 Fed. 667, 670.

C. 200, 201; Miller Brothers v. O. S. L. R. R. Co., Unrep. Op. A-478; Best Company v. G. N. Ry. Company, 33 I. C. C., 1, 2; Louisiana Central Lumber Co. v. C. B. & Q. R. R. Co., 35 I. C. C. 38, 40; Amory & Co. v. S. P. Co., 36 I. C. C. 291, 292; Mutual Wheel Co. v. N. C. & St. L. Ry., 40 I. C. C., 612; Choctaw Lumber Co. v. T. O. & E. R. R. Co., 41 I. C. C. 615, 616; Northern Lumber Co. v. S. Ry., 41 I. C. C., 629; Crowe & Co. v. G. N. Ry., 41 I. C. C. 742; Friedman & Hasson v. A. G. S. R. R. Co., 42 I. C. C. 353; Zelnicker

Supply Co. v. L. W. R. R. Co., 42 I. C. C. 365; Tampa Fuel Co. v. A. C. L. R. R. Co., 43 I. C. C. 231; Williams & Sons v. B. & O. R. R., 45 I. C. C. 107; Friedman v. C. & N. W. Ry., 45 I. C. C. 91; Beaumont Timber Co. v. I. & G. N. Ry., 46 I. C. C. 410; California Pine B. & L. Co. v. S. P. Ry., 47 I. C. C. 372, 374.

§4. Date of payment of charges.

IMPORTANT CASES SINCE 1908

(a) A claim based on section 3 or 4 is entirely different from one based on section 1, the measure of damages may be different, and the kind of evidence necessary to support the claims is not the same. In determining the application of the statute of limitations in respect thereto, the basis of an informal claim can not be broadened or otherwise varied by the formal complaint subsequently filed, i. e., as to shipments on which the charges were paid more than two years prior to the filing of the formal complaint. Blackman & Griffin Co. v. A. C. & Y. Ry., 49 I. C. C. 649, 651.

(b) Following decision of Supreme Court in Louisville Cement Co. Case, 246 U. S. 638, in which it was held that the cause of action accrues and the statute begins to run on the date the freight charges are actually paid, original report modified and reparation awarded on certain portions of the claim previously held barred by the Commission in Unrep. A-333. Louisville Cement Co. v. L. & N. R. R., 50 I. C. C. 538.

(c) Defendants objection that the claim is barred by the statute is not well taken, as complaint was filed within two years after the payment of charges. Fred R. Allen v. L. V. Ry., 53 I. C. C. 33.

(d) The cause of action accrues when unlawful charges are collected. Lamb Fish Lumber Co. v. Transcontinental Freight Bureau, 53 I. C. C. 221, 222.

(e) Following Louisville Cement Co., 246 U. S., 638, the Commission announced that it would reconsider any complaints denied under ruling in Blinn Lumber Co., 18 I. C. C. 430, and that such petitions should be filed not later than December 31, 1918. Present complaint filed after the designated time limit but within two years from date charges were paid found not barred, as the purpose of the ruling was administrative to encourage prompt action. Young v. Director General, 59 I. C. C. 305, 306.

(f) Under the Interstate Commerce Act, declaring that all complaints for the recovery of damages shall be filed with the Commission within two years after the cause of action accrues and not after, the cause of action to recover overcharges must be deemed to have accrued when the overcharges were paid, and not when the shipments were made, particularly as, when the amendment was adopted, it had repeatedly declared in decisions of the Supreme Court that a cause of action does not accrue until suit may be legally instituted upon it. United States v. Interstate Commerce Commission, 38 Sup. Ct. 408.

ALL OTHER CITATIONS

In Re Accrual of Cause of Action, 15 I. C. C. 201, 204; West Texas Fuel Co. v. T. & P. Ry. Co., 15 I. C. C. 443; Pleasant Hill Lumber Co. v. St. L. S. W. Ry. Co., 15 I. C. C. 532, 533; Kile & Morgan Co. v. Deepwater Ry. Co., 15 I. C. C. 235; Marshall and Michel Grain Co. v. St. L. & S. F. R. R. Co., 16 I. C. C. 385; Northern Lumber Co. v. S. Ry., 41 I. C. C. 629. Plymouth Coal Co. v. P.R.R., 56 I. C. C. 699, 706; Portland Cattle Loan Co. v. Director General, 55 I. C. C. 597, 598; Cohen-Schwartz Rail & Steel Co. v. M. L. & T. S. S. Co., 59 I. C. C. 202, 203.

§5. Date of amending claims.

IMPORTANT CASES SINCE 1908

(a) Complainant attacked the rate of $3.70 per 100 lbs. collected for the transportation of a carload of uncompressed cotton from El Centro, Cal., to New Bedford, Mass., as unreasonable. By an amendment filed more than two years after the shipment was delivered, the consignor was made a party complainant. HELD, (1), That so far as the consignor was concerned the claim was barred; and (2) that the rate charged was lawfully applicable. Complaint dismissed. Amory & Co. v. S. P. Co., 36 I. C. C. 291.

(b) Consolidated shipment belonging to complainant and a second party showed only complainant as consignee. Charges paid by third party. Second party's interest in claim made known at hearing more than two years after charges were paid is not barred by the statute to extent of his interest in the claim. Knopke Bros. v. C. & A. R. R., 50 I. C. C. 465, 466.

ALL OTHER CITATIONS

East St. Louis Walnut Co. v. St. L. S. W. Ry. Co. of Texas, 17 I. C. C. 582, 584; Virginia-Carolina Chemical Co. v. St. L.

I. M. & S. Ry. Co., 18 I. C. C. 1, 2; Dillion Coal & Transfer Co. v. O. S. L. R. R. Co., 28 I. C. C. 91; Michigan Hardwood Mfrs. Association v. Transcontinental Freight Bureau, 27 I. C. C. 32, 38.

§5½. After notice to file formal complaint.

IMPORTANT CASES SINCE 1908

(a) Where formal complaint is received more than two years after certain of the shipments on which reparation is sought had been delivered, and more than six months after complainant had been notified that its claim could not be disposed of informally, the claim for reparation must be considered abandoned. Coffeyville Vitrified Brick & Tile Co. v. St. L. & S. F. R. R., 38 I. C. C., 355.

(b) Delay in filing of formal complaint pending the outcome of another case where similar claims were in issue affords no ground for an exception to Rule III of the rules of practice. Blackman & Griffin Co. v. A. C. & Y. Ry., 49 I. C. C. 649, 651.

(c) On shipments of commodities from eastern defined territories to Utah common points informal complaints were filed and notice was sent that claims could not be adjusted informally. HELD, claims on shipments moving more than two years prior to date of filing of formal complaint and six months after notice that claims could not be determined informally, barred. Blackman & Griffin Co. v. A. C. & Y. Ry., 49 I. C. C. 649, 651, 652.

(d) Complaint filed informally January 12, 1916, and complainants advised on March 21, that claim could not be adjusted. Formal complaint received September 19, but returned for addition of participating carrier as party defendant. Amended complaint received October 10, 1916. HELD, complaint as originally received sufficient to stop the running of the statute. Knopke Bros. v. C. & A. R. R., 50 I. C. C. 465, 466.

(e) The Commission finds that complainant failed to file its formal complaint within two years after the cause of action accrued or within a reasonable time after notice that the claim was of such a nature that it could not be determined informally, and that the claim must therefore be regarded as having been abandoned. Citing Rule 3, Rules of Practice and Swift & Co. v. S. Ry., 40 I. C. C. 93. Naylor & Co. Inc. v. C. N. O. & T. P. Ry., 56 I. C. C. 265, 266.

(f) Complaint filed informally within two-year period and formally within six months after notification that it could not be disposed of informally, as required by paragraph (g), rule III, of the Commission's Rules of Practice, found not barred. Gulf Refining Co. v. St. L. S. F. Ry. Co., 64 I. C. C. 201.

& S. F. Ry., 49 I. C. C. 619; Rockford Paper Box Board Co. v. C. M. & St. P. Ry.; 55 I. C. C. 262; Acme Cement Plaster Co. v. Director General, as Agent, 81 I. C. C. 298, 299. Williams & Son v. V. B. R. Ry., 87 I. C. C. 721; Santa Rosa Mercantile Company v. Director General, 88 I. C. C. 753.

§5¾. Interveners.

See Interveners.

IMPORTANT CASES SINCE 1908

(a) The filing of an intervening petition tolls the statute of limitations irrespective of the date of the Commission's order permitting the intervention. Cotton Manufacturers' Asso. of S. C. v. C., C. & O. Ry. 57, I. C. C. 584, 588.

(b) Amending of complaint for reparation by permitting intervention of parties who paid and bore the freight charges had no effect and claim of interveners barred as they were not joined as parties complainant within the statutory period. Oden & Elliott v. S. A. L. Ry. Co., 57 I. C. C. 698, 699.

(c) Original complaint brought to recover reparation for account of complainant only, and not as agent for vendors. Amending of complaint by permitting intervention of the latter who paid and bore the freight charges can have no effect, as they were not joined as parties complainant within the statutory period. Interveners claim for reparation found barred. Oden & Elliott v. S. A. L. Ry Co., 57 I. C. C. 698, 699.

II. INFORMAL COMPLAINTS.

See Reparation §22.

§6. Effect of informal letter.

IMPORTANT CASES SINCE 1908

(a) Where, within two years after the cause of action accrued the Commission receives from complainant's attorney for filing a letter, with which is enclosed a statement claiming overcharge in the amount set forth in the formal complaint subsequently filed, showing the commodity and its weight, points of origin and destination, and car number and initials, the claim is "presented informally" to the Commission within two years after the cause of action accrued. Sanguinetti v. U. P. R. R., 39 I. C. C. 515, 516.

(b) Charges upon four shipments were paid more than two years prior to the date upon which complaint was filed. Complainant contends a letter addressed to the Commission May 8, 1917, containing the statement, "We should have had a $2.20 rate from California terminals to eastern defined territory during the time covered by our complaint. That is what we require now and what we should have had at all times," was sufficient to toll the statute. This is not a filing of a complaint for the recovery of damages as is contemplated by the statute. Savage Tire Co. v. Director General, 53 I. C. C. 578, 579.

(c) Claims filed by complainant for purpose of tolling the statute of limitations and like action taken by defendant tion. Complainant was advised that application would be filed and have prompt consideration. HELD, as complainant lulled into belief that its rights were protected, finding in 49 I. C. C. 586, in which claims held abandoned, reversed herein. Rockford Paper Box Board Co. v. C. M. & St. P. Ry., 55 I. C. C. 262.

(d) Complainant by letter in a very general way, and without specifying rates or shipments or indicating any intention of claiming reparation, first expressed to the Commission its dissatisfaction with the rate adjustment. The Commission is of the opinion that this letter was not such a complaint as would toll the statute of limitations. Plymouth Coal Co. v. P. R. R., 56 I. C. C. 699, 705.

(e) Complainant's letter, in a very general way, expressed dissatisfaction with the rate adjustment, without specifying rates or shipments or indicating any intention of claiming reparation HELD, letter not such a complaint as would toll the statute of limitations. Plymouth Coal Co. v. P. R. R., 56 I. C. C. 699, 705.

C. 391, 394; Humphreys Goodwin Co. v. C. R. I. & P. Ry. Co., Unrep. Op. A-685; Cincinnati, Ohio to Pacific Coast Terminals, Farrin Lumber Co. v. A. T. & S. F. Ry. Co. Unrep. Op. A-685; Mutual Oil Co. v. A. T. & S. F. Ry. Co., 38 I. C. C. 591, 592; Humphreys-Godwin Co. v. C. R. I. & P. Ry. Co., Unrep. Op. A-598.

§7. Necessity and form of formal complaint.

See Reparation §21.

Important Cases Since 1908

(a) The Act does not specify the manner of presentation of complaints and it is therefore not essential that claims in writing made to the Commission should be by a formal petition, as prescribed by the Commission's Rules of Practice, to prevent the operation of the statute of limitations. Venus v. St. L. I. M. & S. Ry. Co., 15 I. C. C. 136, 137.

(b) A complaint stating a good cause of action is sufficient to stop the running of the statute, though the amount of damages claimed is not set forth. Fels & Co. v. P. R. R. Co., 23 I. C. C. 483, 487.

(c) Complaint, containing no specific statement that complainants made shipments, but stating that their business was imperiled by rates attacked, held sufficient to stop running of statute. Michigan Hardwood Mfrs.' Association v. Transcontinental Freight Bureau, 27 I. C. C. 32, 34.

(d) Possession by complainant of original bills of lading and paid freight bills held not a prerequisite to filing of formal complaint; and, as formal complaint was not filed within a reasonable time after complainant was notified that claim could not be disposed of informally, claim for reparation must be considered to have been abandoned. Coffeyville Vitrified Brick & Tile Co. v. M. P. Ry. Co., 39 I. C. C. 208.

(e) Intervening petition received on April 30, 1917, order permitting the intervention entered April 14, 1919, and served upon defendants five days later. Defendants contended that the statute of limitation was not tolled until the entry of the Commission's order permitting the intervention, and therefore, that the claims for reparation on shipments moving during the period in question are barred. It is the opinion of the Commission that this contention is not well founded and that the filing of the intervening petition tolled the statute irrespective of the date of the order. Cotton Manufacturers Asso. of S. C. v. C. C. & O. 57 I. C. C. 584, 588.

(f) A general description in the complaint of the shipments on which reparation is asked is sufficient to meet the requirements of the statute. Coakley v. Director General, as Agent, 59 I. C. C. 141, 144.

(g) Formal complaint should have been filed within a reasonable time after notice, and reparation is denied. It has been held that more than six months' delay is unreasonable. Sloan v. S. Ry. Co. Unrep. Op. 1932.

(h) Claim presented informally within the two-year period stops the running of the statute only when formal complaint is filed, within a reasonable time after notice that formal complaint is necessary. Williamsburg Lumber Co. v. G. & S. I. R. R. Co. Unrep. Op. 1995.

ALL OTHER CITATIONS

Arizona Ry. Comm. v. E. P. & So. W. Co., Unrep. Op. 526; Pioneer Pole & Shaft Co. v. C. H. & D. Ry. Co., Unrep. Op. 123; Beekman Lumber Co. v. St. L. I. M. & S. Ry. Co., 15 I. C. C. 274, 275; Larrowe Milling Co. v. C. & N. W. Ry. Co., 17 I. C. C. 548, 551; Southern Bitulithic Co. v. I. C. R. R. Co., 17 I. C. C. 300.

§8. Requisites of informal complaint.

IMPORTANT CASES SINCE 1908

(a) Where there is no joint rate in effect and charges are exacted in accordance with the separately published tariffs of the initial and intermediate and delivering carrier and the shipper fails to file claim for reparation within the statutory period, and informal request filed by the intermediate carrier for permission to refund to the shipper the switching charge exacted by it will not serve to prevent the claim for excessive charges by the initial and delivering carriers from being barred by the statute of lim-

itations. Acme Cement Plaster Co. v. St. L. & S. F. R. R. Co., 18 I. C. C. 376, 377.

(b) A letter from a shipper to the Commission, making inquiry as to whether the shipment made by him was interstate or intrastate, and containing no complaint as to charges is not sufficient to stop the running of the statute of limitations. George Henley v. C. M. & St. P. Ry. Co., 18 I. C. C. 382, 384.

(c) A letter received by the Commission which sets forth the precise nature of the claim and has attached to it expense bills showing the shipments and the amount paid stops the running of the statute of limitations. Gamble-Robinson Commission Co. v. St. L. & S. F. R. R. Co., 19 I. C. C. 114.

(d) Although the Commission has announced that ordinarily it will not award reparation upon informal proceedings unless the complaint is filed or the rate complained of is reduced within six months after the traffic moves, that rule is only an expression of the administrative discretion of the Commission and is confined to informal matters. It does not in any way modify the rule heretofore made that informal complaints showing the date of shipment, its weight, and the rate charged and collected, coupled with an allegation that the rate assessed is unreasonable, is a sufficient presentation of a claim to come within the provisions of section 16 of the Act. Riverside Mills v. Georgia R. R., 20 I. C. C. 423, 424.

(e) Neither statute nor rules of Commission prescribe what act or acts shall constitute filing of claim for reparation with Commission. Marian Coal Co. v. D. L. & W. R. R. Co., 27 I. C. C. 441, 442.

(f) A petition asked reparation based on reasonable rates to be found. Points of origin and destination appeared, but no particulars as to amount of reparation. HELD, a "filing of claim" with the Commission. Marian Coal Co. v. D. L. & W. R. R. Co., 27 I. C. C. 441, 442.

(g) Where, in a claim for reparation, there is a general allegation showing the point of origin, the point of destination, etc., but there is no detailed statement by cards accompanying the petition, it is sufficient to constitute a filing with the Commission of the claims fully covered, and will not be stricken from the docket as not being sufficiently precise. In re Rates on Live Stock, Packing House Products and Fresh Meats from Southwestern Points, 28 I. C. C. 332, 335.

(h) Stating merely in general terms the number of cars received and amount of damage, held sufficient to toll the statute. City Ice & Supply Co. v. C. & N. W. Ry. Co., 36 I. C. C. 514, 515.

(i) Possession by complainant of the original bills of lading and paid freight bills is not a prerequisite to the filing of formal complaint. Coffeyville Vitrified Brick & Tile Co. v. M. P. Ry., 39 I. C. C. 208.

(j) A letter addressed by a shipper to the Commission setting forth in substance all that a formal complaint would contain and which, while not asking for a judgment for a specified sum, does ask for relief by way of damages for the wrongdoing alleged in it, is a sufficient petition to stop the running of the statute of limitations. Dickerson v. L. & N. Ry. Co., 187 Fed. 874, 878.

ALL OTHER CITATIONS

Liberty Mills v. L. & N. R. R. Co., 23 I. C. C. 182, 183; Fisk & Sons v. B. & M. R. R., 19 I. C. C. 299, 300; Sunderland Bros. Co. v. C. & N. W. Ry. Co., Unrep. Op. 148; Robertson Bros. v. M. P. Ry. Co., Unrep. Op. 126; Prest-O-Lite Co. v. B. & A. R. R. Co., 36 I. C. C. 545, 549.

III. PRESENTATION TO CARRIERS

See Loss and Damage §2.

§9. Advisability.

IMPORTANT CASES SINCE 1908

(a) In cases involving no principle and only small amounts, the shipper should first make his claim upon the carrier for reparation, and thereafter place his case, if necessary, upon the informal docket. Lindsay Bros. v. L. S. & M. S. Ry. Co., 15 I. C. C. 284, 285.

(b) In all cases a statement showing the claim for reparation in sufficient detail to enable the carrier to identify the shipments should be filed with the Commission and served upon those carriers from whom a recovery is asked, where such claim is brought forward pursuant to a decision holding rates unreasonable. In re Rates on Live Stock, Packing House Products and Fresh Meats from Southwestern Points, 28 I. C. C. 332, 335.

(c) Where, pursuant to a decision holding the rates unreasonable, a claim for reparation is filed, it is not necessary to make service upon carriers other than those against which reparation is sought.

In re rates on Live Stock, Packing House Products and Fresh Meats from Southwestern Points, 28 I. C. C. 332, 335.

(d) The Commission is not empowered to direct the return by carriers of claim papers filed by shipper. Minnesota & Ontario Power Co. v. B. F. & I. F. Ry., 47 I. C. C. 208, 209.

ALL OTHER CITATIONS

Carr v. Maine Cent. R. R., (N. H. 1917), 102 Atl. 532, 533.

§10. Regulations.

IMPORTANT CASES SINCE 1908

(a) Carriers should adjust all pending claims with respect to lost shipments, upon their merits. Larkin Co. v. E. & W. Transp. Co., 34 I. C. C. 106, 110.

ALL OTHER CITATIONS

Bewsher Co. v. U. P. R. R. Co., 22 I. C. C. 146, 147.

§11. Penalties for non-payment.

IMPORTANT CASES SINCE 1908

(a) The effect of the Carmack Amendment is not such as to prevent a consignee from recovering a penalty providing by a state statute for failure on the part of the carrier to adjust a claim for loss of goods within 40 days after such claim has been filed with the carrier's agent. Stukes v. Southern Expr. Co. (S. C. 1914), 80 S. E. 612.

See Tariffs.

§1. In general.

See Commodity Rates §2.

IMPORTANT CASES SINCE 1908

(a) The Commission is disposed to encourage the making of class rates wherever practicable, because of their tendency to uniformity and stability. It is only in cases where it clearly appears that the inclusion of a given article in a class results in unreasonable charges and a lower classification will not meet the demands of justice that commodity rates are required to be established. Acme Cement Plaster Co. v. L. S. & M. S. Ry. Co., 17 I. C. C. 30, 35.

(b) It is generally recognized that class rates on heavy commodities are made to move the more or less limited shipments from place to place, and commodity rates to move large, steady shipments. James & Abbot Co. v. B. & M. R. R., 17 I. C. C. 273, 275.

(c) While it may be true that the tendency should be to eliminate commodity rates and work more nearly to a class basis, still the rates of this country have been built up upon a different theory, and to apply that theory would be revolutionary and destructive of many legitimate business enterprises. United States Leather Co. v. S. Ry. Co., 21 I. C. C. 323, 325.

(d) In the absence of commodity rates, shipments are made at class rates. Standard Mirror Co. v. P. R. R. Co., 27 I. C. C. 200, 203.

(e) Exception to the classification publishing rates as percentages of certain class rates, does not in and of itself provide a specific rate, but requires reference to the tariff naming class rates. Such rates can in no sense be considered specific commodity rates. Boldt Paper Mills v. Director General, as Agent, 62 I. C. C. 471, 472.

(f) Class rates applying on sporadic shipments can not be condemned merely because commodity rates are maintained in the opposite direction in which there is a regular movement. Pure Oil Co. v. Director General, as Agent, 64 I. C. C. 444, 445.

(g) Reasonable class rates are properly applicable in the absence of a showing which justifies lower commodity rates, but in determining the question of reasonableness all the surrounding circumstances and conditions should be taken into consideration and ton mile earnings is but one of them. Grasselli Chemical Co. v. N. Y. C. R. R., 69 I. C. C. 529, 530.

(h) While it is desirable that class rates generally should bear the same percentage relationship to first class, such uniformity has not yet been attained, and the relationship varies not only between different schedules but at times for different distances in the same schedule. South Dakota Ry. Commrs. v. A. & W. Ry. Co. ,74 I. C. C. 295, 306.

(i) Frequently when a class basis of rates is displaced and commodity rates established between certain points, the higher class basis obtaining at intermediate points must be adjusted to meet the requirements of the fourth section of the act. Certain-Teed Products Corp. v. A., T. & S. F. Ry. Co., 77 I. C. C. 444, 446.

(j) While it is true that the use of the class-rate structure as a basis for commodity rates would remove some of the flexibility which is generally understood to be a peculiar part of every commodity rate, as much may be said of any distance scale of commodity rates whether constructed with or without regard to corresponding class rates. Memphis-Southwestern Investigation, 77 I. C. C. 473, 497.

C. 715; State Highway Dept. of Texas v. P., C., C. & St. L. Ry. Co., 74 I. C. C. 367; E. W. Arthur v. Director General, 80 I. C. C. 707; Crown Williamette Paper Co. v. Director General, as Agent, 68 I. C. C. 631; Chevrolet Motor Co. v. Director General, as Agent, 69 I. C. C. 226; California Packing Corp. v. Director General, as Agent, 78 I. C. C. 190, 195; Roper v. Director General, as Agent, 80 I. C. C. 125.

II. REASONABLENESS AND DISCRIMINATION.

§2. In general.

See Classification §17; Commodity Rates §2; Discrimination §8 (3); Equalization of Rates.

CASES 1887-1908

(a) Complainant attacked rates on classes from Duluth and Superior to points beyond St. Paul, Minn., as unreasonable and discriminatory in that the rate per ton per mile to those points is higher than to St. Paul, Minn. The rates from Duluth and Superior to St. Paul are competitive rates forced upon defendant and are not to be taken as criteria as to what the basis should be to points beyond. The rates from Buffalo to Twin Cities via Lake Michigan compared with rates via Lake Superior also have a strong effect on the situation. HELD, rates attacked not unreasonable, complaint dismissed. Business Mens Asso. of Minnesota v. C. St. P. M. & O. Ry. 2 I. C. C. 41.

(aa) Complainant attacked class rates charged on vehicles of $1.91 from Cincinnati, O., to Atlanta, Ga., a distance of 474 miles, or to Augusta, Ga., distance 645 miles, and charging 30c more on vehicles to Social Circle, Ga., distance 526 miles as unreasonable. Social Circle is a local point on the Georgia R. R., and is not affected by the water competition that prevails at Atlanta and Augusta. HELD, carriers must cease and desist from making rates to Social Circle higher than to Augusta, and are ordered to make a rate of $1 to Atlanta. James & Mayer Buggy Co. v. C. N. O. & T. P. R. Co., 3 I. C. C. 682.

(b) Complainant attacked as unjust,

unreasonable and unduly discriminatory, rates on classes from Omaha to points in Texas; that rates between Omaha and South Omaha and said stations in Texas are higher than between St. Joseph, Kansas City, Mississippi River points, Chicago, Ill. Commodities involved, sugar from Texas to Omaha, syrup from Omaha to Texas, cotton seed oil from Texas to Omaha, Livestock from Texas to Omaha and packing house products from Omaha to Texas. HELD, the maxima class rates should not be as high from Omaha as from Chicago and they should in no case exceed those fixed from Mississippi River points. The rate on syrup should not exceed that from Davenport, Iowa. Commercial Club of Omaha v. C. R. I. & P. R. Co., 6 I. C. C. 647.

(c) The maxima class rates between Omaha and Texas points should not be as high as those between Chicago and Texas points, and should not exceed those between Davenport, Rock Island and Moline and Texas points, and the rate on syrup from Omaha should not be in excess of that from Davenport. Commercial Club of Omaha v. Chicago R. I. & P. Ry. Co., 6 I. C. C. 647.

(d) Complainant attacked class rates from Cincinnati, O., as compared with the rates from Louisville, Ky., to points in the southeast and southwest as unjust, unreasonable and discriminatory. The location of Cincinnati upon the north bank of the Ohio River, and the fact that railroads leading south must cross that river by expensive bridges for which an arbitrary or toll is charged, or allowed in the division of rates, justify some higher differential from Cincinnati over rates from Louisville, on the south bank of the river, to destination points in Montgomery and Southwestern territory The only evidence presented by the complainant was the distance from Cincinnati to the territory in question as compared with the distance from Louisville. HELD, complaint dismissed. Freight Bureau Cincinnati Chamber of Commerce v. C. N. O. & T. P. R. Co., 7 I. C. C. 180.

(e) The rate on goods of the first class between St. Louis and Eureka Springs proper being $1.25 per 100 lbs. and on the same goods from or to the Harrison district the charge for the same service being $1.00 and on other classes in proportion; between Springfield and Eureka Springs the first class rate being 72 cents, and to or from the Harrison district 45 cents. HELD, Such rates to and from Eureka Springs proper are unreasonable and unlawful. Cary v. Eureka Springs R. Co., 7 I. C. C. 286.

(f) The transportation of grain eastward from Kansas City, Mo., and from Sioux City, Iowa, and other points in the territory adjacent to Sioux City is subject to competition between the carriers; but while reduced rates have resulted from the competition at Kansas City the competition in northwest Iowa has been more effectively restrained by an agreement formerly in effect, and, since such agreement was canceled, by continuance of rates without substantial reduction. The rate on corn to Chicago from most points in western Iowa is 17c per 100 pounds. Examination of the rates and rate changes for a period of years indicates that a rate of 15c on corn from Kansas City to Chicago should be applied at all Missouri river points, but the evidence is not sufficient to enable a definite conclusion. It does appear, however, that the rates on grain from Sioux City and other points in a limited section of northwest Iowa are too high. HELD, that the 19c rate on corn from Sioux City and other points in adjacent territory should be reduced, the 17c rate on corn now in effect from most points in western Iowa should be extended to Sioux City and points in Iowa on and east of the C. St. P. M. & O., and corresponding reduction should be made from other points in southeastern South Dakota. While no opinion is expressed as to what is the proper relation of the rates on wheat and corn from Sioux City and adjacent territory, the difference of 4c which now prevails from most shipping points in that section should not be exceeded. Grain Shippers' Asso. v. I. C. R. Co., 8 I. C. C. 158.

(g) Complainant attacked class rates from Chicago to Kearney, Nebr., as unreasonable and unjustly discriminatory in that the rates from Chicago are based on the Omaha combination. HELD, rates attacked not unreasonable and the evidence was insufficient upon the question whether such rates subject Kearney merchants to unlawful disadvantage. Gustin v. A. T. & S. F. R. Co., 8 I. C. C. 277.

(h) Defendants' class rate of $3.80 per ton on brick, carloads, from Frederick, Md., to Elberon, N. J., 236 miles, applied on shipments made by complainant in January, 1906, was unreasonable and unjust. Complainant awarded reparation based on the difference between

such rate and the rate of $2.75 per ton put in effect by defendants pending the controversy. Frederick Brick Works v. Northern C. R. Co., 12 I. C. C. 14.

(i) It appears in this case that a certain defined territory in the northern part of Texas, commonly known as the Burnt District, takes from Kansas City and other Missouri River points lower rates than are made to the balance of the State, in recognition of greater proximity to these Texas points; the class rates from Kansas City to Fort Worth, representative of the Burnt District, are higher than from Kansas City to Amarillo, though Amarillo is less than the average distance to the Burnt District; and that the Santa Fe System is rebuilding its road to Amarilio, which will soon be situated upon its main line: HELD, That the present class rates from Kansas City to Amarillo are unreasonable and unjust and that the commodity rates between said points should not exceed those from Kansas City to Fort Worth; but that the class rates from St. Louis to Amarillo may properly be higher than from St. Louis to Fort Worth. Nobles Bros. Gro. Co. et al v. F. W. & D. C. Ry Co. et al., 12 I. C. C. 242.

(j) Class rates to Roswell, Artesia, Hagerman and Carlsbad, New Mexico, from Kansas City and St. Louis, Mo., Galveston, Tex., and Denver, Colo.; and commodity rates on grain and grain products from points in Texas and Oklahoma, on lumber from points in Texas and Louisiana; on salt in sacks from Hutchinson, Kan.; and on apples, alfalfa and alfalfa meal from said New Mexico points to Ft. Worth, Tex., unreasonable and excessive. Roswell Commercial Club v. A. T. & S. F. Ry. Co., 12 I. C. C. 339.

(k) Complainant in this case put in issue reasonableness of rates between various points in the United States and Roswell, Artesia, Hagerman, and Carlsbad, in the Territory of New Mexico: HELD, That, under the facts disclosed in the record, the present class rates from Kansas City and St. Louis, Mo.; Galveston, Tex., and Denver, Colo., to said points in New Mexico are unjust and unreasonable; and that commodity rates on grain and grain products from points in Kansas and Oklahoma; on lumber from points in Texas and Louisiana; on salt in sacks from Hutchinson, Kans. ,to said points in New Mexico; and on apples, alfalfa and alfalfa meal from said points in New Mexico to Fort Worth, Tex., are excessive and reductions ordered. Roswell Commercial Club v. A. T. & S. F. Ry. Co., 12 I. C. C. 339.

(l) It appears that class rates from north Atlantic ports were the same to a group of suburban mills as to Augusta, Georgia, for ten or twelve years before the absorption of the South Carolina and Georgia Railroad by the Southern Railway Company; that subsequent to such absorption the long-existing rates to these suburban points were increased by the concerted action of the defendant carriers, though the mill group is still recognized on shipments in the opposite direction, and that this grouping system is still effective to the extent of classing together some of these suburban points which are as far apart as Augusta is from the nearest. It also appears that water lines by way of the Savannah River secure most of the freight of the heavy and bulky classes for these mills, and that a restoration of the Augusta rates to these suburban points would divert much of this traffic to the defendant lines and thus increase their revenues; HELD, That the rates to these suburban mill points in excess of those to Augusta are, under the circumstances, unjust and unreasonable. Guimby et al v. Clyde Steamship Co. et al, 12 I. C. C. 392.

(m) Class rates from North Atlantic ports to suburban mill points reduced to Augusta, Ga., rates. Quimby v. M. K. & T. R. Co., 12 I. C. C. 392.

IMPORTANT CASES SINCE 1908

(n) There is no standard by which class rates can be exactly measured, and in determining what is reasonable or unreasonable a considerable latitude must of necessity be allowed to the carrier. Bluefield Shippers' Ass'n. v. N. & W. Ry. Co., 22 I. C. C. 519, 528.

(o) The Commission can not ignore the fact that rates for the transportation service are divided into class rates and commodity rates and that some articles, which move in large volume and in carload quantities, are usually accorded commodity rates, while articles of general merchandise, moving in less-than-carload quantities, usually take class rates. Harness to Oklahoma, 37 I. C. C 726, 728.

(p) The Commission has not yet seen the way to establishing a standard scale of percentage relation which all classes should bear to the first-class rate because of the great variety in percentages

which now exists, and the many conflicts which would result between existing scales and any percentage scale which might be prescribed. Tulsa Traffic Assn. v. A. T. & S. F. Ry. Co., 40 I. C. C. 9, 11.

(q) The principle that class rates should be considered the maximum standard of reasonableness, is not inflexible and must yield where the higher commodity rates are shown to be reasonable. Dawson Produce Co. v. A. C. L. R. R, 49 I. C. C. 291, 296.

(r) Although class rates, as a rule, better reflect transportation conditions than do commodity rates, it can not be assumed that the present class rates in the east recognize only transportation conditions. It is possible that the class rates also were established with more or less consideration to what the traffic would bear. With six class rates for use in eastern trunk line territory and New England, fixed with the same regard to general traffic and transportation conditions as was exercised in establishing class rates for the adjoining territory, it is believed that their use as bases for rates on paper will not work undue hardship upon any of the defendants railroads or the interveners who use them. Michigan Paper Traffic Asso. v. N. Y. C. Ry., 53 I. C. C. 344, 352.

(s) Because of the number of classes involved and the varying volume of traffic moving on each of the different classes it is difficult to compare two scales of class rates in such a way as to tell precisely and concisely how much higher one is than the other as applied to the traffic actually moving in a given territory. Memphis Southwestern Investigation, 55 I. C. C 515, 525.

(t) The relation between the class and commodity rates is not and need not of necessity be the same in all territories. Penn Seaboard Steel Corp. v. Director General, as Agent, 63 I. C. C. 141, 142.

(u) Class rates applying on sporadic shipments can not be condemned merely because commodity rates are maintained in the opposite direction in which there is a regular movement. Pure Oil Co. v. Director General, as Agent, 64 I. C. C. 444, 445.

(v) The Commission condemns the application of class rates to the transportation of cotton seed between points in southeastern territory Empire Cotton Oil Co. v. M. A. & S. Ry., 69 I. C. C. 729, 732.

(w) Where class rates are charged on unusual movements, if the commodity rate is not improperly classified and the class rate is not unreasonable, reparation will not be awarded. Rosin & Turpentine Export Co. v. A. C. L. R. R. Co., 73 I. C. C. 141, 142.

(x) When class rates are charged on isolated shipments, and it is not shown that the commodity is improperly classified, or that the class rate is unreasonable, reparation will not be awarded. Multibestos Co. v. S. P. Co., 73 I. C. C. 491, 492.

(y) Where class rates are charged on unusual movements, if it is not shown that the commodity is improperly classified or that the class rate is unreasonable, reparation will not be awarded. Bilrowe-Alloys Co. v. N. P. Ry. Co., 73 I. C. C. 625, 626.

(z) Where class rates are charged and it is not shown that the commodity is improperly classified or that the class rates are unreasonable, reparation will not ordinarily be awarded. Bilrowe-Alloys Co. v. N. P. Ry., 73 I. C. C. 625, 626.

(aa) While it is desirable that class rates generally should bear the same percentage relationship to first class, such uniformity has not yet been attained, and the relationship varies not only between different schedules but at times for different distances in the same schedule. South Dakota Ry. Commrs. v. A. & W. Ry. Co., 74 I. C. C. 295, 305, 306.

(bb) While it is true that the use of the class-rate structure as a basis for commodity rates would remove some of the flexibility which is generally understood to be a peculiar part of every commodity rate, as much may be said of any distance-scale of commodity rates, whether constructed with or without regard to corresponding class rates. Memphis-Southwestern Investigation, 77 I. C. C. 473, 497.

(cc) Contention by carriers that where class rates are established by the commission they should be regarded as normally compensatory and that lower commodity rates can not therefore be considered as unreasonable, not sustained. Contention rests upon assumption that class rates are normal rates for all commodities; the commission can not accept this view. Southeastern Sugar cases, 48 I. C. C., 739, 742. Carnation

Milk Products Co. v. Director General, as Agent, 78 I. C. C. 145, 149.

I. RIGHT OF CARRIERS TO ESTABLISH.

§1. In General.

CASES 1887-1908

(a) The proper classification of an article for freight rates is to be judged relatively by the classification of other articles similar in character, quality, and conditions of transportation. Myers v. Penn. Co. (Com.) 2 I. C. R. 403. A classification of freight designating different classes for carload quantities and for less than carload quantities, for transportation at a lower rate in carloads than in less than carloads, is not in contravention of the Act to Regulate Commerce. Thurber v. New York & H. R. R. Co. (Com.), 2 I. C. R. 742.

(b) Classification of freight for transportation purposes is in terms recognized by the act and is therefore lawful. It is also a valuable convenience both to shippers and carriers. Thurber v. N. Y. C. R., 2 I. C. C. 742.

IMPORTANT CASES SINCE 1908

(c) It is well settled that carriers have the right to transport certain commodities under reasonable rules and regulations respecting their receipt, carriage and delivery. National Petroleum Ass'n v. L. & N. R. R. Co., 15 I. C. C. 473, 476.

(d) In fact, the establishment of reasonable classifications, regulations, and practices should precede the determination of the measure of rates. National Society of Record Assos. v. A. & R. R. R. Co., 40 I. C. C. 347, 355.

(e) The reservation by a carrier of the right to refuse a shipment is one which of necessity must be closely scrutinized. The act itself, as the Commission reads it, does not contemplate the refusal of a shipment by a carrier under any circumstances. Such a right, nevertheless, undoubtedly exists; but it grows out of the necessities of each particular case. Classification Specifications of Fiber Box Containers, 77 I. C. C. 713, 718.

U. S. v. Oregon R. R. & Navigation Co., 159 Fed. 975, 979; In Re Suspension of Western Classification No. 51, 25 I. C. C. 442, 451, 608; Boston Cahmber of Commerce v. A. T. & S. F. Ry. Co., 28 I. C. C. 230, 234; Minneapolis Brewing Co. v. A. T. & S. F. Ry. Co., 28 I. C. C. 688, 692; A. C. Cheney P. A. Co. v. N. Y. C. & H. R. R. Co., 152 N. Y. Suppl. 285, 290; Stopping of Cars in Transit to Complete Loading, 36 I. C. C. 130, 132; Minimum Charges on Bulky Articles, 38 I. C. C. 257, 260; Helvetia Milk Condensing Co. v. A. & R. Ry., 51 I. C. C. 625, 626; Viscose Co. v. Hines, Director General of Railroads, et al, 263, Fed. 726, 727, 728, 729; affirmed 41 Sup. Ct. 151; Natchez Chamber of Commerce v. L. & A., 58 I. C. C. 610, 620.

§2. Jurisdiction of Commission.

See Interstate Commerce Commission I; Jurisdiction of Commission.

CASES 1887-1908

(a) When classification is used as a device to effect unjust discrimination, or as a means of violating other provisions of the statute, the Interstate Commerce Commission must so revise and correct it as to correct the abuse. Coxe v. Lehigh Valley R. Co. (Com.), 3 I. C. R. 460.

(b) An order of the Commission requiring a carrier to reclassify specified articles does not prescribe a rate for the future, as the classification merely determines the relation between commodities, not the rate itself; and when a commodity is transferred from a higher to a lower class the revenues of the carrier are not necessarily diminished, since it may advance the rates applicable to those classes. Myer v. Cleveland, Cincinnati & St. L. R. Co., 9 I. C. C. 78.

(c) An order of the Commission requiring a carrier to cease and desist from enforcing a classification of specified articles higher than the classification which upon the facts it has found to be lawful is not prescribing a rate for the future. Classification determines the relation of rates as between commodities, not the rate itself, and when a commodity is transferred from a higher to a lower class the revenues of the carrier are not necessarily diminished since it may advance the rates applicable to those class-

es. Myer v. C. C. C. & St. L. Ry., 9 I. C. C. 78, 86.

IMPORTANT CASES SINCE 1908

(d) Where the classification primarily affects and controls the rates or charges demanded, charged or collected by any common carrier or carriers subject to the provisions of the Act, for the transportation of property as defined in the first section of the Act, or publishes the regulations or practices of such carrier or carriers affecting such rates, the Commission is authorized and empowered to pass upon such rates, or charges, or such regulations or practices. National Hay Ass'n v. M. C. R. R. Co., 19 I. C. C. 34, 38.

(e) The amendment to the Act of June 18, 1910, and section 15, as amended, give the Commission large supervisory powers over the classification of freight. In Re Suspension of Western Classification No. 51, 25 I. C. C. 442, 459.

(f) Before the amendments to sections 1 and 15 of the Act which deal specifically with classification were passed the Commission had power under sections 1 and 3 to determine the rate relationship of different articles so as to effect reasonable rates and avoid undue prejudice 'to any particular description of traffic, in any respect whatsoever." And it matters little whether the means through which the object is to be attained is called a lumber list, a classification, a rate schedule, or a combination of all three. The Commission is empowered, under sections 1, 3 and 15 to effect a rate relationship. In the Matter of Rates on and Classification of Lumber and Lumber Products, 52 I. C. C. 598, 603.

(g) Section 2 of the Act should not be made the basis for an order fixing the relationship of rates upon kindred commodities. Parkersburg Rig & Reel Co. v. Director General, 64 I. C. C. 568, 573.

Director General, 64 I. C. C. 81.

II. BASIS OF CLASSIFICATION.

§3. In General.

See Classification.

CASES 1887-1908

(a) The mode of making rate by classification is intended to be for the convenience of the railroad company and also for the accommodation of the shippers, and long experience has shown that it is the best and most practical way yet devised for dealing with the subject. Pyle v. T. F. & G. R. R., 1 I. C. C. 767, 770.

(b) In grouping articles together in a class for the purpose of fixing rates upon these articles several considerations are usually deemed by the carrier of a very controlling nature. Among these may be mentioned bulk and space occupied, value, hazardous and extra hazardous freight, liability to waste or injury in transit, weight or the like. Pyle v. E. T. & V. G. R. R., 1 I. C. C. 767, 771.

(c) As the freight rates of a railroad are laid for the purpose of obtaining revenue from its operation, it is but just and fair that they should be so distributed upon the different articles transported, so far as this can be done, as to bear upon all with relative equality. Pyle v. E. T. V. & G. R. R. Co.,, 1 I. C. C. 767, 771.

(d) A classification is but a means of arriving at a rate. The statute requires the rate to be reasonable, taking fairly into consideration every circumstance, condition and service performed in its transportation and relatively with other rates. The mere method of arriving at what is a reasonable rate is a matter of far less consequence than that the rate itself should be reasonable and relatively just. Pyle v. E. T. V. & G. R. R. Co., 1 I. C. C. 767, 771.

(e) The Act requires that a tariff for the transportation of merchandise be established by interstate common carriers, and that the charges shall be reasonable and just. Every description of

merchandise is included within the protection of this provision of the law. Riddle Dean & Co. v. N. Y. L. E. & W. R. R. Co., 1 I. C. C. 787, 791.

(f) Whether or not a rate is preferential, and in that sense special, depends upon the character of the article, the manner in which it was shipped, and the classification of commodities similar in character and mode of shipment. Myers v. Pennsylvania Co., 2 I. C. C. 403, 405.

(g) Transportation charges should be, and usually are, adjusted with a proper degree of reference to the marketable value of the goods carried, and to the amount of revenue required by the carrier to make its business fairly remunerative. If the charges should be reduced, therefore, to any considerable extent, upon goods of higher value and properly included in the higher classes, it would be necessary to increase the charges upon the lower classes, and enhance the cost to consumers of goods perhaps more necessary and generally important to the public. The community at large, therefore, as well as carriers and the shippers of particular articles, are interested in the proper relative classification of freights and the adjustment of rates. Myers v. Pennsylvania Co., 2 I. C. C. 544, 545.

(h) Of course the Commission would not hold that a classification that was wrong should be adhered to, although its change might work injury to individuals whom the wrong classification had unduly favored. Bates v. Pennsylvania Co., 2 I. C. C. 715, 718.

(i) Classification of freight for transportation purposes is in terms recognized by the Act to Regulate Commerce and is therefore lawful. It is also a valuable convenience both to shippers and carriers. Thurber v. New York Central & Hudson River R. Co., 2 I. C. R. 742.

(j) Classification is not yet an applied science founded on correct principles and governed by just and reasonable rules. Thurber v. N. Y. C. R. Co., 2 I. C. C. 742, 750.

(k) Carriers are not at liberty to classify property as a basis of transportation rates and impose charges for its carriage with exclusive regard to their own interest, but they must respect the interests of those who may have occasion to employ their services, and conform their charges to the rules of relative equality and justice which the act prescribes. Thurber v. N. Y. C., 2 I. C. C. 742, 751.

(l) In arranging the classification of articles of commerce, their market value and the shippers' representations to the public as to their character, may properly be taken into account in ascertaining the analogy they bear to other articles, and determining the class to which they justly belong. This is especially applicable to articles in which there is no free competition among producers and shippers. And carriers are not required to estimate the intrinsic value of freight as distinguished from its commercial value for purposes of classification and rates. Warner v. New York Central & H. R. R. Co., 3 I. C. R. 74.

(m) When a manufacturer describes his article to the public for the purpose of making a market for it, he also describes it for purposes of carriage, and it seems as reasonable that a carrier should have the right to accept the manufacturers' representation concerning his product as that the public should be influenced by it in the purchase of the article. Warner v. N. Y. C. & H. R. Co., 3 I. C. C. 77, 80.

(n) The mere fact that one article is of more general use and therefore shipped in greater quantities than another, when each as a rule is shipped in less than carload quantities, and of no considerable difference in bulk, weight and value, and of no appreciable difference in expense of handling and of haul, constitutes in itself no reason why the first should receive a lower rate than the last. In such a case mere quantity, not measured by any recognized unit of quantity adapted to carriage, and lessening the expense of handling and carriage, cannot be allowed to affect rates in the transportation of property. Harvard Co. v. Pa. Co., 3 I. C. R. 257.

(o) The valuable service performed to the transportation interests of the country by rate and classification committees. Rules recognized by the Commission in making of classifications and rates. Harvard Co. v. Pa. Co., 3 I. C. R. 257.

(p) A rate on wheat less than that on flour is unlawful if it works unjust discrimination, but it is not otherwise. Kaufman Milling Co. v. Missouri P. R. Co. (Com.), 3 I. C. R. 400.

(q) Charges on anthracite coal which are higher than on iron ore, pig iron, and other low-grade freight, or on general freight, the expense of carrying which is much greater than the expense of coal, are unreasonable. Coxe v. Lehigh Valley R. Co. (Com.), 3 I. C. R. 460.

(r) Freight classification is deemed by the railroads convenient and essential to any practical system of rate-making, and is so recognized though not enjoined by the Act to Regulate Commerce. Coxe Brothers & Co. v. Lehigh Valley R. Co., 3 I. C. R. 460, 470.

(s) For convenience, in making transportation rates and charges, freight is arranged and put in different classes according to expense of carriage, bulk, value risk, competition and other considerations affecting the cost and value of transportation service. Coxe Bros. & Co. v. L. V. R. R. Co., 3 I. C. C. 460, 470.

(t) Classification may be used as a device to effect unjust discrimination or as a means of violating the most essential provisions of the statute. When so used it is the duty of the Commission to so revise such arrangement as to correct the abuse. Murphy, Wasey & Co. v. Wabash R. Co., 3 I. C. C. 725, 727.

(u) The object of classification is to furnish a basis for rate charges, but an incorrect classification would neither authorize an unjust rate nor render unlawful a just rate. Independent Refiners' Asso. v. W. N. Y. & P. R. Co., 4 I. C. C. 163, 176.

(v) Classification is recognized as a necessary method of adjusting the burden of transportation equitably upon the various articles of traffic, in view of differing circumstances and conditions, and but for the necessity of such adjustment, considerations based alone on weight and distance of haul would probably determine rates, except as modified by competition. F. Schumacher Milling Co. v. C., R. I. & P. R. Co., 4 I. C. C. 373, 376.

(w) Cost of service is only one of the elements to be considered in determining proper classification and relative rates for different articles. F. Schumacher Milling Co. v. C., R. I. & P. R. Co., 4 I. C. C. 373, 377.

(x) Unless within the authorized exceptions of the general rule of the statute, discriminations in charges upon like shipments of the same commodities based solely upon the purpose or business motive of the shipper are unlawful, whether affected directly or indirectly by methods of classification. Duncan v. A., T. & S. F. R. Co., 4 I. C. C. 385, 392.

(y) Cost of service is only one of the elements to be considered in determining proper classification and relative rates for different articles. F. Schumacher Milling Co. v. Chicago, R. I. & P. R. Co., 6 I. C. C. 61.

(z) The elements of bulk, weight, value, and character of commodities are main considerations in determining approximately what freight articles are so analogous as to entitle them to the same classification. Page v. Delaware, L. & W. R. Co., 6 I. C. C. 548, 565.

(aa) An exact classification is impossible. Unless the number of classes is infinitely increased there must always be articles in respect to which it will be very difficult to determine into which of two classes they should fall. If the elements which fix the class are substantially the same in case of two articles, then those articles should, as a matter of law, be classified alike, and to put one in one class and another in another class would be a discrimination and a violation of the act, no matter what the purpose of doing it might be. Rea v. M. & O. R. Co., 7 I. C. C. 43, 51.

(bb) A classification is unjust and unreasonable where it fails to maintain a fair relation between the various commodities. Myer v. Cleveland, Cincinnati & St. L. R. Co., 9 I. C. C. 78.

(cc) Manifestly, in determining what freight rate shall be borne by different commodities, an attempt should be made to maintain a fair relation between these commodities, and a classification which utterly ignores all considerations of this kind or which utterly fails to give due weight to such considerations is unjust and unreasonable. Nathan Meyer v. C., C., C. & St. L. Ry. Co., 9 I. C. C. 78.

(dd) In the forming of a classification bulk, value, liability to damage, and similar elements affecting the desirability of the traffic should be considered, and that analogous articles should ordinarily be placed in the same class. Myer v. C., C., C. & St. L. Ry., 9 I. C. C. 78, 83.

(ee) The legal duty of common carriers to so classify traffic and fix charges thereon that the burdens of transporta-

tion shall be reasonably and justly distributed among the articles they carry arises under the obligation imposed upon them not to charge unreasonable or unjust rates or to inflict any unjust discrimination or undue prejudice in any respect whatsoever; and even in cases where the need of additional revenue is apparent the carrier cannot arbitrarily select some one or more articles upon which to apply higher rates regardless of the relation which such article or articles bear to other commodities commonly offered for transportation. The National Hay Asso. v. L. S. & M. S. R. Co. et al., 9 I. C. C. 264.

(ff) The legal duty of common carriers to classify traffic, and fix charges thereon in such a manner that the burden of transportation will be reasonably and justly distributed among articles they carry, arises under the obligation imposed upon them to charge reasonable and just rates, and to refrain from discrimination, and hence, where the need of additional revenue is apparent, the carrier cannot arbitrarily apply higher rates to certain articles, regardless of the relation which they bear to other commodities commonly offered for transportation. National Hay Asso. v. Lake Shore & Michigan S. R. Co., 9 I. C. C. 264.

(gg) In a freight classification like the official, which contains but six general classes, it is manifestly impossible to bring together in each class only such articles as resemble each other in character, use, value, volume, bulk, weight, risk, expense of handling and competition; the best that can be done under such a scheme of classification is to place two or more articles possessing general similarity in the same class, and where an article is not analogous to any other to put that article in the class containing commodities which are most nearly related to it in general character and other essential respects. The National Hay Asso. v. L. S. & M. S. R. Co. et al., 9 I. C. C. 264.

(hh) In the carriage of great staples, which supply enormous business, and which in market value and actual cost of transportation are among the cheapest articles of commerce, rates yielding only moderate profit to the carriers are both necessary and justifiable, and, although the defendant carriers may be at some greater expense to handle and transport hay than some other articles in the fifth or sixth class of their freight classification, the character, value, volume and use of that commodity are such as to require relatively low charges for its carriage. The National Hay Asso. v. L. S. & M. S. R. Co. et al., 9 I. C. C. 264.

(ii) Where the chief question involved is the justice of the change in the classification of the commodities shipped by complainant, and the decision will affect all shippers of the same commodity in the classification territory, the profits secured by complainant from the operation of the railway connected with the defendant's line are not material, and the case must be decided in accordance with the principle which properly governs the classification of freight articles. Proctor & Gamble Co. v. Cincinnati, H. & D. R. Co., 9 I. C. C. 440.

(jj) Freight classification is based upon the relations which commodities bear to each other in such respects as character, use, bulk, weight, value, tonnage or volume, risk, cost of carriage, ease of handling and controlling circumstances caused by conditions. Proctor & Gamble Co. v. C., H. & D. Ry., 9 I. C. C. 440, 482.

(kk) To require a separation and grading into different classes with varying rates different grades of the same articles of freight would greatly complicate the work, and go far to defeat the very purpose of classification, and even then it would be impracticable to apportion with mathematical exactness the burdens of transportation; the best result obtainable in this direction is reasonable and substantial approximation. Derr Mfg. Co. v. Pennsylvania R. Co., 9 I. C. C. 646.

(ll) While there are exceptional instances requiring deviation from methods generally employed in constructing freight classification, it is manifest that to require the separation and grading into different classes with varying rates different grades of the same articles of freight would greatly complicate the work and go far to defeat the very purpose of classification, and even then it would be impracticable to apportion with mathematical exactness the burdens of transportation; the best result obtainable in this direction is reasonable and substantial approximation. Derr Manufacturing Co. v. Penn. R. Co. et al., 9 I. C. C. 646.

(mm) No classification can be so mi-

nute as to conform to the differing varieties and conditions of traffic, and to separate different grades or densities of the same article into different classes, with varying rates, even if it could be accomplished, would go far to defeat the real purpose of classification. Planters' Compress Co. v. Cleveland, C. , C. & St. L. R. Co., 11 I. C. C. 382.

(nn) Classification is not scientific, or a difference in rates well based, which is altogether founded upon a distinction that has no transportation significance, such as the intended use of the article transported. Stowe-Fuller Co. v. Pennsylvania Co., 12 I. C. C. 215.

(oo) Differences in rates on fire, building and paving brick which are made of the same material, come out of the same kiln, are nearly alike in color and are of the same size and weight, held based upon no justifiable distinction. Stowe-Fuller Co. v. Pa. Co., 12 I. C. C. 215.

IMPORTANT CASES SINCE 1908

(pp) Owing to differences in bulk and weight, there must of necessity be marked variations in revenue per car produced by articles in the same and other classes, and a disparity either way is not conclusive of the propriety of an adjustment. Kiser Co. v. C. of G. Ry. Co., 17 I. C. C. 430, 439.

(qq) While the classification unit test may not finally determine the classification of an article, it constitutes a basis for comparison with other articles. When all the modifying conditions and facts are known, a fair classification relation may be established among articles through the aid of this classification unit. In Re Suspension of Western Classification No. 51, 25 I. C. C. 442, 452.

(rr) Whether it will become necessary to subject all of the 10,000 or more objects of transportation to a combination of unifying principles and recast them into an entirely new classification having no relationship, except an accidental one, to the existing classifications, and except in so far as the identity, or similarity, of inherently correct classification principles applying to the given article may bring that about, quaere? In Re Suspension of Western Classification No. 51, 25 I. C. C. 442, 452.

(ss) Whether a rate is too high or too low should be made a separate issue distinct from classification. Nevertheless, as far as possible, the establishment of ratings and the application of rates should follow changes in classification very closely. In Re Suspension of Western Classification No. 51, 25 I. C. C. 442, 453.

(tt) But the question of rates should be kept separate from the question of classification. Western Classification Case, 25 I. C. C. 442, 453.

(uu) In determininig the proper classification of articles, the following elements are considered by the Commission: Bulk, character of article, competition, cost of service, desirability of the traffic, distinction in transporting conditions, ease of handling, expense of carriage, hazardousness, liability to waste or injury, loading, manner of packing, possibility or probability of false billing, risk, space occupied, tonnage, use, utilization of equipment, value of article, value of service, volume of traffic, and weight. Western Classification Case, 25 I. C. C. 442, 472.

(vv) The preservation of classification calls for the exercise of "the flexible limit of judgment which belongs to the power to fix rates." Louisville & Nashville Railroad Coal and Coke Rates, 26 I. C. C. 20, 28.

(ww) The ability of one commodity to bear the greater share of transportation costs than another is in most cases independent of the length of the haul. In the Matter of Rates on and Classification of Lumber and Lumber Products, 52 I. C. C. 598, 617.

(xx) While it is possible to remove many of the present inconsistencies without changes in rate scales, it should also be borne in mind that an absolutely uniform classification could be prepared and proposed only in connection with a universal system of rate scales having a uniform number of classes. It is the Commission's view that a desirable arrangement would be to have in each scale at least ten classes, practically all less than carload traffic to be confined to the first four classes, and redistribution made of the articles in the carload classes. Many articles that now move under commodity rates and under exceptions to the classifications could be assigned ratings in such a scale that would result in the application of rates not substantially higher or lower that now apply. This would be particularly true of the of-

ficial and southern territories. Consolidated Classification Case, 54 I. C. C. 1, 11.

(yy) Classification and rates must be general and an injurious effect in some cases and to some interests is unavoidable, but so long as in the main they are satisfactory the rule applies that the good of the greater number is paramount. Carload Minimum Weight on Garden Tractors, 64 I. C. C. 1, 2.

(zz) Range of prices, depending upon the percentage of purity and method of production of a particular commodity, is inconclusive evidence of impropriety or unreasonableness in the classification or the rates on such commodity. Du Pont de Nemours & Co. v. Director General, as Agent, 73 I. C. C. 129, 131.

(3a) There is no practical distinction between gas oil and fuel oil; they are of approximately the same weight and value, are used for the same purposes, and generally take the same rates. Empire Refineries v. Director General, as Agent, 73 I. C. C. 207, 210.

(3b) From a classification standpoint the establishment of a specific rating on lumber is desirable. Rating on Lumber and Veneer in Western Territory, 74 I. C. C. 247, 248.

(3c) Contention that, since carriers may lawfully refuse shipments of explosives and other dangerous articles in containers not conforming to specifications of the Commission, they may also refuse all articles in containers which do not meet the requirements which they prescribe, not sustained. Congress directed the Commission to formulate regulations governing transportation of dangerous articles for protection of life and property, and fact that shipments of that character may not be transported in containers not complying in every particular with specifications prescribed does not prove that there should be no latitude in that respect in transportation of articles which are not dangerous. Fiber-Box Containers, 77 I. C. C. 715.

C. 485.

§3½. Application of Section 2.

See Infra §17; Differentials §8½

CASES 1887-1908

(a) Complainant attacked the imposition of unreasonable and discriminating rates for the transportation of railroad ties. HELD: The classification of railroad ties in a different class from other lumber, thus imposing a higher rate upon ties than upon other lumber, to be an unjust discrimination. HELD, Further: That it was not just or reasonable that the defendant railroad company should give a low special rate upon coarse lumber in other forms, to the exclusion of ties. Rates established by a common carrier under the influence of a desire to keep upon its line a material for which the road itself has use, or to keep the price thereof low for its own advantage, can not be justified. Reynolds v. Western New York & Pennsylvania R. R., 1 I. C. C. 685.

(b) The difference in classification adopted by the "western classification" (which applies to business from the Pacific Coast to all points west of the Missouri River), between "raisins" and "dried fruits," by which a higher carload rate is imposed on raisins than on other dried fruits, while by the "Pacific coast east-bound classification" (which applies to business over the same roads from the Pacific Coast to points on the Missouri River and east thereof) such distinction is not imposed, is, in connection with the different rules of the two classifications as to mixed carloads, an unreasonable discrimination. Martin v. Southern P. Co. (Com.), 2 I. C. R. 1.

(c) A discrimination between the rate on corn and its direct products, which subjected persons engaged in the business of manufacturing and selling such products to unreasonable prejudice or disadvantage, and which is without necessity or advantage to the carrier, or any reason founded on the character or condition of the traffic, is in violation of the Act to Regulate Commerce, § 3, notwithstanding the rate on corn was open to all persons equally and with equal service. Bates v. Pennsylvania R. Co. (Com.), 2 I. C. R. 715.

(d) Upon the evidence produced at the former hearing it was decided that no reason was shown for a differential rate between corn and the direct products of corn, eastward between Indianapolis and the seaboard. The difference in rate complained of was 4½ cents per hundred pounds between Indianapolis and New York, this being the proportion, according to the distance, of a five-cent differential between Chicago and New York. Since the first hearing the defendants have reduced the differential to 2½ cents per hundred pounds. The complainants claimed there should be no difference. The evidence produced at the rehearing satisfied the Commission, upon

grounds stated in the opinion, that the former order should be vacated, and that no further order should now be made. Bates v. Penn. R. Co., 3 I. C. R. 296.

(e) For reasons peculiar to the territory lying west of the Mississippi River, comprising a large portion of Texas, the State of Missouri and a considerable part of Kansas, the rates on wheat and wheat flour are grouped without reference to distance, and a lower rate has been charged on wheat than on wheat flour for fifteen years or more. Prior to 1886 the difference in the two rates was fifteen cents a hundred pounds or greater. In 1886 a readjustment of rates was made and upon consideration of all the circumstances and conditions and claims of rival localities the differential was reduced to five cents a hundred pounds, which has since been maintained. Upon complaint made by millers of Missouri, supported also by millers of Kansas, against a differential of five cents a hundred pounds, and claiming an equal rate on wheat and flour carried from Missouri and Kansas into Texas, HELD, that under the conditions existing in the territory in question a rate of five cents less a hundred pounds on wheat than on flour does not as matter of fact work unjust discrimination, and is not therefore unlawful. Kauffman Milling Co. v. Missouri Pac. R. Co., 3 I. C. R. 400.

(f) It appearing that the carriers have at times reduced the rate on wheat without a contemporaneous reduction on flour, and so made a larger differential than five cents a hundred pounds, which is sometimes maintained for a considerable period, it is found that a differential exceeding five cents a hundred pounds works unjust discrimination and is unlawful. Kauffman Milling Co. v. Missouri Pac. R. Co., 3 I. C. R. 400.

(g) Two roads by agreement carried bituminous coal from the Snow Shoe region in Pennsylvania to Perth Amboy, N. J., a distance of about 300 miles, at a higher aggregate, but lower proportionate, rate than was charged by one road on anthracite for the distance over its line, the distance over such line being about 150 miles. HELD: That this was no undue preference in favor of the bituminous coal traffic, and subjected anthracite traffic to no unreasonable disadvantage, except as the anthracite charges might be excessive. Coxe Brothers & Company v. Lehigh Valley R. Co., 3 I. C. R. 460.

(h) The charging in any case by railroad companies of a higher rate on wheat than on flour between the same points and on the same line is unjust discrimination and unlawful within the Act to Regulate Commerce. Milwaukee Chamber of Commerce v. Chicago, M. & St. P. R. Co., 7 I. C. C. 481.

(i) Defendant's charges on grain originating at points on its Southern Minnesota division, milled in transit at La Crosse, Wis., and forwarded as product to Milwaukee or Chicago, are not more than 2½ cents per 100 pounds in excess of its wheat rates from the same points of origin to Milwaukee or Chicago, and such milling rates at La Crosse, as related to defendant's wheat rates, or as affecting the competitive relations of complainant with millers at Milwaukee, are not unjust or otherwise unlawful. Listman Mill Co. v. Chicago, M. & St. P. R. Co., 8 I. C. C. 47.

(j) The freight rate upon wheat from Sioux City and other points in the territory adjacent thereto should not exceed that upon corn by more than 4 cents per 100 pounds. Grain Shippers' Asso. v. Illinois C. R. Co., 8 I. C. C. 158.

(k) Carriers of corn and cornmeal from Kansas points to destinations in Texas enforce a differential of 7 cents per 100 pounds more on cornmeal than on corn, and such difference prohibits the shipment of cornmeal ground at Kansas points into Texas territory. The difference in cost of service need not exceed 3 cents per 100 pounds, and the difference in value, greater liability to injury and other conditions surrounding the transportation of such commodities, do not justify the greater difference in the rate. HELD: That the difference in rate of 7 cents against cornmeal and in favor of corn unjustly discriminates against Kansas millers, and that the differential should not exceed 3 cents per 100 pounds. Board of R. R. Comrs. v. Atchison, T. & S. F. R. R. Co., 8 I. C. C. 304.

(l) The changes which have taken place in conditions governing the transportation of wheat and flour from Kansas points to destinations in Texas, although they have been material in some respects, are not sufficient to warrant interference in this case with the differential making the rate 5 cents higher on flour than on wheat, which was approved by the Com-

mission in Kauffman Milling Co. v. Missouri U. R. Co., 4 I. C. C. Rep. 417, 3 Inters. Com. Rep. 400; Board of R. R. Comrs. v. Atchison, T. & S. F. R. Co., 8 I. C. C. 304.

(m) Rates from points in Kansas and Missouri to points in Texas are five cents per hundred pounds higher on flour than on wheat, and such differential is not applied on flour or wheat carried in any other direction. This differential has been the subject of controversy in two previous cases before the Commission, Kaufman Milling Co. v. Missouri P. R. Co. (1890), 4 I. C. C. Rep. 417, 3 Inters. Com. Rep. 400; Railroad Comrs. v. Atchison, T. & S. F. R. Co. (1899), 8 I. C. C. Rep. 304, and in decisions of those cases the five cent higher rate on flour than on wheat, as applied on the traffic to points in Texas, was not declared unlawful. HELD: Upon the record in this case, that since the former decisions were rendered there has been no such change in conditions governing the traffic as to warrant interference by the Commission. The Mayor, Etc., of Wichita, v. M. P. Ry. Co. et al., 10 I. C. C. 35.

(n) There has been no such change in conditions governing the traffic as to warrant the Commission in interfering with its previous holding, whereby it declared that there was nothing unlawful in the fact that the rates from points in Kansas and in Missouri to points in Texas are 5 cents per 100 pounds higher on flour than on wheat, and that such differential is not applied on flour or wheat carried in any other direction. Wichita v. Missouri P. R. Co., 10 I. C. C. 35.

(o) The traffic in cattle and hogs to Chicago and other points is discriminated against by the exaction of higher rates for transporting cattle and hogs than for transporting live stock products to Chicago from points west, northwest and southwest thereof, including Missouri River points and South St. Paul, Minn. Chicago Live Stock Exchange v. Chicago G. W. R. Co., 10 I. C. C. 428.

(p) The desire of a carrier to secure additional business does not justify a change in the relation of rates, resulting in a higher rate upon cattle and hogs, the raw material, than upon live stock product, the manufactured article, where, as in this case, the articles are in sharp competition with each other in markets of purchase and sale, where it appears that upon other lines and in other sections rates are generally no higher, and in many instances much lower, on the traffic prejudiced than on that favored by the change, and where numerous and important industries, which have been built up and maintained under the former adjustment, and those interested in such industries, will be injuriously affected by the action taken. Chicago Live Stock Exchange v. Chicago G. W. R. Co., 10 I. C. C. 428.

(q) The defendants, by charging a higher rate on shingles than on lumber, in carloads, from Duluth, Minn., to Chicago, Ill., unjustly discriminate against shingles in favor of lumber, subject Duluth and complainant and other shingle shippers from that point to undue prejudice and disadvantage, and afford undue preference and advantage to other places from which shingles are carried at rates as low as those applied on lumber therefrom. Duluth Shingle Co. v. Duluth, S. S. & A. R. Co. et al. 10 I. C. C. 489.

(rs) The defendants by charging a higher rate on shingles than on lumber in carloads from Duluth, Minn., to Chicago, Ill., subject Duluth and its shingle shippers to undue prejudice and disadavntage, and afford undue preference and advantage to other places from which shingles are carried at rates as low as those applied on lumber therefrom. Duluth Shingle Co. v. Duluth, S. S. & A. R. Co., 10 I. C. C. 489.

(t) The rate on rye, barley and other coarse grain from Cannon Falls to Louisville or East St. Louis is wrongfully higher than the rate on wheat between the same points. Cannon Falls Farmers' Elevator Co. v. Chicago G. W. R. Co., 10 I. C. C. 650.

(u) The present charges on corn products and corn from Missouri River points to the Pacific Coast terminals constitute undue, unreasonable and unlawful discrimination against corn products and producers thereof at places on the Missouri River to the extent that such rate on corn products is more than 5 cents above the rate on corn. Re Rates on Corn and Corn Products from Missouri River Points to Points in Washington, Oregon and California., 11 I. C. C. 212.

(v) Commission investigated rates on corn and corn products from Kansas City and other Missouri River points to Washington, Oregon and California. The re-

lation of rates on corn and corn products from Missouri River points to California terminals was for about one year after Januaary 1, 1890, a differential of 9c against corn products. Then, for about one and a half years, it was 9c, in favor of corn products. The rates were the same between July, 1892, and March, 1895, when a differential of 5c against corn products was established. In December, 1897, the differential was increased to 10c and in July, 1902, it was made 20c. During March, 1904, the differential was fixed at 17½c, and in October of that year it was reduced to 10c, and has since remained at that figure. Changes in the relation of rates on corn and corn products from Missouri to North Pacific terminals were not greatly different from those mentioned, except that in December, 1897, the rates were made the same on corn and corn products and there is not now any difference, unless the minimum carload for corn is the marked capacity of the car, in which case the rates show a differential of 10c against corn products. HELD: That the present charges on corn products and corn from Missouri River to Pacific Coast terminals, in so far as the rate on corn product is more than 5c above the rate on corn constitutes undue unreasonable and unlawful discrimination against corn products and producers thereof at places on the Missouri River. In the Matter of Rates on Corn and Corn Products from Missouri River Points to Points in Washington, Oregon and California, 11 I. C. C. 212.

(wx) Up to February 19, 1905, the rate on corn meal was 3 cents per 100 pounds higher than the rate on corn for shipments from Missouri River points to points in Texas. On that date, the differential against corn meal was advanced so that it varied from 7 to 9½ cents. On April 15 the differential was made 5 cents for all Texas destinations. The differential for hominy grits and bran remains at 3 cents. Upon consideration of the fact and circumstances. HELD, That the differential on corn meal shipped from Missouri River points to Texas destinations should not be more than 3 cents above the rate on corn in force between the same points. Matter of Rates on Corn and Corn Products, 11 I. C. C. 220.

(y) Commission instituted an investigation as to rates on corn and corn products from Kansas City and other Missouri River points to points in Texas. Up to February, 1905, the rate on corn meal was 3c higher than on corn from Missouri River to Texas. On that date the differential against corn meal was advanced so that it varied from 7 to 9½c. On April 15 the differential was made 5c for all Texas destinations. The differential for hominy grits and bran remains at 3c. HELD, That the differential on corn meal should not be more than 3c above the rate on corn in force between the same points. In the Matter of Rates on Corn and Corn Products from Missouri River Points to Texas, 11 I. C. C. 220.

(zaa) The Commission instituted an investigation as to rates on corn and corn products from Missouri River points to Louisiana. Prior to July 1, 1905, rates from Missouri River to Louisiana were 5c higher on corn meal than on corn, but on that date the differential was removed by respondents and rates on corn and corn meal made the same. HELD: Such action having obviated the complaints herein, no order is necessary. In the Matter of Rates on Corn and Corn Products from Missouri River Points to Louisiana, 11 I. C. C. 227.

(bb) Complainant alleged that the defendants unduly discriminated against Kansas millers, in favor of California millers, by exacting rates for the transportation of flour which were 10 cents greater per 100 pounds than the rates contemporaneously exacted by them for the transportation of wheat from Wichita and other shipping points in Kansas to points in California known as "Pacific Coast terminals," and also by exacting rates for the transportation of flour, which were 35 cents per 100 pounds greater than the rates contemporaneously exacted by them for the transportation of wheat from said shipping points to Phoenix, Ariz. HELD: That under the circumstances and conditions disclosed by the record in this case, and following decisions of this Commission in other similar cases, the flour rates between said shipping and destination points should not exceed the wheat rates between such points by more than 7 cents per 100 pounds. Howard Mills Co. v. Miss. Pacific Ry. Co. et al., 12 I. C. C. 259.

IMPORTANT CASES SINCE 1908

(cc) Chassis parts of passenger and freight automobiles are a like kind of

traffic within the meaning of section 2 of the act. Anthony v. Director General, as Agent, 61 I. C. C. 336, 367, 368.

ALL OTHER CITATIONS

Parkersburg Rig & Steel Co. v. Director General, 64 I. C. C. 568, 573; Interstate Rates on Grain, Grain Products, and Hay, Carloads, Between Points in the Western and Mountain-Pacific Groups, 80 I. C. C. 362.

§3½a. Application of Section 4.

See Long and Short Hauls.

§4. Bulk or Weight of Commodity.

See Evidence §65; Express Companies §18; Loading and Unloading; Passenger Fares and Facilities §10.

CASES 1887-1908

(a) The rate on cabbages shipped in standard barrels or barrel crates should not exceed three-fourths the rate on potatoes shipped in the same manner, where the cabbages do not weigh more than three-fourths as much as potatoes and are not worth more than half as much. Truck Farmers' Asso. v. Northeastern R. Co., 6 I. C. C. 295.

(b) If the accustomed traffic has a less unit than a carload and ordinary shipments are by the ton or bale, or hundredweight, the effect of a new lower carload rate is to give an advantage to the large shipper, a discrimination the Commission has not encouraged, even though its first result is to secure lower rates to the large shipper, less cost to the carrier, and, in its encouragement to trade, to increase the carriers' revenues. Kindel v. B. & A. R. R. Co., 11 I. C. C. 495, 506.

IMPORTANT CASES SINCE 1908

(c) A change in the size of articles should naturally be followed by a change in the rules which were made because of smaller equipment in use at the time such rules were established. Bennett v. M., St. P. & S. Ste. Marie Ry. Co., 15 I. C. C. 301, 303.

(d) Long and bulky articles should be transported in box cars in every case where it is possible to do so, and when so transported they should be charged regular rates for less-than-carload shipments. When shipment, solely because of its length or bulk, is actually transported on an open car, the rule applying a higher rate and minimum may be enforced. Merchants' & Mfrs.' Assn. of Baltimore v. A. C. L. R. R. Co., 22 I. C. C. 467, 470.

(e) If some scheme were applied by which the rate properly decreased in proportion as the loading increased, justice would be done both between different shippers and between shippers as a class and the carriers. It is possible that some system of this kind will finally be applied to commodities where the weight varies greatly, when the car is filled to its physical capacity. In Re Wool, Hides and Pelts, 25 I. C. C. 185, 189.

(f) The space occupied by an article may properly be considered in determining its appropriate classification rating. Western Classification Case, 25 I. C. C. 442, 472.

(g) If all the parts constituting a completed article are offered as one shipment, under one bill of lading, the freight charge should be calculated upon a rating for the completed article. This does not prevent a shipper from billing separately each constituent part at its respective rating. Western Classification Case, 25 I. C. C. 442, 487.

(h) In establishing a minimum for the transportation of a light and bulky article it is the aim to name a weight which can be loaded under ordinary circumstances. Bernard Co. v. Director General, as Agent, 74 I. C. C. 557, 560.

(i) Weight density is one element entering into classification of commodities, but mere fact that a commodity manufactured from one kind of material weighs a few pounds less per cubic foot than some commodity manufactured from a different kind of material, does not justify a difference in rating of two classes between them. General Gas Light Co. v. A. G. S. R. R. Co., 83 I. C. C. 361, 364.

§4½. Knocked-down Shipments.

See Knocked-down Shipments.

CASES 1887-1908

(a) Complainant attacked classification applicable on surgical chairs from Canton, O., to Boston, Mass., as unreasonable and unjustly discriminatory. Present classification double first class, less carloads. According to its condition, size and weight, it cannot be said to be light and bulky when crated for shipment. They are greatly more heavy and compact according to space occupied than reclining chairs, and it is difficult to conceive how reclining chairs could have the backs folded over the chairs and crated in such manner as to occupy so little space, and at the same time furnish so much weight according to space as these surgical chairs. HELD: First class rate would be reasonable on these surgical chairs when partly knocked down and shipped at owner's risk, crated in less carloads; one and one-half times first class when at carriers' risk, crated. The Harvard Company v. Pennsylvania Company, 3 I. C. C. 257.

IMPORTANT CASES SINCE 1908

(b) The term "knocked down" has a definite and well-understood meaning in railroad terminology; it involves taking apart the article shipped in such a manner as to reduce materially the space occupied. Merely separating the article into parts and crating them without reducing the bulk would not constitute knocking down in such a manner as to justify a reduction in the rate. Fond du Lac Church Furnishing Co. v. C., M. & St. P. Ry. Co., 21 I. C. C. 481, 482.

(c) But the term "knocked down" in pieces does not mean that a machine must be served into all its component parts and these parts shipped as separate pieces. United Refrigerator & Ice Machine Co. v. C. & N. W. Ry. Co., 28 I. C. C. 439, 441.

(d) Complainant attacked rates charged on carload shipments of pipeless furnaces from Cincinnati, O., to San Francisco, Portland and Seattle, Tacoma and Spokane, Wash., during October 23, 1918, to October 8, 1919, as unreasonable and unjustly discriminatory. The furnaces comprising the shipments were made of cast iron, except the casings and caps, which were of sheet iron. They were shipped knocked down and the parts were crated. The tariffs in effect during the period of movement provided commodity rates of $2.25, minimum 24,000 pounds, from Cincinnati to all points except Spokane, the latter being $1.90, minimum 24,000 pounds. The same tariff provided a rate of $1.625, minimum 40,000 pounds to all points on cast iron furnaces, k. d. On December 31, 1919, tariffs were amended making this rate applicable on cast iron furnaces with sheet iron or steel castings. HELD: rate of $2.25 was applicable and not unreasonable or unjustly discriminatory, complaint dismissed. The Monitor Stove Co. v. Director General, 68 I. C. C. 305.

§5. C. L. and L. C. L. Shipments.

See Infra §13; Cars and Car Supply §11⅞; Evidence §63; Minimums.

CASES 1887-1908

(a) Under a classification which puts lumber in carloads in the sixth class, and unfinished wagon materials in the fifth class, hub blocks prepared to be sold to the manufacturers of hubs and of wheeled vehicles, but upon which only so much labor has been expended as is needful to put them in a condition for seasoning, are regarded as raw material, and belong, when not otherwise specified in the classification sheet, with lumber, instead of unfinished wagon materials. Hurlburt v. Lake Shore & M. S. R. Co. (Com.), 2 I. C. R. 81.

(b) A carrier in defining a carload and fixing the rate should furnish a car adapted to carry properly the quantity designated and not put the shipper to any expense to fit up the car. Rice, Robinson & Witherop v. W. N. Y. & P. R. R. Co., 2 I. C. C. 298, 302.

(c) Complaints attacked as unreasonable classification on carloads and less carloads. Under the official classification, the articles known in trade as grocery articles are so classified as to discriminate unjustly in rates between carloads and less than carloads upon many articles, and a revision of the classification and rates to correct unjust differences and give these respective modes of shipment more relatively reasonable rates is necessary and is so ordered. Thurber v. N. Y. C., 2 I. C. C. 742.

(d) A difference in rates upon carloads and less than carloads of the same merchandise between the same points of carriage so wide as to be destructive to competition between large and small dealers, especially upon articles of general and necessary use, and which, under existing conditions of trade, furnish a large volume of business to carriers, is unjust and violates the provisions and principles of the act. Thurber v. New York Central & Hudson River R. Co., 2 I. C. R. 742.

(e) Under the official classification, the articles known in trade as grocery articles are so classified as to discriminate unjustly in rates between carloads and less than carloads upon many articles, and a revision of the classification and rates to correct unjust differences and give these respective modes of shipment more relatively reasonable rates is necessary, and is so ordered. Thurber v. New York Central & Hudson River R. Co., 21 I. C. R. 742.

(f) A classification of freight designating different classes for carload quantities and for less than carload quantities for transportation at a lower rate in carloads than in less than carloads is not in contravention of the Act to Regu late Commerce. The circumstances and conditions of the transportation in respect to the work done by the carrier and the revenue earned are dissimilar, and may justify a reasonable difference in rate. The public interests are subserved by carload classifications of property that, on account of the volume transported to reach markets or supply the demands of trade throughout the country, legitimately or usually moves in such quantities. Thurber v. New York Central & Hudson River R. Co., 2 I. C. R. 742.

(g) The mere fact that one article is of more general use and therefore shipped in greater quantity than another, when each, as a rule, is shipped in less

than carload quantities, and is of no considerable difference in weight, bulk, and value, and of no appreciable difference in expense of handling and of haul, constitutes in itself no reason why the first should receive a lower rate than the last. Harvard Co. v. Pennsylvania Co. (Com.), 3 I. C. R. 257.

(hi) When an article moves in sufficient volume and the demands of commerce will be better served, it is reasonable to give a lower classification for carloads than that which is applied to less than carload quantities, but the difference in such classification should not be so wide as to be destructive to competition between large and small dealers. Thurber v. New York Cent. & H. R. R. Co., 2 Inters. Com. Rep. 742, 3 I. C. C. Rep. 473, cited and reaffirmed. The justice of the claim for a lower rating on carload lots can only be determined upon the facts in each case. Charles H. Brownell, Columbus, v. Cincinnati Midland R. Co., 4 I. C. R. 285.

(j) Upon complaint alleging unjust discrimination against carload shippers of eggs in favor of shippers in less than carloads, it appeared that under the 'official classification" eggs take second class rates for carload or less quantities; that the commodity is carried in refrigerator cars; that for carload shipments ice to the amount of 6,000 pounds is furnished by the carrier without extra charge; that less than carload shipments are taken from local stations in "pickup" cars to distributing points and forwarded in carloads to New York and other large markets; that notwithstanding the special facilities afforded to small shipments by the carriers, the large dealers control 83 per cent of the traffic. HELD: Upon all the facts in the case, that no unjust discrimination results to the carload shipper from the equal rating of carload and less than carload lots and the special service rendered in gathering and forwarding small shipments, and the complaint should therefore be dismissed. Charles H. Brownell, Columbus, v. Cincinnati Midland R. Co., 4 I. C. R. 285.

(k) When, on complaint of a carload shipper, unjust discrimination is alleged to result from equal rates on carloads and less than carload quantities of the same commodity, the burden of proof is upon the complainant. Brownell v. Columbus & C. M. R. Co. (Com.), 4 I. C. R. 285.

(l) No unjust discrimination results to the carload shipper of eggs from the equal rating of carload and less than carload service rendered in gathering and forwarding small shipments in "pickup" cars, where for carload shipments ice to the amount of 6,000 pounds is furnished by the carrier without extra charge. Brownell v. Columbus & C. M. R. Co. (Com.), 4 I. C. R. 285.

(m) A difference in rates upon carloads and less than carloads of the same merchandise between the same points of carriage so wide as to be destructive to competition between large and small dealers, especially upon articles of general and necessary use, is unjust and violates the act. Brownell v. C. & C. M. R. Co., 4 I. C. C. 285, 291.

(n) The difference between the rate on carloads and that on less than carloads must be reasonable. Duncan v. Atchison, T. & S. F. R. Co. (Com.), 4 I. C. R. 385.

(o) While the circumstances and conditions in respect to the work done by the carrier and the revenue earned are dissimilar in the transportation of freights in carloads and less carloads, and a lower rate on carloads than on less than carloads is, therefore, not in contravention of the statute, yet the difference between the two rates must be reasonable. Duncan v. A., T. & S. F. R. Co., 4 I. C. C. 385, 395.

(p) The importance of maintaining a reasonable relation between carload and less carload rates on the same commodity is seen from the fact that any material difference between them in favor of the larger shipments must result in altogether debarring small dealers from participation in the trade. Duncan v. A., T. & S. F. R. Co., 4 I. C. C. 385, 395.

(q) The difference between carload and less than carload rates from St. Louis, Chicago and other points in the Middle West to the Pacific Coast territory, and which average about 50 cents per 100 pounds, are not unjust, taking the rate adjustment as a whole, and giving due consideration to the controlling force of water competition between the eastern seaboard and the Pacific Coast, the difference in the cost of service by rail, the interests of the parties, and the preservation of reasonable competition between the Middle West and the Pacific

Coast jobbers. Business Men's League of St. Louis v. Atchison, T. & S. F. R. Co., 9 I. C. C. 318.

(r) Where but a small amount of less than carload traffic moves by water, the water competition applies only to carload traffic, and while reducing the rate on carload business, need not necessarily affect the rate on less than carload traffic. Business Men's League of St. Louis v. Atchison, T. & S. F. Ry. Co., 9 I. C. C. 318.

(s) In determining the propriety of a differential between carloads and less than carloads, not only the difference in the expense of handling traffic at terminals should be considered, but also the increased cost of hauling less than carload traffic; and therefore the differentials need not be approximately a fixed quantity, but may increase with the distance, and justify a difference in rates between carloads and less than carload shipments. Business Men's League of St. Louis v. Atchison, T. & S. F. R. Co., 9 I. C. C. 318.

(tu) A differential as between carloads and less than carloads, on the traffic from the Middle West to Pacific Coast territory, which is at once more than 50 cents per 100 pounds, and more than 50 per cent of the carload rate, is prima facie excessive; and while it does not follow that every differential may equal this, or that every one which exceeds this is unlawful, any differential in excess of this requires special justification. Business Men's League of St. Louis v. Atchison, T. & S. F. R. Co., 9 I. C. C. 318.

(v) The difference between carload and less than carload rates from St. Louis, Chicago and other points in the Middle West to Pacific Coast territory, which are the subject of complaint herein, and which average about 50 cents per 100 pounds, are not, taking the rate adjustment as a whole, and giving due consideration to the controlling force of water competition between the eastern seaboard and the Pacific Coast, difference in the cost of service by rail, the interests of the parties, perservation of reasonable competition between the Middle West and the Pacific Coast jobbers, and other material circumstances, shown to be unjust; but while the tariff cannot be condemned as a whole upon grounds urged by complainants, many of the details in such tariff are in violation of law. Business Men's League v. A., T. & S. F. Ry. Co. et al., 9 I. C. C. 318.

(w) While on traffic from the Middle West to the Pacific Coast many differentials in the rates named for carloads and less than carloads are too great, while varied commodity rates in the hardware schedule and perhaps in some others should be readjusted, and while in some instances greater latitude should be given in the shipment of practically the same articles in mixed carloads, the present record, which pertains almost wholly to the general aspects of the controversy, furnishes no facts from which it can be intelligently determined what ought to be done in specific instances, and further hearing is accordingly ordered. Business Men's League v. A., T. & S. F. Ry. Co. et al., 9 I. C. C. 318.

(x) While it was shown that many differentials in the rates named for carloads on traffic from the Middle West to the Pacific Coast were too great, and the varied commodity rates in the hardware schedule should be readjusted, and in some instances greater latitude should be given in the shipment practically of the same articles in mixed carloads, the Commission ordered a further hearing, where the record furnished no facts from which it could be intelligently determined what ought to be done in specific instances. Business Men's League of St. Louis v. Atchison, T. & S. F. R. Co., 9 I. C. C. 318.

(y) In the adjustment of carload and less than carload rates circumstances often render the application of a greater differential more proper in one case than in another, but taking the traffic generally from the Middle West to Pacific Coast territory, it is held that a differential as between carloads and less than carloads which is at once more than 50 cents per 100 pounds and more than 50 per cent of the carload rate is prima facie excessive. It does not follow that every differential may equal this or that every differential which exceeds this is unlawful, but any differential in excess of this requires special justification. Business Men's League v. A., T. & S. F. Ry. Co. et al., 9 I. C. C. 318.

(z) Carriers may properly make a difference in their rates between carload and less than carload shipments, but such difference must be reasonable. Business Men's League of St. Louis v. A., T. & S. F. R. Co., 9 I. C. C. 319, 357.

(aa) The act of defendants in increasing the classification of soap in less than carloads from fourth to third class was unreasonable and unjust, and under the Act to Regulate Commerce their subsequent practice of applying 20 per cent less than third class rates on such traffic is also unlawful. Proctor & Gamble Co. v. Cincinnati, H. & D. R. Co., 9 I. C. C. 440.

(bb) Before allowing a carload rating to a carload shipment a carrier is entitled to require that the goods shall be loaded at one time and place, that but a single bill of lading shall be issued, and that the shipment shall be from one consignor to one consignee, but when the goods are so loaded and by the terms of sale become the property of the consignee upon delivery to the carrier, the carrier has no right to inquire whether the consignee obtained his title from one or several owners; and if it accords the carload rate in case the consignor is the owner, failure on its part to extend the same privilege when the consignee is the owner, violates sections one, two and three of the act. Buckeye Buggy Company v. C. C. C. & St. L. Ry., 9 I. C. C. 620, 627.

(cc) A carload rate lower than the less carload rate, where the difference is not too great, would ordinarily be lawful; but a still lower rate for shipments of a hundred or a thousand carloads, though duly published and impartially applied, would be wholly indefensible. If a low rate is granted on conditions with which only a few can comply that rate is presumable unfair and may be extremely prejudicial to all other shippers of like traffic because they are practically unable to meet the terms upon which it is offered. Glade Coal Co. v. B. & O. R. Co., 10 I. C. C. 226, 251.

(dd) While the carriers may lawfully establish carload and less than carload rates on cotton, with a reasonable difference between the two rates, and a reasonable carload minimum securing to shippers generally the lower carload rates, it does not follow that they are bound to do so, much less that they can be required to establish a differential based upon an unusual carload minimum. Planters' Compress Co. v. Cleveland, C. C. & St. L. R. Co., 11 I. C. C. 382.

(ee) Defendant's refusal to grant lower rates on cotton in carloads of 45,000 pounds or more is not a violation of the regulating statute. Planters Compress Co. v. Cleveland, C. C. & St. L. R. Co., 11 I. C. C. 382.

(ff) Defendants have classified leather scraps in less than carloads as third class since 1887, but in January, 1894, they limited such classification to scrap refuse from the manufacture of leather goods, and excluded strips or pieces cut from hide leather, and in January, 1905, such limitation was superseded in defendants' freight classification by the words 'this rating will apply only upon scraps not available in the manufacture of leather goods." All leather scrap purchased by complainant contains leather pieces which can be used in the manufacture of leather goods, and the sole purpose of complainant in purchasing such leather scrap is to separate such pieces and sell them to persons having use for the various sizes and kinds. The effect of the new rule was to advance complainant's commodity from third to second class, which is the rating prescribed by defendants for leather. HELD, that a third class rating for leather scraps in less than carloads is sufficiently high, and that defendants' present classification and rating of that traffic is unjust and unreasonable. Newman v. N. Y. Central & H. R. Co. et al., 11 I. C. C. 517.

(gg) A third-class rate for leather scraps in less than carloads is sufficiently high, and defendant's present classification and rating for that traffic is unjust and unreasonable. Newman v. New York C. & H. R. R. Co., 11 I. C. C. 517.

(hh) Complainant attacked as unreasonable rate charged on wool in the grease, less carload, from Philadelphia, Pa., to Fort Wayne, Ind., of 62 cents as compared with rate in reverse direction of 43 cents. Distance 674 miles, the commodity being classed the same in both directions, first class, less carloads, second class carloads. In the commodity under consideration the whole great western fields and ranges furnish the supplies, and these for the most part move in a steady stream toward the storing and manufacturing centers of the northeast, naturally resulting in competition more intense than can be expected to result in an effort among the carriers to secure occasional shipments in the other direction. HELD, rate attacked not unreasonable or unduly discriminatory, complaint dismissed. Weil v. Pennsylvania R. R. Co., 11 I. C. C. 627.

(ii) Defendants classify cement burial vaults with iron burial vaults as second-class freight, in less than carloads, and apply second-class rates thereon, although the cement vault is about four times heavier and occupies but little more space in the car; in carload shipments the defendants classify cement vaults as fifth-class and iron vaults as third-class freight. The risk of breakage in the carriage of the cement vaults is insignificant; their value and the value of the materials used in their construction is much less than in the case of iron vaults; cement vaults are also made with unskilled labor, while iron vaults require skilled mechanics and a plant with machinery and tools. HELD, that under such circumstances defendants should charge not to exceed third-class rates on shipments from Indianapolis, Ind., the point from which complainant's shipments of cement vaults are consigned. Van Camp Burial Vault Co. v. C. I. & L. Ry. Co., 12 I. C. C. 79.

(jj) Complainant ships bags from Newark, N. J., to Stanley, Luray, and Greenville, Va., over the Pennsylvania, Cumberland Valley and Norfolk & Western roads in less than carloads, which are used in carload shipments of ground bark from such Virginia points to Newark and other points in that vicinity, and upon the bag shipments from Newark a rate of 38 cents per 100 pounds is charged, while on complainant's competitors' shipments of bags from Newark to Barboursville and Charlottesville, Va., via the Pennsylvania and Southern roads, a rate of 22 cents is in force, such difference in rates resulting from the use of different freight classifications. Upon consideration of all the facts and circumstances: HELD, that the rate on bags, less than carloads, from Newark to Stanley, Luray and Greenville should not exceed 22 cents per 100 pounds. Henry M. Rau v. Penn. Railroad Co., et al., 12 I. C. C. 200.

(kk) That defendants' refusal to apply their carload rates to shipments of wrapping paper and paper bags in mixed carloads is not unlawful. Paper Mills Co. v. Pennsylvania Railroad Co. et al., 12 I. C. C. 438.

IMPORTANT CASES SINCE 1908

(ll) Water competition may justify a difference in the right of combining different commodities at the carload rate. City of Spokane v. N. P. Ry. Co., 15 I. C. C. 376, 389.

(mm) Shipments offered in carload quantities entitled to carload rate. Voorhees v. A. C. L. R. R. Co., 16 I. C. C. 42, 43.

(nn) Carriers, within proper limitations, may take competition into consideration in classifying freight. Competition that may be considered in proper cases not only includes that between carriers, but also that of the commodity produced in one section of the country with the same commodity produced in another section, and sometimes competition of one kind of traffic with another kind. Metropolitan Paving Brick Co. v. Ann Arbor R. R. Co., 17 I. C. C. 197, 203.

(oo) A carload rating should be established for a commodity when that commodity can be offered for shipment in carload quantities, unless public interests or other valid considerations require the contrary. Assuming a proper relation between C. L. and L. C. L. rates, the establishment of carload ratings whenever carload quantities are offered will meet the needs of new and growing lines of industry without discrimination, and it should not be a prerequisite to the establishment of C. L. rates that there should be a reasonable prospect of a minimum number of carloads within a certain period of time. In Re Suspension of Western Classification No. 51, 25 I. C. C. 442, 465.

(pp) The difference in the cost to the carriers should be ascertained as accurately as possible, and due weight given to it in determining the classification and rates for L. C. L. quantities as compared with C. L. quantities. In Re Suspension of Western Classification No. 51, 25 I. C. C. 442, 467.

(qq) All the different factors which enter into the establishment of a rate should be considered in the establishment of the proper relationship between C. L. and L. C. L. rates in making a uniform classification. In Re Suspension of Western Classification No. 51, 25 I. C. C. 442, 467.

(rr) One of the great purposes in the construction of a uniform classification should be the establishment of just relations between C. L. and L. C. L. quantities in accordance with some consistent principle throughout the classification and the rate schedules which may be constructed upon it. In Re Suspension of

Western Classification No. 51, 25 I. C. C. 442, 467.

(ss) In establishing a proper relation between carload and less-than-carload ratings, among the factors to which consideration should be given are the relative cost of handling, the demands made upon terminal properties of the carriers, and the utilization of equipment. In Re Suspension of Western Classification No. 51, 25 I. C. C. 442, 608.

(tt) Commercial and economic conditions must be considered in determining whether a carload rating should be accorded. Taylor Dry Goods Co. v. M. P. Ry. Co., 28 I. C. C. 205, 207.

(uu) And in determining whether a carload rating should be accorded, not merely the physical but the commercial and economic aspects must be considered. Taylor Dry Goods Co. v. M. P. Ry. Co., 28 I. C. C. 205, 207.

(vv) Each case must be considered upon its own merits, and in determining whether a carload rating should be accorded, not merely the physical, but the commercial and economic aspect must be considered. John Taylor Dry Goods Co. v. M. P. Ry. Co., 28 I. C. C. 205, 207.

(ww) Whether a carload rating should be accorded in a particular instance depends not only upon whether that commodity is offered for shipment in carload quantities, but also upon other considerations. John Taylor Dry Goods Co. v. M. P. Ry. Co., 28 I. C. C. 205, 209.

(xx) In arriving at the relation which should be observed between straight and mixed carload rates, it is proper to give due regard to the nature and cost of the special service furnished. Under the prevailing practice, it is the rule in the absence of a specific rate upon the mixed shipment, to apply the highest rate and highest minimum weight applicable on any of the commodities contained in the shipment. Where there is a substantial difference between the rates on the several commodities, the application of the highest rate and highest minimum weight certainly permits the carrier to secure the additional compensation which the conditions attending the transportation of mixed shipments appear to warrant. Mixed Carload Shipments of Lime, Cement and Plaster, 34 I. C. C., 124, 126.

(yy) In a typical case the Commission considered proposed changes in the loading and unloading charges on less-than-carload shipments transported at carload rates. The existing rule of the western classification provided a charge of 1¼c per 100 pounds, for loading and a like charge for unloading, but did not state whether such charges would be based on actual weights or on carload minimum. The carrier's proposed to amend the rule so that the charges should be definitely based on the carload minimum. HELD, that the proposed change in the rule had not been justified, since there was no apparent reason for basing loading or unloading on the carload minimum weight. Cancellation of proposed rule directed. L. C. L. Minimum Handling Charges, 43 I. C. C. 266.

(zz) A narrow spread between the carload and less-than-carload rates, tends to waste of transportation facilities without adequate compensating advantages to the general public and is not to be encouraged. The Southeastern Sugar Cases, 48 I. C. C. 739, 747.

(3a) The volume of movement is not determinative of the right to a carload rating, and the Commission does not accept the view that to entitle a commodity to a carload rating it should be shown that increased movement in carload quantities would result. Brunswick-Balke Collender Co. v. C. G. W. R. R., 56 I. C. C. 340, 342.

(3b) Volume of movement is not determinative of the right to a carload rating. Interstate Cottonseed Crushers Association v. Director General, 61 I. C. C. 1, 6.

(3c) Three separate l. c. l. shipments loaded in one car were billed to three consignees at two destinations, and three separate bills of lading and three separate freight bills were issued. Failure of carriers, after shipment left point of origin, to divert to one of the consignees as a c. l. shipment or to provide by rule for such diversion, found not unreasonable or otherwise unlawful. Consolidated Rendering Co. v. B. & M. R. R., 77 I. C. C. 101.

(3d) In distributing commodities in competitive territory, the point that can avail itself of a long carload haul and a short less-than-carload haul is ordinarily entitled to a lower total transportation charge than the point using a short carload haul and a long less-than-carload haul. Certain-Teed Products

Corp. v. A., T. & S. F. Ry. Co., 77 I. C. C. 444, 445, 446.

(3e) Carload ratings should be established as need for them arises. Sonora v. D., L. & W. R. R. Co., 83 I. C. C. 399, 401.

(3f) Commodities when shipped in less than carloads should take, and ordinarily are accorded, higher ratings and rates than when shipped in carloads. Carnie-Goudie Mfg. Co. v. Director General, as Agent, 83 I. C. C. 573, 574.

(3g) Generally speaking, the cost of handling less carload traffic, due to increased terminal expense, frequent transfers enroute, and higher percentage of loss and damage claims, greater than the cost of handling carload traffic, that ordinarily a differential between the carload and less carload rates on traffic moving heavily in carload quantities is justified by the difference in the cost of transportation, but the Commission will not require carriers against their will to establish a differential or widen an existing differential between carload and less carload rates unless it clearly appears that the carload rates are unreasonable or that to do so would remove prejudice or preference, which, is found to be undue and unlawful. St. Louis Merchants Exchange v. A. & R. R. R., 87 I. C. C. 548, 556.

§6. Competition.

See Competition.

CASES 1887-1908

(a) Complainant attacked rates on pearline as compared with common soap from New York to Atlanta as unreasonable. By the classification of the Southern Ry. & Steamship Association, on shipments of pearline and common soap from New York to Atlanta, Ga., pearline is in the fourth class freight with a rate of 73 cents per 100 pounds, while common soap is in sixth class freight with a class rate of 49 cents per 100 pounds, but a special rate is given common soap of 33 cents per 100 pounds. HELD: That pearline being competitive with common soap, the relative difference between the class rate of pearline and this special rate on common soap is too great, and that pearline must be placed in fifth class freight from New York to Atlanta with a rate of 60 cents, and also fifth class in the Southern Ry. & Steamship Association; and further, that the relative difference in the rates on pearline and common soap in such shipments must not exceed the difference of 60 cents on pearline and 33 cents on common soap.

HELD, further, that on shipments of pearline and common soap, all rail, in this territory to which the classification of the Southern Ry. & Steamship Company applies, the following rates of this Association must be maintained: soap powder 32 cents for 100 miles, common soap 20 cents; 49 cents on soap powder and 38 cents on common soap for 500 miles. HELD, that the discrimination made by the special rate between pearline and common soap, to the extent now existing on the shipments to which it refers, is unjust and must be discontinued; and while pearline is fifth class, common soap should be sixth class. James Pyle & Sons v. East Tennessee, Virginia & Georgia R., 1 I. C. C. 767.

(b) By the classification of the Southern Railway & Steamship Association, adopted by the East Tennessee, Virginia & Georgia Railway Company, on shipments of pearline and common soap from New York to Atlanta, Ga., pearline is in fourth class freight with a rate of 73 cents per hundred pounds, while common soap is in sixth class freight with a class rate of 49 cents per hundred pounds, but a "special rate" is given common soap of 33 cents per hundred pounds. HELD: (a) That pearline being competitive with common soap, the relative difference between the class rate of pearline and this "special rate" on common soap is too great, and that pearline must be placed in fifth class freight on shipments from New York to Atlanta by the defendant company, with a rate of 60 cents per hundred pounds, and also in the fifth class in the classification of the Southern Railway & Steamship Association; and further, that the relative difference in the rates on pearline and common soap in such shipments must not exceed the difference of 60 cents per 100 pounds on pearline and 33 cents on common soap. (b) HELD FURTHER, that on shipments of pearline and common soap, all rail, in the territory to which the classification of the Southern Railway & Steamship Association applies, the following rates of this Association must be maintained by the defendant company, namely: Per 100 pounds, 100 miles, soap powder, 32 cents, common soap 20 cents; 500 miles, soap powder 49 cents, common soap 38 cents. (c) HELD, that the discrimination made by the "special rate" of the Southern Railway & Steamship Association between pearline and common soap, to the extent now existing on the shipments to which it refers, is unjust and must be discontinued; and while common soap is in its sixth class, pearline must be placed in its fifth class. Pyle v. E. Tenn., Va. & Ga. R. Co., 1 I. C. R. 767.

(c) Where questions of classification and rates are involved as to one particular article of freight, it is often necessary to examine and consider the classification and rates upon other articles in which the same calculations in respect of value, bulk and expense of handling, and of carriage, would to a considerable extent enter; and for the purposes of such comparison it is not indispensably necessary that the articles should be competitive with each other, though if they are competitive then this feature must more strongly bring to view the fact of discrimination in rates, if there be such. Harvard Co. v. Pa. Co., 3 I. C. R. 257.

(d) The rates involved in this case are those on live hogs, live cattle and the dressed products of each. These are found to be competitive commodities and therefore entitled to relatively reasonable rates for transportation proportioned to each other according to the respective costs of service. Squire & Co. v. Mich. Central R. Co., 3 I. C. R. 515.

(e) Competitive commodities are entitled to relatively reasonable rates for transportation proportioned to each other according to the respective costs of service. Squire v. Michigan C. R. Co. (Com.), 3 I. C. R. 515.

(f) Two kinds of soap used for the same purposes, and so advertised and held out to the world, and substantially equal in value, should, for purposes of transportation and rating, be placed in the same classification. Beaver v. Pittsburgh, C. & St. L. R. Co. (Com.), 3 I. C. R. 564.

(g) When carriers have uniformly placed in the same class all grades of a particular commodity, for example, window shades, regardless of the difference in value between different grades or the size of cases used for shipment, such carriers will not incur greater risks than they have thus voluntarily assumed, if the same practice is continued under a decision and order requiring a lower classification and rating for the great bulk of shipments of that commodity which are actually transported. Page v. Delaware, L. & W. R. Co., 6 I. C. C. 548.

(h) Hatters' furs and fur scraps and cuttings are offered for transportation in packages not bulky, but of convenient size, their value is not great, they are not liable to be lost or damaged in transit, and the first class of the "Official Classification" enforced by defendants contains hardly any article so desirable for traffic as they are, yet these commodities are classified double first class by the defendant carriers. For manufacturing purposes these raw materials are competitive with hats, the finished product. Complainant, located at Wabash, Ind., is the only manufacturer of hats west of Atlantic Seaboard territory, most of his competitors being located in the vicinity of New York, from whence supplies of hatters' furs and fur scraps and cuttings are almost entirely drawn. The difference in freight rates operates to damage complainant in his competition in western territory with the eastern manufacturers to the extent of about one thousand dollars per year. HELD: That hatters' furs and fur scraps and cuttings as compared with articles taking first class rates in defendants' classification, including hats, the finished product for which these commodities constitute raw material, are unlawfully made double first class and cannot lawfully be classed higher than first class in such classification. Nathan Meyer v. C. C. C. & St. L. Ry. Co., 9 I. C. C. 78.

(i) Manifestly, in determining what freight rate shall be borne by different commodities an attempt should be made to maintain a fair relation between those commodities, and a classification which utterly ignores all considerations of this kind or which utterly fails to give due weight to such considerations is unjust and unreasonable. Myer v. C. C. C. & St. L. Ry., 9 I. C. C. 78, 83.

(j) When water competition permits the establishment of classification and rates below the rates to non-competitive points, such lower rates, while possessing value as standards of comparison, are not always conclusive in fixing rates to shorter distance points not affected by such competition. Shippers' Union of Phoenix v. Atchison, T. & S. F. R. Co., 9 I. C. C. 250.

(k) The legal duty of common carriers to so classify traffic and fix charges thereon that the burdens of transportation shall be reasonably and justly distributed among the articles they carry arises under the obligation imposed upon them not to charge unreasonable or unjust rates or to inflict any unjust discrimination or undue prejudice in any respect whatsoever; and even in cases where the need of additional revenue is apparent the carrier can not arbitrarily select some one or more articles upon which to apply higher rates regardless of the relation which such article or articles bear to other commodities commonly offered for transportation. National Hay Association v. L. S. & M. S. Ry., 9 I. C. C. 264, 304.

(l) Where but a small amount of less than carload traffic moves by water, the water competition applying only to carload traffic, reducing the rate on carload business need not necessarily affect the rate on less than carload traffic. Business Men's League of St. Louis v. Atchison, T. & S. F. R. Co., 9 I. C. C. 318.

(m) There is no such competitive relation between fresh meat and, for example, fresh fruit that it is of necessity undue discrimination to accord a privilege to the one commodity which is refused to the other. Miner v. New York, N. H. & H. R. Co., 11 I. C. C. 422.

IMPORTANT CASES SINCE 1908

(n) Carriers, within proper limitations, may take competition into consideration in classifying freight. Competition that may be considered in proper cases not only includes that between carriers, but also that of the commodity produced in one section of the country with the same commodity produced in another section, and sometimes competition of one kind of traffic with another kind. Metropolitan Paving Brick Co. v. Ann Arbor R. R. Co., 17 I. C. C. 197, 203.

(o) Complainant attacked western and southern classification ratings of third class on sudan seed, less carloads, as unjust, unreasonable, unjustly discriminatory and unduly prejudicial. Sudan grass is a species of sorghum cane, is grown for rough forage and fodder and the seeds are not used to any extent for other than planting purposes. As a forage crop it is substantially the same as sorghum and competes with the various varieties thereof. Prior to May 25, 1921, there was no specific rating on sudan seed in either classification, but sorghum seed rating was applied. On that date it was rated at third class. The

rating on sorghum seed was fourth in western and sixth in southern, the latter being advanced to third. In physical appearance sudan seeds resemble seeds of the different varieties of sorghum more closely than they resemble the several grass seeds. Loss and damage claims are negligible. The transportation characteristics of sudan seeds are substantially similar to those of sorghum seeds. HELD, western and southern classification ratings of third class on sudan seeds unreasonable to extent they exceeded fourth class. Mangelsdorf Seed Co. v. C. B. & Q. R. R., 74 I. C. C. 665.

(p) Competition, value, and risk of transportation are the factors to be considered in classifying an article. Centennial School Supply Co. v. L. V. R. R. Co., Unrep. Op. 2190.

(q) Clay hollow building tile is the only important competitor of gypsum hollow building (partition) tile. Both are ordinarily used in partition work in large buildings, and the clay tile may be used in all instances where the gypsum tile can be used. Acme Cement Plaster Co. v. A., C. & Y. Ry. Co., 77 I. C. C. 691, 694.

C. 59, 65; Goodyear Tire & Rubber Co. v. A. C. & Y. Ry. Co., 53 I. C. C. 389, 394; Carnation Milk Products Co. v. Director General, 55 I. C. C. 665; Dothan Chamber of Commerce v. Director General, 58 I. C. C. 537, 544; Homestead Valve Mfg. Co. v. Director General, as Agent, 80 I. C. C. 248.

§6½. Crated Shipments.

CASES 1887-1908

(a) Complainant attacked classification on iron pipe fittings as unduly discriminatory and unreasonable. Iron pipe fittings shipped in cases from northern points to southern territory, take second class rates, but if shipped in casks, barrels, or kegs a special iron rate, lower than the sixth class rate, is applied on any quantity. The barrel package is cheaper than the case, except when the quantity is insufficient to fill a barrel; but when that happens a keg can be used for packing, with but little inconvenience or additional expense, and the lower special iron rate is thereby secured. The choice is wholly with the shipper to pay the higher rate on fittings in cases or the lower rate on fittings in kegs or barrels. Such a classification does not operate of itself to aid dishonest shippers in underbilling goods of greater value and the opportunity of false billing would not be lessened by giving the special iron rate to pipe fittings packed in cases. No ground of distinction appears in this respect between pipe fittings and numerous articles included in the special iron list, and taking higher rates when packed in boxes, and reclassification of all these other commodities is not warranted by the facts in this case. HELD, the defendant carriers have not exceeded the limits of their discretion in placing iron pipe fittings packed in cases in a higher class than iron pipe fittings packed in kegs or barrels, and that such action is not unreasonable or otherwise in violation of the act. Trades League of Philadelphia v. P. W. & B. R. Co., 8 I. C. C. 368.

IMPORTANT CASES SINCE 1908

(b) Term "crated" or "in crates" held to mean inclosed on sides, including bottom, with framework. Volverton v. U. P. R. R. Co., 31 I. C. C. 23.

(c) Rates on crated animals in excess

of rates on animals shipped uncrated are unreasonable; but a tariff requirement that small animals must be crated for shipment is not unreasonable, but such requirement should be made uniform. National Society of Record Assos. v. A. & R. R. R. Co., 40 I. C. C. 347, 357.

(d) On shipment of a soda fountain from Cleveland, Ohio, to Arkansas City, Kans., packed in box with aperatures between the boards varying from 1 inch to 2½ inches, held such covering could not properly be termed a box and a higher rating applicable to crated shipments not found unreasonable. Bishop-Babcock-Becker Co. v. N. Y. C. R. R., 45 I. C. C. 141, 142.

(e) Failure of carriers in western classification territory to provide for shipment of stoneware water filters, loose, in excelsior, hay, straw, or similar packing material, at same rating and minimum weight as apply on same commodity when shipped in barrels, boxes, or crates, found unreasonable, and c. l. rating and minimum weight ordered established accordingly. Schlieper v. S. P. Co., 80 I. C. C. 630.

ALL OTHER CITATIONS

Produce Distributors Co. v. L. V. R. R. Co., 40 I. C. C. 17, 19.

§7. Mixed Carloads.

See Classification §16½; Express Companies §16; Minimums §6; Mixed Carloads.

CASES 1887-1908

(a) Complainant attacked rates on mixed carloads of chair stuff, bed and mattress material, unfinished, from Detroit, Mich., to Omaha, Neb., as unjust and unreasonable. HELD, rate prescribed, minimum 25,000 pounds, 20 cents from Chicago to Omaha and 15 cents from Mississippi River to Omaha resulting in through rate from Detroit to Omaha via Chicago of 30 cents per 100 pounds and via Mississippi River points, not through Chicago, of 31½ cents. Murphy Wasey & Co. v. Wabash R. Co., 3 I. C. C. 725.

(b) A rate prescribed for complainants' shipments in mixed carloads of chair-stuff, spring bed and mattress material all wooden, minimum weight 25,000 pounds, of not exceeding 20 cents per hundred pounds from Chicago to Omaha and not exceeding 15 cents per hundred pounds from Mississippi River points to Omaha, resulting in a through rate from Detroit to Omaha via Chicago of 30 cents per hundred pounds and via Mississippi River points, not through Chicago, of 31½ cents per hundred pounds. Murphy, Wasey & Co. v. Wabash R. Co., 3 I. C. R. 725.

(c) Mixed carloads of celery and cauliflower or other vegetables in the same class should be transported at no higher rate per carload than for a carload quantity of either. Tecumseh Celery Co. v. Cincinnati, J. & M. R. Co. (Com.), 4 I. C. R. 318.

(d) Complainant attacked classification and rate on cereal products westward from Chicago, Ill. Cereal products are classified and rated with flour. On mixed carloads the shipper pays the ordinary, less carload rate for the quantity of each product placed in the car. The entire tonnage of cereal products is only about one-fourth that of flour. At present the rates westbound on cereals are not as high as the average westbound rates principally because of the large empty car movement westbound. HELD, rating and classification attacked not unreasonable, the record being left open so far as the mixing privilege is concerned. F. Schumacher Milling Co. v. C. R. I. & P. Ry., 4 I. C. C. 373.

(e) A mixed carload rate for cereal products or for cereal products and flour that would have the effect of throwing out of the trade many competitors of complainant who manufacture only certain kinds of cereal products, and of centralizing the business in the hands of one or more dealers, should not be granted when, without it, no wrong is done to any one and the market is open to all competitors. To obtain the abrogation of a rule in a classification denying a mixed carload rate upon specified articles the rule should be shown unreasonable, unfair or unjustly discriminative. The F. Schumacher Milling Co. v. The Chicago R. I. & P. R. Co., 4 I. C. R. 373.

(f) A mixed carload rate for cereal products or for cereal products and flour that would have the effect of throwing out of the trade many competitors of complainant who manufacture only certain kinds of cereal products, and of centralizing the business in the hands of one or more dealers, should not be granted when, without it, no wrong is done to

any one and the market is open to all competitors. To obtain the abrogation of a rule in a classification denying a mixed carload rate upon specified articles the rule should be shown unreasonable, unfair or unjustly discriminative. F. Schumacher Milling Co. v. C., R. I. & P. R. Co., 6 I. C. C. 61.

(g) The effect of a rule permitting the shipment of small quantities of articles in the same class as a mixed carload is properly to be considered in determining the reasonableness and justice of an increase of a long standing less than carload rate, thereby subjecting the shipper of less than a carload to an additional disadvantage in conjunction with the mixed carload rule. Proctor & Gamble Co. v. Cincinnati, H. & D. R. Co., 9 I. C. C. 440.

(h) The privilege of shipping small quantities of articles in the same class as a mixed carload is valuable to a great many shippers and is not to be condemned because it may result in some degree to the advantage of particular manufacturers or to jobbers; but when it appears, as in this case, that shippers like complainant are subjected to additional disadvantage under the operation of a mixed carload rule through the increase in a long-standing less than carload rate, the effect of that rule is properly to be considered in determining the reasonableness and justice of such increased rate. Proctor & Gamble Co. v. C., H. & D. Ry. Co., 9 I. C. C. 440.

(i) Complainant attacked rate charged on a mixed carload of lemons and pineapples from New Orleans, La., to Dallas, Tex., as unreasonable. The tariff provided for mixed carloads of lemons and bananas and of pineapples and bananas and that pineapples might be mixed with a carload of almost any other kind of green fruit except lemons and oranges. Complainant was charged the minimum carload weight and carload rate on the lemons and less carload rate on the pineapples. HELD, rate attacked unreasonable to extent the tariff did not provide for a mixed carload rating on lemons and pineapples, reparation awarded to basis of class A rate of 72 cents minimum 24,000 pounds, the basis applicable to mixed carloads of lemons and bananas. Charles Roth v. T. & P. Ry., 9 I. C. C. 602.

(j) A tariff should be amended so as to provide for a mixed carload of lemons and pineapples, where it appears that the tariff provides for a mixed carload of lemons and bananas, and of pineapples and bananas, and that pineapples might be mixed in carloads with almost any other kinds of fruit except lemons and oranges. Roth v. Texas & P. R. Co., 9 I. C. C. 602.

(k) Upon the amendment of a tariff so as to provide for the shipment of mixed carloads of lemons and pineapples, the complainant was allowed reparation for the excess charged above the carload rate upon the shipment in question. Roth v. Texas & P. R. Co., 9 I. C. C. 602.

(l) On submission by a railway company of shipper's claim for carload rating on a mixed carload of lemons and pineapples, it appeared that the tariff provided for mixed carloads of lemons and bananas and of pineapples and bananas, and that pineapples might be mixed in a carload of almost any other kind of green fruit except lemons or oranges. HELD: That a matter submitted in this way should be treated as a case upon complaint and answer; that the railway company should amend its tariff so as to provide for mixed carloads of lemons and pineapples, and that it should make reparation to complainant for the excess charge above the carload rate upon the shipment in question. Roth v. Texas & P. Ry. Co., 9 I. C. C. 602.

(m) Complainant attacked as unduly discriminatory and unreasonable refusal of defendants to apply carload rates on paper bags and wrapping paper in mixed carloads, that is, carloads containing less carload shipments of each of said articles, between points in southern classification territory and from shipping points on the Pennsylvania to destinations points in that territory. The Commission has in several cases disapproved of the imposition by carriers of conditions with which only a comparatively few shippers could comply, and the circumstances and conditions disclosed by the record in this case convince it that such a condition would be created by sustaining complainants contention concerning mixed carloads where the transportation is controlled by the southern classification. If the carload rates were applied on mixed carloads complainants and one other concern would be benefited, but many others, who deal only in one of these articles, would be correspondingly injured. HELD, complaint dismissed.

Paper Mills Co. v. Pennsylvania R. R., 12 I. C. C. 438.

(n) Refusal to apply carload rates to shipments of wrapping paper and paper bags in mixed carloads not unlawful. Paper Mills Co. v. Pa. R. R. Co., 12 I. C. C. 438.

IMPORTANT CASES SINCE 1908

(o) Mixing carloads or whatever privilege of this sort is accorded to one locality should be accorded to another served under the same circumstances. Water competition, however, may justify differences. City of Spokane v. N. P. Ry. Co., 15 I. C. 376, 389.

(p) The liberalization of mixtures is in the interest of the whole public. Artificial restrictions upon mixtures are restrictions upon the freedom of trade and commerce, with a tendency to militate against the small man. From the point of view of railway operation, mixtures result in a better utilization of car space, they lessen the demands upon terimnal properties, they decrease the expense of operation and facilitate the movement of freight. In Re Suspension of Western Classification No. 51, 25 I. C. C. 442, 607.

(q) A schedule which fails to provide a rate for a mixture which can be properly handled and transported without damage to destination, is unreasonable. Lee v. L. S. Ry. Co., 29 I. C. C. 101, 102.

(r) So it has been said that just what mixture of implements may be included in a car in order to take a certain rate is of as much importance to the jobbers as the rate itself. Wichita Business Assn. v. A. T. & S. F. Ry. Co., 30 I. C. C. 374, 375.

(s) It is the prevailing rule that the rate applicable on mixed carloads of live stock is the rate prescribed for the highest class of stock in the car, subject to the highest minimum weight for any class of stock in the car. Hoyt & Bergen v. C. & N. W. Ry. Co., 32 I. C. C. 319, 324.

(t) The Commission has previously pointed out the desirability of liberal provisions for mixtures. The benefits to shipper and consignee are obvious. Orders may be made for smaller quantities of each commodity and the service contributed by them in loading and unloading obviates the expense of handling by the carrier which is involved in less-than-carload shipments, as well as the greater inconvenience of warehouse delivery as compared with track delivery. Mixed Carload Shipment of Lime, Cement and Plaster, 34 I. C. C. 124, 125.

(u) The rules governing mixtures of shipments and follow lots now in effect in different sections of the country are not uniform. These mixing and follow lot rules should not be different when the traffic is transported in privately owned than in railroad owned cars. In the Matter of Private Cars, 50 I. C. C. 652, 707.

(v) Uniformity as to mixing arrangements could have been accomplished in the consolidated classification either by using one rule for the entire country or by having no rule with respect to that matter. All things considered, the first alternative was deemed to be reasonable and desirable. To have adopted the latter would have been impracticable. No uniform set of specific mixtures could have been devised that would have suited or would have been suitable to all shippers and classes of shippers and to all sections of the country, and there would not in that event have been uniformity as to descriptions, because on many groups of related articles different specific mixtures in the description column of the classification would have been necessary for each individual territory. A consolidated classification would be impracticable without a general mixing rule. Consolidated Classification Case, 54 I. C. C. 1, 18.

(w) Specific mixtures in large numbers are extended to the western shippers at present in commodity tariffs. The policy of leaving mixtures to be provided for in each instance by a specific provision opens the door to discrimination. It is productive of continual requests for broadening the mixtures to meet the desires of individual shippers, and thus leaves the situation in an unsettled state. A definite fundamental principle rather than uncertain and varying practices and policies should govern. Consolidated Classification Case, 54 I. C. C. 1, 18.

(x) It seems desirable to provide rules or specific mixtures in the classification that fit the traffic and make unnecessary the publication of exceptions and special arrangements in commodity tariffs. Consolidated Classification Case, 54 I. C. C. 1, 42.

(y) Original report 62 I. C. C. 375,

complainant petitioned for rehearing. Rehearing was had solely on the question of the elimination of lard compounds and lard substitutes from the mixing rules covering fresh meats and packing house products. Lard compound is composed of lard and other oil ingredients. No lard compound has been manufactured or moved in interstate commerce for years. Lard substitute is the cheapest form of shortening fat manufactured and sold. It is a combination of animal and vegetable fats, or an exclusive vegetable fat. Lard substitute, both from the commercial and the consumers standpoint, is closely related to lard, which is exclusively a packing house product. It is included in every list of packing house products published in a railroad tariff to which the attention of the Commission has been directed. It is used for the same purpose as lard and is a product manufactured by the packers. The Commission can not see how the wholesale grocers or the manufacturers of lard substitutes will be injured by inclusion of lard substitutes in the proposed mixing rules. If lard substitutes were excluded from the mixing rules the large packers and large manufacturers of lard substitutes would continue to ship in carload quantities at the carload rate, while the smaller packer would have to pay the less carload rate on the amount shipped in its mixed carload. HELD, the former finding should be modified. HELD, the inclusion of lard compounds and lard substitutes in the mixing rules heretofore prescribed will not result in undue prejudice to the wholesale grocer or to the manufacturer of lard substitutes. National Wholesale Grocers Asso. v. Director General, 69 I. C. C. 669.

(z) And carload rates should not be denied on mixed merchandise shipped by forwarding agent because shipper is not owner of property. Sheldon & Co. v. N. Y. C. & St. L. R. R. Co., Unrep. Op. A-276.

(aa) Class rate on a mixed carload of flaked cereals and pancake flour from Spokane, Wash., to Baker, Ore., found unreasonable as compared with lower commodity rate from Portland, Ore., which lower rate was subsequently established from Spokane. Shipments from both points move over the same rails for practically half the distance; operating conditions are much the same, and earnings under subsequently established rate compare favorably with earnings under rates between other points in the same general territory. Centennial Mill Co. v. Director General, as Agent, 77 I. C. C. 91.

§7½. New Cars.

See Cars and Car Supply §32.

IMPORTANT CASES SINCE 1908

(a) Cars moving on own wheels under load were delivered to carriers as articles rather than as instruments of commerce and were received subject to restrictions unlike those governing the use of privately owned or foreign-line equipment. Defendants were not lessees but common carriers of the cars, and relations of the parties were those of shipper and carrier. Pacific Engineering & Construction Co. v. C., R. I. & P. Ry., 56 I. C. C. 247, 249.

(b) Carriers within their rights in declining as provided by their tariffs, to treat new cars moving on own wheels under load as instruments of commerce and at the same time assume common-carrier duties and liabilities with respect to them. Pacific Engineering & Construction Co. v. C., R. I. & P. Ry. Co., 56 I. C. C. 247, 249.

(c) A common carrier service was performed when cars moving on own wheels under load were offered for transportation, and compensation derived from their contents had no tariff relation to the transportation of the cars. Pacific Engineering & Construction Co. v. C., R. I. & P. Ry., 56 I. C. C. 247, 249.

ALL OTHER CITATIONS

McCloud River Ry. Co. v. S. P. Co., 56 I. C. C. 287, 290, 291; Acme Cement Plaster Co. v. Director General, 59 I. C. C. 508.

§8. Possibility of Misbilling.

See Crimes IV.

IMPORTANT CASES SINCE 1908

(a) The possibility or probability of misrepresentation of article is one of the numerous considerations of primary importance in classification. Forest City Freight Bureau v. A. A. R. R. Co., 18 I. C. C. 205, 206.

ALL OTHER CITATIONS

In Re Suspension of Western Classification No. 51, 25 I. C. C. 442, 476.

§8a. Investment Relying on Classification.

CASES 1887-1908

(a) An assurance made by a carrier that if one will locate in business on the line of its road his property shall be taken for transportation as belonging to a specified class can not bind the carrier so as to compel a classification accordingly. A right to special rates can not be made out in this way; the classification must have the same construction in favor of all persons; the law requires uniformity and impartiality in the dealings of a carrier with all persons. Hurlburt v. L. S. & M. S. R. R., 2 I. C. C. 81, 83.

(b) Where an existing classification and rate are not shown to operate injuriously to the carriers from a given point or to give undue advantage to shippers, a change is not justifiable that materially injures an important industry and a class of shippers at that point who have there built up the industry in reliance upon a continuation of the previous classification and rate first established and long maintained by the carriers themselves without complaint from any quarter. Such change in classification and rate would subject the persons engaged in the industry and the locality and the particular traffic to unreasonable disadvantage within the prohibition of section 3 of the Act to Regulate Commerce. Bates v. Pennsylvania R. Co., 2 I. C. R. 715, 718.

(c) Carriers are not at liberty to classify property as a basis of transportation rates and impose charges for its carriage with exclusive regard to their own interests, but they must respect the interests of those who may have occasion to employ their services, and conform their charges to the rules of relative equality and justice which the act prescribes. Thurber v. New York Central & Hudson River R. Co., 2 I. C. R. 742.

§9. Risk.

See Evidence §52.

CASES 1887-1908

(a) Cotton waste entitled to transportation at less rates than cotton goods, being less in value and involving less risk and expense in transportation. Riverside Mills v. Southern Railway Co., 12 I. C. C. 388.

IMPORTANT CASES SINCE 1908

(b) Liability to waste or injury in transit must be considered in framing classifications and rates. Ford Co. v. M. C. R. R. Co., 19 I. C. C. 507, 509.

(c) It is the duty of carriers to protect other freight from commodities which are likely to damage it. Western Classification Case, 25 I. C. C. 442, 444.

(d) It is unsound to say that, except for increased risk, rates upon cheap and valuable commodities should be the same. Union Tanning Co. v. S. Ry. Co., 26 I. C. C. 159, 163.

(e) Risk is one of the elements entering into the present day rate fabric, and innumerable classifications and tariffs contain packing and shipping requirements which can have no other justification than the right of the carrier to require the use of substantial and suitable containers and the elimination of hazard by the secure staying of unpacked articles. Carriers must furnish suitable cars and receive and transport goods tendered to them in safe shipping condition, but are not required to prepare shipments for transportation. Standard box, stock, ventilated, and refrigerator cars will accommodate all of the ordinary and usual needs of shippers, and if more than this is demanded because of the form, nature, or peculiar characteristics of goods tendered for conveyance, some obligation must attach to the shipper in connection with the additional demand. Dunnage Allowances, 30 I. C. C. 538, 542.

(f) The susceptibility of an article to damage in transit is an important factor which enters into its classification rating. Indian Packing Corp. v. Director General, as Agent, 64 I. C. C. 205, 208.

ALL OTHER CITATIONS

Blumenstein v. P. & R. Ry. Co., 21 I. C. C. 90, 92; Green Bay Soap Co. v. C. M. & St. P. Ry. Co., 14 I. C. C. 609, 610; In Re Suspension of Western Classification No. 51, 25 I. C. C. 442, 605; Silk Assn. of America v. Penn. R. R., 44 I. C. C. 578, 580; Closset & Devers v. N. P. Ry., 45 I. C. C. 99, 100; In the Matter of Rates on and Classification of Lumber and Lumber Products, 52 I. C. C. 598, 616; National Paving Brick Mfrs. Asso. v. A. & V. Ry. Co., 68 I. C. C. 213, 220; Nat'l Asso. Waste Material Dealers v. A. A. R. R. Co., 68 I. C. C. 748, 751; Magnesite Stucco in Western Trunk Line Territory, 74 I. C. C. 567, 569.

§9¼. Double Lading.

IMPORTANT CASES SINCE 1908

(a) Two shipments were loaded in the

same car and consigned to different destinations under separate bills of lading. Combination rate in effect lower than that collected. It was held that, since its tariff contained no prohibition against double-loading or that where cars are so loaded one of the destinations must be directly intermediate to the other, shipments found overcharged. Reparation awarded. Acme Cement Plaster Co. v. Director General, as Agent, 59 I. C. C. 508; Riprap between Texas and Louisiana, 68 I. C. C. 475.

§9½. Split Classes.

IMPORTANT CASES SINCE 1908

(a) The continued use of the intermediate or split class of Rule 25 and Rule 26 in the official classification constitutes one of the principal difficulties in reaching uniform ratings on the higher classes of freight. Rule 25 is 15 per cent less than second class, subject to third class as a minimum. Rule 26 is 20 per cent less than third class, subject to fourth class as a minimum. These classes were formerly used to a rather limited extent, but additional articles have been assigned to them from time to time, until in the consolidated classification they are numbered by hundreds. Consolidated Classification Case, 54 I. C. C. 1, 11.

§10. Use, Ownership, or Special feature of Commodity.

See Reasonableness of Rates §22; §23; Restricted Rates.

CASES 1887-1908

(a) Complainant alleged unjust discrimination in favor of the Standard Oil Company and against complainant, in the transportation of petroleum oil. HELD: When, for a special traffic, the transportation of petroleum oils, a carrier provides rolling stock for one method, but does not provide it for another for which it publishes rates, but the shippers are expected to provide the same, the terms on which such rolling stock is to be provided should be uniform and be published with the rate sheets and cannot lawfully be left to be the subject of bargain and of different terms in the case of different shippers. It is properly the business of a carrier by railroad to supply the rolling stock for the freights he offers or proposes to carry, and if the diversities and peculiarities of traffic are such that this is not always practicable, and consignors are allowed to supply it for themselves, the carrier must not allow its deficiencies in this particular to be made the means of putting at unreasonable disadvantage those who make use in the same traffic of the facilities it supplies. When two methods for the transportation of an article of merchandise are nominally offered by the carrier, for only one of which it offers rolling stock, and for the other of which the shipper must supply his own rolling stock at considerable expense, it can not be said that the resort to the latter by the shipper is so far a matter of choice that he has no concern with the charges for transportation in the other mode. The man of small means being compelled to make this choice, by reason of the carrier's failure to supply rolling stock for the other mode, has a right to insist that the charges for transportation in the two modes shall be relatively just and equal. When oil is transported in tanks permanently affixed to car bodies, the tank is to be considered as part of the car, and for oil transported therein the charge for transportation should be the same by the hundred pounds that the carrier charges for transportation between the same points, of barrels filled with like oil and taken in carload lots. The carrier is guilty of unjust discrimination if the shipper in barrels is charged a higher rate. Neither the fact that the shipper in the one case supplies the rolling stock, nor the alleged fact—which is not found sustained—that for the tanks there is a greater probability of return loads, nor the further alleged fact that with barrel shipments there are greater risks to the carrier's property and that which it carries, can justify imposing upon the barrel shipments the greater burden. Under this rule the carrier will be at liberty, and will be expected to make to the owner of tank cars a reasonable allowance for their use. Rice v. L. & N. R. R. Co., 1 I. C. C. 723.

(b) When oil is transported in tanks permanently affixed to car bodies, the tank is to be considered as part of the car, and for oil transported therein the charge for transportation should be the same by the hundred pounds that the carrier charges for transportation between the same points, of barrels filled with like oil and taken in carload lots. Rice v. L. & N. R. R. Co., 1 I. C. C. 723, 742.

(c) Common carriers have no right, by issuing a prohibitory tariff or otherwise, to withdraw from the transporta-

tion of any articles not dangerous to handle and which are ordinarily the subject of transportation by them; less desirable traffic must be accepted upon reasonable terms, as well as that which is more desirable. Riddle Dean & Co. v. N. Y., L. E. & W. R. R., 1 I. C. C. 787, 791.

(d) A manufacturer's description of an article to induce its purchase by the public also describes it for transportation, and carriers may accept his description for purposes of classification and rates. Carriers are not required to analyze freight to ascertain whether it is in fact inferior to the description or public representations under which it is sold, in order to give it a lower rate corresponding to its actual value. Andrews Soap Co. v. Pittsburgh, Cinn. & St. L. R. Co., 3 I. C. R. 77.

(e) Upon complaint by a manufacturer of soap, advertised and sold as toilet soap, charging unjust discrimination by classifying his product in the second class with other toilet soaps and not in the fourth class with laundry soaps, as he claims it should be classed for the reason that his toilet soap is not substantially superior to soap put on the market by certain other manufacturers as laundry soap, which, under that description, is transported at a lower rate. HELD: That the manufacturer's description of his product for commercial purposes as an article of superior grade and value warrants its classification accordingly, and carriers are not required to classify and transport it as a laundry soap. Andrews Soap Co. v. Pittsburgh, Cinn. & St. L. R. Co., 3 I. C. R. 77.

(f) The mere fact that one article is of more general use and therefore shipped in greater quantities than another, when each as a rule is shipped in less carload quantities, and of no considerable difference in bulk, weight and value, and of no appreciable difference in expense of handling and of haul, constitutes in itself no reason why the first should receive a lower rate than the last. In such a case mere quantity, not measured by any recognized unit of quantity adapted to carriage, and lessening the expense of handling and carriage, cannot be allowed to affect rates in the transportation of property. Harvard Company v. Pennsylvania Company, 3 I. C. C. 257, 262.

(g) Where two kinds of soap are made use of for the same purposes, and are advertised and held out to the world as suited for like purposes, and are substantially equal in value, they should both for purposes of transportation and rating be placed in the same classification. The soaps known as the Ivory Soap and Grand Pa's Wonder Soap fall within this rule. Both are represented as suitable for laundry and also for toilet purposes, and both are used for those purposes. HELD: It would be unjust discrimination to place one of them in a classification as toilet soap and the other in a much lower classification as laundry soap. Beaver & Company v. P., C. & St. L. R. Co., 3 I. C. C. 564.

(h) Unless within the authorized exceptions to the general rule of the statute, discriminations in charges upon like shipments of the same commodities, based solely upon the purpose or "business motive" of the shipper, are unlawful, whether effected directly or indirectly by methods of classification. Duncan v. Atchison, T. & S. F. R. Co. (Com.), 4 I. C. R. 385.

(i) Two westbound carload rates from Mississippi River points to Pacific Coast terminals on goods termed "Emigrants" Movables" (including "household goods")—one a general class rate, and the other designated a "commodity rate" and less than the general rate, being published as open to "intending settlers only," but in practice given to shippers indiscriminately, and not apparently unreasonable in itself—are improper, as their retention can only serve to mislead the public and afford opportunity for the practice of favoritism and unjust discrimination as between shippers, and the rate should not be in excess of the amount of said commodity rate. Duncan v. Atchison, T. & S. F. R. Co. (Com.), 4 I. C. R. 385.

(jk) Under the Western Classification and tariff there are two westbound carload rates from Mississippi River points to Pacific Coast terminals on goods termed "Emigrant's Movables" (including "household goods"), one a general class rate and the other designated a "commodity" rate and less than the general rate; the latter rate is published as being open to "intending settlers only," but in practice it is given to shippers indiscriminately, and does not appear to be unreasonable in itself. HELD: (1) That there is neither propriety in, nor

necessity for, retaining in the classification and tariff either the two rates, or the statement in connection with the commodity rate that it is open to "intending settlers only," as their retention can only serve to mislead the public and afford opportunity for the practice of favoritism and unjust discrimination as between shippers; (2) That the westbound rate on "Emigrants' Movables" (including "household goods") from Louisville to Los Angeles should not be in excess of the amount of said commodity rate thereon. Duncan v. Atchison, T. & S. F. R. Co., 4 I. C. R 385.

(l) Under the Western Classification and tariff there are two westbound carload rates from Mississippi River points to Pacific Coast terminals on goods termed "Emigrants' Movables" (including "household goods"), one a general class rate and the other designated a "commodity rate and less than the general rate; the latter rate is published as being open to "intending settlers only," but in practice it is given to shippers indiscriminately, and does not appear to be unreasonable in itself. HELD: (1) That there is neither propriety in, nor necessity for, retaining in the classification and tariff either the two rates, or the statement in connection with the commodity rate that it is open to "intending settlers only," as their intention can only serve to mislead the public and afford opportunity for the practice of favoritism and unjust discrimination as between shippers; (2) That the westbound rate on Emigrants' Movables" (including "household goods") from Louisville to Los Angeles should not be in excess of the amount of said commodity rate thereon. Blanton Duncan v. A., T. & S. F. R. R. Co. et al., 6 I. C. C. 85.

(m) Two westbound carload rates from Mississippi River points to Pacific Coast terminals on goods termed "Emigrants' Movables" (including "household goods")—one a general class rate, and the other designated a "commodity rate and less than the general rate, being published as open to "intending settlers only," but in practice given to shippers indiscriminately, and not apparently unreasonable in itself—are improper, as their retention can only serve to mislead the public and afford opportunity for the practice of favoritism and unjust discrimination as between shippers, and the rate should not be in excess of the amount of said commodity rate. Duncan v. Atchison, T. & S. F. R. Co., 6 I. C. C. 85.

(n) Unless within the authorized exceptions to the general rule of the statute, discriminations in charges upon like shipments of the same commodities based solely upon the purpose or business motive" of the shipper are unlawful, whether effected directly or indirectly by methods of classification. Blanton Duncan v. A., T. & S. F. R. R. Co. et al., 6 I. C. C. 85.

(o) The rule of equality as to rates is violated by lower rates for cargo or trainload quantities than for carload shipments, whether for export or for domestic use, although all cargo shippers pay the same rate and all carload shippers are charged alike. Paine v. Lehigh Valley R. Co., 7 I. C. C. 218.

(p) Defendant classifies its Rich Hill coal as soft or lump coal and "mine run, nut, mill and slack," the former being used for domestic consumption and the latter for steam purposes. The two kinds of coal are entirely distinct in their use, and the latter does not compete with the product of complainant's mine, which is all lump coal. HELD: That defendant may properly make this distinction in classification and apply a lower rate to steam coal, and that complainant is not damaged by defendant's failure to publish a rate upon mine run, nut, mill and slack from Myrick, since the Myrick mine produces nothing which could be shipped under that name. McGrew v. Missouri Pac. Ry. Co., 8 I. C. C. 630.

(q) A carrier may properly classify coal according to use for domestic consumption or steam purposes, and apply a lower rate to steam coal. McGrew v. Missouri P. R. Co., 8 I. C. C. 630.

(r) The rule in defendant's classification covering the application of carload lots should be so modified as to accord the same rating to consignor and consignee when the condition of ownership after the property is delivered to the carrier is the same; though no opinion is expressed as to whether a carrier may distinguish between a forwarding agent and an actual owner of the goods. Buckeye Buggy Co. v. Cleveland, C., C. & St. L. R. Co., 9 I. C. C. 620.

(s) Where the goods are loaded at one time and place with but a single bill of lading, and the shipment is by one

consignor to one consignee, and by the terms of sale become the property of the consignee upon delivery to the carrier, the latter has no right to inquire whether the consignee obtained his title from one or several owners, and if it accords the carload rate in case the consignor is the owner, failure on its part to extend the same privilege when the consignee is the owner violates sections 1, 2 and 3 of the Act to Regulate Commerce. Buckeye Buggy Co. v. Cleveland, C., C. & St. L. R. Co., 9 I. C. C. 620.

(t) In fixing carload rates, the same rating should be given to consignor and consignee when the condition of ownership after the property is delivered to the carrier is the same; though no opinion is expressed as to whether a carrier may distinguish between a forwarding agent and the actual owner of the goods. Buckeye Buggy Co. v. Cleveland, C., C. & St. L. R. Co., 9 I. C. C. 620; C. S. Bell Co. v. Baltimore & O. S. R. Co., 9 I. C. C. 632.

(u) Before allowing a carload rating for a carload shipment, a carrier is allowed to require that goods be loaded at one time and place, that but a single bill of lading shall be allowed, and that the shipment shall be by one consignor to one consignee. Buckeye Buggy Co. v. Cleveland, C., C. & St. L. R. Co., 9 I. C. C. 620; C. S. Bell Co. v. Baltimore & O. S. R. Co., 9 I. C. C. 932.

(v) Making certain charges for the transportation of coal shipped in carloads when the coal is loaded by tipple, and exacting a higher charge when it is loaded in some other way, and, for that reason, is not justified by difference in cost to the carrier between different methods of loading, or by other facts appearing in this case, and renders the higher rates thus made unreasonable and unduly discriminatory, first, as against complainants, and, second, as against all other shippers of coal except those who load by tipple, and constitutes a violation of sections 1 and 3 of the Act to Regulate Commerce. Glade Coal Co. v. Baltimore & O. R. Co., 10 I. C. C. 226.

(wx) Cowpeas, like clover and other grasses, are sown and then turned over by the plow for the purpose of soil improvement, but this is not a reason why cowpeas should, in the adjustment of freight rates, be classed as a fertilizer, which is applied directly to the soil, and cowpeas are further distinguished from fertilizer in that fertilizer furnishes the carrier much greater tonnage, cowpeas have much greater value, and the vine, as well as the pea itself, is used as a food product. Swaffield v. Atlantic Coast Line R. Co., 10 I. C. C. 281.

(y) The right of complainant to ship coal was not barred by the fact that he is a druggist by occupation, or that he loaded coal cars from wagons, for a large part of the commerce of the country is handled in that way; and when he tendered freight for transportation he was entitled to the same facilities furnished to other shippers under like conditions. Thompson v. Pennsylvania R. Co., 10 I. C. C. 640.

(z) Defendants' joint rate of 90 cents per ton on bituminous coal from Norwood, N. Y., to Montpelier, Vt., when intended for "railway supply" and their combination rate of $1.85 per ton, applied on such coal carried between the same points and used for manufacturing or any other industrial or domestic use, constitutes unlawful discrimination. Capital City Gas Co. v. Central V. R. Co. et al., 11 I. C. C. 104.

(aa) Complainant attacked classification rating on a second hand dynamo as unreasonable from Marietta, Ga., to Cleveland, O. Shipment was billed as scrap iron, but rated at destination as an electric dynamo. Rate on dynamos, $1.33; on scrap iron, 65c. The shipment in question was in fact a dynamo which had burnt out and was in fact worthless as a dynamo and it was the intention of the complainant upon receiving it at Cleveland to separate the brass and copper from the iron and sell the same for junk. Whether the rate on a second hand dynamo shipped from the electric light station to the repair shop should be lower than is charged upon either a new or second hand dynamo sent to the station for use, is a queston of policy for the railways, and this Commission can not say that it is unjust or unreasonable to exact the same charge for the new and the second hand dynamo. Old dynamos, which have become merely combinations of copper, brass and iron scrap and valuable only as junk should, under suitable regulations fixed by the carrier, be given the rating for junk, basing the same on the highest class metal used in the construction, complaint dismissed. National Machinery & Wrecking Co. v. P., C., C. & St. L. Ry., 11 I. C. C. 581.

(bb) Complainant attacked the present difference in defendant's rates on fire, building and paving brick from Empire, Strasburg and other points in Ohio, to New York City and other eastern destinations, but no attack was made upon the reasonableness of the rates on either kind of brick, except as involved in the claim that any difference in the rates for the different kinds is unlawful. HELD: No such distinction between these three classes of brick, which are made of the same material, come out of the same kiln, are nearly alike in color, and are of the same size and weight, exists as justifies a difference in rates. To hold otherwise would be to promote false billing by the shippers and to require carriers to make a practically impossible examination into the use to which each shipment of these brick was put, complaint dismissed. Stowe Fuller Co. v. Pennsylvania Company, 12 I. C. C. 216.

(cc) Classification must be based upon a real distinction from a transportation standpoint. Aside from the difficulty in learning what use the brick were to be put to upon reaching their destination, the Commission cannot regard a classification as scientific, or a difference in rates as well based, which is altogether founded upon a distinction that has no transportation significance. Such a differentiation, if permitted and extended throughout the various classes of freight, would lead to an almost endless multiplication of rates, which could find no excuse save the use which might be made of the article transported. Stowe-Fuller Company v. Pennsylvania Co. et al., 12 I. C. C. 216, 226.

(dd) Complaint in this case was directed solely against present difference in defendants' rates on fire, building and paving brick from Empire, Strasburg and other points in Ohio to New York City and other easternr destinations, but no attack was made upon the reasonableness of the rates on either kind of brick except as involved in the claim that any difference in the rates for the different kinds is unlawful. HELD: Upon the facts and circumstances of the case, that no such distinction between these three classes of brick, which are made of the same material come out of the same kiln, are nearly alike in color, and are of the same size and weight, exists as justifies a difference in rates. To hold otherwise would be to promote false billing by the shippers and to require carriers to make a practically impossible examination into the use to which each shipment of these brick was put. Stowe-Fuller Company v. Penn. Co. et al., 12 I. C. C. 216.

IMPORTANT CASES SINCE 1908

(ee) A carrier has no right to attempt to dictate the uses to which commodities transported by it shall be put. Its duty is to transport them at its tariff rates and on equal conditions for all. Tariffs naming different rates on nitrate of soda when destined for the manufacture of fertilizer and of powder are unlawful. Fort Smith Traffic Bureau v. St. L. & S. F. R. R. Co., 13 I. C. C. 651, 655.

(ff) The Commission will refuse to sanction a classification resting upon the use to which a commodity is put. Metropolitan Paving Brick Co. v. A. A. R. R. Co., 17 I. C. C. 197, 204.

(gg) A carrier has no right to dictate the use to which a commodity shall be put. American Creosote Works v. I. C. R. R. Co., 18 I. C. C. 212, 215.

(hh) A classification rests upon an improper basis, which makes the rate dependent upon the use to which the article shipped is to be devoted. Jones Bros. Co. v. M. & W. R. R. R. Co., 21 I. C. C. 577, 579.

(ii) The Commission has condemned the maintenance of dual rates on a commodity dependent upon the use to which the article is put. Arkansas Fertilizer Co. v. St. L., I. M. & S. Ry. Co., 25 I. C. C. 645, 647.

(jj) Where the value of an article, such as advertising matter, depends upon the results of its use, a cheap product often producing as effective pecuniary results as the more costly, rates should not be based upon the quality or kind of paper used. Proprietary Asso. of America v. N. Y. C. & H. R. R. R., 26 I. C. C. 318.

(kk) A difference in the rate according to the use to which a commodity is put has been condemned by this Commission, and the Supreme Court of the United States. Paper Rates from Manitowoc and Milwaukee to Kaukauna, Wis., 28 I. C. C. 305, 307.

(ll) Under section 2, carriers may not maintain a rate differential based upon the use to which the commodity is to be

put. Douglas & Co. v. I. C. C. R. R. Co., 31 I. C. C. 587, 593.

(mm) Carriers may not make rates dependent upon the use to which the commodity is to be put. There is no more justification for a lower rate on coal used for fuel on boats than there would be on coal for use on railroads. Coal and Coke Rates in the Southeast, 35 I. C. C. 187, 190.

(nn) Of course the final use to which the article is put may determine whether it should be considered finished or unfinished. The Iron and Steel Cases, 36 I. C. C. 86, 107.

(oo) It is unlawful to attempt by tariff description to make rates dependent upon the use to which the commodity is put. Northwest Steel Co. v. Director General, 68 I. C. C. 195, 198.

(pp) Complainant attacked fifth class rating on scrap rubber, carloads, as unreasonable to extent it exceeded sixth class. Scrap rubber is consumed by industries in reclaiming its rubber content. The product, known commercially as reclaimed rubber or rubber shoddy, is sold in competition with crude rubber, both being adapted to the same uses. Reclaimed rubber is rated fifth class, the same as scrap rubber. Keeping in mind the fact that there is at present an overproduction and a consequent surplus of crude rubber, it may be presumed that there is little likelihood of an appreciable upward trend in the near future, although somewhat higher prices are probable as the present are said to be below the cost of production. The foregoing is important, due to its bearing upon scrap rubber, the sale of which is largely contingent upon the market of its product, reclaimed rubber. Of the scrap rubber shipper, about 72 per cent consists of pneumatic automobile tires, 10 per cent boots and shoes and 2.5 per cent inner tubes. Used tires under the classification take the fifth class rating, as well as those which are worn out. There is no limitation such as is imposed in connection with other scrap material ratings, that the commodity has value only for reclamation, remanufacture, or remelting. The record indicates, that not over 2 per cent of the old tires shipped are used for other than reclamation purposes. It is conceded by both parties that adjustment or other tires not worn out are not entitled to the same rate as old worn out tires having value for reclamation purposes only. Scrap rubber is desirable traffic from a transportation standpoint. No special equipment or expedited service is required, loss and damage claims are negligible, and the movement is appreciable and fairly constant. Reclaimed rubber, a more valuable commodity than scrap rubber, of which it is a product, is rated fifth class. Other scrap materials with which scrap rubber does not compare unfavorably, either in value or from a transportation standpoint, are rated sixth class. HELD, fifth class rating and rates governed by official classification rating on scrap rubber, including tires, carloads, having value only for reclamation of raw materials, unreasonable to extent they exceed sixth class rating and rates. National Association Waste Materials Dealers v. A. A. R. R. Co., 68 I. C. C. 748.

(qq) Carriers may not make rates dependent upon the use to which the commodity is to be put. Rates on bunker coal, 73 I. C. C. 62, 74.

(rr) As a practical matter bunker coal is so closely associated with cargo coal, and by reason of this association is so impressed with the character of the latter that a distinction in rates between the two is impracticable. Rates on Bunker Coal, 73 I. C. C. 62, 76.

(ss) Maintenance of rates on coal delivered at ports to vessels, whether as cargo or for bunker purposes, which are lower than the local rates from the same points of origin to intermediate points, found not to contravence the fourth section of the act. Rates on Bunker Coal, 73 I. C. C. 62, 77.

(tt) Neither the intention of tariff compilers nor the use to which an article is put is controlling in determining the rate applicable on a particular commodity. The commission has consistently condemned such methods of determining applicable rates. Morris & Co. v. Director General, as Agent, 73 I. C. C. 137.

(uu) It is the character of an article from a transportation standpoint, and not the use to which parties may contract that it shall be put, that determines the rate or rating applicable. Chase Companies v. Director General, 81 I. C. C. 207, 208.

(vv) But different rates may be assessed on different classes of lumber in exceptional instances based on differ-

ences of condition and value. S. P. Co. v. U. S., 197 Fed. 167, 171.

(ww) Proposed increased rates which would create undue prejudice and preference by providing for the application of rates upon commodities depending upon the process used in obtaining them rather than upon their nature, found not justified. Cottonseed-Hull Fiber or Shavings, 77 I. C. C. 727.

(xx) Where certain grades of a commodity made and sold for common grades are not mere by-products of the production of higher grades and otherwise fully conform to description and loading requirements of common grades, incidental final use by purchaser of a selected few thereof for better purposes should not be regarded as affecting their essential character for rate-making purposes, although exclusive or predominant use of grades for a given purpose is a circumstance to be considered, along with other facts, in determining proper description to be applied. National Paving Brick Mfrs. Asso. v. A. & Y. Ry. Co., 80 I. C. C. 179, 183.

(yy) The Commission refuses to sanction different rates on the same commodity based on the use to which the article is put. Mid-Continent Equipment & Machinery Co. v. M. & O. R. Co., 81 I. C. C. 510, 511.

(zz) Rails intended for use in mining operations moved at rate lower than that on "railway track." HELD: Rails were of weight often used on short-line railroads, and higher "Railway track" rate was applicable. The commission has repeatedly refused to sanction different rates on same commodity based on use to which article is put. Mid-Continent Equip. & Mach. Co. v. M. & O. R. R. Co. 81 I. C. C. 510.

(3a) It is the character of an article from a transportation standpoint, and not the use to which parties may contract that it shall be put, that determines the rate or rating applicable. Van Dyke Smelting & Refining Works v. Pennsylvania R. R., 88 I. C. C. 743, 744.

C. 660, 661; Chicago Bridge & Iron Co. v. E. R. R., 46 I. C. C. 641, 644; Schwartz v. St. L. & S. F. Ry., 51 I. C. C. 145; Natchez Chamber of Commerce v. L. & A. Ry. Co., 58 I. C. C. 610, 643; Moreland Motor Truck Co. v. Director General, 60 I. C. C. 179; Earl C. Anthony v. Director General, 61 I. C. C. 346, 366, 368; D. Nagase & Co. v. Director General, 62 I. C. C. 422, 424; Cottonseed-Hull Fiber or Shavings, 77 I. C. C. 727; McCrory Stores Corporation v. Director General, 55 I. C. C. 423, 424; Pure Oil Co. v. Director General, 56 I. C. C. 218, 222; Atlas Leather Mfg. Co. v. P. C. C. & St. L. R. R., 55 I. C. C. 394; Carnie Goudie Mfg. Co. v. A. T. & S. F. Ry. Co., 68 I. C. C. 40; National Paving Brick Mfrs. Asso. v. A. & V. Ry. Co., 68 I. C. C. 213, 220, 221; Southern Cotton Oil Co. v. Director General, as Agent, 80 I. C. C. 627; Daisy Mfg. Co. v. A. & V. Ry. Co., 81 I. C. C. 44, 46; Chase Companies v. Director General, as Agent, 81 I. C. C. 207; Express Rates, 1922, 83 I. C. C. 606, 666.

§11. Value.

See Advanced Rates §18 (5); Evi-

dence §61; Reasonableness of Rates §38.

CASES 1887-1908

(a) The Element of value in the commodity transported forms a proper consideration to be taken into account in the establishment of a rate, since the greater the value the greater the carriers liability as an insurer of freight. Howell v. N. Y. L. E. & W. R., 2 I. C. C. 162, 172.

(b) A discrimination between the rate on corn and its direct products from a given locality resulting from a reduction of the rate on corn below the rate on its direct products, which subjected persons in that locality engaged in the business of manufacturing corn into its direct products and of selling the same to unreasonable prejudice or disadvantage; and was without necessity or advantage to the carrier, or any reason founded on the character or condition of the traffic. HELD, to be in violation of section three of the Act ot Regulate Commerce, notwithstanding the new rate on corn was open to all persons equally and with equal service. Bates v. Pennsylvania R. Co., 2 I. C. R. 715.

(c) Patent medicines manufactured and shipped by the complainant are rated in the Official Classification as first class for less than carloads and third class for carloads. Ale, beer and mineral water are rated as third class in less than carloads and fifth class in carloads. The market value of the medicines is three times or more higher than that of the other articles named and the quantity transported much less. Upon complaint made that the patent medicines should be classified the same as ale, beer and mineral water. HELD, that in view of the much higher market value of the medicines and the smaller volume of traffic they supply a higher classification than for the other articles named, in which there is much greater competition among shippers, is not unreasonable, and the classification at present in force is not shown to be unjust. Warner v. New York Central & H. R. R. Co., 3 I. C. R. 74.

(d) Classing patent medicines higher than ale, beer, and mineral water for the purpose of fixing rates, is not unjust, where the market value of the medicines is at least three times as high as the other articles and the quantity transported is much less. Warner v. New York C. & H. R. R. Co. (Com.), 3 I. C. R. 74.

(e) The value of an article to a manufacturer is the price it commands, and it seems only reasonable that carriers should take into account the market value, a thing generally known and easily ascertained, as one of the considerations in arranging their classifications and fixing the rates that a commodity should bear. It is not seen how the relations that any specific commodity should bear to other commodities for classification purposes can be arrived at in any other practicable way. Warner v. N. Y. C. & H. R. Co., 3 I. C. C. 74, 77.

(f) The classification of petroleum oil and its products in carloads, adopted and generally applied by carriers, is the same, and the rates upon oil and its products should correspond with their classification and be alike. Rice v. Western N. Y. & P. R. Co. (Com.), 3 I. C. R. 162.

(g) The general rule in classifying articles for freight rates by carriers is that the manufactured article, when of considerably more value, takes a higher rate than the raw material of which it is made. Board of Trade of Chicago v. C. & A. R. R. Co., 3 I. C. C. 233, 243.

(h) The rate on unfinished cheap bedroom sets shipped knocked down from Lansing, Michigan, to Oakland, California, should not exceed 85 per cent of whatever rate may be adopted for such sets in a finished condition. Potter Mfg. Co. v. Chicago & G. T. R. Co. (Com.), 4 I. C. R. 223.

(i) Complainant attacked rates on unfinished and finished cheap bedroom sets from Lansing, Mich., to Oakland, Calif., as unreasonable. HELD, taking into consideration the greater tonnage per carload which can be hauled of the former and the difference in value in favor of the former, the rate on unfinished cheap bedroom sets should not exceed 85 per cent of whatever rate may be adopted for such sets in a finished condition. Potter Manufacturing Co. v. C. & G. T. R. Co., 4 I. C. C. 223.

(j) While the difference in cost to the carrier in transporting cereal products and flour is not in itself sufficient to warrant a higher classification upon cereal products, the facts that these products range higher in value than flour, while in the matter of volume of traffic afforded there is a very wide difference

in favor of flour, are some of the conditions compelling a low rate upon flour which do not apply in the transportation of cereal products. F. Schumacher Milling Co. v. Chicago, R. I. & P. R. Co. (Conn.), 4 I. C. R. 373.

(k) It is a conceded rule of classification that value, on account of enhanced risk and ability to pay a greater proportion of the aggregate return upon investment, may justify a higher classification. F. Schumacher Milling Co. v. C. R. I. & P. R. Co., 4 I. C. C. 373, 377.

(l) Defendant's regulation whereby the freight rate on peaches and other fruit from Georgia points is increased in proportion to the carload valuation fixed by the shipper is unreasonable and unjust, and the carrier can be required to respond in damages, if the fruit is damaged through its negligence, to the full amount of the injury sustained, without regard to the valuation placed upon it. Georgia Peach Growers' Asso. v. Atlantic Coast Line R. Co., 10 I. C. C. 255.

(m) Cowpeas, like clover and other grasses, are sown and then turned over by the plow for purpose of soil improvement, but this is not a reason why cowpeas should, in the adjustment of freight rates, be classed as a fertilizer, which is applied directly to the soil; and cowpeas are further distinguished from fertilizer in that fertilizer furnishes the carrier much greater tonnage, cowpeas have much greater value, and the vine, as well as the pea itself, is used as a food product. Swaffield v. Atlantic Coast Line R. Co., 10 I. C. C. 281.

(n) The differential on corn meal shipped from Missouri River points to points in Texas should not be more than 3 cents above the rate on corn in force between the same points. Re Rates on Corn and Corn Products from Missouri River Points to Points in Texas, 11 I. C. C. 220.

(o) Old dynamos which have become merely combinations of copper, brass, and iron scrap, and are valuable only as junk, should, under suitable regulations fixed by the carrier, be given the rating for junk, basing the same on the highest class metal used in the construction. National Machinery & W. Co. v. Pittsburgh, C. C. & St. L. R. Co., 11 I. C. C. 581.

(p) There is no inflexible requirement that rates upon grain and the products of the grain should be, under all circumstances, the same, but rather that carriers may, in just regard for their own interest or to meet special conditions, vary those rates within narrow limits. When once the relation has been established, business developed, and money expended upon the strength of it, then the carrier can not, in the absence of some sufficient reason, change that relation; nor would this Commission direct a change. Howard Mills Co. v. Mo. Pac. Ry. Co., 12 I. C. C. 258.

(q) Complainant alleged that the defendants unduly discriminated against Kansas millers, in favor of California millers, by exacting rates on flour which were 10 cents greater than the rates exacted by them for wheat from Wichita and other shipping points in Kansas to points in California and also by exacting rates on flour which were 35 cents greater than the rates exacted by them on wheat from said shipping points to Phoenix, Ariz. HELD, flour rates between said shipping and destination points should not exceed the wheat rates between such points by more than 7 cents. Howard Mills Co. v. M. P. Ry., 12 I. C. C. 259.

(r) There is no inflexible requirement that rates upon grain and the products of the grain should be, under all circumstances, the same, but rather that carriers may, with just regard for their own interest or to meet special conditions, vary those rates within narrow limits. When once the relation has been established, business developed, and money expended upon the strength of it, then the carrier cannot, in the absence of some sufficient reason, change that relation; nor would the Commission direct a change. Howard Mills Co. v. M. P. Ry., 12 I. C. C. 259, 264.

(s) Complainant attacked as unreasonable rates on cotton waste in bales from Augusta, Ga., to New York, of 41 cents, the same as cotton goods, though cotton waste is a by-product, considerably less in value and involves much less risk and expense in transportation than cotton goods. HELD, rates attacked unreasonable to extent they exceeded 35 cents. Riverside Mills v. Southern Ry., 12 I. C. C. 388.

IMPORTANT CASES SINCE 1908

(t) The Commission said that at the present time it would decline to establish a rating upon the basis of value, but commended the idea to the considera-

tion of the carriers. Union Pacific Tea Co. v. Pa. R. R. Co., 14 I. C. C. 545, 546.

(u) Value must be taken into consideration in framing clasification and rates. Ford Co. v. M. C. R. R. Co., 19 I. C. C. 507, 509.

(v) But a manufactured product may properly take a higher rating than the material from which it is made. In Re Suspension of Western Classification No. 51, 25 I. C. C. 442, 590.

(w) The right of the carrier to initiate its rates and to consider value of the property as an element in determining the classification there of or the rate applicable thereto has not been denied by the Act or withdrawn by this amendment. The Cummins Amendment, 33 I. C. C. 682, 694.

(x) But though important it is not the controlling element in classification. Louden Machinery Co. v. A. T. & S. F. Ry. Co., 34 I. C. C. 383, 384.

(y) Value is a factor in classification, for two reasons: Because carriers incur a greater risk in transporting more valuable articles and because value is generally indicative of the ability of a commodity to pay transportation charges. In the Matter of Rates on and Classification of Lumber and Lumber Products, 52 I. C. C. 598, 615.

(z) If based on value alone the number of classes would be too large and the refinement too subtle for practical operation. McCroy Stores Corp. v. Director General, 55 I. C. C. 423, 424.

(aa) But value is only one of the many elements that enter into the classification of an article. Link-Belt Co. v. P., C. C. & St. L. R. R. Co., 64 I. C. C. 195, 196.

(bb) Under similar transportation conditions, finished or semifinised products ordinarily take a higher rate than the material from which they are produced, if any rate distinction is made. Lancaster Steel Products Corp. v. Director General, as Agent, 73 I. C. C. 567, 568.

(cc) Ordinarily a manufactured product is rated higher than its components. Wilckes, Martin & Wilckes Co. v. Director General, as Agent, 74 I. C. C. 13, 15.

(dd) Value is an important element in determining classification and rates, but it is not controlling. Chevrolet Motor Co. v. Director General, 74 I. C. C. 373, 374.

(ee) It is elementary that refined oil rates are higher than crude rates. Crude Oil from Louisiana Points, 74 I. C. C. 623, 629.

(ff) Maintenance of lower rates on finished articles than are applicable on commodity from which manufactured, must be justified, if at all, by clear, positive, and convincing evidence. Oklahoma Iron Works v. Director General, as Agent, 80 I. C. C. 327, 331.

(gg) While value is always a factor in classification and is properly given consideration in fixing basic rates on given commodities, it is not a necessary element in determining the rate relationship between intimately related commodities. National Veneer & Panel Asso. v. A. & R. R. R. Co., 81 I. C. C. 227, 233.

(hh) It is a well established principle of transportation that the rates on manufactured products ought generally to be higher than the rates on the raw materials from which they are made. Agricultural Implement, Sleigh and Vehicle Wood, 83 I. C. C. 25, 26.

(ii) Value of an article is one determining factor in classification. Western Classification case, 25 I. C. C., 442; American Stockmen's Supplies Asso. v. C., R. I. & P. Ry. Co., 83 I. C. C. 334, 336.

C. 412, 428; Official Classification No. 44, 47 I. C. C. 91, 94, 98; Knopke Bros v. C. & A. R. R. Co., 50 I. C. C. 465, 467; Building and Roofing Paper Board Rates, 52 I. C. C. 84, 89; In the Matter of Rates on and Classification of Lumber and Lumber Products, 52 I. C. C. 598, 605; Pure Oil Co. v. Director General, 56 I. C. C. 218-222; Atlas Leather Mfg. Co. v. P. C. C. & St. L. R. R., 55 I. C. C. 394; Dahlstrom Metallic Door Co. v. E. R. R., 55 I. C. C. 402, 406, 407; Goodyear Tire & Rubber Co., 57 I. C. C. 206, 209; Sinclair Refining Co. v. Director General, as Agent, 61 I. C. C. 18, 31; Spier & McKay v. Director General, as Agent, 61 I. C. C. 736; Maltby v. S. V. Ry. Co., 63 I. C. C. 103; Minnesota & Ontario Paper Co. v. N. P. Ry. Co., 66 I. C. C. 571, 573; Indiana Quartered Oak Co. v. A. C. R. R. Co., 81 I. C. C. 59; National Floyd & Co. v. A. & M. R. R. Co., 83 I. C. C. 485, 487.

§11½. Weight or Volume.

See Evidence § 65.

CASES 1887-1908

(a) The volume of traffic supplied by an article for transportation is also an element that may be considered in its classification, as a basis for rates that are reasonable both for carriers and shippers. Warner v. New York Central & H. R. R. Co., 3 I. C. R. 74.

(b) The volume of traffic supplied by an article for transportation is an element that may be considered on the question of its classification as a basis for rates. Warner v. New York C. & H. R. R. Co. (Com.), 3 I. C. R. 74.

(c) Complainants are manufacturers of common soap at Cincinnati, O. In the official clasification common soap stands in the fifth class in carload lots. The defendant has always given it the rate of fifth class articles, but for many years prior to May, 1889, they charged the complainants for only net weight, the gross weight being one-sixth more than net weight, but since that date they have charged for gross weight without diminishing the rate per hundred pounds. The effect of this was to charge one-sixth more for the same service than had before been charged. The charge for transportation under the net weight practice was reasonable and just, and without complaint on the part of shippers or carriers. HELD, that the increased charge by the device of charging for the gross weight, being one-sixth advance for the same service, was unwarranted, as it operated to make the rate unreasonable. Procter & Gamble v. C. H. & D. Co., 3 I. C. C. 131.

(d) Charging the same rate per quart on milk in 40-quart cans and in bottles, usually of one quart capacity, and packed in cases, found to constitute discrimination in favor of the bottle method of shipment, but for reasons stated—HELD that the proper relation of rates as between can and bottle milk from all points

of shipment need not now be determined. Milk Producers Protective Asso. v. Delaware, L. & W. R. Co., 7 I. C. C. 92.

IMPORTANT CASES SINCE 1908

(e) The weight of an article is to be considered in determining the proper classification thereof. Western Classification Case, 25 I. C. C. 442, 472.

(f) Value and density are important considerations in determining ratings of commodities, but they must be used in conjunction with the other elements of classification. Goodyear Tire & Rubber Co., v. A., C. & Y. Ry. Co., 57 I. C. C. 206, 209.

ALL OTHER CITATIONS

Southern Classification Ratings, 39 I. C. C. 173, 175.

III. CLASSIFICATION REGULATIONS

§11¾. In General.

IMPORTANT CASES SINCE 1908

(a) Both the Commission and the courts have held that carriers have the right to make reasonable and appropriate rules respecting the acceptance and transportation of traffic. Longo Fruit Co. v. Illinois Traction Co., 38 I. C. C. 487, 489.

(b) The mere fact that rules and regulations may result in some inconvenience to shippers does not warrant a finding that they are unreasonable or otherwise unlawful. Millsaps Cotton Co. v. Director General, 62 I. C. C. 26, 27.

(c) Reasonable and pertinent rules are as essentially a part of the tariff as the rates which are governed or limited by their application. Viscoe Co. v. Amer Ry. Ex., 62 I. C. C. 32, 34.

ALL OTHER CITATIONS

Jewelers' Protective Union v. Penn. R. R., 36 I. C. C. 71; New York Mercantile Exchange v. B. & O. R. R. Co., 36 I. C. C. 156, 161; Baltimore Chamber of Commerce v. B. & O. R. R., 45 I. C. C. 40, 52; Redmond v. Adams Exp. Co., 53 I. C. C. 39, 42; Kansas Car-Lot Egg Shippers' Asso. v. B. & O. R. R. Co., 53 I. C. C. 59, 65; Consolidated Classification Case, 54 I. C. C. 21.

§12. Bulk Shipments and Ownership.

See Bulk Shipments; Forwarders II.

CASES 1887-1908

(a) A difference in rate for a solid carload of one kind of freight from one consignor to one consignee, and a carload quantity from the same point of shipment to the same destination consisting of like freight or freight of like character from more than one consignor to one consignee or from one consignor to more than one consignee, is not justified by the difference in the cost of handling. Thurber v. N. Y. C. R., 2 I. C. C. 742, 755.

(b) Where the goods are loaded at one time and place with but a single bill of lading, and the shipment is by one consignor to one consignee, and by the terms of sale become the property of the consignee upon delivery to the carrier, the latter has no right to inquire whether the consignee obtained his title from one or several owners, and if it accords the carload rate in case a consignor is the owner, failure or its part to extend the same privilege when the consignee is the owner violates §§ 1, 2, and 3 of the Act to Regulate Commerce. Buckeye Buggy Co. v. Cleveland, C. C. & St. L. R. Co., 9 I. C. C. 620.

IMPORTANT CASES SINCE 1908

(c) In a typical case a number of packages of merchandise, aggregating 16,000 pounds in weight, were assembled in New York by the complainant's agent and offered to defendant at one time and one place, consigned under one bill of lading to the complainant, a voluntary association of San Francisco merchants. Defendant's tariff provided a rate of $8 per 100 pounds for shipments of 10,000 pounds and less than 20,000 pounds. Applying its rules as to "bulked shipments intended to be distributed by the consignee," defendant charged its parcel rate against each separate package. HELD, that the rule against "bulked" shipments is illegal. Reparation awarded. California Commercial Ass'n v. Wells, Fargo & Co., 14 I. C. C. 422.

(d) In gathering several packages of goods together and shipping them under the carrier's rates on large shipments, a shipper is not by a device evading the law, but is legally availing himself of the rates which the carrier offers. California Commercial Ass'n v. Wells, Fargo & Co., 14 I. C. C. 422.

(e) The law does not justify the classification of shippers with regard to their interest in property shipped. California Commercial Ass'n v. Wells, Fargo & Co., 14 I. C. C. 422, 426.

(f) The provisions of the Act prohibit

a classification of traffic upon the basis of the nature or character of consignees or consignors, and while a different rate may be given to the larger shipment, it must be justified upon transportation conditions, and such rate is made as applying to the shipment, not to the shipper. California Commercial Ass'n v. Wells, Fargo & Co., 14 I. C. C. 422, 428.

(g) The only shipper whom the carrier knows is the one offering the shipment, and the rate which this shipper pays is the lawful rate. The law condemns the use of a device to evade the payment of a lawful rate; it does not forbid the use of the rate. And so long as the carrier offers to transport a certain weight of goods at a fixed rate, the shipper of these goods is certainly not evading the law by paying this rate. California Commercial Ass'n v. Wells, Fargo & Co., 14 I. C. C. 422, 428.

(h) The cost of carrying a "bulked shipment" is not greater than the cost of carrying the same amount of freight at the instance of an individual owner. The charge must therefore be the same in each case. California Commercial Ass'n v. Wells, Fargo & Co., 14 I. C. C. 422, 432.

(i) And the personality of the consignee affords no basis for a difference in rates. Sligo Iron Store Co. v. A. T. & S. F. Ry. Co., 17 I. C. C. 139, 142.

(j) So less-than-carload lots may be consolidated at a transit point. Michigan Bean Jobbers' Asso. v. G. R. & I. Ry. Co., 33 I. C. C. 318, 319.

(k) If shipments of empties were aggregated as provided in rule, charges would be materially reduced. National Asso. of Ice Cream Mfrs. v. Adams Exp. Co., 33 I. C. C. 411, 414.

ALL OTHER CITATIONS

Export Shipping Co. v. Wabash R. R. Co., 14 I. C. C. 437, 440; Davies v. I. C. R. R. Co., 19 I. C. C. 3; In Re Suspension of Western Classification No. 51, 25 I. C. C. 442, 478, 479.

§12¼. Description.

IMPORTANT CASES SINCE 1908

(a) Proposed specifications as to protection of shipments of clay products should be given fair trial. Consolidated Classification Case, 54 I. C. C. 38.

(b) Essential parts, such as ventilators and valves, are entitled to ratings applying on the outfits, and should be specifically provided for. Consolidated Classification Case, 54 I. C. C. 44.

(c) Provision under the head of agricultural implements for agricultural-implement wheels, other than master wheels (bull wheels) with an added provision to the effect that the ratings do not apply on machine finished gear or sprocket wheels, which are separately provided for under the heading of wheels, recommended. Consolidated Classification Case, 54 I. C. C. 46.

(d) Symbols, meaning of, as used with descriptions of articles or in territorial columns in consolidated classification. Consolidated Classification Case, 54 I. C. C. 90.

ALL OTHER CITATIONS

Consolidated Classification Case, 54 I. C. C. 38, 45, 50; Acme Cement Plaster Co. v. Director General, as Agent, 59 I. C. C. 508.

§12½. Duplicate Shipments.

See Duplicate Shipments.

IMPORTANT CASES SINCE 1908

(a) Where charges on a lost article as a part of a shipment are less than minimum charge on article if shipped alone, carriers should collect charges on full shipment and should transport a like article free of charge. Larkin Co. v. E. & W. Transp. Co., 34 I. C. C. 106, 108.

(b) The Commission considered the proposed cancellation of a western trunk line rule providing that where a portion of a shipment was lost or damaged by the carrier, on which shipment all charges were paid, the carrier, in claim settlements, would cancel the freight charges on a duplicate of the lost or damaged portion shipped to replace the original, provided the duplicate portion were shipped by same consignor to same consignee from same point of origin to same destination over same route as original shipment. Cancellation of the rule was sought because many shippers desired a rule which would permit the duplicate shipment to move from the place most convenient and by express or freight as might best meet the particular situation. To promptly replace lost or damaged parts, shipment must be made from the most convenient point and by the most expeditious route. HELD, that the carriers had justified the tariffs under suspension. Uniform rules to meet the situation recommended. Lost or

Damaged Freight Replacement, 43 I. C. C. 257.

ALL OTHER CITATIONS

Larkin Co. v. E. & W. Transp. Co., 34 I. C. C. 106, 110, 111; Lost or Damaged Freight Replacement, 43 I. C. C. 257, 258.

§12¾. Inspection.

See Inspection.

IMPORTANT CASES SINCE 1908

(a) Complainants attacked defendant's tariff rules, providing that when cases of eggs received at shipping point and receipted for by the carrier as in apparent good order (contents and condition of contents of package unknown) arrived at destination in the same apparent conditions, showing no external evidence of damage, consignees should not be accorded the right to examine the contents of the cases prior to delivery and should receipt for said cases as in apparent good order (contents and condition of contents unknown), as unjust, unreasonable and unduly prejudicial to consignees of eggs in the metropolitan district of New York; enforcement of the rules there, and not elsewhere, being delegated to the inspection bureau of the Trunk Line Ass'n. The former rule permitting all cases to be examined on the docks had led to corrupt practices in properly swelling loss and damage claims, led to congestion at the terminals, and necessitated an army of inspectors at prohibitive cost. Inspection of all cases at joint of origin would be impossible at many small stations employing, but a single agent. Despite the more drastic rules of the metropolitan district, shipment of eggs hereto had increased in proportion with competing centers. HELD, that the rules involved had not been shown to be unjust, unreasonable or unduly prejudicial. Complaint dismissed. New York Merc. Exch. v. B. & O. R. R., 36 I. C. C. 156.

(b) In actual practice loading must be performed in a manner satisfactory to inspectors of each road, and where delivery is made by one road to another, the loading must be approved by inspectors of the receiving road. Sand Point Lumber & Pole Co. v. N. P. Ry., 48 I. C. C. 418, 420.

§12⅞. Empty Equipment and Returned Containers.

See Cars and Car Supply §31; Reduced Rates §5.

CASES 1887-1908

(a) A rate which may be reasonable when applied to the transportation of egg cases as a disconnected service may be unreasonable if the carriage of returned cases at favorable rates is in fact a special service, the discontinuance of which would unduly burden the business of shipping eggs to points of sale. Rhode Island Egg & B. Co. v. Lake Shore & M. S. R. Co., 6 I. C. C. 176.

IMPORTANT CASES SINCE 1908

(b) The Commission has repeatedly approved the cancellation of exceptionally low rates on empty used packages or containers. The Consolidated Classification Case, 54 I. C. C. 1, 65.

ALL OTHER CITATIONS

Stearns & Culver Lum. Co. v. L. & N. R. R., 37 I. C. C. 376; Official Classification Ratings, 46 I. C. C. 383; Aetna Explosives Co. v. Director General, 53 I. C. C. 175; Consolidated Classification Case, 54 I. C. C. 35, 42, 64; New Jersey Zinc Co. v. Director General, 57 I. C. C. 201; Express Classification, 59 I. C. C. 265, 273, 274.

§13. Loading and Unloading.

See Facilities and Privileges §10; Loading and Unloading; Transportation §10.

IMPORTANT CASES SINCE 1908

(a) It cannot be stated as a matter of law that it is the absolute duty of carriers to unload carloads of package freight, nor that this duty rests upon the shipper, as there is no hard and fast rule of law upon the subject. It is rather a question with respect to each commodity of what, under the circumstances, is just and reasonable, and perhaps also what has been the practice. Wholesale Fruit & Produce Ass'n v. A. T. & S. F. Ry. Co., 14 I. C. C. 410, 416.

(b) A rule is not unreasonable which compels shippers to count packages of perishable freight. Ponchatoula Farmers' Ass'n v. I. C. R. R. Co., 19 I. C. C. 513, 521.

(c) Carload freight, whether handled on carload or any-quantity ratings, is generally received and delivered at private sidings or on team tracks, and usually the loading and unloading is performed by consignors and consignees. Less than carload freight is usually handled through the depots and the expense

thereof is borne by the carriers. In addition, the movement of freight in carloads means more efficient use of equipment, for the average loading is much greater. Consolidated Classification Case, 54 I. C. C. 1, 8.

(d) The rule providing that if a shipment tendered as l. c. l. freight and loaded by the carriers or transported and unloaded by carriers is found to be subject to the carload rate, and tariffs do not provide that the cost of loading and unloading is included in the carload rate, a charge of 2.5 cents per 100 pounds will be made for the loading and unloading, approved. Consolidated Classification Case, 54 I. C. C. 19.

ALL OTHER CITATIONS

Brunswick-Balke-Collender Co. v. G. T. W. Ry. Co., Unrep. Op. 334; National Wholesale Lumber Co. v. A. C. L. R. R. Co., 14 I. C. C. 154, 160; Wholesale Fruit & Produce Ass'n v. A. T. & S. F. Ry. Co., 14 I. C. C. 410, 416; Indianapolis Freight Bureau v. C. C. C. & St. L. Ry. Co., 15 I. C. C. 370, 373; Montague & Co. v. A. T. & S. F. Ry. Co., 17 I. C. C. 72, 75; Hood & Sons v. Del. & Hud. Co., 17 I. C. C. 15, 19; Brunswick-Balke-Collender Co. v. C. M. & St. P. Ry. Co., 18 I. C. C. 165, 166; Merchants & Mfrs. Ass'n v. A. C. L. R. R. Co., 22 I. C. C. 467; In Re Transportation of Wool, Hides and Pelts, 23 I. C. C. 151, 167; In Re Advances in Demurrage Charges, 25 I. C. C. 314, 317; In Re Suspension of Western Classification No. 51, 25 I. C. C. 442, 478, 491, 492, 494; Bagley & Co. v. P. M. R. R. Co., 25 I. C. C. 698, 699; Taylor Dry Goods Co. v. M. P. Ry. Co., 28 I. C. C. 205, 208; Klauer Mfg. Co., v. A. T. & S. F. Ry. Co., 28 I. C. C. 508, 509; Canton Bridge Co. v. P. Co., Unrep. Op. A-612; Consolidated Classification Case, 54 I. C. C. 1, 21, 24, 44.

§13½. Long Articles.

IMPORTANT CASES SINCE 1908

(a) Rule 29, note 2, elimination of special rule that "articles shipped l. c. l. * * * when exceeding 22 feet in length, or too wide to be loaded in a standard 36-foot box car through the side door thereof, and if all the articles are loaded together in or on one car, shall be charged at actual weight and class rate for each article, except that the minimum charge for each shipment shall be 1,000 pounds at first-class rate," approved. Consolidated Classification Case, 54 I. C. C. 22.

(b) It is proper to assess on long lumber, timbers, poles and piling too long to be loaded on a single car, rates as high as those maintained on lumber in single cars. Forbes Timber Co. v. Director General, 80 I. C. C. 36, 38.

ALL OTHER CITATIONS

Consolidated Classification Case, 54 I. C. C. 21.

§14. Marking and Addressing.

See Marking and Addressing.

IMPORTANT CASES SINCE 1908

(a) All questions as to marking packages ought to be settled before the carrier accepts the goods, reasonable rules as to marking and packing being proper. C. H. Algert Co. v. D. & R. G. R. R. Co., 20 I. C. C. 93, 94.

(b) A rule is neither unreasonable nor discriminatory which requires low-priced cotton factory products to be plainly marked on outside of package and stated in bill of lading in order to secure lower rate dependent upon value. Muse Bros. Co. C. R. I. & P. R. Co., 20 I. C. C. 235, 236.

(c) Packages containing fragile articles consisting wholly or in part of, or contained in, glass, must be plainly marked to inidcate contents. In Re Express Rates, 24 I. C. C. 380, 405.

(d) Inferior, insecure tags should be prohibited; no justification has been shown for rule which provides requirements of metal eyelets at an additional expense of 15 cents per 100. Western Classification Case, 25 I. C. C. 442, 484.

(e) A label need be attached to only one package in each shipment of perishable property, such label to indicate the number of packages in the shipments. In Re Express Rates, 28 I. C. C. 132, 136.

(f) Carriers reasonably may require shippers to properly mark their shipments and if shippers object to showing the value of their shipments they may use the code which defendant has adopted for that purpose. Viscoe Co. v. American Ry. Exp. Co., 62 I. C. C. 32, 33, 34.

ALL OTHER CITATIONS

C. 39; Consolidated Classification Case, 54 I. C. C. 15; Tobacco Products Corp. v. Director General, 55 I. C. C. 69.

§15. Minimum Charge and Weight.

See Passenger Fares and Facilities §6½.

CASES 1887-1908

(a) Defendants' rule, providing that the minimum charge upon any single shipment of freight shall be for 100 pounds at the class or commodity rate applying upon the article, which is in force in the territory roughly described as south of the Ohio and Potomac and east of the Mississippi rivers, and also on traffic shipped to that territory from points in the central west,—is not, upon the facts of the case, shown to be unreasonable. Wrigley v. Cleveland, C. C. & St. L. R. Co., 10 I. C. C. 412.

(b) Defendants' rule, providing that the minimum charge upon any single shipment of freight shall be for 100 pounds at the class or commodity rate applying upon the article, which is in force in the territory roughly described as south of the Ohio and Potomac and east of the Mississippi rivers, and also on traffic shipped to that territory from points in the Central West. HELD, upon the facts in this case, not to be unreasonable or unjustly discriminating in its application to complainant's traffic. No opinion expressed as to the legality of the rule upon traffic generally. Wrigley v. Cleveland, C., C. & St. L. R. Co. et al., 10 I. C. C. 413.

(ba) Complainant attacked as unreasonable minimum charge in effect in official and southern classification territory. The defendants rule, providing that the minimum charge upon any single shipment of freight shall be for 100 pounds at the class or commodity rate applying on the article, which is in force in the territory roughly described as south of the Ohio and Potomac and east of the Mississippi rivers, and also on traffic shipped to that territory from points in the central west, HELD, not unreasonable or unjustly discriminatory. Wrigley, v. C. C. C. & St. L. Ry., 10 I. C. C. 412.

IMPORTANT CASES SINCE 1908

(c) The Commission considered the reasonableness of the rules in the three classification territories, relating to minimum charges on articles too long or too bulky to be loaded through the side doors of box cars. Under these rules there was no uniformity in charge on like shipments moving. If the article moved in a closed car it might be charged only the l. c. l. rate at actual weight; but if loaded on a flat car it was subject to charge on a 4,000 or 5,000 lb. minimum. The average length of cars varied from 36 to 40 ft. in the different territories, as well as the percentage of box cars provided with end doors or windows. The loading of these articles in closed cars entailed much unusual handling, and extra expense to the carrier in loading. HELD, that unless otherwise provided, a shipment containing articles the dimensions of which do not permit loading through the center side doorway, 6 feet wide by 7 feet 6 inches high, without the use of end door or window in a closed car not more than 36 feet in length by 8 feet 6 inches wide and 8 feet high shall be charged at actual weight and authorized rating, subject to a minimum charge of 4,000 pounds at the first-class rate for the entire shipment. Minimum Charges on Bulky Articles, 33 I. C. C. 378.

(d) Minimum charge should apply to car movement rather than to each shipment. Lighterage and Storage Regulations at New York, 35 I. C. C. 47, 63.

(e) The graduate minimum rule is founded upon the fact that the carriers have extra large cars designed for light and bulky freight. Certain regulations are necessary to secure the proper loading of such equipment, to prevent its wasteful use, and to insure the desired advantages to the shipper who will load economically. Consolidated Classification Case, 54 I. C. C. 1, 24.

(f) Proposed rule providing that if the excess over a full carload is loaded on a flat car, the minimum charge for that excess shall be for 4,000 pounds at first-class rate, which shall be in addition to the charge on the full carload at the minimum weight provided for a carload shipment, or at the actual weight if in excess of the minimum weight, approved. Consolidated Classification Case, 54 I. C. C. 20.

(g) Minimum weight on sheet iron cans, 28 gauge or thinner, found unrea-

sonable as compared with the minimum on tin cans, tin pails, and tin buckets. Minimum of 9,000 pounds on cars 36 feet 6 inches and under with graduated minimum for cars of larger sizes prescribed and reparation awarded. Armour & Co. v. B., S. L. & W. Ry. Co., 73 I. C. C. 415.

(h) Minimum charge of $15 per car established by the director general under General Order No. 28 and applied in connection with class and commodity rates for trans-Mississippi River movement between points within the St. Louis-East St. Louis switching district, during Federal control, found unreasonable to extent it exceeded charge of $12 subsequently established. Reparation awarded. St. Louis Chamber of Commerce v. Director General, as Agent, 74 I. C. C. 308, 324.

(i) Combination rates on glass bottles and bottle fittings from Reading, Ohio, to points in Kentucky found unreasonable due to the factor from Reading to Cincinnati, Ohio, composed of a minimum charge of $15 per car established under General Order No. 28 of the director general, to extent it exceeded 50 cents per ton, minimum 20 tons. Nivison-Weiskopf Co. v. Director General, as Agent, 77 I. C. C. 107.

(j) Old flat cars, unfit for maximum service, were furnished by carrier for transportation of slab wood, and were loaded to full stenciled cord capacity. Minimum charge of $15 per car assessed, higher than charges that would have accrued on basis of actual weight of marked capacity load of this commodity. HELD: Charges collected found unreasonable to extent they exceeded those that would have accrued at contemporaneous rates per cord on basis of actual number of cords loaded on each car. Reparation awarded. International Lime Co. v. Director General, as Agent, 77 I. C. C. 645.

(k) Minimum charge of $15 per car established under General Order No. 28 of Director General and assessed on shale from Buchtel to Logan, Ohio, during Federal control, found unreasonable to extent it exceeded those based on rate per net ton contemporaneously in effect and actual weight, subject to c. l. minimum. Reparation awarded. Hocking Valley Brick Co. v. Director General, as Agent, 80 I. C. C. 743.

(l) Complainant attacked commodity rate of 40 cents increased to 56 cents on August 26, 1920, with minimum charge of $15 per car collected on carloads of clay shipped from Bryan, Ohio, to Cement City, Mich., on and after June 25, 1918, as illegal, unreasonable, unjustly discriminatory and unduly prejudicial. Prior to June 25, 1918, rate applicable was 29 cents, increased on that date to 40 cents under defendants interpretation of the increase although 36.5 cents was the proper rate. Effective May 25, 1919, a specific rate of 40 cents was established. Distance 40 miles. HELD, applicable rates were 36.5 cents from June 25, 1918, to May 24, 1919, 40 cents from that date to August 25, 1920, and 56 cents thereafter, reparation awarded. Peninsular Portland Cement Co. v. Director General, 83 I. C. C. 10.

§15½. Nesting.

IMPORTANT CASES SINCE 1908

(a) It should be observed that merely bundling similar articles or packing together like articles which barely fit one within the other does not constitute such a nesting as to justify a reduction in rating. Obviously in a working classification every contingency can not be provided for and necessarily some exceptions must be established to a general rule of this character. Classification Nesting Rule, 37 I. C. C. 477, 481.

(b) Provision should be continued for the acceptance, without penalty, of hats or caps, other than millinery, when nested or folded flat, in standard fiber-board containers. Consolidated Classification Case, 54 I. C. C. 35.

§16. Packing and Private Cars.

See Reasonableness of Rates §2.

CASES 1887-1908

(a) Charge of transportation of oil in tank cars should be same as charged for transportation of barrel shipments of oil. Rice v. Louisville & Nashville R. Co., 1 I. C. R. 722.

(b) That there are greater risks to carrier's property than such shipments does not justify greater charges therefor. Rice v. Louisville & Nashville R. Co., 1 I. C. R. 722.

(c) Complainant attacked as unduly preferential and unreasonable rates on petroleum in tank cars as compared with rates on petroleum in barrels in that the rates on the former are lower than on the latter. HELD, that so much of the complaint as alleged unjust discrimination in favor of oil shipped in tank cars is sustained, and that it is the duty of the defendant and it must give the same rates on oil shipped in barrels in carload lots that it charges upon oil in tanks. Allegation of unjust discrimination between oil shipped in barrels in carload lots and less carload lots not sustained. Scofield v. L. S. & M. S. R., 2 I. C. C. 67.

(d) Upon the facts of this case it is found, and held, that there is an unlawful preference given by the carrier, in favor of oil shipments in tank car lots, as against like shipments in barrels carload lots, which is ordered to be corrected, and the mode prescribed by which

this must be done, giving equal rates on each per pound. Scofield v. Lake Shore & Michigan Southern R. Co., 2 I. C. R. 67.

(e) In this particular instance, on account of the phenomenal differences in expense of service rendered, the exceptionally high rates on oil in barrels less than carload lots as compared with oil in carload lots, are sustained; but the defendant and all other carriers engaged in interstate commerce are notified that there seems to be too great a tendency on their part to make excessive differences in favor of all shipments generally in carload lots, as against shipments of similar articles in less than carload lots, and that it would be well for each of them to look to their tariffs in this respect, before the Commission takes further action on this subject. Scofield v. Lake Shore & Michigan Southern R. Co., 2 I. C. R. 67.

(f) The carrier at its peril must see to it in every transaction in which the shipper furnishes the car for the transportation of his freight that such shipper shall not thereby receive a lower rate than other shippers who use and have to use the cars furnished by the carrier in the shipment of their freight. Scofield v. L. S. & M. S. R. R., 2 I. C. C. 67, 77.

(g) In cases against carriers who were charged with discriminating unjustly in their rates as against those shipping petroleum and its products in barrels in favor of those who shipped in tank-cars, the evidence among other things showed that in the territory served by the defendants the shipment in barrels was most dangerous, and also that when shipment was in tanks there was greater likelihood of return loads. The difference in rates made by the carriers was considerable; the Commission equalized this, but still permitted a charge for the weight of the barrel. In the same case it was incidentally made to appear that on the Pennsylvania system of roads some of the conditions affecting rates on this traffic were the reverse of those above stated, and the rates had therefore been made the same by quantity whether the shipment was in tanks or in barrels. On the decision above referred to being made the rates on barrel oil were raised by the managers of the Pennsylvania system so as to include a charge for the weight of the barrel. This was claimed to be done in order to come into conformity with the action of the Commission. HELD: That the action was unwarranted. A decision on facts does not establish a principle to govern where the facts are different, and no facts which had been laid before the Commission would have authorized a ruling raising the rates on the Pennsylvania roads on barrel oil, either absolutely or relatively. Re Relative Tank and Barrel Rates on Oil, 2 I. C. R. 245.

(h) Allowing a charge for weight of oil barrels, whose shipment in tanks is less dangerous, and also is more likely to result in return loads, does not authorize such a charge as against tank shipments on lines where these conditions do not exist. Re Relative Tank and Barrel Rates on Oil (Com.), 2 I. C. R 245.

(i) The Pennsylvania Railroad provided in a circular to its agents that rates on oil in barrels should be computed on the contents of the barrels as well as the barrel itself, claiming this was in line with the decision of the Commission in 1 I. C. C. 722. HELD: Circular should be withdrawn as in deciding a case against one or more carriers who are charged with making rates which are unjustly discriminating in a certain line of traffic, the decision made upon the facts of the particular case does not necessarily govern rates in other sections of the country where the facts bearing upon them may be altogether different. Re Relative Tank and Barrel Rates on Oil, 2 I. C. C. 245.

(j) The difference in the rate of transportation of compressed and uncompressed cotton by rail carriers should be the actual and necessary cost of compressing. New Orleans Cotton Exch. v. Illinois C. R. Co. (Com), 2 I. C. R. 777.

(kl) When a carrier engages in transporting oil in tanks, and also in barrels conveyed in box cars, in carloads, and charges for the weight of the barrel as well as the oil carried by the box-car mode of transportation, but for the weight of the oil only when carried in tanks, it unjustly discriminates between shippers, and subjects the traffic to undue prejudice and disadvantage. Rice, Robinson & Witherop v. W. N. Y. & P. R. Co., 3 I. C. R. 162.

(m) Complainant attacked rates charged on oil in tank cars as compared with rates on oil in barrels. HELD: When a carrier engages in transporting

oil in tanks and also in barrels conveyed in box cars, in carloads, and charges for the weight of the barrel as well as the oil carried by the box car mode of transportation, but for the weight of the oil only when carried in tanks, it unjustly discriminates between shippers, and subjects the traffic to undue prejudice and disadvantage. Rice, Robinson & Witherop v. W. N. Y. & P. R. R. Co., 3 I. C. C. 162.

(n) A carrier that employs different methods for the transportation of oil and its products in carloads, for example, tank cars in which the oil is carried in bulk and box cars in which the oil is carried in barrels, is not relieved from its duty in respect to equality of rates by the difference it makes between its patrons in the mode of carriage, but its charges for like quantities carried between like points of shipment and destination must be equal upon the commodity itself, irrespective of the mode of carriage or the tank or barrel package in which it is contained. Differences in circumstances and conditions of transportation that are of a carrier's own creation or connivance, or that by reasonable effort on the part of a carrier might be avoided, cannot justify exceptional rates. Rice, Robinson & Witherop v. W. N. Y. & P. R. R. Co., 3 I. C. C. 162, 167.

(o) A tank used in carrying oil is deemed by carriers part of the car and the rate is charged only upon the contents, while for carriage in box cars the barrels containing the oil are treated as freight and the rate is charged both for the weight of the barrel and its contents. The prevention of this prejudice to shippers in barrels requires that for purposes of rates, when a carrier used both tank and box cars for carrying oil in carloads, the barrels shall be deemed part of the box car, and that, as in the case of transportation in tanks, the rate shall be charged only for the weight or quantity of oil carried, exclusive of the weight of the barrels, and be the same for like weight or quantity carried in tanks. Rice, Robinson & Witherop v. N. Y. & P. R. R. Co., 3 I. C. C. 162, 167.

(p) The practice of allowing the tank shipper an arbitrary deduction of 42 gallons per tank car is wholly indefensible. Losses from leakage and evaporation are not less proportionally when the shipment is made in barrels, and no circumstance is discovered or reason advanced which justifies a concession of that nature to the shipper who furnishes his own conveyance, when no corresponding allowance is made to a rival shipper using the means of transportation provided by the carrier. Rice v. Cinn., W. & B. R. Co., 3 I. C. R. 841.

(q) Where oil is transported by the carrier both in barrels and tank cars, but the use of the tank cars is practically limited to one class of shippers, the charge for the barrel package in barrel shipments, in the absence of a corresponding charge on tank shipments, resulting in a greater cost of transportation to the shipper in barrels on like quantities of oil between like points of shipments and destination than to the tank shipper, is a discrimination against the former in favor of the latter, for which no legal justification has been shown in these cases. Independent Ref. Asso. v. Western N. Y. & P. R. Co. (Com.), 4 I. C. R. 162.

(r) Complainant attacked rates on oil in tank cars and oil in barrels from Oil City, Pa., and Titusville, Pa., to New York and New York Harbor points and Boston and Boston points as unreasonable. HELD: The rates themselves not unreasonable, but the rates on oil in barrels should be on the same carload basis as on oil in tank cars regardless of the ownership of the tank cars. Independent Refiners' Asso. v. W. N. Y. & P. R. Co., 4 I. C. C. 163.

(s) A shipper should not be subjected to unnecessary restrictions as to the kind of case or package he shall use. Rhode Island Egg & B. Co. v. Lake Shore & M. S. R. Co. (Com.), 4 I. C. R. 512.

(t) A shipper should have the right to use, without favor in classification of freight, any size egg case as best suits his purpose, provided such case is in good order at the time used. Rhode Island Egg & Butter Co. v. L. S. & M. S. R. Co., 4 I. C. C. 512, 517.

(u) Carriers are under no obligation to receive freight improperly packed or in otherwise unsafe condition. Rhode Island Egg & Butter Co. v. L. S. & M. S. R. Co., 4 I. C. C. 512, 517.

(v) Where oil is transported by the carrier both in barrels and tank cars, but the use of the tank cars is practically limited to one class of shippers, the

charge for the barrel package in barrel shipments, in the absence of a corresponding charge on tank shipments, resulting in a greater cost of transportation to the shipper in barrels on like quantities of oil between like points of shipments and destination than to the tank shipper, is a discrimination against the former in favor of the latter for which no legal justification has been shown in these cases. Independent Ref. Asso. v. Pennsylvania R. Co., 6 I. C. C. 52.

(w) A shipper should not be subjected to unnecessary restrictions as to the kind of case or package he shall use. Rhode Island Egg & Butter Case Co. v. L. S. & M. S. R. Co. et al., 6 I. C. C. 176.

(x) On failure of the defendant common carriers to cease charging for the transportation over their respective roads of barrel packages containing oil shipped from points in Western Pennsylvania to New York Harbor points and Boston and Boston points, or, as an alternative, promptly furnish tank cars to shippers of oil between said points, and to file and publish tariffs accordingly, and to make reparation to injured parties legally entitled thereto, by refunding all sums received for carrying barrel packages containing oil shipped between said points when the use of tank cars for such shipments had not been open to shippers impartially, and shippers had been thereby deprived of their use, all of which was required of defendants by order entered in these cases on November 14, 1892, and upon the filing of itemized claims for reparation, due hearing of the claimants and defendants, and full investigation of the matters involved, HELD: that the claims for reparation served upon defendant initial carriers by claimants, according to a stipulation entered into by the parties, are the claims to be considered in these cases. That the parties legally entitled to reparation under said order of November 14, 1892, are oil shippers from Titusville, Oil City and vicinity who were members of the complaining associations at the time the complaints were filed, or subsequently, up to the date of the hearing at Titusville on May 15, 1894. That the time which the claims herein may properly cover is from September 3, 1888, when the practice of charging for carrying barrels containing oil was commenced by defendants, to May 5, 1894, when hearing on the claims was had. That the shipments as to which reparation should be made are those from Titusville, Oil City, or vicinity, to New York or New York Harbor points, or Boston or points taking the Boston rate, that passed over routes in which some one of the defendants was the carrier receiving the freight for transportation, initiating and controlling the method or mode of carriage and billing the freight through to destination at the aggregate rates of compensation charged. That the amount to be refunded is the charge collected by defendants for the transportation of barrels containing petroleum oil shipped and carried as aforesaid. That the defendants are severally liable for the full amount of damages proved in these cases to result from violations in which they or either of them participated. Independent Refiners' Asso. v. Western N. Y. & P. R. Co., 6 I. C. C. 378.

(y) Complainant attacked rates on oil in barrels as compared with oil in tank cars from western Pennsylvania to New York Harbor points as unreasonable and unjustly discriminatory. Previous order dated Nov. 14, 1892. Upon hearing reparation awarded. Independent Refiners' Asso. v. W. N. Y. & P. R. Co., 378.

(z) Iron pipe fittings shipped in cases from northern points to southern territory take second class rates, but if shipped in casks, barrels or kegs a special iron rate, lower than the sixth-class rate, is applied on any quantity. The barrel package is cheaper than the case except when the quantity is insufficient to fill a barrel; but when that happens a keg can be used for packing, with but little inconvenience or additional expense, and the lower special iron rate is thereby secured. The choice is wholly with the shipper to pay the higher rate on fittings in cases or the lower rate on fittings in kegs or barrels. Such a classification does not operate of itself to aid dishonest shippers in underbilling goods of greater value, and the opportunity for false billing would not be lessened by giving the special iron rate to pipe fittings packed in cases. No ground of distinction appears in this respect between pipe fittings and numerous other articles included in the special iron list and taking higher rates when packed in boxes, and reclassification of all these other commodities is not warranted by the facts

in this case. HELD: That the defendant carriers have not exceeded the limits of their discretion in placing iron pipe fittings packed in cases in a higher class than iron pipe fittings packed in kegs or barrels, and that such action is not unreasonable or otherwise in violation of the Act to Regulate Commerce. Trades League v. Philadelphia, W. & B. R. R. Co., 8 I. C. C. 368.

(aa) A carrier does not exceed the limits of its discretion in placing iron pipe fittings packed in cases in a higher class than iron pipe fittings packed in kegs or barrels, and such action is not unreasonable or in violation of the Act to Regulate Commerce. Trades League of Phila. v. Philadelphia, W. & B. R. Co., 8 I. C. C. 368.

(bb) Defendant's published tariffs to various points in Alabama, including Gordo, as well as those of the Louisville & Nashville, Southern, and Illinois Central, to some points in Alabama, show in some instances charges per barrel of flour considerably less than double the rate per 100 pounds in sacks, while in other cases, as in the instance of Gordo, the barrel rate is materially in excess of double the rate per 100 pounds in sacks, and this, notwithstanding the weight of a barrel of flour is substantially double the weight of flour as shipped in sacks. The rates on sack flour are commodity rates, and the evidence leads to the inference that shipments of flour in barrels would be given double the rate on flour in sacks, although this may not correspond to actual published rate on flour in barrels. HELD, that it is manifestly contrary to law, and leads to confusion, for one line of rates to be retained in published tariffs, while others are in fact used on actual shipments, and that so long as carriers in Southern Classification territory deem it necessary to retain Class F in their classifications and publish rates applicable thereto, including flour in barrels, and at the same time publish commodity rates on the same article carried in sacks, there should be uniformly a just relation in such rates. Case retained with respect to the rates in question on flour shipped in barrels, unless same are changed to conform relatively to those applied to shipments in sacks. Cannon v. Mobile & O. R. Co., 11 I. C. C. 537.

IMPORTANT CASES SINCE 1908

(cc) Classification is sometimes made with respect to the manner of packing of articles. Metropolitan Paving Brick Co. v. A. A. R. R. Co., 17 I. C. C. 197, 201.

(dd) Form in which goods are presented for shipment must be considered in framing classifications and rates. Ford Co. v. C. M. R. R. Co., 19 I. C. C. 507, 509.

(ee) It is clearly within the power and authority of carriers to establish reasonable and just regulations requiring proper packing and marking of consignment before acceptance by them for transtation, which will amply protect them from negligence by shippers in this respect. C. H. Algert Co. v. D. & R. G. R. R. Co., 20 I. C. C. 93, 94.

(ff) The public is interested in safe packing. Western Classification Case, 25 I. C. C. 442, 486.

(gg) From a classification standpoint, the security of a package may with propriety be considered when fixing the rating, and carriers are not justified in placing a higher rating upon a more secure than a less secure package, except, perhaps, in cases where articles known by the same name are, in fact, different commodities of widely different values. For example, charcoal, when shipped in the bulk in barrels or bags, is a fuel; when packed in glass it is practically a drug. In Re Suspension of Western Classification No. 51, 25 I. C. C. 442, 499.

(hh) Where wide variation in the value of the same commodities when shipped in fiber or metal cans or containers when packed in barrels or boxes, the rating on such double packages should not be higher than the rating on the same commodity when shipped in bulk in barrels. Western Classification Case, 25 I. C. C. 442, 499.

(ii) The propriety of increasing the rating upon an article when it is offered loose or in bundles with practically no protection as compared with the rating of the same commodity when boxed or otherwise fully protected, cannot be questioned. A package which is less desirable from a transportation standpoint deserves to be given a higher rating than one which is more desirable. This does not sanction disproportionate and arbitrary increases in the rating of an article when offered in a less desirable package. There should be some relation between

the increased rating and the increase in the risk, difficulty in handling and other proper considerations. In Re Suspension of Western Classification No. 51, 25 I. C. C. 442, 608.

(jj) Articles shipped in a safer and more secure package should not be rated higher than those shipped in a less safe package. In Re Suspension of Western Classification No. 51, 25 I. C. C. 442, 537.

(kk) The shipper should so pack and load his commodity as to insure against leakage from the package. Southwestern Missouri Millers' Club v. St. L. & S. F. R. R. Co., 26 I. C. C. 245, 250.

(ll) So long as proper and suitable equipment is furnished, it is the duty of the shipper to so pack his commodity as to admit of its transportation in a safe manner. It is going to extremes to claim that a perfectly new car must be "repaired" by the shipper before he can use it. There are many commodities sold to the trade in a form which the trade demands, which require no special equipment and are handled in ordinary box cars, but which do require protection from the damage which would result from friction with the sides and the floor of the car. To impose upon the carrier the duty of affording this protection for shippers of flour would necessarily require the furnishing of similar protection at the expense of the carrier on innumerable other articles or else create discriminations in favor of the chosen commodities. S. W. Missouri Millers' Club v. St. L. & S. F. R. R. Co., 26 I. C. C. 245, 251.

(mm) The Commission has no preferences in the matter of containers; and if it had it would not express them. It may be required, however, to draw a conclusion with reference to the reasonableness of certain rules of the carriers made applicable to a certain kind of container. Sea Gull Specialty Co. v. Baltimore Steam Packet Co., 27 I. C. C. 267, 272.

(nn) The duty should be placed upon the carriers' agents to notify the shippers whenever their containers do not comply with specifications laid down in the classification rules. This responsibility should rest upon the initial carrier. It should point out to the shipper that his box or container does not come within the classification rules, in order that he may have opportunity to correct the defect before incurring a penalty which may be imposed by the delivering carrier. Sea Gull Specialty Co. v. Baltimore Steam Packet Co., 27 I. C. C. 267, 273.

(oo) Different rates according to character of container or form in which commodity is shipped not uncommon. Gotron Bros. Co. v. G. & W. R. R. Co., 28 I. C. C. 38, 42.

(pp) Classification rules with respect to the construction, packing and sealing of fiber boxes should be rigidly enforced and the shipper held responsible for any violation thereof. Pridham Co. v. S. P. Co., 30 I. C. C. 117, 124.

(qq) The authorities have generally recognized that it is not only the right but the duty of the carrier to decline shipments which are not so prepared or packed as to render them safe for transportation, and to establish reasonable rules and practices in this respect. Dunnage Allowances, 30 I. C. C. 538, 542.

(rr) The primary purpose of packing requirements involved is to prevent what is technically known as concealed loss; i. e., loss by theft in transit, which is not discovered until after delivery of shipment to consignee, because of the fact that there is no indication on the package that it has been tampered with. Reynolds Tobacco Co. v. A. & S. Ry. Co., 39 I. C. C. 371, 373.

(ss) The covering of, or package in which an article is contained does not stamp with its character the contents of the package. Eastbound Transcontinental Canned Goods, 50 I. C. C. 62, 66.

(tt) If any particular packing specification is believed to be unreasonable it may be made the subject of complaint. Consolidated Classification Case, 54 I. C. C. 1, 14.

(uu) Concessions in freight charges based upon the manner in which goods are packed or the containers which are used are not unlawful, provided they are reasonably related to the advantages accruing to the carriers from the improved packing or loading. Pneumatic Sales Corp v. A. & R. R. R. Co., 57 I. C. C. 308, 309.

(vv) The contention that a difference in values warranted a lower rate on cotton linters, uncompressed, than on cotton found not sustained as in Louisiana Cotton, 46 I. C. C. 451, 453, the Commission approved rates on linters the same

as those on cotton. Speir & McKay v. Director General, as Agent, 61 I. C. C. 736.

(ww) The failure of carriers to provide for the shipment of machine-finished steel roller chains, in bags, at the same ratings when shipped in barrels or boxes, found unreasonable. Link-Belt Co. v. P., C., C. & St. L. R. R. Co., 64 I. C. C. 195.

(xx) The liability of an inner container to breakage depends chiefly on the method of packing and the character of the outer container, which the carrier may control. When shipments are properly packed in an outer container of the right character, the character of the inner container may become relatively unimportant. Indian Packing Corp v. Director General, as Agent, 64 I. C. C. 205, 208.

(yy) The word "cases" has generally been construed as including both the shell and the shell containing one or more empty bottles. The word does not cover casks. Duluth Brewing & Malting Co. v. G. N. Ry. Co., 73 I. C. C. 637, 638.

(zz) From a transportation standpoint boxed apples are more desirable traffic, especially on long hauls, than bulk apples. Holmes v. Director General, as Agent, 74 I. C. C. 668, 669.

(3a) The duty should be placed upon the carriers' agents to notify shippers whenever their containers do not comply with specifications laid down in the classification rules. This responsibility should rest upon the initial carrier. It should point out to the shipper that his box or container does not come within the classification rules, in order that he may have opportunity to correct the defect before incurring a penalty which may be imposed by the delivering carrier. Classification Specifications for Fiber Box Containers, 77 I. C. C. 713, 717.

(3b) Proposed rule in classification empowering carriers to refuse for shipment articles in fiber-board boxes which do not in all respects conform to specifications, in addition to present penalty rate provision if such shipments are accepted, found not justified. Present penalty provision is uniform throughout the United States and should be uniformly applied, and no necessity is shown for refusing articles in fiber-board boxes which will safely and securely transport commodities contained therein, although not conforming in all respects to carriers' specifications. Fiber-Box Containers, 77 I. C. C. 713.

(3c) Contention that, since carriers may lawfully refuse shipments of explosives and other dangerous articles in containers not conforming to specifications of the Commission, they may also refuse all articles in containers which do not meet the requirements which they prescribe, not sustained. Congress directed the Commission to formulate regulations governing transportation of dangerous articles for protection of life and property, and fact that shipments of that character may not be transported in containers not complying in every particular with specifications prescribed does not prove that there should be no latitude in that respect in transportation of articles which are not dangerous. Fiber-Box Containers, 77 I. C. C. 715.

(3d) Rates assessed on stoneware moved in crates and barrels found unreasonable to extent they exceeded lower rate contemporaneously in effect on same commodity "in bent-wood crockery crates," which lower rate applied generally to stoneware "in crates" prior to movement and was subsequently restored. Reparation denied for lack of proof. Hercules Powder Co. v. Director General, as Agent, 80 I. C. C. 219.

(3e) Failure of carriers in western classification territory to provide for shipment of, loose, in excelsior, hay, straw, or similar packing material, at same rating and minimum weight as apply on same commodity when shipped in barrels, boxes, or crates, found unreasonable, and c. l. rating and minimum weight ordered established accordingly. Schlieper v. S. P. Co., 80 I. C. C. 630.

§16a. Penalty Charge.

See Passenger Fares §4¼; Penalty Charges.

IMPORTANT CASES SINCE 1908

(a) Respondents filed tariffs making it clear that the penalty charge of 25 per cent on eggs not packed in accordance with the classification would be made against the entire shipment even though only a small part did not conform to the classification requirements for packing. Respondents made no effort to justify the proposed rule, but proposed in lieu thereof one providing for the application of the less carload rate and actual weight on the improperly packed part of the shipment, and the carload rate and minimum weight on the properly packed part thereof. A sufficient and more logical penalty would be imposed by assessing on that part of the shipment the second class rate, applicable on carload shipments of eggs improperly packed. HELD: Respondent has not justified the proposed schedules. Penalty charge on eggs not packed in standard carriers between points in Western Trunk Line Territory, 74 I. C. C. 726.

§16½. Part of Same Article or Shipment.

See Infra §21; Follow-Lot Shipments.

IMPORTANT CASES SINCE 1908

(a) The parts of a machine, although separately prepared for shipment, as constituent parts their identities are merged for the purpose of classification into the complete article. Meyer Co. v. A., T. & S. F. Ry., 41 I. C. C. 380, 382.

(b) It is sound principle that the machine and its parts should be provided for in straight or mixed carloads. Consolidated Classification Case, 54 I. C. C. 1, 29.

(c) Complainant loaded first car to visible capacity and forwarded shipments under separate bills of lading, but failed to comply with tariff requirements or make cross reference to the separate shipments in the actual billing which would indicate that commodities were offered as a single shipment. HELD: Follow-lot rule not applicable and charges legally applicable not found unreasonable. United Verde Extension Mining Co. v. Director General, 57 I. C. C. 483.

(d) Where classification provided different rates for different kinds of the same article and such articles are not separately packed, the rating applicable to the highest rated article in the package will apply. Torsion Balance Co. v. Director General, as Agent, 59 I. C. C. 218, 219.

(e) Following Parkersburg Rig and Reel Co., 50 I. C. C. 416, rates on nails, shipped with parts of oil-well outfits and supplies, in quantities sufficient for assembling the parts or constructing the derrick to be used in connection therewith, but not more than 500 pounds for each outfit, found unreasonable to extent they exceeded the rates on mixed carloads of oil-well outfits and supplies. Reasonable rate prescribed and reparation awarded. Parkersburg Rig & Reel Co. v. Director General, as Agent, 59 I. C. C. 563.

(f) Fourth-class rate on locomotives, k. d., essential parts of which were missing at time of shipment, found legally applicable as the absence of such parts did not affect the identity of the article transported or destroy its fundamental character from a transportation or tariff standpoint. Harris Bros. Co. v. Director General, as Agent, 60 I. C. C. 428.

(g) Steel crown blocks are manufactured specially as integral parts of oil-drilling outfits, and are not adapted to other uses. If they are parts of oil-well outfits when shipped l. c. l., their movement in carloads does not alter their character. Parkersburg Rig & Reel Co. v. Director General, as Agent, 64 I. C. C. 154, 155.

ALL OTHER CITATIONS

Bowling v. M., K. & T. Ry., of Texas, 45 I. C. C. 473, 474; Federal Bridge Co. v. A., T. & S. F. Ry., 45 I. C. C. 537, 538; Acme Cement Plaster Co. v. A., T. & S. F. Ry., 45 I. C. C. 1, 19, 20, 44, 48, 52, 53, 56, 57; Texas Highway Department v. Director General 73 I. C. C. 629.

§16¾. Valuable Articles.

IMPORTANT CASES SINCE 1908

(a) Proposed rule which contains list of several articles of extraordinary value that will not be accepted for transportation by freight, including money, stamps, valuable papers, etc., approved. Consolidated Classification Case, 54 I. C. C. 14.

IV. COMPARATIVE RATINGS.

See Infra §22; Advanced Rates §5 (3); Classification §6; §16; §22; Commodity Rates II; Comparative Rates; Evidence §12; §31.

(A) Analogous Articles.

§17. In General.

See Live Stock; Reasonableness of Rates §28.

CASES 1887-1908

(a) The classification of railroad ties in a different class from other lumber, thus imposing a higher rate upon ties than upon other lumber, HELD, to be an unjust discrimination.. Reynolds v. Western N. Y. & Pa. R. Co., 1 I. C. R. 685.

(b) Complainant attacked as excessive rates and classification on rough hub blocks in that they are higher than on lumber. The blocks are the unseasoned raw material on their way to the hands of the manufacturer. They must be considered as properly classed with lumber. HELD: Rates and classification on rough hub blocks unreasonable to extent they exceeded those on lumber. Hurlburt v. L. S. & M. S. R. R., 2 I. C. C. 81.

(c) The rate on bitters as at present classified, compared with analogous articles, is not so unreasonable as to demand a change of the classification of that particular article. The propriety and extent of a change can more appropriately be acted upon, in connection with other articles, in a general revision of the classification. Myers, Survivor of Hostetter & Co., v. Pennsylvania, 2 I. C. R. 403.

(d) Grain and grain products classified alike are presumptively entitled to equal rates, and if a difference is made by a carrier it assumes the burden of sustaining it by satisfactory evidence. McMorran v. Grand Trunk R. Co., 2 I. C. R. 604.

(e) Upon complaint against the Grand Trunk Railway of Canada for alleged unreasonableness of a rate of eight cents a hundred pounds on grain and ten cents a hundred pounds on grain products from Port Huron to Buffalo, as compared with a through rate of fifteen cents a hundred pounds from Chicago to Buffalo over the line formed by that road and the Chicago & Grand Trunk road. HELD: That though the local rate from Port Huron to Buffalo might be regarded as disproportionate on the basis of distance alone, other considerations are involved, and, in view of the terminal and ferry expenses at Port Huron, the Niagara Bridge charges and the Buffalo terminal expenses, all of which are borne by the Grand Trunk Railway of Canada alone upon business originating at Port Huron, the complaint against the eight-cent rate on grain is not sustained, but no good reason having been shown for a higher rate on grain products, that portion of the complaint is sustained, and the products ordered to be carried at the same rate as grain. McMarran v. Grand Trunk R. Co., 2 I. C. R. 604.

(f) In arranging the classification of articles of commerce their market value and the shippers' representations to the public as to their character may properly be taken into account in ascertaining the analogy they bear to other articles, and determining the class to which they justly belong. This is especially applicable to articles in which there is no free competition among producers and shippers. And carriers are not required to estimate the intrinsic value of freight as distinguished from its commercial value for purposes of classification and rates. Warner v. N. Y. C. & H. R. R., 3 I. C. C. 74, 76.

(g) Complainant attacked classification on celery from Tecumseh, Mich., to Kansas City, Mo., as unjust and unreasonable. HELD: For that portion of its line over which the Western Classification is in force, the Wabash should class celery with cauliflower, asparagus, lettuce, green peas, string beans, oyster plant, egg plant, and other vegetables enumerated in Class C, rather than with berries, grapes, and other fruits specified in Class 111 thereof. Tecumseh Celery Co. v. C., J. & M. R. Co., 4 I. C. C.318.

(h) Complainant attacked classification of window shades as unjust and unreasonable, from Minetto, N. Y., to Chicago, Ill., and other western points.

HELD: Upon consideration of the great reduction which has taken place in the value of window shades, the arbitrary increase of shade classification during the progress of the proceeding, and all the other facts and circumstances herein which pertain to the rights of shade shippers and consignees generally, and of purchasers of that article of household necessity, HELD, the classification of window shades as first class in the official classification has become unjust, and the legal duty of defendants to so classify thereon that the burdens of transportation are reasonably and justly distributed among the articles they carry, requires them to reduce their classification of window shades to the class which, under the classification, is now applied to window hollands and shade cloth, plain, uncut and undecorated. Page v. D., L. & W. R. Co., 4 I. C. C. 525.

(i) Carriers who have uniformly placed in the same class all grades of a particular commodity, regardless of the difference in value between different grades, will not incur greater risks by continuing the same practice under an order of the Interstate Commerce Commission requiring a lower classification and rating for the great bulk of shipments of such commodity which are actually transported. Page v. Delaware, L. & W. R. Co., 6 I. C. C. 148, 548.

(j) The railroad companies named as defendants established and maintained a rate of 15 cents per hundred pounds on box shooks, and a lower rate of 12 cents per hundred pounds on lumber, laths and shingles carried from Bay City, Michigan, to Buffalo, Black Rock, Tonawanda and Suspension Bridge, New York. A carload of lumber weighs 36,000 pounds, a carload of box shooks or shingles weighs about 30,000 pounds. Lumber carried in carloads is worth from $350 to $800 per car; a carload of box shooks is worth about $220. The freight charges on both lumber and box shooks are about $43, and on shingles about $36 per carload. The rates on these several products are the same from Bay City to Cleveland and ports on Lake Erie other than Buffalo, and to points in Illinois, Indiana, Ohio and other states. HELD: That the higher rate on box shooks was not justified, and was excessive. Michigan Box Co. v. Flint & P. M. R. Co. et al., 6 I. C. C. 335.

(k) Complainant attacked rates on box shooks as unreasonable from Bay City, Mich., to Buffalo, Black Rock, Tonawanda and Suspension Bridge, N. Y., as compared with rates on lumber. The rate on box shooks was 15c per 100 pounds, and 12c on lumber, laths and shingles. Lumber in carloads is worth from $350 to $800 per car, box shooks about $220. The rates on these several products are the same from Bay City to Cleveland and ports on Lake Erie other than Buffalo and to points in Illinois, Indiana, Ohio, and other states. HELD: The higher rate on box shooks was not justified, and was excessive. Record held open as to proof of damage. Michigan Box Co. v. F. & P. M. R. Co., 6 I. C. C. 335.

(l) A charge of a higher tariff rate to designated points on "box shooks" made from an inferior grade of lumber than on lumber, laths and shingles to the same places, is unjustified and excessive, where these products are classed together and carried at the same rate to other points. Michigan Box Co. v. Flint & P. M. R. Co., 6 I. C. C. 335.

(m) Complainants' open-end envelopes, though made by a different and cheaper process than that employed in the manufacture of other open-end or side envelopes, and usually from an inferior grade of paper, are nevertheless made, used, and shipped like merchandise envelopes, and not like paper bags, which defendants place in a lower class; and rating complainants' envelopes in the higher class provided for merchandise envelopes is not unlawful. Wolf Brothers v. Allegheny Valley R. Co., 7 I. C. C. 40.

(n) Tomatoes and beans need not be rated in the same class where beans are more perishable than tomatoes, but such difference does not justify a difference of nearly one-half in the rate, where the actual cost of transportation is nearly the same. Rea v. Mobile & O. R. Co., 7 I. C. C. 43.

(o) Complainant attacked as unreasonable classification of iron handled bristle shoe blacking daubers in less carload lots in official classification territory. Classification charged first class which is the rating applicable to bristles, all kinds, and brushes made from bristles. HELD: It may be that carriers might, if they saw fit to do so, reduce the rates on this particular kind of brush without prejudice to others, but, in view of the necessity and purposes of the general

classification of traffic, the facts do not warrant requirement that this brush be removed from the class to which bristles brushes in general are assigned, complaint dismissed. Derr Manufacturing Co. v. Pennsylvania R. R., 9 I. C. C. 646.

(p) A cheap grade of brush, manufactured and sold as a blacking dauber, is not entitled to be classified lower than the class to which bristle brushes in general are assigned. Derr Mfg. Co. v. Pennsylvania R. Co., 9 I. C. C. 646.

(q) Validity of maintenance of rates on flour from points in Kansas and Missouri to points in Texas, which are 5 cents per 100 pounds higher than those on wheat, where such differential is not applied on flour or wheat carried in any other direction. Wichita v. Missouri P. R. Co., 10 I. C. C. 35.

(r) Cowpeas not to be classified with fertilizer in the adjustment of freight rates. Swaffield v. Atlantic Coast Line R. Co., 10 I. C. C. 281.

(s) Complainant attacked classification rating on Scheidel outfit as unreasonable. The Scheidel outfit is an electrical apparatus consisting of a so-called Ruhmkorff coil, an interrupter, a small rheostat and two switches, fitted to a strong table. The parts are detachable and are shipped in separate boxed packages, except the table, which is crated. This outfit, which transforms an electric current of low voltage into one of extremely high voltage, is used in medical and scientific work, including the use of the x-ray, and also in wireless telegraphy and in chemical works. The western classification places x-ray apparatus and scientific or medical instruments in double first class, and electrical apparatus, n. o. s., in first class. Complainant contended that their outfit should be treated as an ordinary eectrical appliance and carried at first class rates. HELD: That under conditions now governing the manufacture and use of complainant's outfit, such outfit is properly classified by defendants with the x-ray and medical or scientific apparatus as double first class, and is not entitled to a first class rating with dynamos, transformers and other electrical machinery, but no opinion is expressed upon the justice of the first class rate on such machinery, complaint dismissed. Scheidel & Company v. C. & N. W. Ry., 11 I. C. C. 532.

IMPORTANT CASES SINCE 1908

(t) In making a classification, bulk, value, liability to loss and damage, and similar elements affecting the desirability of the traffic should be considered, and articles which are analogous in character should ordinarily be placed in the same class. Mettropolitan Paving Brick Co. v. A. A. R. R. Co., 17 I. C. C. 197, 203.

(u) Classification must be by analogy and comparison. German Kali Works, Inc., v. A., T. & S. F. Ry. Co., 28 I. C. C. 223, 225.

(v) And the fact that carriers have accorded to one article a basis of rates below normal is of itself no reason, in the absence of unjust discrimination or undue prejudice, for requiring the establishment of the same rates on analogous articles, especially where shipper is directly benefited by the lower basis of rates already in effect. Pioneer Pole & Shaft Co. v. Director General, as Agent, 64 I. C. C. 744, 746.

(w) In numerous cases involving rates on coal in almost every section of the United States the Commission has either approved or required establishment of lower rates on finer coal than on prepared sizes. Northern States Power Co. v. A., T. & S. F. Ry. Co., 80 I. C. C. 261, 264.

(x) There can be no justification for great difference between rates on anthracite and bituminous coal. Both kinds move in the same equipment, load to approximately the same weight, and are given the same minimum weights under tariffs. Western Coal Rates, 80 I. C. C. 383, 439.

(y) The fact that rates lower than those authorized have been accorded by certain carriers is of itself no valid reason, in the absence of unjust discrimination or undue prejudice, for requiring the establishment of the same rates on analogous articles. Hollingshead Co. v. A. & R. R., 88 I. C. C. 191, 195.

§18. Specific Comparisons.

See Supra §3½; §17; Comparative Rates.

CASES 1887-1908

(a) The proper classification of an article is to be judged relatively by the classification of other articles similar in character, quality and conditions of transportation. Myers, Survivor of Hostetter & Co. v. Pennsylvania, 2 I. C. R. 403.

(b) From Sioux City, Iowa, to Mississippi River points, and from Sioux City to eastern markets and seaboard cities via Mississippi River points, the rates are made considerably higher by the carriers on live hogs than on packing house products. With, however, the single exception of Sioux City rates are made the same by rail carriers on live hogs and packing house products carried from Missouri River points to Mississippi River points or from Missouri River points to eastern markets via Mississippi River points, or from intermediate points in Iowa and Missouri to Mississippi River points, or from Chicago to eastern markets and intermediate points. But upon all shipments of live hogs and packing house products from Missouri River points to Chicago, or from intermediate points in Iowa and Missouri to Chicago, the rate charged is much higher on live hogs than on packing house products. HELD, defendants must cease from the unjust discrimination now made by them in rates on live hogs and packing house products from Missouri River points and from interior points in Iowa and Missouri upon shipments of these articles to Chicago, and that the rates made by them upon live hogs shall not be greater than upon packing house products carried by them on each of their lines from Missouri River points and Iowa and Missouri to Chicago. Board of Trade of Chicago v. C. & A. R. Co., 3 I. C. C. 233.

(c) For reasons peculiar to the territory lying west of the Missouri River, comprising a large portion of Texas, Missouri and a part of Kansas, the rates on wheat and wheat flour are grouped without reference to distance, and a lower rate has been charged on wheat than on wheat flour for fifteen years. Prior to 1886 the difference in the two rates was 15 cents per 100 pounds. In that year a readjustment of rates was made, and upon consideration of all the circumstances and conditions and claims of rival communities the differential was reduced to 5 cents per 100 pounds, which has since been maintained. Upon complaint made by millers of Missouri against a differential of 5 cents and claiming an equal rate on wheat and flour from Missouri and Kansas into Texas. HELD, that under the conditions existing in the territory in question a rate of 5 cents less than 100 pounds on wheat than on flour does not as a matter of fact work unjust discrimination, and is not therefore unlawful, complaint dismissed. Kauffman Milling Co. v. M. P. R. Co., 3 I. C. C. 400.

(d) Unreasonable or unjust classification of a commodity is not shown by evidence of lower classification for articles widely dissimilar in the elements of risk, weight, bulk, value, or general character. The proper method of comparison is the classification accorded by the carriers to analogous articles. Chas. H. Brounell, Columbus & Cincinnati Midland R. Co., 4 I. C. R. 285.

(e) Complainant attacked rates and classification on vegetables, carloads. Evidence presented concerning defendants alleged unlawful practice of charging second class rates on beans, while potatoes are carried by it at rates provided for third class articles. HELD, not sufficient to justify an order requiring a change in classification. The present difference of almost one-half in the rate on beans and tomatoes shipped from Verona, Miss., to East St. Louis, Ill., the actual cost of transportation being nearly the same, ought to be remedied. Group rates of 70 cents on second class articles and 44 cents on third-class applying within a distance of 271 miles from Prichard, Ala., to Verona, Miss., on shipments over an extreme distance of 640 miles to East St. Louis, and which in the next 200 miles fall to 30 cents second class, and 22 cents third class. HELD, prima facie unreasonable and unjustly discriminatory against points within the group which are nearer to East St. Louis, and unlawful as to shipments from Verona. Complainant offered the defendant a carload of potatoes at Verona, Miss., and asked that the shipment be forwarded to Cleveland, O., via a connecting line with which defendant had at the time through billing arrangements and through rates, but defendant's agent refused to receive and route the shipment in accordance with such direction, and complainant was thereby damaged. HELD, complainant was entitled to have his merchandise carried over the route which he directed, and the failure of defendant to receive and forward the shipment was a discrimination against complainant, reparation awarded. Rea v. M. & O. R. Co., 7 I. C. C. 43.

(f) Complainant attacked as unreasonable and unjustly discriminatory rates

charged from Kansas and Missouri to Texas on flour as compared with rates on wheat. Rates from Kansas and Missouri to Texas are five cents per 100 pounds higher on flour than on wheat, and such differential is not applied on flour or wheat carried in any other direction. In previous decisions, 4 I. C. C. 417, 3 I. C. C. 400 and 8 I. C. C. 304, this differential has been before the Commission and there has been no such change in conditions governing the traffic as to warrant interference by the Commission. HELD, differential attacked not unreasonable or unjustly discriminatory, complaint dismissed. Mayor and Council of Wichita, Kas., v. M. P. R. R., 10 I. C. C. 35.

(g) Complainant attacked classification on cowpeas in the southern classification as unreasonable and unduly discriminatory. Cowpeas, like clover and other grasses are sown and then turned over by the plow for the purpose of soil improvement, but this is not a reason why cowpeas should, in the adjustment of freight rates, be classed as a fertilizer, which is applied directly to the soil; and cowpeas are further distinguished from fertilizer in that fertilizer furnishes the carrier much greater tonnage, cowpeas have much greater value, and the vine as well as the pea itself is used as a food product. Defendant, L. & N., classifies cowpeas in class D of its freight classification, which also includes grain, while defendant, A. C. L., imposes a charge of 1 cent higher than class D rates on cowpeas shipped from North and South Carolina points to New Orleans, La. HELD, charge exacted by the A. C. L., is unreasonable and unjust and cowpeas should be placed by it in class D and carried at the rates fixed by that class. Swaffield v. A. C. L. R. R., 10 I. C. C. 281.

(h) Complainant attacked as unreasonable and unduly discriminatory rates on cattle and hogs as compared with livestock products from west, northwest and southwest to Chicago, Illinois. The desire of a carrier to secure additional business for its line of road does not justify a change in the relation of rates resulting in a higher rate upon cattle and hogs, the raw material, than upon livestock products, the manufactured article, where, as in this case, the articles are in sharp competition with each other in markets of purchase and sale, and where it appears that upon other lines and in other sections rates are generally no higher, and in many instances much lower, on the traffic prejudiced than on that favored by the change, and where numerous and important industries, which have been built up and maintained under the former adjustment, and those interested in such industries, will be injuriously affected by the action taken. Such discrimination is not justified by difference in cost of transportation or otherwise, and subjects the traffic in cattle and hogs at Chicago and other points, and those interested therein, to undue and unreasonable prejudice and disadvantage, and gives to the traffic in the products of hogs and cattle, and to shippers and localities interested in such traffic, undue and unreasonable preference and advantage, in violation of the act. HELD: The action of the C. G. W., in reducing rates on livestock products lower than on livestock and the action of other defendants in following with reductions on their lines, is unduly discriminatory against shippers of livestock and defendants ordered to withdraw the tariffs in question. Chicago Live Stock Exchange v. C. G. W. R. R., 10 I. C. C. 428.

(i) Complainant attacked as unreasonable and unduly discriminatory rates on shingles higher than on lumber from Duluth, Minn., to Chicago, Ill. Generally speaking, the demand for and use of shingles as building material are quite as important and general as for any other lumber product, and the necessity is equally as great that such product shall be charged only a reasonable and equitable rate for its transportation. Shingles being put up in bundles for shipment, the work of handling is facilitated so that no more, and perhaps even less, labor is required than for the handling of many other lumber products classed with and charged the same transportation rate as lumber, such as laths, shooks, sawdust and box and moulding material and other stuff of the regular dimensions. The weight of shingles that can be loaded in a car will also compare favorably with the above named and many other lumber products taking the lumber rate. HELD: Defendants unduly discriminate against shingles, and rates should be the same on lumber as on shingles. Duluth Shingle Company v. D. S. S. & A. R. Co., 10 I. C. C. 489.

IMPORTANT CASES SINCE 1908

(j) A mere showing of the fact that

the rating in one classification territory is different from the rating on the same article in another territory does not establish that either of the ratings are unreasonable or unduly prejudicial. Dixie Mfg. Co. v. B., C. & A. Ry. Co., 31 I. C. C. 337, 340.

(k) Contention that the state of relativity between commodities which features the classification as the real foundation of its structures must necessarily extend to commodity rates, not sustained. Macaroni & Noodle Mfrs. v. A. G. S. R. R., 50 I. C. C. 289, 292.

(l) Western and southern classification rating of third class on Sudan seed, l. c. l., found unreasonable as compared with lower ratings contemporaneously maintained on sorghum seeds, and fourth class ratings prescribed for future. The transportation characteristics of Sudan seed are substantially similar to those of the competitive sorghum seeds, and there is no justification for according it the higher rating applicable to grass seeds. Mangelsdorf Seed Co. v. C., B. & G. R. R. Co., 74 I. C. C. 665.

§18½. Split Classes.

IMPORTANT CASES SINCE 1908

(a) Continued use of the intermediate or split classes of Rule 25 and Rule 26 in official classification constitutes one of the principal difficulties in reaching uniform ratings. Consolidated Classification Case, 54 I. C. C. 11.

§19. Evidence and Procedure.

See Evidence; Procedure.

CASES 1887-1908

(a) In a proceeding to correct a classification of freight made by the initial carrier, which freight before reaching its destination must pass over the roads of several carriers, it is proper to make all such carriers parties; but if the initial carrier alone is made defendant, the proceeding is not for that reason defective. An order requiring that carrier to make the correction will be effectual for the purposes of all subsequent consignments, and there is no difficulty in its being complied with, without asking the consent of others. Hurlbert v. Lake Shore & Michigan Southern R. Co., 2 I. C. R. 81, 82.

(b) Complainant attacked as unjust and exorbitant rate upon mineral water in tank cars and an improper classification of mineral water. All of the defendants parties to the through rate were not made parties to the complaint, therefore complaint dismissed. Michigan Congress Water Co. v. C. & G. T. R., 2 I. C. C. 428.

(c) When an informal complaint is made in regard to such a matter against a classification committee alone, the Commission will, if it can, endeavor to reach some ground that will fairly and justly adjust the differences between the complaining shippers and the carriers, but if it appear that these conflicting differences exist not only between the carriers and the complaining shippers, but that there are other localities and other dealers whose interests are directly involved and who are opposed to the relief sought by the complaining shippers, then the practice of the Commission is not to proceed in any investigation of the complaint until the complaint is put into such shape that such localities and dealers, as well as the carriers complained of, can have an opportunity to be heard. McMillan & Co. v. W. Classification Committee, 3 I. C. R. 282.

(d) Whether a complaint to the Interstate Commerce Commission in regard to classification and rates is formal or informal, it is not enough that it be made against a classification committee or a rate committee concerning grievances alleged to be perpetrated by carriers in the matter of classification and rates, who are represented to some extent by such classification or rate committee in making rates, but which carriers are not bound to accept such classification and rates and do not accept them any further than they see proper to do so; in such a case the carriers who, it is alleged, are guilty of perpetrating the grievances should be made the parties defendant to the complaint and the complaint should point them out by name. McMillan & Co. v. W. Classification Committee, 3 I. C. R. 282.

(e) Complainant attacked classification on hides and pelts as provided in the western classification as unreasonable and unjustly discriminatory. The Western Classification Committee were the only defendants, notwithstanding carriers are not obligated to publish the recommendations of the Committee on classification matters. HELD: As all carriers involved were not made parties to the complaint, complaint dismissed. James McMillan & Co. v. Western Classification Committee, 3 I. C. C. 282.

(f) When on complaint of a carload shipper unjust discrimination is alleged to result from equal rates on carload and less carload quantities of the same commodity, the burden of proof is upon the complainant. Brownell v. C. & C. M. R. Co., 4 I. C. C. 285.

(g) An order of the Commission requiring a carrier to desist from enforcing a classification of specified articles higher than the classification, which upon the facts is found to be lawful, is not prescribing a rate for the future. Classi-

fication determines the relation of rates as between commodities, not the rate itself, and when a commodity is transferred from a higher to a lower class, the revenues of the carrier are not necessarily diminished, since it may advance the rates applicable to those classes. Myer v. Cleveland, Cincinnati & St. L. R. Co., 9 I. C. C. 78.

(h) Where the chief question involved is the justice of the change in the classification of the comodities shipped by complainant, and the decision will affect all shippers of the same commodity in the classification territory, the profits secured by complainant from the operation of the railway connected with the defendant's line are not material, and the case must be decided in accordance with the principle which properly governs the classification of freight articles. Proctor & Gamble Co. v. Cincinnati, H. & D. R. Co., 9 I. C. C. 440.

(i) A submission by a railway company of a shipper's claim for carload rating on a mixed carload of lemons and pineapples should be treated as a case upon complaint and answer. Roth v. Texas & P. R. Co., 9 I. C. C. 602.

IMPORTANT CASES SINCE 1908

(j) A bare reference to the ratings on particular commodities without supporting data as to volume of movement, weight, value, density, packing, and other criteria for determining the oppositeness of the comparison, is not helpful in determining the reasonableness of the ratings under attack. National Confectioners' Asso. v. A. & R. R. R., 49 I. C. C. 566, 572.

(k) When class rates are charged on isolated shipments, and it is not shown that the commodity is improperly classified or that the class rate is unreasonable, reparation will not be awarded. Multibestoc Co. v. S. P. Co., 73 I. C. C. 491, 492.

ALL OTHER CITATIONS

Milk and Cream Rates to New York City, 45 I. C. C. 412, 427.

§20. Different Classification Territories.

See Evidence §13 (1); Through Routes and Joint Rates §20¾.

CASES 1887-1908

(a) The difference in classification adopted by the "western classification" (which applies to business from the Pacific Coast to all points west of the Missouri River), between "raisins" and "dried fruits," by which a higher car load rates is imposed on raisins than on other dried fruits, while by the "Pacific Coast eastbound classification" (which applies to business over the same roads from the Pacific Coast to points on the Missouri River and east thereof), such distinction is not imposed, is, in connection with the different rules of the two classifications as to mixed carloads, an unreasonable discrimination. Martin v. Southern Pacific Co., 2 I. C. R. 1.

(b) The fact that different rates and classifications are in force in different sections of the country will not of itself, without proof of unlawful discrimination or disadvantage or of unreasonably high rates, warrant an extension of the lower rate and classification to the section where the higher rate and classification are applied. F. Schumacher Milling Co. v. Chicago, R. I. & P. R. Co. (Conn.), 4 I. C. R. 373.

(c) The complaining company has shown no reason why roads using the Western Classification should adopt the Official Classification as to cereal products. Neither is there sufficient evidence in this case to justify an order directing the defendants to establish the mixed carload rate prayed for in the complaint. But this will not preclude the filing of another complaint based on other grounds, and raising the question of unreasonable or relatively unreasonable rates on cereal products. The F. Schumacher Milling Co. v. The Chicago, R. I. & P. R. Co., 4 I. C. R. 373.

(d) The fact that different rates and classifications are in force in different sections of the country will not of itself warrant an extension of the lower rate and classification to the section where the higher rate and classification are applied. There must be proof of unlawful discrimination or disadvantage, or of unreasonably high rates, to procure an order directing changes in classification. F. Schumacher Milling Co. v. C., R. I. & P. R. Co., 4 I. C. C. 373, 378.

(e) The complaining company has shown no reason why roads using the Western Classification should adopt the Official Classification as to cereal products. Neither is there sufficient evidence in this case to justify an order directing the defendants to establish the mixed carload rate prayed for in the complaint. But this will not preclude the filing of

another complaint based on other grounds, and raising the question of unreasonable or relatively unreasonable rates on cereal products. F. Schumacher Milling Co. v. C., R. I. & P. R. Co., 6 I. C. C. 61.

(f) The fact that different rates and classifications are in force in different sections of the country will not of itself, without proof of unlawful discrimination or disadvantage or of unreasonably high rates, warrant an extension of the lower rate and classification to the section where the higher rate and classification are applied. F. Schumacher Milling Co. v. Chicago, R. I. & P. R. Co., 6 I. C. C. 61.

(g) Complainant attacked as unreasonable and unjust class rate of 30c charged on empty burlap bags, less carloads, from Newark, N. J., to Stanley, Luray and Greenville, Va., via the Pennsylvania C. V. and N. & W. A rate of 22c is charged to Barboursville and Charlottesville, Va., via the Pennsylvania, P., B. & W., and Southern. This difference in rate is brought about by different classifications, the first group being on the eastern classification, the second on the southern classification. Bags are third class in official and fifth in southern. His competitors are able to ship the bags at the 22c rate to the destinations last mentioned, they to be filled with bark and reshipped to Newark. HELD: Rate attacked unreasonable to extent it exceeded 22c. Henry M. Rau v. Pennsylvania R. R., 12 I. C. C. 200.

IMPORTANT CASES SINCE 1908

(h) While a uniform classification throughout the United States would doubtless tend to simplify the interrelations of tariffs and perhaps go far to level existing inequalities, it does not appear that the desired end would be attained by spreading western classification over official classification territory. Milburn Wagon Co. v. A. A. R. R. Co., 32 I. C. C. 582, 587.

(i) A mere showing of the fact that the rating in one classification territory is different from the rating on the same article in another territory does not establish that either of the ratings are unreasonable or unduly prejudicial. Western Newspaper Union v. A. & R. R. R., 34 I. C. C. 326, 328.

(j) Difficulty of complying with the law because of lack of uniformity in the three classifications can not be accepted as an excuse for existing violations. Memphis Freight Bureau v. St. L., I. M. & S. Ry. Co., 39 I. C. C. 224, 238.

(k) In large part different ratings in the three classification territories are not due to actual or substantial differences in circumstances and conditions, but are the result of mere differences of opinion and the natural inclination of traffic officials to give expression to their respective theories of classification. Consolidated Classification Case, 54 I. C. C. 9.

(l) Differences in percentage relationships that are revealed when the three classification territories are compared with each other should not constitute a bar to efforts toward uniform ratings except in so far as carload freight in the lower classes is concerned. The percentage relationships are not uniform even within any of the three classification territories; nor among the tariffs of the same system of railroads or even for different distances in the same tariff. Consolidated Classification Case, 54 I. C. C. 1, 12.

(m) The Commission's conclusion is that ordinarily there can be no justification for a different rating on an article when transported wholly within a state than when moved into or out of the state or between states in the same general territory. Consolidated Classification Case, 54 I. C. C. 1, 70.

(n) Eastern trunk line territory, as that expression is generally understood, does not embrace New England. Peoria, Board of Trade v. A., T. & S. F. Ry. Co., 73 I. C. C. 532, 534.

(o) First class rating and rates, governed by western classification, on automobiles and chassis, freight, set up, from points in various states to points in Texas found not unreasonable as compared with second-class rating and rates applicable in official and southern classifications, which lower ratings and rates were subsequently established in western classification. State Highway Department of Texas v. Director General, as Agent, 73 I. C. C. 741.

(p) A mere showing of a reduction in a rating or a difference between the ratings in different classifications affords no basis for a finding of unreasonableness. State Highway Department of Texas v. Director General, as Agent, 73 I. C. C. 741, 742.

(q) Conditions differ in different classification territories and the rates in one territory are not of controlling importance in determining the reasonableness of rates in another territory on the same kind of traffic. Oliver v. O. G. & N. E. Ry. Co., Unrep. Op. A-496.

(r) Rates yielding excessive charges are indefensible, and this judgment is not weakened by comparisons showing rates in other territories apparently as high. National Petroleum Asso. v. Director General, as Agent, 78 I. C. C. 711, 717.

(s) The fact that the former ratings in the southern classification were much higher than the ratings in the official and western does not demonstrate that the higher rating was unreasonable. Diamond Match Co. v. Director General 88 I. C. C. 435, 436.

Co., 83 I. C. C. 761, 765.

§21. Follow Lot Shipments.

See Supra §16½; Follow-Lot Shipments; Minimums.

IMPORTANT CASES SINCE 1908

(a) It is not unreasonable to restrict the follow-lot privilege to machinery where the minimum is 30,000 pounds or more. Western Classification Case, 25 I. C. C. 442, 449.

(b) The carriers some years ago proposed that rule 7, section 2 (e), Western Cassification No. 51, should provide that the overflow, no matter how large, must be marked by the shipper as is l. c. l. freight. The Commission held the burden of marking overflow shipments should not fall on either party exclusively. Shippers having knowledge of the volume of shipments should be charged with the expense of ordering cars of the proper size, and carriers with the duty of furnishing cars of the size ordered. "Follow-lot" shipments should be marked by the shipper of the "follow lot," whenever they constitute an overflow resulting from the failure of the shipper to designate the dimensions of cars required for his shipments. But where the shipment could be loaded in a car of the size ordered by the shipper and two cars were furnished by the carrier, the marking, where necessary, should be done by the carrier. In Re Suspension of Western Classification No. 51, 25 I. C. C. 442, 485.

(c) Follow lots should be marked by the shipper. But where the shipment could be loaded in a car of the size ordered by the shipper and two cars are furnished, the marking should be done by the carrier. Western Classification Case, 25 I. C. C. 442, 485.

(d) The last car of each kind of ore from a cargo or stock pile should be transported at carload rates and actual weight. The general rule of the official classification governing part lot or follow lot shipments does not apply to bulk commodities, and it would seem that carriers would be justified in prescribing a minmum weight that would at least return revenues sufficient to cover the cost of transporting the car and its contents. Iron Ore Rate Cases, 41 I. C. C. 181, 206.

(e) Follow-lot and two-for-one rules are of general application in the west and in connection with transcontinental traffic from the west to the east. Both kinds of rules are desirable, and once established can be abrogated only for exceptional reasons. Furnishing Cars at Carrier's Convenience, 42 I. C. C. 379, 381.

(f) Both Official and Western Classifications provide that when parts or pieces constituting one or more complete articles are shipped at one time, by one shipper, to one consignee and destination, they will be charged at the rate provided for the complete article. Seth Thomas Clock Co. v. N. Y., N. H. & H. R. R. Co., Unrep. Op. A-213.

(g) Three separate l. c. l. shipments loaded in one car were billed to three consignees at two destinations, and three separate freight bills and three separate bills of lading were issued. Failure of carriers, after shipments left point of origin, to divert to one of the consignees as a c. l. shipment or to provide by rule for such diversion, found not unreasonable or otherwise unlawful. Consolidated Rendering Co. v. B. & M. R. R., 77 I. C. C. 101.

ALL OTHER CITATIONS

In Re Suspension of Western Classification No. 51, 25 I. C. C. 442, 607; Frick Co. v. C. V. R. R. Co., Unrep. Op. A-362; Heyman & Co. v. Rutland Transit Co., Unrep. Op. 2232; Teasdale & Co. v. V. & S. Ry. Co., 38 I. C. C. 565, 567; Byrd v. Atlantic Coast Line R. Co. (S. C. 1916), 90 S. E. R. 181. Crown Columbia Paper Co. v. Pa. R. R., 44 I. C. C. 495; Johns-Manville Co. v. L. V. R. R. Co., 53 I. C. C. 527; United Verde Extension Mining Co. v. Director General, 57 I. C. C. 483.

V. REASONABLENESS AND APPLICATION.

See Class Rates; Commodity Rates §3.

§22. In General.

CASES 1887-1908

(a) Pearline must be placed in fifth class freight in classification of Southern Railway & Steamship Association, and relative difference in rates on pearline and common soap must not exceed difference of sixty cents per 100 pounds on pearline and thirty-three cents on common soap. Pyle v. East Tennessee, Va. & Ga. R. Co., 1 I. C. R. 600, 767.

(b) It was not just or reasonable that the defendant railroad company should give a low special rate upon coarse lumber in other forms, to the exclusion of ties. Reynolds v. Western N. Y. & Pa. R. Co., 1 I. C. R. 685.

(c) The railway officials who have made a classification can not testify to their understanding of its construction. A classification sheet is put before the public for general information; it is supposed to be expressed in plain terms so that the ordinary business man can understand it, and, in connection with the rate sheet, can determine for himself what he can be lawfully charged for transportation. The persons who prepared the classification have no more authority to construe it than anybody else, and they must leave it to speak for itself. Hulbert v. Lake Shore & Michigan Southern R. Co., 2 I. C. R. 81.

(d) Under a classification which puts lumber in carload lots in the sixth class and unfinished wagon materials in the fifth class, it is HELD that hub blocks which are prepared as such to be sold to the manufacturers of hubs and of wheeled vehicles, but upon which only so much labor has been expended as is needful to put them in condition for seasoning are to be regarded as the raw material upon which the process of manufacture of hubs is not yet begun, just as boards are the raw material from which wagon boxes are made. The blocks belong, therefore, when not otherwise specified in the classification sheet, with lumber instead of with unfinished wagon materials. Hulbert v. Lake Shore & Michigan Southern R. Co., 2 I. C. R. 81.

(e) It is competent to prove by the testimony of witnesses in what sense terms of art or terms peculiar to any occupation or business are used by those engaged in such occupation or business. But when such terms are made use of in a classification sheet to designate the product of particular employment, they are supposed to be used as understood in that employment, and it is not competent for railroad experts, when the meaning of the classification is in question, to testify in what sense they are understood in transportation circles. Hulbert v. Lake Shore & Michigan Southern R. Co., 2 I. C. R. 81.

(f) Terms of art, or terms peculiar to any occupation or business, used in a classification sheet to designate the product of a particular employment, are supposed to be understood in that employment; and it is not competent for railroad experts, when the meaning of the classification is questioned, to testify in what sense they are understood in classification circles. Hurlburt v. Lake Shore & M. S. R. Co. (Com.), 2 I. C. R. 81.

(g) The railway officials who have made a classificatiton can not testify to their understanding of its construction. A classification sheet is put before the public for general information; it is supposed to be expressed in plain terms so that the ordinary business man can understand it, and, in connection with the rate sheet, can determine for himself what he can be lawfully charged for transportation. The persons who prepared the classification have no more authority to construe it than anybody else, and they must leave it to speak for itself. Hurlburt v. L. S. & M. S. R. R., 2 I. C. C. 82, 83.

(h) Complainant attacked as unreasonable and unjust rates on Hostetter's Bitters from Pittsburgh, Pa., to points in United States. Prior to April 5, 1887, bitters were rated fourth class carloads and third class carloads, subsequent thereto first class carloads and less carloads. Weight on carload shipments usually 24,500 pounds. It is manifest that before the passage of the act bitters were accorded exceptional transportation advantages. The favorable rates had little, if any, relation to the marketable value of the property or to the charges for carrying analogous articles. They were part of the former railroad practices of affording special advantages to favored shippers, based upon no principle whatever, and in violation of their duty to the public to apportion their charges justly and with fair regard to the value of the service. In the new adjustment made necessary by the act, the commodity shipped by the petitioners being similar for transportation purposes to many others, and no adequate reason existing for giving it a class and rate of its own, was very properly classed with other things similar in commercial value, and in the character of the service required of the carrier. The classification in less carloads has been raised to first class for the reason that, all things considered, it properly belongs in that class, which includes a variety of similar articles, and because a lower classification without sufficient reasons to justify it would be an undue preference, and in violation of the law. HELD: Rating attacked not unreasonable, complaint dismissed. Myers v. Pennsylvania Co., 2 I. C. C. 403.

(i) After the Act to Regulate Commerce, the Official Trunk Line classification superseded the former classification, and bitters were classified in first class with other liquids similar in character, marketable value and manner of shipment. The class rates under the official classification are lower than under the one previously used. Myers, Survivor of Hostetter & Co., v. Pennsylvania, 2 I. C. R. 403.

(j) Complainant attacked classification and rates applicable to Hostetter's Stomach Bitters, as unjust and unreasonable. Prior to the effectiveness of the act bitters took a preferred classification. HELD: A former special and preferred rate is not a fair test of the reasonableness of a present rate. Complaint dismissed. Myers v. Pennsylvania Company, 2 I. C. C. 403.

(k) The proper classification of an article is to be judged relatively by the classification of other articles similar in character, quality and conditions of transportation. Myers v. Pennsylvania Company, 2 I. C. C. 403, 405.

(l) Complainant attacked as unjust discrimination rates on corn and its products from Indianapolis, Ind., to seaboard points. A discrimination between the rate on corn and its direct products from a given locality resulting from a reduction of the rate on corn below the rate on its direct products, which subjected persons in that locality engaged in the business of manufacturing corn into its direct products and of selling the same to unreasonable prejudice or disadvantage; and was without necessity or advantage to the carrier, or any reason founded on the character or condition of the traffic. HELD: To be in violation of section 3 of the Act, notwithstanding the new rate on corn was open to all persons equally and with equal service. Bates v. Pennsylvania R. Co., 2 I. C. C. 715.

(m) A manufacturer's description of an article to induce its purchase by the public also described it for transportation, and carriers may accept his description for purposes of classification and rates. Carriers are not required to analyze freight to ascertain whether it is in fact inferior to the description or public representations under which it is sold, in order to give it a lower rate corresponding to its actual value. Andrews Soap Co. v. P., C., C. & St. L. R. Co., 3 I. C. C. 77, 79.

(n) Where questions of classification and rates are involved as to one particular article of freight, it is often necessary to examine and consider the classification and rates upon other articles in which the same calculations in respect of value, bulk and expense of handling, and of carriage, would to a considerable extent enter, and for the purpose of such comparison it is not indispensably necessary that the articles should be competitive with each other, though if they are competitive then this feature must more strongly bring to view the fact of discrimination in rates, if there be such. Harvard Company v. Pennsylvania Company, 3 I. C. C. 257, 261.

(o) Complainant charged discrimination in rates between corn and corn products from Indianapolis, Ind., to New York. Previous opinion found in 2 I. C. C. 715. Upon rehearing, HELD: The additional evidence warrants a finding contrary to what appeared and was found in the original hearing, that the cost to the defendants of transporting the direct products of corn, including terminal expenses, properly chargeable as freight charges, between Indianapolis and seaboard points, is greater on the product than on raw corn. The former order should be vacated. Bates v. Pennsylvania R. Company, 3 I. C. C. 296.

(p) The Commission will not hold that a classification that was wrong should be adhered to, although its change might work injury to individuals whom the wrong classification unduly favored. Potter Mfg. Co. v. C. & G. T. R. Co., 4 I. C. C. 223, 226.

(q) Celery should be classed with cauliflower, asparagus, lettuce, green peas, string beans, oyster plant, egg plant and other vegetables enumerated in Class C of the Western Cassification, rather than with berries, peaches, grapes, and other fruits specified in Class III. thereof. Tecumseh Celery Co. v. Cincinnati, J. & M. R. Co. (Com.), 4 I. C. R. 318.

(r) For that portion of its line over which the Western Classification is in force the Wabash road should class celery with cauliflower, asparagus, lettuce, green peas, string beans, oyster plant, egg plant, and other vegetables enumerated in Class C of that Classification, rather than with berries, peaches, grapes,

and other fruits specified in Class III. thereof, and the defendants should transport celery from Tecumseh to Kansas City at no higher rate per carload than they charge for carrying a carload quantity of any of said other vegetables named in Class C aforesaid; and mixed carloads of celery and cauliflower or other vegetables specified in said Class C of the Western Classification should be transported by defendants from Tecumseh to Kansas City at no higher rate per carload than they charge for carrying a carload quantity of either of said vegetable articles embraced in that class. Tecumseh Celery Co. v. Cincinnati, J. & M. R. Co., 4 I. C. R. 318.

(s) Cost of service is only one of the elements to be considered in determining proper classification and relative rates for different articles. While the difference in cost to the carrier in transporting cereal products and flour is not in itself sufficient to warrant a higher classification upon cereal products, these products range higher in value than flour, and in the matter of volume of traffic afforded there is a very wide difference in favor of flour; and there are other conditions compelling a low rate upon flour which do not apply in the transportation of cereal products. It appears, moreover, that the complaining company controls the production of half the cereal products manufactured in this country, and, under the present classification and rates, is an active competitor of other manufacturers of cereal products whose mills are located nearer to the points of destination involved in this case. The F. Schumacher Milling Co. v. The Chicago, R. I. & P. R. Co., 4 I. C. R. 373.

(t) Complainant attacked as unreasonable classification and rating on returned empty egg cases from Providence, R. I., to Chicago, Ill., Burlington, Ia., and other western points. The classification provided for first class rates applicable on egg carriers or cases new, and third class on egg carriers or cases old, rates 82c on first class and 55c third class. By a change in the classification the rating was advanced to first class on egg carriers or cases old. The evidence submitted was insufficient for the Commission to determine the question. HELD: The defendants should be allowed time to consider whether shippers generally are not unduly prejudiced by the rating complained of and take or refrain from taking action accordingly, and if the carriers fail to take satisfactory action, complainants may have the case reopened. Complaint dismissed. Rhode Island Egg and Butter Co. v. L. S. & M. S. R. Co., 4 I. C. C. 512.

(u) Upon consideration of the great reduction which has taken place in the value of window shades, the arbitrary increase of shade classification by the carriers during the progress of this proceeding, and all the other facts and circumstances herein which pertain to the rights of shade shippers and consignees generally, and of purchasers of that article of household necessity, HELD: That the classification of window shades as first class in the Official Classification has become unjust, and that the legal duty of defendants to so classify traffic and fix charges thereon that the burdens of transportation are reasonably and justly distributed among the articles they carry, requires them to reduce their classification of window shades to the class which, under the Official Classification, is now applied to "window hollands and shade cloth, plain, uncut and undecorated." Page v. Delaware, L. & W. R. Co., 4 I. C. R. 525.

(v) Bottles of medicine separately wrapped and shipped together in a box from another state are not original packages after the box is opened. State of Missouri v. Parsons, 5 I. C. R. 250.

(w) Cost of service is only one of the elements to be considered in determining proper classification and relative rates for different articles. While the difference in cost to the carrier in transporting cereal products and flour is not in itself sufficient to warrant a higher classification upon cereal products, these products range higher in value than flour, and in the matter of volume of traffic afforded there is a very wide difference in favor of flour; and there are other conditions compelling a low rate upon flour which do not apply in the transportation of cereal products. It appears, moreover, that the complaining company controls the production of half the cereal products manufactured in this country, and, under the present classification and rates, is an active competitor of other manufacturers of cereal products whose mills are located nearer to the points of destination involved in this case. F. Schumacher Milling Co. v. C., R. I. & P. R. Co., 6 I. C. C. 61.

(x) Upon consideration of the great reduction which has taken place in the value of window shades, the arbitrary increase of shade classification by the carriers during the progress of this proceeding, and all the other facts and circumstances herein which pertain to the rights of shade shippers and consignees generally, and of purchasers of that article of household necessity, HELD: That the classification of window shades as first class in the Official Classification has become unjust, and that the legal duty of defendants to so classify traffic and fix charges thereon that the burdens of transportation are reasonably and justly distributed among the articles they carry, requires them to reduce their classification of window shades to the class which, under the Official Classification, is now applied to "window hollands and shade cloth, plain, uncut, and undecorated." Alanson S. Page v. D., L. & W. R. R. Co. et al., 6 I. C. C. 148.

(y) Complainant attacked as unjust, unreasonable and unduly discriminatory classification rating on window shades. Original order dated March 23, 1894. Upon rehearing, HELD: Original order vacated and new order entered containing the same general requirement, but with a proviso permitting the defendants to restrict their transportation of window shades at third class rates to those limited to a specific maximum valuation at the time of shipment, and to prevent excessive undervaluation for transportation purposes of the much more expensive grades by such regulations as they may be advised are just and lawful. Page v. D., L. & W. R. Co., 6 I. C. C. 548.

(z) Complainant attacked classification rating on open end envelopes, though made by a different and cheaper process than that employed in the manufacture of other open end or side envelopes, and usually from an inferior grade of paper, are nevertheless made, used and shipped like merchandise envelopes, and not like paper bags, which defendants place in a lower class; and rating complainant's envelopes in the higher class provided for merchandise envelopes is not unlawful, complaint dismissed. Wolf Brothers v. Allegheny Valley R. Co., 7 I. C. C. 40.

(aa) Classifying open-end envelopes made for enclosed merchandise put up in paper boxes and shipped in wood cases as first class in less than carload lots and third class in carload lots, instead of as paper bags as third class in less than carload lots, and fifth class in carload lots, does not constitute a discrimination, where paper bags are usually done up in paper bundles so that a car which will with difficulty hold 20,000 pounds of envelopes will easily hold 36,000 pounds of paper bags. Wolf v. Allegheny Valley R. Co., 7 I. C. C. 40.

(bb) Hatters' furs and fur scraps and cuttings are unlawfully made double first class as compared with articles taking first class rates in defendant's classification, including hats, the finished product for which these commodities constitute raw material; and they cannot lawfully be classed higher than first class, where they are offered for transportation in packages in bulk, but of convenient size, and their value is not great, and they are not liable to be lost by damage in transit, and are more desirable for traffic than other commodities in the defendant's first class, and the difference in freight rates operate to damage complainant, who is a western manufacturer of hats, in his competition with eastern manufacturers. Myer v. Cleveland, Cincinnati & St. L. R. Co., 9 I. C. C. 78.

(cc) Complainant attacked the classification on hatters' furs and fur scraps and cuttings as unreasonable and unjustly discriminatory. Hatters' furs are classified double first class, likewise scraps and cuttings, and complaint is that he is entitled to first class on hatters' furs and second class on fur scraps and cuttings. Hatters' furs and fur scraps and cuttings are offered for transportation in packages not bulky, but of convenient size, their value is not great, they are not liable to be lost or damaged in transit, and the first class of the official classification contains hardly any article as desirable for traffic as they are. Complainant, located at Wabash, Ind., is the only manufacturer of hats west of the Atlantic seaboard territory, most of his competitors being located in the vicinity of New York. The difference in freight rates operates to damage complainant in his competition in western territory. HELD: That hatters' furs and fur scraps and cuttings as compared with articles taking first class, including hats, the finished product for which these commodities constitute raw material, are unlawfully made double first class and can not lawfully be classified higher than

first class. Myer v. C., C., C. & St. L. Ry., 9 I. C. C. 78.

(dd) The defendant carriers by keeping hay and straw in the sixth class and charging sixth class rates thereon for thirteen years or more, with the exception of a short period in 1894, were furnishing evidence that such classification and rates are reasonably high, and, while the continuance of such classification and rates is not conclusive evidence of their reasonableness, it is in the nature of an admission against them which tends to show the unreasonableness of the advance of hay and straw to fifth class rates in January, 1900, and the force of this admission becomes great in view of the largely increased business and profits of the defendants in 1899 and subsequent years. The National Hay Asso. v. L. S. & M. S. R. Co. et al., 9 I. C. C. 264.

(ee) The localities in Official Classification Territory wherein hay and straw are produced were discriminated against by the act of several carriers in advancing these commodities from the sixth to the fifth class, and thereafter charging fifth class rates for transportation. National Hay Asso. v. Lake Shore & Michigan S. R. Co., 9 I. C. C. 264.

(ff) The advancement of hay and straw by several carriers, from sixth to fifth class, and thereafter charging fifth class rates for transportation, is unreasonable and unjust, and resulted in unlawful discrimination and prejudice against hay and straw localities in Official Classification Territory wherein those commodities are produced, and against producers, shippers, dealers, and consumers of such articles in that section of the country. National Hay Asso. v. Lake Shore & Michigan S. R. Co., 9 I. C. C. 264.

(gg) The act of carriers in keeping hay and straw in the sixth class, and charging sixth class rates thereon for thirteen years, with the exception of a short period, is evidence that such classification and rates are reasonably high; and, while not conclusive, it is in the nature of an admission which tends to show the unreasonableness of the subsequent advance of such commodities to the fifth class, the force of which becomes great, in view of the carriers' largely increased business and profits. National Hay Asso. v. Lake Shore & Michigan S. R. Co., 9 I. C. C. 264.

(hh) Complainant attacked advance in classification from sixth to fifth class on hay and straw as unreasonable and unjustly discriminatory. Advance was made January 1, 1900. The defendant carriers, by keeping hay and straw in the sixth class and charging sixth class rates thereon for thirteen years or more, were furnishing evidence that such classification and rates are reasonably high, and, while the continuance of such classification and rates is not conclusive evidence of their reasonableness, it is in the nature of an admission against them which tends to show the unreasonableness of the advance, and the force of this admission becomes great in view of the largely increased business and profits of the defendants in 1899 and previous years. Hay and straw should take the same rates. Hay, in respect of character, use, value and volume, corresponds more nearly with articles taking sixth class or lower commodity rates than with those in fifth class. Apparently all commodities which come to defendants in aggregate volume or tonnage equal to or exceeding that of hay are given commodity rates. Hay is a raw agricultural product which is grown, shipped and consumed in all parts of the Official Classification territory, and, coming to the carriers in steady and large voume, is profitable to them at sixth class rates. HELD: The advance from sixth to fifth class was unreasonable and unjust and resulted in unlawful discrimination. National Hay Association v. L. S. & M. S. Ry., 9 I. C. C. 264.

(ii) Complainant attacked the legality of the change made on January 1, 1900, in the classification of common or laundry soap from sixth to fifth class carloads and from fourth to third class less carloads as unjust and unreasonable and unduly prejudicial. The action of defendants in placing soap in carloads with common grades of grocery and general merchandise in the fifth class of their freight classification and refusing to reduce soap in carloads to the sixth class, which includes only low grade freights, held not to be unlawful, while other articles with which carload soap is properly compared are retained in the fifth class. On January 1, 1900, the less carload rating was advanced from fourth to third class and on March 10 reduced to 20 per cent less than third class, but not lower than fourth class. The difference between sixth and fourth class based on

Chicago-New York rates is 10c, between the fifth and third class 20c, and difference between 20 per cent less than third class and fifth class is 10c. HELD: Increase in classification of soap in less carloads from fourth to third class unreasonable and their subsequent practice of applying 20 per cent less than third class also unlawful. Proctor & Gamble Co. v. C., H. & D. Ry., 9 I. C. C. 440.

(jj) The action of defendant in placing soap in carloads with common grades of groceries and other general merchandise in the fifth class of their freight classification, and refusing to reduce soap in carloads to the sixth class, which includes only low grade freights, where other articles to which carload soap properly compares are retained in the fifth class, is unlawful. Proctor & Gamble Co. v. Cincinnati, H. & D. R. Co., 9 I. C. C. 440.

(kk) The action of defendants in placing soap in carloads with common grades of grocery and other general merchandise in the fifth class of their freight classification and refusing to reduce soap in carloads to the sixth class, which includes only low grade freights, held not to be unlawful, while other articles with which carload soap is properly compared are retained in the fifth class of such classification; but this shall not operate to preclude the Commission from holding in an appropriate proceeding that fifth class rates in this territory are excessive. Proctor & Gamble Co. v. C., H. & D. Ry. Co., 9 I. C. C. 440.

(ll) A cheap grade of brush manufactured and sold by complainant as a blacking dauber is not entitled, upon the facts in this case, to be classified lower than the class to which bristle brushes in general are assigned. Derr Manufacturing Co. v. Penn. R. Co. et al., 9 I. C. C. 646.

(mm) While there are exceptional instances requiring deviation from methods generally employed in constructing freight classification, it is manifest that to require the separation and grading of different classes with varying rates different grades of the same articles of freight would greatly complicate the work and go far to defeat the very purpose of classification, and even then it would be impracticable to apportion with mathematical exactness the burdens of transportation; the best result obtainable in this direction is reasonable and substantial approximation. Derr Manufacturing Co. v. Pennsylvania R. R., 9 I. C. C. 646, 648.

(nn) An arbitrary charge of $80 per car imposed by the New York, New Haven & Hartford Railroad Company for the transportation from New York to Boston of peaches and other fruit shipped from Georgia points to Boston, its haul being part of the through service between the points of shipment and destination, is unreasonable and unjust, and $50 per car would be a just and reasonable charge for such transportation. Georgia Peach Growers' Asso. v. Atlantic Coast Line R. Co., 10 I. C. C. 255.

(oo) The charge imposed by the Atlantic Coast Line Railroad Company, of one cent higher than Class D rates on cowpeas shipped from South and North Carolina points to New Orleans, is unreasonable and unjust, and cowpeas should be placed by it in Class D and carried at the rate fixed for that class. Swaffield v. Atlantic Coast Line R. Co., 10 I. C. C. 281.

(pp) The defendant, the L. & N. R. Co., classifies cowpeas in Class D of its freight classification, which also includes grain, while the defendant, the A. C. L., imposes a charge of one cent higher than Class D rates on cowpeas shipped from South and North Carolina points to New Orleans. HELD: That the charge exacted by the A. C. L. is unreasonable and unjust and that cowpeas should be placed by it in Class D and carried at the rate fixed for that class. Swaffield v. Atlantic Coast Line R. Co. et al., 10 I. C. C. 281.

(ppa) Cowpeas, like clover and other grasses, are sown and then turned over by the plow for the purpose of soil improvement, but this is not a reason why cowpeas should, in the adjustment of freight rates, be classed as a fertilizer, which is applied directly to the soil; and cowpeas are further distinguished from fertilizer in that fertilizer furnishes the carrier much greater tonnage, cowpeas have much greater value, and the vine as well as the pea itself is used as a food product. Swaffield v. Atlantic Coast Line R. Co. et al. 10 I. C. C. 281.

(qq) The Missouri, Kansas & Texas Railway Company's rate of $1.90 per ton on coal, lump and slack, from South McAlester, I. T., to Denison, Tex., a distance of 97 miles, is unreasonable and unjust,

and should not exceed $1.25 per ton. Denison Light & Power Co. v. Missouri, K. & T. R. Co., 10 I. C. C. 337.

(rr) Defendant's present rate of $1 per 100 pounds on lemons in carloads from southern California to points on and east of the Missouri River is apparently reasonable. Consolidated Forwarding Co. v. Southern P. Co., 10 I. C. C. 590.

(ss) Complainant attacked classification on sectional or elastic book cases in less carloads from Cincinnati, O., to points in the Official Classification territory. While there is much to support the view that sectional book cases might properly be placed in the first class of the official classification, it does not appear from the proofs presented that one and one-half first class rates for all book cases is an unlawful discrimination against the sectional variety, and the action of defendants in fixing the same classification and rates for sectional as for other book cases does not exceed the limits of their discretion; nor is defendant one and one-half times first class rate for the transportation of sectional and other book cases shown by the record to be unreasonable. HELD: Classification attacked not unreasonable, complaint dismissed. Globe-Wernicke Company v. B. & O. S. W. R. R., 11 I. C. C. 156.

(tt) While there is much reason to believe that sectional bookcases might properly be placed in the first class by the Official Classification Committee, the same as has been done by the Southern and Western Classification Committee, it does not follow, however, that the classification fixed by the Committee, of one and one-half times first class rates for all bookcases, is an unlawful discrimination against the sectional varieties. Globe Wernickle Co. v. Baltimore & O. S. W. R. Co., 11 I. C. C. 156.

(uu) While the Commission does not decide that one and one half times first class rates for sectional bookcases are reasonable, they do hold that the evidence submitted is not sufficient to show such unreasonableness. Globe-Wernicke Co. v. Baltimore & O. S. W. R. Co., 11 I. C. C. 156.

(vv) While there is much to support the view that sectional bookcases might properly be placed in the first class of the Official Classification, it does not appear upon the proofs presented that one-and-one-half times first class rates for all bookcases is an unlawful discrimination against the sectional variety, and the action of defendants in fixing the same classification and rates for sectional as for other bookcases does not exceed the limits of their discretion; nor is defendant's one-and-one-half times first class rate for the transportation of sectional and other bookcases shown by the record to be unreasonable. Complaint dismissed without prejudice for further investigation. Globe-Wernicke Co. v. B. & O. S. R. Co. et al., 11 I. C. C. 156.

(ww) Defendant's refusal to grant lower rates on cotton in carloads of 45,000 pounds or more is not a violation of the regulating statute. Planters' Compress Co. v. Cleveland, C. C. & St. L. R. Co., 11 I. C. C. 382.

(xx) If the rate on an article is reasonable to those who ship the great bulk of that article in the form in which it is commonly prepared for transportation, that rate does not become unreasonable to the shipper of a small quantity of the same article merely because he chooses to prepare his shipments in a form which affords the carrier a greater profit per hundred pounds, particularly when the preparation of that article in the more profitable form would impose some degree of hardship upon a large majority of shippers because of its greater expense or for other reasons. Planters' Compress Co. v. C. C. C. & St. L. Ry., 11 I. C. C. 382, 405.

(yy) The exaction of first-class rates on cotton-piece goods between Missouri River points and Denver, in view of the long-prevailing differentials in other parts of the country, and other existing conditions, is unjust and unreasonable. Kindel v. Boston & A. R. Co., 11 I. C. C. 495.

(zz) Complainant attacked classification on leather scraps in Official Classification territory, as unreasonable and unjustly discriminatory. Defendants have classified leather scraps in less carloads as third class since 1887, but in January, 1894, they limited such classification to scrap refuse from the manufacture of leather goods, and excluded strips or pieces cut from hide leather and in January, 1905, such limitation was superseded in defendants freight classification by the words "this rating will apply only on scraps not available

in the manufacture of leather goods." All leather scrap purchased by complainant contains leather pieces which can be used in the manufacture of leather goods, and the sole purpose of complainant in purchasing such leather scrap is to separate such pieces and sell them to persons having use for the various sizes and kinds. The effect of the new rule was to advance complainants commodity from third to second class, which is the rating prescribed by defendants for leather. HELD, that a third-class rating for leather scraps in less carloads is sufficiently high and that defendants present classification and rating on that traffic is unjust and unreasonable. Newman v. N. Y. C. & H. R. R., 11 I. C. C. 517.

(3a) The "Scheidel outfit" is an electrical apparatus consisting of a so-called Ruhmkorff coil, an interrupter, a small rheostat and two switches, fitted to a strong table. The parts are detachable and are shipped in separate boxed packages, except the table, which is crated. This outfit, which transforms an electrical current of low voltage into one of extremely high voltage, is used in medical and scientific work, including the use of the x-ray, and also in wireless telegraphy and in chemical works. The Western Classification places x-ray apparatus and scientific or medical instruments in double first class, and electrical apparatus, n. o. s., in first class. Complainant contends that their outfit should be treated as an ordinary electrical appliance and carried at first class rates. HELD: That under conditions now governing the manufacture and use of complainant's outfit, such outfit is properly classified by defendants with the x-ray and medical or scientific apparatus as double first class, and is not entitled to a first class rating with dynamos, transformers and other electrical machinery; but no opinion is expressed upon the justice of the first class rate for such machinery. Scheidel & Co. v. Chicago & N. W. R. Co. et al, 11 I. C. C. 532.

(3b) If the rate on a given article is reasonable to those who ship the great bulk of that article in the form in which it is commonly prepared for transportation, that rate does not become unreasonable to the shipper of a small quantity of the same article because he chooses to prepare his shipments in a form which affords the carrier a greater profit per hundred pounds. Particularly is this so when the preparation of that article in the more profitable form would impose some degree of hardship upon a large majority of shippers because of its greater expense or for other reasons. Planters Compress Co. v. M. K. & T. R. Co., 11 I. C. C. 606, 610.

(3c) The rates complained of in this case are those on cotton goods from East St. Louis, Ill., to Kansas City, Mo., and from East St. Louis to Wichita, Kans., but the real question involved is the differential in rates from eastern markets to Kansas City and Wichita, which is 57 cents via all rail and 44 cents via rail and water routes in favor of Kansas City, the rail and water routes being via Galveston, Tex., and two of the lines passing through Wichita to Kansas City. The rate of 35 cents, East St. Louis to Kansas City, is not excessive. The rate of 66 cents, Kansas City to Wichita, is extremely high for the distance of 222 miles; but for reasons stated it would not benefit complainant at Wichita and might result to its disadvantage, and would involve a ruling either that rating cotton piece goods as first class in the Western Classification is wrong or that the class rates between the Missouri River and Chicago are too high. No reason appears why the classification of cotton goods should be changed or the class rates reduced at this time. The rates from the East and the differential mentioned are not the subject of complaint nor are the water and rail lines parties thereto. HELD, that the complaint be dismissed without prejudice to further proceedings. Johnston-Larimer Dry Co. v. Wabash R. Co., 12 I. C. C. 52.

(3d) Complainant attacked as unreasonable classification on cement burial vaults, less carloads. Defendants classify cement burial vaults with iron burial vaults as second class, less carloads and apply second class rates thereon, although the cement vault is about four times heavier and occupies but little more space in the car; in carload shipments the defendants classify cement vaults as fifth class and iron vaults as third class freight. The risk of breakage in the carriage of cement vaults is insignificant; their value and the value of the materials used in their construction is much less than in the case of the iron vaults; cement vaults are also

made with unskilled labor, while iron vaults require skilled mechanics and a plant with machinery and tools. HELD, defendants should charge not to exceed third class on shipments from Indianapolis, Ind., on cement vaults. Van Camp Burial Vault Co. v. C. I. & St. L. Ry., 12 I. C. C. 80.

(3e) There is no inflexible requirement that rates upon grain and the products of the grain should be, under all circumstances, the same, but rather that carriers may, in just regard for their own interest or to meet special conditions, vary those rates within narrow limits. When once the relation has been established, business developed, and money expended upon the strength of it, then the carrier cannot, in the absence of some sufficient reason, change that relation; nor would this Commission direct a change. Howard Mills Co. v. Missouri Pacific Ry. Co., et al., 12 I. C. C. 259.

(3f) The point here is, whether where an existing classification and rate are not shown to operate injuriously to the carrier from a given point, or to give undue advantage to shippers, a change is justifiable that materially injures an important industry and a class of shippers at that point who have there built up the industry in reliance upon the continuation of a previous classification and rate first established and long maintained by the carriers themselves without complaint from any quarter. The Commission thinks not. Howard Mills Co. v. M. P. R. Co., 12 I. C. C. 259, 263.

(3g) It appears that defendants' rate on cotton waste, in bales, a by-product of cotton goods, from Augusta, Georgia, to New York is 41 cents per 100 pounds, or the same as their rate on cotton goods between the same points, though cotton waste is considerably less in value and involves much less risk and expense in transportation than cotton goods. HELD, that cotton waste should be transported at less rates than cotton goods, and that no higher rate than 35 cents per 100 pounds should be charged for its transportation by defendants, sea and rail, from Augusta to New York. The Riverside Mills v. Southern Railway Co. et al., 12 I. C. C. 388.

(3h) Complainant attacked as unreasonable rates charged on denatured alcohol from Chicago and Missouri River points to north Pacific terminals. Rates on alcohol, all kinds, are 85 cents in carloads and $1.25 less carloads, these rates being less than the rates on petroleum products, whisky and paint. Denatured alcohol is manufactured in California and is sold in the north Pacific coast cities at a price which could be met by the eastern product only by reducing the transportation charges to nothing. An effort to place denatured alcohol upon a parity with proof spirits would lead either to a large increase in the charges on the proof spirits or a practical wiping out of the charges on the denatured article. Such increase in the charges on the proof spirits would probably render futile all effort to compete with the California product. HELD, rates attacked not unreasonable, complaint dismissed. Railroad Commission of Oregon v. C. & A. R. R., 12 I. C. C. 541.

IMPORTANT CASES SINCE 1908

(3i) Where a carrier applies a combination of both classifications on traffic, the mere fact that the general rule applying Southern Classification rating on the entire haul into Official territory is in force from other points in Southern territory, does not in itself constitute undue prejudice. Virginia Mfg. Co. v. A. C. L. R. R. Co., 25 I. C. C. 68, 70.

(3j) The fact that a classification has long existed is persuasive of its reasonableness. Underwood Veneer Co. v. A. A. R. R. Co., 32 I. C. C. 265, 267.

(3k) A classification should apply universally in territory which it purports to cover, and exceptions should be made by individual carriers only for exceptional reasons. Portland Chamber of Commerce v. C. M. & St. P. Ry. Co., 32 I. C. C. 188, 190.

(3l) There is no provision of the Act, or rule of the Commission, which prescribes what rate shall apply on a combination of commodities made in course of transportation. Mixed Car Dealers Asso. v. D., L. & W. R. R. Co., 33 I. C. C. 133, 138.

(3m) There are no differentiating circumstances or conditions in the three classification territories justifying varying increases above basic rates for increased values on live stock l. c. l. Natl. Soc. of Record Assos. v. A. & R. R. R., 40 I. C. C. 347, 355.

(3n) The absence of uniformity in classification does not prima facie con-

note illegality, as difference in transportation conditions may, and frequently do, require a deviation from uniformity in particular instances to accomplish the legality and reasonableness of rates which the law exacts. National Confectioners' Asso. v. A. & R. R. R., 49 I. C. C. 566, 576.

(3o) Under the law the initiation of rates is with the carriers. In a comprehensive readjustment traffic officials of the various carriers are in the best position to prescribe the rates on the products. It is doubtless true that rates on hollow clay building tile have never been made in accordance with any system. That constitutes no good reason why a readjustment should not be made. Acme Cement Plaster Co. v. A. C. & Y. Ry., 53 I. C. C. 46.

(3p) Transportation conditions, generally speaking, have heretofore warranted a somewhat higher level of rates in territory west of the Mississippi River than in territory east thereof, but it does not follow that it is true as to all commodities on all routes, for all distances, and for all times. Commercial Club of Greeley v. C. & S. Ry., 53 I. C. C. 66, 67.

(3q) While the transportation of citrus fruits, apples, and other deciduous fruits, cabbage, and vegetables, is performed under circumstances more or less similar, these commodities do not constitute like kinds of traffic within the meaning of section 2. California Citrus League v. Director General, 58 I. C. C. 373, 392.

(3r) The absence of essential parts not affecting the identity of an article transported does not destroy its fundamental character from a transportation or tariff standpoint. Harris Bros Co. v. Director General, 60 I. C. C. 428, 430.

(3s) Fact that carriers have accorded to one article a basis of rates below normal is of itself no reason, in the absence of unjust prejudice, for requiring the establishment of the same rates on analogous articles, especially where shipper is directly benefited by the lower basis of rates already in effect. Pioneer Pole & Shaft Co. v. Director General, as Agent, 64 I. C. C. 744, 746.

(3t) When a manufacturer describes his article to the public for the purpose of making a market for it, he also describes it for purposes of carriage, and it seems as reasonable that the carrier should have the right to accept the manufacturer's representation concerning his products as that the public should be influenced by it in the purchase of the article. Cheseborough Mfg. Co. v. Director General 68 I. C. C. 555, 557.

(3u) It is possible to pick out of a classification commodities taking higher ratings than other more valuable articles, and vica versa. National Association Waste Material Dealers v. A. A. R. R. Co., 68 I. C. C. 748, 751.

(3v) Because carriers have published a lower rating on crude naphthalene, used chiefly for disinfecting purposes and as an insecticide and only to a small extent as a dye base, it does not follow that they should also give a like rating to crude anthracene, used solely as a dye base and very much more valuable. Du Pont de Nemours & Co. v. Director General, as Agent, 73 I. C. C. 129, 132.

(3w) Under similar transportation conditions finished or semifinished products ordinarily take a higher rate than the material from which they are produced, if any rate distinction is made. Lancaster Steel Products Corp. v. Director General, as Agent, 73 I. C. C. 567, 568.

(3x) A mere showing of a reduction in a rating or a difference between the ratings in different classifications affords no basis for a finding of unreasonableness. State Highway Department of Texas v. Director General, as Agent, 73 I. C. C. 741, 742.

(3y) Neither the approval by the commission of a tariff rule for future application in all classification territories, nor its existence in western territory when shipments moved, is proof of unreasonableness of the charges assessed under the provisions of a rule as stated in official classification. Kissel Motor Co. v. G. T. Ry. Co., 74 I. C. C. 45, 46.

(3z) The approval by the Commission of a tariff rule for future application in all classification territories does not prove the unreasonableness of charges assessed under the provisions of the rule as stated in official classification. Kissel Motor Co., v. G. T. Ry. Co., 74 I. C. C. 45, 46.

(4a) From a classification standpoint the establishment of a special rating on veneer, is desirable. Rating on Lumber and Veneer in Western Territory, 74 I. C. C. 247, 248.

(4b) The attempted limitation of the term "stucco" to plaster for coating walls, unduly restricts its meaning. In modern practice the term "stucco" describes more than what may technically be known as plaster, and the dictionaries accords to it the secondary definition of "any plaster or cement used for external coating of buildings." Magnesite Stucco in Western Trunk Line Territory, 74 I. C. C. 567, 569.

(4c) There is a lack of comprehensive adjustment of rates in southern territory. Generally speaking, it is not unusual in that territory to find for same distance widely varying rates, and often it is not difficult to develop numerous rates applying for some distance which compare favorably wtih almost any given rate. Increased Rates on Petroleum, 83 I. C. C. 98, 101.

Ry., 89 I. C. C. 151.

§23. Uniform or Consolidated Classification.

CASES 1887-1908

(a) The evils arising from the lack of uniformity in the existing rules in reference to rates on mixed car load shipments commented on, and the immediate adoption by the railroads of the country, of some uniform classification rule which shall definitely control the question of such shipments, recommended. Martin v. Southern Pacific Co. 2 I. C. R. 1.

(b) Where all the interstate carriers of the country, working through a committee selected by them for that purposes, are endeavoring to reach a uniform classification of freight, instead of having the various different and conflicting classifications that exist, it being apparent to the Commission that such uniform classification is a result that is greatly in the public interests, as well as in the interest of the carriers, and that has often been recommended by the Commission to the carriers, the Commission will not embarrass, delay or retard the carriers in this work by instituting investigations of its own under the 12th section of the Act to Regulate Commerce involving the classification of a few enumerated articles, transported from and to an extended area of country, but unless a formal complaint is made against the carriers in regard to such matter and a hearing of it pressed to a determination by the parties, the Commission will wait a reasonable time to see the result of the effort being made by the carriers in their efforts to arrive at a uniform classification. McMillan & Co. v. W. Classification Committee, 3 I. C. R. 282.

(c) Reserving any questions that may arise in case a uniform classification shall be established, at present an exception to a general rule of classification or rate-making may be justified by adaquate considerations in view of dissimilar conditions in different portions of the country, and when a rigid application of a general rule will be injurious to important public interests an exception is only reasonable. Kaufman Milling Co. v. Missouri Pac. R. Co., 3 I. C. R. 400.

IMPORTANT CASES SINCE 1908

(d) So the work of the uniform committee should not be discarded unless substantial reasons are shown. National Commercial Fixture Mfrs. Asso. v. A. A. R. R. Co., 40 I. C. C. 484, 488.

(e) It therefore has said it does not feel that the results attained should be jeopardized by leaving it optional with each carrier to remove undue prejudice by applying to commerce between Shreveport and Texas points the provisions of the Texas classification. This would in turn create discrimination in favor of Shreveport and against other competing points. Railroad Comm. of La. v. A. H. T. Ry., 48 I. C. C. 312, 370.

(f) The consolidated classification is the result of effort toward uniformity extending over a long term of years, and since uniform rules and descriptions

are necessary before uniformity in rates is possible, it marks an important step toward a uniform classification. Consolidated Classification Case, 54 I. C. C. 1, 3.

(g) The Commission is fully convinced that a uniform classification, with such exceptions or commodity rates as may be necessary in special cases, is practicable and desirable, and practical uniformity should not be unnecessarily delayed. Naturally there must be both increases and reductions, which may adversely or advantageously affect individual shippers and carriers, but a broad view of the situation justifies the statement that carriers and shippers alike will be amply repaid in the end by the benefits which will accrue from uniformity. The fact that a uniform classification would be of convenience is a consideration of relatively minor importance; the Commission has advocated uniformity because it is an essential part of the general scheme which contemplates greater consistency in rate making and elimination of discriminations and inequalities. Consolidated Classification Case, 54 I. C. C. 1, 9.

(h) The Commission has emphasized the point that uniformity in classification is highly desirable. Brunswick-Balke-Collender Co. v. C. G. W. Ry., 56 I. C. C. 340, 342.

(i) Complainant attacked as unreasonable fourth-class rating on soaps moving into or within southern territory. In the consolidated classification the ratings on soap in Official and Western Classifications remained fifth-class carloads, rule 28 and fourth-class, less carload, except that in Official Classification soap powders, and washing, cleansing, and scouring compounds, generally, were and are rated rule 26. Complainants seek restoration of the sixth-class any quantity rating on common soap in less carloads, subject to a released valuation. As this would tend to disrupt the desired identity in description for the three classification territories they are willing that like provisions as to released value be made in connection with the ratings in official and western classifications. The less than carload tonnage of soap in the south is heavier than in Official and Western territories and the hauls are longer. From a transportation standpoint soap is a desirable commodity, and as packed is conveniently loaded in the same car with other less carload shipments. Loss and damage claims are negligible. HELD, fourth-class rating in southern classification on soap, soap powders, and washing, cleansing and scouring compounds, in less carloads, was and is not unreasonable or illegal, complaint dismissed. Globe Soap Co. v. Director General, 62 I. C. C. 307.

(j) Fifteenth section applications were not filed with the Commission to cover consolidation No. 1. No approval from the Commission under that section was necessary as to lines under federal control. Globe Soap Co. v. Director General, 62 I. C. C. 307, 311.

ALL OTHER CITATIONS

Rates on Fruits and Vegetables, 30 I. C. C. 56, 62; Official Classification on Ratings, 37 I. C. C. 166, 181; Through Rates to Points in Louisiana and Texas, 38 I. C. C. 153, 159; Memphis Freight Bureau v. St. L., I. M. & S. Ry. Co., 39 I. C. C. 224, 240; National Society of Record Assos. v. A. & R. R. R. Co., 40 I. C. C. 347, 352, 353; Associated Railways, Classification Exceptions, 41 I. C. C. 561, 564; Showers Bros. Co. v. A. A. R. R., 48 I. C. C. 518, 519; Johnson Service Co. v. A. A. R. R., 50 I. C. C. 290, 302, 303; Brunswick-Balke-Collender Co. v. C. G. W. R. R., 56 I. C. C. 340, 342.

§24. Exceptions to Classification.

IMPORTANT CASES SINCE 1908

(a) An exception to the classification ordinarily in its very nature presupposes the existence with respect to the commodity affected by it of special conditions; it is a question separate and distinct from the rate per 100 lbs.; and if it is not justified the rate-making plan itself in which the rate per 100 lbs. is used is not involved. Lettuce from Texas points, 36 I. C. C. 511, 513.

(b) Classification exceptions must be interpreted in the light of the classification and of the specifications and definitions contained in such classification. Carriers are admonished that more care must be exercised in the preparation of exception sheets to the end that they shall harmonize and conform in respect of governing rules, conditions, definitions, and like matters, with the classification proper. Attention is also di-

rected to the requirements of the Commission's rules concerning tariff publications that references in one publication to another must be in specific, clear and unambiguous terms as to every item affected. Marx & Sons v. I. C. R. R., 36 I. C. C. 519, 521.

(c) Exceptions are governed by the rules and regulations of the classification, unless otherwise specifically provided. Chicago Portland Cement Co. v. I. C. R. R., 45 I. C. C. 477, 478.

(d) The so-called "exceptions" to the Official and other classification ratings are numerous—perhaps too numerous—but such exceptions are not in themselves improper forms of tariff publication, either under the Act or under our tariff regulations based thereon. Merrell-Soule Co. v. B. & O. R. R., 49 I. C. C. 733, 734.

(e) An exception to the classification publishing rates as percentages of certain class rates does not in and of itself provide a specific rate, but requires reference to the tariff naming class rates. Such rates can in no sense be considered specific commodity rates. Boldt Paper Mills v. Director General, as Agent, 62 I. C. C. 471, 472.

(f) An exception to the classification can not be considered a specific commodity rate, and the minimum class rate under G. O. 28 is applicable. Fort Wayne Corrugated Paper Co. v. Director General, 66 I. C. C. 669, 670.

(g) Carriers parties to Agent Dulayney's exceptions to the Southern Classification proposed a general exception to that classification reading: "Class or commodity rates on cottonseed hull fiber or shavings, other than bleached or dyed, in bales, l. c. l. and c. l., will apply on fiber or shavings secured from cottonseed hulls after the latter have been separated from the kernel or meat of the cotton seed, or secured from cotton seed after first cut or linters has been obtained." In the Southern Classification cotton linters or regins in carloads, are rated sixth class, and in less carloads take cotton rates, while cottonseed hull fiber or shavings, other than bleached or dyed, are rated carloads class A, and in less carloads second class if in bags, barrels, or boxes, or fourth class if in machine pressed bales. Commodity rates lower than the corresponding class rates are generally in effect on cottonseed hull fiber or shavings, other than bleached or dyed. If all cotton seed were fairly uniform in the amount and length of fiber carried, the test might meet practical purposes, provided the linter rates were intended only for perhaps the first 20 pounds linters cut from a ton of cotton seed. But the weakness of respondents case is that cotton seed varies widely, and there is no showing that the linter rates are intended only for a definite cut, of say, 20 pounds and the shavings rates for any subsequent cut, no matter how light the latter may be. The "first cut" requirement is not so related as to justify its proposed use. The suspended schedules would confuse the situation and create undue prejudice and preference, because they would provide for the application of rates upon commodities depending upon the process used in obtaining them rather than upon their nature. The record shows that the first cutting, called linters, from one lot of cotton seed may be no better than the second cutting, called fiber or shavings, from another lot; and that in some instances even experts have difficulty in distinguishing fiber or shavings from mill run linters. HELD, suspended schedules not justified. Cotton hull fiber or shavings from and between southern points, 77 I. C. C. 727.

Director General, 58 I. C. C. 73, 74; Boldt Paper Mills v. Director General, 55 I. C. C. 331, 332; Dey Manufacturing Co. v. P. & R. R. Ry., 74 I. C. C. 475; Magnesite Stucco between points in western trunk line territory, 74 I. C. C. 567; Rates on Clam, Mussel, and Oyster Shells, 74 I. C. C. 245; Dey Mfg. Co. v. P. & R. Ry. Co., 74 I. C. C. 475; Cancellation of l. c. l. commodity rates on vehicles from and between points in southern territory, 78 I. C. C. 37; California Packing Corporation v. Director General, 78 I. C. C. 190, 195;

Cancellation of Rating on Fruits and Vegetables, 68 I. C. C. 401; Boston Wool Trade Asso. v. Director General, as Agent, 78 I. C. C. 341, 343; Morrell & Co. v. C., B. & Q. R. R. Co., 81 I. C. C. 200, 202, 203; Consolidated Products Co. v. C. B. & Q. R. R., 89 I. C. C. 103.

§24a. Relation of Section 4.

CASES 1887-1908

(a) The use by carriers of different freight classifications, the effect of which is to increase the revenue from local traffic as compared with that obtained from through traffic, is as much a violation of the Act, §4 (the long and short haul provision), as would be the imposition of a higher tariff upon the same class in the same classification. Martin v. Southern P. Co. (Com.), 2 I. C. R. 1

§25. Refusal to Transport.

IMPORTANT CASES SINCE 1908

(a) Allegation that increased classification rating is illegal because filed with the Commission before January 1, 1920, without prior approval as then required by section 15. HELD, Fifteenth section applications were not filed to cover consolidated classification No. 1, and no approval from the Commission under that section was necessary as to lines under federal control. Globe Soap Co. v. Director General, as Agent, 62 I. C. C. 307, 311.

(b) Rates charged on intrastate shipments of box board moving during federal control found legally applicable and not unreasonable, as provision published in exceptions and tariff naming class rates charged provided that "no rate shall be applied on traffic moving under class rates lower than amount for the respective classes, and the minimum shall be the rate for the class at which that article is rated in the classification applying in the territory where the shipments move." Ft. Wayne Corrugated Paper Co. v. Director General, as Agent, 66 I. C. C. 669.

(c) Third-class rates on "jacks or screws, n. o. i. b. n., not mounted on trucks, l. c. l.," charged on shipments of automobile jacks, in less than carloads, found legally applicable and not unreasonable or unjustly discriminatory as compared with lower commodity rates on wagon jacks. Commodity description "jacks, wagon" was neither misleading nor indefinite, as the term "wagon" is commonly accepted as applying to a vehicle which is not self-propelled. Chevrolet Motor Co. v. Director General, as Agent, 66 I. C. C. 677.

(d) A proposed change in a carrier's tariffs, so as to cancel the published classification and rates on artificial silk, and include it among articles that would not be accepted for shipment, constituted a change of classification, or of regulation affecting classifications, and under Interstate Commerce Act, §§ 1, 3, 6, 13, 15, the exclusive initial jurisdiction to suspend or annul such proposed change was in the Interstate Commerce Commission, and not in the courts, as "classification," in carrier rate-making practice, is grouping or associating in a designated list of commodities, which because of their inherent quality or value, or of the risks involved in shipment, or because of the manner or volume in which they are shipped or loaded, and the like, may justly and conveniently be given similar rates. Director General of Railroads et al v. Viscose Co., 41 Sup. Ct. 151.

ALL OTHER CITATIONS

Transit Privileges on Breakfast Foods, 69 I. C. C. 115.

§26. Jurisdiction of Courts.

CASES 1887-1908

(a) If the classification made by the Legislature operates uniformly, a court cannot decide whether it was the best that could have been made. Dow v. Beidelman, 2 I. C. R. 56.

(b) An order of the Interstate Commerce Commission, prohibiting railway companies from charging any greater compensation for the transportation of window shades of any description than the third-class rate charged for the transportation of the materials used in making shades is unjustifiable as ignoring the element of the value of the service in fixing the reasonable compensation of the carrier in denying him any remuneration for additional risk. Interstate Commerce Commission v. Deleware, L. & W. R. Co., 5 I. C. R. 144.

(c) An order by the Interstate Commerce Commission requiring specified carriers to desist from charging more than third-class rates for the transportation of window shades will, upon a rehearing after a refusal of the Federal court to enforce such order, on the sole ground that it applied to shades having a very high value as well as to

cheaper varieties, be vacated and a new order entered with the same general requirement, but with a proviso permitting such carriers to restrict their transportation of shades at third-class rates to those limited to a specified maximum valuation. Page v. Deleware, L. & W. R. Co., 6 I. C. C. 548.

(d) An order having been issued in this case on March 23, 1894, requiring the defendants to cease and desist from charging more than third-class rates for the transportation of window shades, and the circuit court of the United States having declined to enforce such order on the sole ground that it applied to shades having very high value as well as to the cheaper varieties. HELD, upon rehearing before the Commission, that said order of March 23, 1894, should be vacated, and a new order entered containing the same general requirement, but with a proviso permitting the defendants to restrict their transportation of window shades at third-class rates to those limited to a specified maximum valuation at the time of shipment, and to prevent excessive undervaluation for transportation purposes of the much more expensive grades by such regulations as they may be advised are just and lawful. Page v. Deleware, L. & W. R. Co., 6 I. C. C. 548.

IMPORTANT CASES SINCE 1908

(e) The contention that it is impracticable to single out individual items for special treatment, and that a reduction in the rating will inevitably be followed by demands for similar treatment of similar commodities, HELD: Reason insufficient for refusing to accord a reasonable rating and if other articles are entitled to similar treatment, they should have it. Indian Packing Corp. v. Director General, as Agent, 64 I. C. C. 205, 210.

(f) Though the power to suspend classifications or regulations issued by the President was taken from the Interstate Commerce Commission by the Federal Control Act, the power over them after hearing remained, and the power to suspend was restored by Transportation Act, Feb. 28, 1920, and the action of the Director General of Railroads on January 28, 1920, in filing a supplement to the freight tariff schedule, effective February 29, 1920, may be treated as if taken by a carrier in passing on the jurisdiction of the courts to annul such change without resort being had to the commission. Director General of Railroads et al v. Viscose Co. 41, Sup. Ct. 151.

§27. Reparation.

IMPORTANT CASES SINCE 1908

(a) Claims for reparation, based on causes of action which, excluding the period of Federal control as provided in section 206 (f) of the Transportation Act 1920, arose within two years from the date of filing complaint, found not barred. Ball, Seligman & co. v. N. Y., P. & N. R. R. Co., 73 I. C. C. 223.

(b) Claims for reparation covering shipments which moved during Federal control can not be considered where such claims were not filed with the commission within one year after the termination of Federal control, as required by the statute. Phoenix Chamber of Commerce v. Director General, as Agent, 73 I. C. C. 284.

(c) An award of reparation would not necessarily follow from a finding that a classification rating was unreasonable. State Highway Department of Texas v. Director General, as Agent, 73 I. C. C. 741, 742.

ALL OTHER CITATIONS

Multibestoc Co. v. S. P. Co., 73 I. C. C. 491, 492; Jones & Laughlin Steel Co. v. P. C. C. & St. L. R. R., 74 I. C. C. 687.

VI. TARIFFS AND CONSTRUCTION

See Tariffs.

§28. In General.

CASES 1887-1908

(a) It is competent to prove by the testimony of witnesses in what sense terms of art or terms peculiar to any occupation or business are used by those engaged in such occupation or business. But when such terms are made use of in a classification sheet to designate the product of particular employment they are supposed to be used as understood in that employment, and it is not competent for railroad experts, when the meaning of the classification is in question, to testify in what sense they are understood in transportation circles. Hurlburt v. L. S. & M. S. R. R. 2 I. C. C. 82, 83.

IMPORTANT CASES SINCE 1908

(aa) Different rates on "peanut hulls" and "ground peanut hulls" published in the same tariff. Shipments of hulls rolled under high pressure to effect com-

pactness for shipment, as well as to reduce them to smaller particles, found to consist of "peanut hulls," as the term when used in a tariff must be construed to apply to the commodity prepared in a practical manner for transportation. Shipments found overcharged and reparation awarded. Rothschild Co. v. Director General, as Agent, 73 I. C. C. 126.

(b) First class ratings and rates assessed on a shipment of accessories and parts comprising parts of motor truck and chassis previously shipped from Chicago, Ill., to Austin, Tex., found legally applicable. Such shipment found not to consist of bodies or chassis, k. d., upon which ratings of third and second class applied. Had such articles been included in cars with the motor trucks or chassis, the rating on the latter would have been applied on the parts on basis of actual weight. State Highway Department of Texas v. Director General, as Agent, 73 I. C. C. 629.

(c) When the description of commodity given by shipper and the rating applied by carrier's inspector are in conflict, the disposition of the commodity may properly be considered, but such evidence is not controlling, particularly when shipments clearly come within description contained in applicable tariffs. Western Cartridge Co. v. Director General, as Agent, 74 I. C. C., 654, 655.

(d) The term "scrap brass" is generally understood to mean pieces of brass or old brass articles useful only for remelting purposes. Western Cartridge Co. v. Director General ,as Agent, 74 I. C. C. 654, 655.

(e) Construction or interpretation of a classification tariff in order to encourage production and assist manufacturers is improper. If carriers' officials are of opinion that a specific commodity technically is ratable a certain class under the tariff, that rating and no other should be applied. General Gas Light Co. v. A. G. S. R. R. Co., 83 I. C. C. 361, 364.

ALL OTHER CITATIONS

COAL POOLS

IMPORTANT CASES SINCE 1908

(a) Where shippers of bituminous coal organized an association to facilitate shipments to tidewater through pooling of the coal, with debit and credit charges for coal deposited and withdrawn, withdrawals by each member not being limited to his deposit, and each pool being independent of others, HELD, that, under the rule of accounts that earlier payments are to be credited against earlier debits, the withdrawals by a railroad should first be credited against its existing credits on March 1, 1920, when the railroad wa redelivered to its owners under Federal Transportation Act, §200, before its deposits were applied. In Re Tidewater Coal Exch. 292 Fed. 225.

(b) Where a railroad was a member of an association of shippers of bituminous coal organized to speed up shipments of coal to tidewater by a pooling of the coal shipped, each member being credited with the coal deposited and debited with coal withdrawn, members in withdrawing not being limited to the amount of coal deposited, each pool being independent of the others, and each overdrawing member being required to replace in kind

his withdrawal, HELD, that on the redelivery of the railroad to its owners under Transportation Act, §200, the railroad under the terms of its contract with the Director General made under Federal Control Act, §1 (Comp. St. 1918, Comp. St. Ann. Supp. 1919, §3115¾a), providing that the Director General on redelivery of the railroad should return material and supplies equal in quantity and quality to those received, etc., was chargeable only with coal which it had actually withdrawn from the pools before March 1, 1920, and the Director General could claim as not transferred to the railroad only so much of the coal credits as were not represented by coal on hand in the pools less the debits on that day. In Re Tidewater Coal Exch. 292 Fed. 225.

CLAYTON ACT

IMPORTANT CASES SINCE 1908

(a) The power to hold a hearing and decide whether or not specific sections of the Clayton Anti-Trust Act are being or have been violated confers no jurisdiction to determine whether or not certain contemplated or proposed acts would constitute violations of those sections. Charleston & Norfolk S. S. Co., 47 I. C. C. 365, 368.

COASTWISE TRAFFIC

See Port-to-Port Rates; Rail and Water Rates.

IMPORTANT CASES SINCE 1908

(a) Steamship company and S. P. Co. may compete for interstate coastwise traffic within the meaning of the Act Application S. P. Co. in re Operation S. S. Co., 32 I. C. C. 690, 696.

(b) Coal placed on a vessel for use as fuel can not be regarded as a coastwise or export movement of that commodity. Basin Supply Co. v. T. & F. S. Ry. Co., 33 I. C. C. 157, 158.

(c) Reduction of period of free storage from 10 to 5 days on coastwise freight not found justified. Lighterage and storage Regulations at New York, 35 I. C. C. 47.

(d) Cosat to coast traffic is unattractive to steamship lines because of the exceptionally high prices obtained for ocean service between the United States and foreign countries. Reopening Fourth Section Applications, 40 I. C. C. 35, 38.

(e) There is no substantial difference between export and coastwise traffic with respect to transfer from cars to ship. Export Freight Free Time, 47 I. C. C. 162, 180.

COMMODITIES CLAUSE

I. CONSTITUTIONALITY
II. APPLICATION AND CONSTRUCTION

I. CONSTITUTIONALITY.

IMPORTANT CASES SINCE 1908

(a) The provisions of section 1 of the Act, as amended June 29, 1906, making it unlawful for a railroad to transport in interstate commerce any article or commodity, other than timber and the manufactured products thereof, manufactured, mined or produced by it, or under its authority, or which it may own in whole or in part, or in which it may have any interest, direct or indirect, except such articles or commo lities as may be necessary and intended for its use in the conduct of its business as a common carrier, is in violation of the fifth amendment of the Constitution of the United States, forbidding the deprivation of private property without due process of law, since the provision is not a competent and efficient regulation of commerce directly dealing with the evil of the situation, but is destructive of property interests, which only indirectly affect interstate commerce, and a bill by the United States to enjoin carriers who have owned coal lands for many

years from violating the provision should be denied. (Buffington, J., dissenting.) U. S. v. D. & H. Co., 164 Fed. 215, 245, reversed, 213 U. S. 366, 29 Sup. Ct. 527, 53 L. ed. 836.

(b) The commodities clause in the Hepburn Act is inherently within the power of Congress to enact as a regulation of commerce, and constituted a regulation to which all pre-existing rates of the railroad companies were subordinated. U. S. v. D. & H. Co., 213 U. S. 415, Sup. Ct. 527, 53 L. ed, 836.

(c) The commodities clause of the Hepburn Act is not void because of the exception contained therein as to timber and the manufactured products thereof, since no constitutional limitation requires that such a regulation when adopted should be applied to all commodities alike. U. S. v. Del. & Hudson Co., 213 U. S. 366, 416, 29 Sup. Ct. 527, 53 L. ed 836.

(d) The commodities clause of the Hepburn Act is not unconstitutional as depriving railroads of property without due process of law, contrary to the fifth amendment, since the contentions to the contrary proceed upon the mistaken conception that inconvenience, not power, is the criterion by which to test the constitutionality of legislation. U. S. v. D. & H. Co., 213 U. S. 366, 416, 26 Sup. Ct. 527, 53 L. ed 836.

(e) The commodities clause of the Hepburn Act is not void as resulting in discrimination between carriers. U. S. v. D. & H. Co., 213 U. S. 366, 417, 29 Sup. Ct. 527, 53 L. ed. 836.

(f) The commodities clause of the Hepburn Act is not void because of the nature and character of the penalties which it imposes for violations of its provisions, since the question of the constitutionality of the clause relating to penalties is wholly separable from the remainder of the clause. U. S. v. D. & H. Co., 213 U. S. 366, 417, 29 Sup Ct. 527, 53 L. ed 836.

ALL OTHER CITATIONS

U. S. v. D. & H. Co., 164 Fed. 215, 245, reversed 213 U. S. 366, 29 Sup Ct. 527, 53 L. ed. 836.

II. APPLICATION AND CONSTRUCTION

CASES 1887-1908

(a) A railroad company carrying coal as interstate traffic is the owner of the capital stock of a coal company, which under its charter holds lands mines, buys and sells coal, and ships over the lines of said railroad company. HELD, where such conditions result in violations of the act, the only regulation practicable is the enforcement of the provision of the act requiring rates to be reasonable. Coxe Bros. & Co. v. L. V. R. Co., 3 I. C. C. 460.

(b) Where a railroad company carrying coal as interstate traffic is the owner of the capital stock of a coal company which ships over its lines and this results in violation of the Act to Regulate Commerce, the only regulation practicable is to enforce the provision requiring rates to be reasonable. Coxe v. Lehigh Valley R. Co., (Com.) 3 I. C. R. 460.

(c) The defendant railway, owning most of the mines upon its system, is engaged both in mining and transporting coal to market, and it is a matter of entire indifference to it whether a profit accrues from the mining or from the transportation; it may so adjust its rates that the mining of its coal will be conducted at a loss, the profit being derived from the carriage, and in that event every coal operator upon its line paying such rates must do business at a loss. HELD, that the only remedy available in such case to the independent operator is to secure to him a reasonable rate. McGrew v. M. P. R. Co., 8 I. C. C. 630, 641.

IMPORTANT CASES SINCE 1908

(d) The ownership of a rail line by a shipper which serves that shipper calls for closest scrutiny to ascertain whether, through divisions or allowances, rebates are made to the shipping owner. Crane R. R. v. P. & R. Ry. Co., 15 I. C. C. 248, 253.

(e) So long as the identity of ownership, in the agency of transportation and the thing transported, it is extremely difficult, if not impossible, to prevent discrimination between shippers. Cedar Hill Coal & Coke Co. v. A. T. & S. F. Ry. Co., 15 I. C. C. 73, 78.

(f) Identity of ownership of terminal and adjoining refinery is a relationship which should be subjected to the closest scrutiny. Federal Sugar Refining Co. v. B. & O. R. R. Co., 17 I. C. C. 40 47.

(g) The fact that the United States Steel Corporation, through a subsidiary, controls two roads and owns the larger portion of the ore shipped over them demands a strict interpretation of any

standard of unreasonableness which is adopted. Lum v. G. N. Ry. Co., 33 I. C. C., 541, 546.

(h) The commodities clause of the Hepburn Act was intended to prevent railroads from occupying the dual and inconsistent position of public carrier and private shipper; and in order to separate the business of transportation from the business of selling, the statute made it unlawful for railroads to transport in interstate commerce any coal in which the company had any interest, direct or indirect. Rates for Transportation of Anthracite Coal, 35 I. C. C. 220, 254.

(i) The commodities clause forbids common carriers by railroad to transport any articles or commodities, other than timber and the manufactured products thereof and company material, which they own; or in which they have any interest, direct or indirect; or manufactured, mined, or produced by them, or under their authority, from which they have not genuinely dissociated themselves before the act of transportation. The argument frequently is made that this provision conflicts with the provision of section 15 of the Act relative to the compensation of shippers by railroads for assisting them in the service of transportation or for furnishing facilities for such service and that industrial railroads and tap lines are therefore beyond the purview of the commodities clause. The argument is fallacious. Section 15 recognizes the common-law right of railroads to perform their public duties through agents and by means of hired facilities and merely provides that the Commission may regulate the compensation paid to the agent employed or to the owner of the facility hired if the agent or the owner of the facility is also a shipper. Allowances to K. G. J. & E. Ry., 41 I. C. C. 53, 59.

(j) The Act does not prohibit the mere ownership by a mining company of the stocks or other securities of a railroad over which its products are shipped. The Alaska Investigation, 44 I. C. C. 709.

(k) The conduct of the business of a common carrier by rail embraces among other things, the maintenance of its right of way. When it becomes necessary to replace its worn rails with new ones, it becomes equally necessary to make disposition of the old rails. The money resulting from the sale of worn rails returns to the treasury of the road. Such sale, therefore, is for the use of the railroad as much as the further employment of the particular rails as tracks. The transportation of the second hand rails was not in violation of the commodities clause. Valley & Siletz Railroad Co. v. S. P., 53 I. C. C. 397, 399.

(l) Determination of question of payment of divisions to short lines by trunk lines in violation of commodities clause does not come within Commission's administrative function, and is more appropriately a matter for the courts. St. Louis, Troy & Eastern R. R. Co., 57 I. C. C. 371, 374.

(m) Complainant alleged defendant violated the commodities clause of the act; that the defendant's rates on coal to Jersey city, N. J., from Buck Mountain, Vulcan, and New Boston collieries in the Lehigh region and East Boston colliery in Wyoming region were unreasonable; that defendant loaned to the coal company large sums of money without interest or security, and otherwise aided it financially, that the assistance thus rendered offset the unreasonable freight charges paid by the coal company to defendant and enabled it and its customers to underbid complainant; that the reduction of 15c per ton in the price of coal sold by the company to complainants competitors for delivery in New York was a departure from the tariff rates of defendant; that defendant also discriminated against complainant and in favor of competitors in switching service; that defendant collected from complainant improper and discriminating demurrage charges; that defendant further subjected complainant to unjust discrimination in the matter of credit for freight charges and circulated false reports concerning complainants financial standing. At time complaint was filed, rates on coal from Lehigh and Wyoming regions to Jersey were on prepared sizes, $1.60, pea $1.45, buckwheat $1.25 and rice and barley, $1.15. In 35 I. C. C. 220, the Commission decided the anthracite case and evidence therein is relied on by complainant in this case. In that case the Commission found $1.45 on prepared sizes and $1.35 on pea and smaller sizes as reasonable. The record does not warrant a finding on anything other than unreasonableness of the rates. HELD, rate charged unreasonable to extent exceeded $1.45 per long ton on prepared sizes, and $1.35 on smaller sizes, reparation awarded. Werthein Coal and Coke Co. v. L. V., 62 I. C. C. 211.

(n) Control of a carrier through stock ownership by an industrial corporation which is its principal shipper is not prohibited by the interstate commerce act. Adriatic Mining Co. v. C. & N. W. Ry., 78 I. C. C. 611, 619.

(o) While under the commodities clause of the Hepburn Act the right of a railroad company as a stockholder in a coal company to use its stock ownership for the purpose of a bona fide separate administration of the affairs of the coal corporation may not be denied, the use of such stock ownership for the purpose of destroying the entity of the producing corporation and of commingling its affairs in administration with the affairs of the railroad company, so as to make the two corporations virtually one, brings the railroad company within the prohibition of the commodities clause. U. S. v. L. V. R. R. Co., 220 U. S. 257, 274, 31 Sup. Ct. 387, 55 L. ed. 458.

(p) By the operation and effect of the commodities clause of the Hepburn Act, a duty is cast upon a railroad company proposing to carry in interstate commerce the products of a producing corporation in which it has a stock interest, not to abuse such power so as virtually to do by indirection that which the commodity clause prohibits, a duty which plainly would be violated by the unnecessary commingling of the affairs of the producing company with its own so as to cause them to be one and inseparable. U. S. v. L. V. R. R. Co., 220 U. S. 257, 274, 31 Sup. Ct. 387, 55 L. ed. 458.

(q) The commodities clause in the Hepburn Act prohibits a railroad company engaged in interstate commerce from transporting in such commerce articles or commodities: (a) when the article or commodity has been manufactured, mined or produced by a carrier or under its authority, and at the time of transportation the carrier has not in good faith before the act of transportation disassociated itself from such article or commodity; (b) when the carrier owns the article or commodity to be transported in whole or in part; (c) when the carrier at the time of transportation has an interest, direct or indirect, in a legal or equitable sense in the article or commodity, not including, therefore, articles or commodities manufactured, mined, produced or owned, etc., by a bona fide corporation in which the railroad company is a stockholder. U. S. v. D. & H. Co., 213 U. S. 366, 415, 29 Sup. Ct. 527, 53 L. ed. 836.

(r) Under the commodities clause of the Hepburn Act forbidding a railroad to transport articles or commodities "in which it may have any interest direct or indirect," the prohibition does not apply to commodities owned by separate corporations in which the carrier owns stock. (Harlan, J., dissenting.) U. S. v. D. & H. Co., 213 U. S. 366, 414, 29 Sup. Ct. 527, 53 L. ed. 836.

(s) Under the commodities clause of the Hepburn Act, making it unlawful for any railroad company to transport any article or commodity, other than timber and the manufactured products thereof, manufactured, mined or produced by it, or under its authority, or which it may own in whole or in part, or in which it may have an interest, direct or indirect, etc., the prohibition applies only to articles manufactured, mined or produced by the railroad which are at the time of transportation owned by it and does not apply to such articles when the same have become, prior to the time of transportation, the property of someone else. U. S. v. D. & H. Co., 213 U. S. 366, 412. 29 Sup. Ct. 527, 53 L. ed. 836.

(t) The commodities clause of the Hepburn Act is general in its scope, and applies not only to those particular instances in which the carrier may use its power to the prejudice of the shipper, but to all shipments which, however innocent in themselves, come within the scope and probability of the evil to be prevented. D. L. & W. Ry. Co. v. United States, 34 Sup Ct. 65, 67, 231 U. S. 363, 58 L. ed. —.

(u) Where hay is purchased by a railroad company for use in operating mines, in which 75 per cent of the coal produced is "assorted sizes" intended to be sold for domestic purposes and the remaining 25 per cent is steam coal used as fuel on the company's locomotives, the steam coal is in the nature of a by-product from a mine operated primarily for the purpose of obtaining coal for sale, and the hay cannot be said to be, within the purview of the exception to the commodities clause, necessary for the use of the company in the conduct of its business as a common carrier. D. L. & W. Ry. Co. v. United States, 34 Sup. Ct. 65, 67, 231 U. S. 363, 58 L. ed.—.

(v) The contention that an arrangement made by certain carriers with a terminal company violates the commodities clause of the Interstate Commerce Act will not be considered by the

Supreme Court on an appeal from the Commerce Court from an order by the latter enjoining the enforcement of an order of the Commission, where there is nothing in the record showing that such a contention was pressed upon the Commission, considered by that body, or that the order rendered was in any respect based upon the commodities clause. United States v. Baltimore & O. Ry. Co., 34 Sup. Ct. 75, 82, 231 U. S. 274, 58 L. ed. —.

(w) Control of a carrier through stock ownership by an industrial corporation which is its principal shipper is not prohibited by the interstate commerce act. Adriatic Mining Co. v. C. & N. W. Ry., 78 I. C. C. 611, 619.

I. CREATION AND PURPOSE.

§1. Nature in general.

CASES 1887-1908

(a) The power of interstate carriers to make commodity class rates and special class rates to meet the circumstances and conditions of traffic along their lines recognized and defined. N. Y. Board of Trade and Transportation v. Pa. R. Co., 3 I. C. R., 417.

(b) Salt requires and gets a commodity rate lower than class rates, and the roads should not only be limited as to such lower rating by the rule that a commodity shall not be carried at such unremunerative rates as will impose burdens upon other articles transported to recoup loss incurred in carrying that commodity. Anthony Salt Co. v. M. P. R. Co., 4 I. C. C. 33, 40.

IMPORTANT CASES SINCE 1908

(c) A rate that applies to one commodity only is hardly comparable with a rate under which two different commodities move. 1915 Western Rate Advance Case, 35 I. C. C., 497, 573.

(d) A commodity rate is fixed in a normal case when under the particular facts special treatment not afforded by the classification is required. Eastern Live Stock Case, 36 I. C. C. 675, 704.

(e) The publication of a multitude of commodity rates in order to avoid the maintenance of class rates which exceed the aggregates of the intermediate rates is not desirable. Through Rates to Points in Louisiana and Texas, 38 I. C. C., 153, 160.

(f) Commodity rates are made with regard for the actual volume of movement, and relative commodity rate adjustments can only be reviewed satisfactorily when the relative volume of movement of the various commodities involved is known. Commercial Club of Mitchell, S. Dak. v. A. & W. Ry., 46 I. C. C. 1, 14.

(g) The establishment of such rates is governed largely by volume of movement and usage in the territory affected. Railroad Comm. of La. v. A. H. T. Ry., 48 I. C. C. 312, 341.

(h) Commodities moving in large volume are accorded what are known as commodity rates, i. e., specific rates ap-

plicable only on a designated commodity and articles grouped therewith. R. R. Comm. of La. v. A. H. T. Ry., 48 I. C. C. 312, 369.

(i) Commodity rates are established to meet special conditions and because of special considerations which are not met by or reflected in classification or subclassifications. Those conditions may change. The consideration may gain or wane in compelling force. But so long as they are potent they find expression in exceptions to that uniformity and symmetry of rates which should characterize a classified system. Public Utilities Commission of the State of Colorado v. A. T. & S. F. Ry., 52 I. C. C. 439, 448.

(j) A commodity rate applicable to less than carload traffic is a pronounced departure from the usual practice and the Commission should require its establishment only upon a clear showing of compelling reasons. Public Utilities Commission of the State of Colorado v. A. T. & S. F. Ry., 52 I. C. C. 439, 477.

(k) While it is true that commodity rates are generally regarded as designed to take care of particular movements, the circumstances and conditions surrounding which require a departure from the normal adjustment as provided by the classifications and in the class rates, it is also true that as to many commodities the movement at commodity rates is to such an extent predominant that the class rates can no longer be regarded the normal adjustment. When that is the case it is desirable to ascertain whether or not a standardization of rate relationships such as the classifications were intended to afford can again be effected, upon a new basis different from that found inadequate in the existing classifications. In the Matter of Rates on and Classification of Lumber and Lumber Products, 52 I. C. C. 598, 604.

(l) Commodity rates are generally regarded as designed to take care of particular movements. In making commodity rates, the rate-maker must observe the law which requires that rates shall be reasonable in and of themselves, and also reasonable by relation. In the Matter of Rates on and Classification of Lumber and Lumber Products, 52 I. C. C. 598, 628.

(m) The reason for the establishment of commodity rates is that the considerations which governed the classification makers are not, under our present conditions of railroad transportation, controlling, either because the articles on which they apply can not bear the proportion of the transportation costs that the class to which they are assigned would place upon them or else because it has been found expedient to give lower rates in order that competition of carriers, by rail or water, or of markets may be met. In the Matter of Rates on and Classification of Lumber and Lumber Products, 52 I. C. C. 598, 641.

(n) Commodity rates lower than class rates are ordinarily established when special treatment not afforded by the classification is required, and their establishment is governed largely by the volume of movement. Samuel v. Director General, as Agent, 59 I. C. C. 190, 191.

(o) In the establishment of rates on a single commodity the fact that the carriers are operating at a loss or on a narrow margin of profit should not be given too much weight, unless it clearly appears that the particular commodity constitutes the bulk of the traffic transported. Holmes & Hallowell v. G. N., 60 I. C. C. 687, 702.

(p) The establishment of commodity rates is governed largely by volume of movement and usage in the territory affected. Nevada Public Service Commission v. S. P. Co., 73 I. C. C. 240, 248.

(q) Volume of tonnage can not be made the sole criterion for the establishment of commodity rates but it is an important factor. California Packing Corporation v. Director General, 78 I. C. C. 190, 200.

(r) While the substitution of commodity rates based on mileage for a group adjustment must necessarily result in many instances in different rates to points formerly grouped together and accorded the same rates, there is no sound reason why, as a general rule, commodity rates constructed on a distance basis should not be graded according to distance in substantially the same manner as class rates. Memphis-Southwestern Investigation, 77 I. C. C. 497.

(s) While it is true that the use of the class-rate structure as a basis for commodity rates would remove some of the flexibility which is generally understood to be a peculiar part of every commodity rate, as much may be said of any distance scale of commodity rates whether constructed with or without regard to corresponding class rates. Memphis-Southwestern Investigation, 77 I. C. C. 497.

(t) Steel articles, being keenly competitive and moving in large volume, should move on commodity rates and not class rates. Iron and Steel to Virginia Cities, 83 I. C. C. 82, 86.

(u) Commodity rates should be established as need for them arises. Sonora v. D., L. & W. R. R. Co., 83 I. C. C. 399, 401.

Co., 68 I. C. C. 213, 252.

§2. Relation to class rates.

See Class Rates.

IMPORTANT CASES SINCE 1908

(a) Class rates on heavy commodities are made to move the more or less limited shipments from place to place, and commodity rates to move large, steady shipments. James & Abbot Co. v. B. & M. R. R., 17 I. C. C. 273, 275.

(b) Where a commodity rate is made for a manufactured product capable of classification, a certain equilibrium between competing points of manufacture should be preserved, if possible, and only some peculiar circumstance or condition can warrant the maintenance of a commodity rate from a few points of manufacture in a limited locality, while the class rate basis as to the same commodity is maintained from all other points of manufacture. Westbound Lake and Rail Knit Goods Commodity Rates, 32 I. C. C. 54, 57.

(c) While the Commission has recognized the fact that a commodity rate usually is lower than the rate applicable to the class from which the commodity is withdrawn, it has been held that it is not obligatory upon carriers to establish such lower rates. In the absence of proof that the commodity rate is unreasonable, a finding of unreasonableness cannot be predicated upon the mere fact that the commodity rate is higher than the corresponding class rate. Chamber of Commerce, Houston, Texas, v. I. & G. N. Ry. Co., 32 I. C. C. 247, 255.

(d) So many elements enter into the determination of a commodity rate that it can not be said that a commodity rate must always bear a fixed relation to the class rate, even as between competing points. Peet Bros. v. I. C. R. R., 34 I. C. C. 634, 637.

(e) There can be no question about the propriety of commodity rates where conditions justify such departures from the regular class rates. Rates and Rules on Shipments of Packing House Products, 36 I. C. C. 62, 69.

(ea) The ratios of the commodity rates involved to the class rates that would apply in the absence of commodity rates are not absolute measures of proper relationships between commodity rates, but may be of significance in a certain case Oklahoma Traffic Assn. v. A. & S. Ry. Co., 36 I. C. C. 329, 338.

(f) The Commission can not ignore the fact that rates for the transportation service are divided into class rates and commodity rates and that some articles, which move in large volume and in car-

load quantities, are usually accorded commodity rates, while articles of general merchandise, moving in less-than-carload quantities, usually take class rates. Harness to Oklahoma, 37 I. C. C. 726, 728.

(g) Commodity rates higher than the class rates that would otherwise apply are unusual, but are not necessarily unreasonable on that account, unless the class rates are fixed at the highest reasonable level. Sulphuric Acid from New Orleans, La., 42 I. C. C. 200, 202.

(h) A contention that a commodity rate should bear a fixed, different, or any relation whatever to the corresponding class rate overlooks the fact that the article on which the commodity rate applies has been removed from the classification and from its association with or relation to other articles, so far as the movement between certain points is concerned. Western Trunk Line Rate Increases, 43 I. C. C. 481, 489.

(i) A showing that the commodity rate on a particular article is a less proportion of the corresponding class rate than on certain other articles is no more justification for an increase in the commodity rate on that particular article than a showing that the commodity rate on another article is a greater proportion of the corresponding class rate is a justification for reducing the commodity rate on that article. Western Trunk Line Rate Increases, 43 I. C. C. 481, 489.

(j) A reduction of a class rate below the level of a rate upon a particular commodity would not put in issue the reasonableness of that commodity rate if not attacked in the complaint. Wisconsin Rate Cases, 44 I. C. C. 602, 627.

(k) Where the circumstances and conditions of transportation to two destinations are not substantially the same, it does not necessarily follow that because the class rates from certain points of origin are the same the rates on a certain commodity should also be the same. Natchez Cham. of Com. v. Y. & M. V. R. R., 46 I. C. C. 60, 62.

(l) In instances where carriers are authorized to publish and charge lower class rates to more distant than to intermediate points, the publication of rates on commodities to intermediate points to which such commodities do not ordinarily move will not be required if the item containing the commodity rate to the more distant point makes proper reference to described note. Second Duluth Case, 46 I. C. C. 585, 594.

(m) A contention that class rates are the "normal" rates for practically all freight, and that ordinarily a commodity rate lower than the class rate which would otherwise apply is "unreasonably low" or "subnormal," is unsound. The Southeastern Sugar Cases, 48 I. C. C. 739, 742.

(n) While commodity rates are generally lower than the corresponding class rates the fact that the commodity rates in certain instances are higher than the class rates is not conclusive of their unreasonableness. Heldmaier v. C. I. & L. Ry., 49 I. C. C. 81, 82.
